The main imports are manufactured goods, classified chiefly as materials, machinery and transport equipment, mineral fuels, lubricants and related materials.

Communications.—The postal service handled 76,675,000 postal packets in 1957. The telegraph and telephone system has nearly 20,000 miles of line. The number of telephones exceeds 53,000. A cable connects Mombasa with Zanzibar, and a wireless station in Nairobi works direct with the United Kingdom, providing both telegraph and telephone facilities. There is a coast wireless station at Mombasa with a radio-telephone service for the marine mobile service. Telephone and/or telegraph communication by both line and radio exists in the majority of the settled areas of the Colony and to Uganda, Tanganyika, Belgian Congo, Nyasaland and South Africa.

The East African Railways and Harbours are State-owned; the railway, which is metre gauge, has a total route mileage of open line of 3,375 miles, made up as follows: Kenya and Uganda Section—Main Line: Mombasa-Kampala-Kasese (1,081 miles); Principal Lines: Nakuru Junction-Kisumu (131), Tororo-Soroti (100), Voi-Kahe Junction (14); Minor and Branch Lines: Rongai-Lake Solai (27), Kisumu-Butere (43), Leseru-Kitale (41), Mbulamuti-Namasagali (19), Kampala-Port Bell (6), Gilgil-Thomson's Falls (48), Nairobi-Nanyuki (145), The Konza-Lake Magadi Line (91 miles) is worked but not owned by the Railway Administration. Tanganyika Section—Main Line: Dares-Salaam–Kigoma (780 miles); Principal Line; Tabora–Mwanza (236): Branch Line: Kaliuwa–Mpanda (131). The Tanga Line runs from Tanga to Arusha (272 miles). Southern Province Railway: Mtwara-Nachingwea (132 miles). In addition the Administration operates a marine service on Lakes Victoria, Kioga, Albert and Tanganyika, and also on the River Nile, with a route mileage of 6,300 miles. There are also 2,188 miles of road services in Tanganyika connecting the Central and Tanga Lines and providing regular transport to the Southern and Usambara Highlands. There are a further 485 miles of subsidiary road services in Kenya and Uganda.

Scheduled trunk airline services during 1957 were operated to or through Kenya, from Embasaki airport near Nairobi, by B.O.A.C., Air India, South African Airways, Air France, Central African Airways, Scandinavian Air Services, Airwork and Hunting Clan, while regional scheduled services were also run by East African Airways, Sabena, Ethiopian Air Lines, Aden Airways and Alitalia.

Road affairs are under the control of the Road Authority. Capital funds are allocated to the Authority by the Colony's Development Committee.

There are in the Colony 3,730 miles of trunk roads, 4,753 miles of secondary roads and 6,695 miles of grant earning minor roads, and in the Northern Frontier Province and African Areas there are in addition approximately 8,900 miles of administrative tracks. Fewer than 500 miles of road throughout the Colony are as yet bitumen surfaced and funds for the extension of this mileage are urgently required, as the gravel (murram) roads are proving increasingly difficult to maintain in the light of the growing traffic density. At the end of 1957 more than 75,000 vehicles were licensed, an increase of approximately 8 per cent. over the previous year.

FINANCE

	1957–58	1958–59
Revenue	£30,571,500	£31,315,500
Expenditure	34,691,088	33,076,736

The funded public debt at June 30, 1958, was £41,055,600.

TRADE

	1956	1957
Imports	£84,615,395	£87,995,252
Exports	28,983,451	26,361,341

TRADE WITH U.K.

	1956	1957
Imports from U.K.	£35,610,870	31,523,315
Exports to U.K.	7,110,890	13,181,478

Since 1949 the Customs Departments of Kenya, Uganda and Tanganyika have been amalgamated under the title of the East African Customs and Excise Department as an East Africa High Commission Service.

GOVERNMENT

The Colony and Protectorate is administered by the Governor and Commander-in-Chief, who is advised by a Council of Ministers, There is provision for 16 Ministers, of whom not more than 8 and not less than 6 shall be public officers. Of the 8 unofficial Ministers 4 shall be Europeans, 2 Asian and 2 Africans. There is also provision for not more than 6 Assistant Ministers who may be appointed by the Governor to assist the Ministers.

The Legislative Council consists of a Speaker, appointed by the Governor; *ex officio* members, who are for the time being Ministers or temporary Ministers, but not otherwise members of the Legislative Council; 36 constituency elected members of whom 14 are European; 14 are African; 6 are Asians, of whom 2 are Muslims; and 2 are Arabs; specially elected members, at present 12, elected by the legislative members sitting as an electoral college, of whom 4 are European, 4 are African, 2 are non-Muslim Asian, 1 is a Muslim Asian and 1 is an Arab; and nominated members, at present 20, nominated by the Governor. In addition a Council of State has been established and may consist of a chairman with not more than 16 and not less than 10 members. At present a chairman and 10 members have been appointed.

Governor and Commander-in-Chief, His Excellency the Hon. Sir Evelyn Baring, G.C.M.G., K.C.V.O., *appld.* 1952, *term extended till* March, 1959 (*and allowances*) £10,500

COUNCIL OF MINISTERS

Appointed Members, M. Blundell, M.B.E.; W. B. Havelock; I. E. Nathoo; N. F. Harris; C. B. Madan, Q.C.; W. E. Crosskill; M. S. Amalemba.

Official Members: The Chief Secretary, the Minister for Defence, the Minister for Education, the Minister for Legal Affairs, the Minister for African Affairs, the Minister for Commerce and Industry, the Minister for Security, the Minister for Finance and Development, the Minister for Forests, Game and Fisheries and the Minister for Tourism and Common Services.

Speaker, Legislative Council, Hon. Sir Ferdinand Cavendish-Bentinck, K.B.E., C.M.G., M.C.	£2,000
Chief Justice, Sir Ronald Sinclair	3,600
Chief Secretary, Hon. W. F. Coutts, C.M.G., M.B.E.	3,500
Minister for Finance and Development, Hon. E. A. Vasey, C.M.G.	3,200

Nairobi, the Capital City and seat of Government is situated at latitude 12° S. and longitude 36°8′ E. at 5,500 feet above sea level. It is 314 miles by road from Mombasa, the Colony's port and is also the site of Africa's most modern airport, opened in 1958. Mombasa possesses what is perhaps the finest harbour on the East Coast of Africa and is well served by shipping lines from Europe and Asia besides a frequent coastal service. Other centres are Eldoret, Kisumu, Lamu, Nakuru and Nyeri.

Nairobi; transit from London about 16 days by sea; by air, 1 day.

LEEWARD ISLANDS

(*See* WEST INDIES)

THE FEDERATION OF MALAYA

AREA, CLIMATE AND POPULATION

The Federation of Malaya is situated at the southern end of the Kra Peninsula between latitudes 1° and 7° North and longitudes 100° and 105° East. The country is bounded by Thailand on the north, the Johore Straits and the island of Singapore on the South, the China Sea on the East and the Straits of Malacca on the West. The total area is just over 50,000 square miles, of which about 70 per cent. is still under forest and undeveloped. The climate is tropical, characterized by high humidity. Average temperatures at the lower altitudes vary between approximately 70° and 90°. The annual rainfall is about 90 inches, distributed fairly evenly throughout the year.

Population.—The Federation has a population of 6,278,763 (1957 census, preliminary figures). Estimated distribution by races: Malaysians 3,126,706; Chinese 2,332,936; Indians and Pakistanis 695,985; Others 123,136.

State	Area (*sq. miles*)	Population
Johore	7,330	927,565
Kedah	3,660	701,643
Kelantan	5,750	505,585
Malacca	640	291,246
Negri Sembilan	2,580	364,331
Pahang	13,820	312,949
Penang	390	572,132
Perak	7,980	1,221,390
Perlis	320	90,866
Selangor	3,160	1,012,891
Trengganu	5,050	278,165

GOVERNMENT

The Federation of Malaya became an independent country within the Commonwealth on August 31, 1957, as a result of an agreement between H.M. the Queen and the Rulers of the Malay States, whereby Her Majesty relinquished all powers and jurisdiction over the Malay States and over the Settlements of Penang and Malacca which then became States of the Federation.

The Constitution, which came into force on Independence Day, is designed to ensure the existence of a strong Federal Government and also a measure of autonomy for the eleven State Governments. It provides for a constitutional Supreme Head of the Federation (His Majesty the *Yang di-Pertuan Agong*) to be elected for a term of 5 years by the Malay Rulers from among their number, and for a Deputy Supreme Head (His Highness the *Timbalan Yang di-Pertuan Agong*) to be similarly elected. Save in certain instances provided in the Constitution, the Supreme Head acts in accordance with the advice of a Cabinet appointed by him from among the members of Parliament on the advice of the Prime Minister. The Supreme Head appoints as Prime Minister the person who in his judgment is likely to command the confidence of the majority of the members of the House of Representatives.

The Federal Parliament will after the Federal Elections in 1959 consist of two houses, the Senate and the House of Representatives. The Senate (*Dewan Negara*) will consist of 38 members, under a President (*Yang di-Pertua Dewan Negara*), 22 elected by the Legislative Assemblies of the States (2 from each) and 16 appointed by the *Yang di-Pertuan Agong* from persons who have achieved distinction in major fields of activity or are representative of racial minorities, including the Aborigines. The House of Representatives (*Dewan Ra'ayat*) will consist of 104 members elected on the principle of universal adult suffrage with a common electoral roll, under a speaker (*Yang di-Pertua Dewan Ra'ayat*). Pending the elections in 1959, the powers of Parliament are exercised by the single-chamber Legislative Council with 99 members (52 of them elected) which came into existence

at the last elections in July, 1955.

Speaker of the Legislative Council, Dato Haji Abdul Malek Bin Yusof.

There is a Conference of Rulers consisting of the Rulers of eight States and the Governors of Malacca and Penang, presided over by the Supreme Head of the Federation. The conference is empowered to elect the Supreme Head and Deputy Supreme Head and has certain other powers, notably in matters of religion; it has authority to deliberate on any subject.

The Constitution provides that each State shall have a simplified version of the Federal Constitution, with the Ruler or Governor acting on the advice of an Executive Council appointed on the advice of the *Mentri Besar* or Chief Minister and a single-chamber Legislative Assembly. The Legislative Assemblies are to be fully elected on the same basis as the Federal Parliament, but the Constitution allows for a minority of appointed members for a transitional period. The present State Constitutions provide generally for the Chief Minister and Executive Council to be appointed by the Ruler in his discretion, but the new provisions will be incorporated before the next State Elections to be held before the Federal Elections in 1959.

Legislative powers are divided into a Federal List, a State List and a Concurrent List, with residual powers vested in the State Legislatures. The Federal List comprises broadly, external affairs, defence, civil and criminal law and justice, the machinery of government, finance, commerce and industry, communications and transport, power, education, medicine and labour and social security. The State List includes land, agriculture and forestry, local government and services and the machinery of state government. In the Concurrent List are, *inter alia*, social welfare, wild-life, animal husbandry, town and country planning, public health and drainage and irrigation.

There is provision for formal consultations between the Federal Government and the States in a National Finance Council and a National Land Council.

Islam is the religion of the Federation, each Ruler being the head of the religion in his State; the Supreme Head of the Federation is the head of the religion in Malacca and Penang. The Federation is, however, a secular State.

Malay is the national language, with English permitted for official use for a minimum of 10 years after Independence Day.

Supreme Head of the Federation, His Majesty Tuanku Abdul Rahman ibni Almarhum Tuanku Muhammad (*Yang di-Pertuan Besar of Negri Sembilan*).

Deputy Supreme Head, His Highness Sultan Hisamuddin Alam Shah ibni Almarhum Sultan Alaidin Sulaiman Shah (*Sultan of Selangor*).

State Rulers

Johore, His Highness Sultan Ibrahim ibni Almarhum Sultan Abu Bakar.

Pahang, His Highness Sultan Abu Bakar Ri'ayatuddin Al-Muadzam Shah ibni Al-marhum Almu'tasim Bi'llah Sultan Abdullah.

Selangor, His Highness Sultan Hisamuddin Alam Shah ibni Almarhum Sultan Alaidin Sulaiman Shah.

Kedah, His Highness Tunku Halim.

Perlis (*Raja*), His Highness Syed Putra ibni Almarhum Syed Hassan Jamalullail.

Kelantan, His Highness Tengku Ibrahim ibni Almarhum Sultan Mohamed IV.

Trengganu, His Highness Sultan Ismail Nasiruddin Shah ibni Almarhum Sultan Zainal Abidin.

Perak, His Highness Puduka Sri Sultan Yussuf Izzuddin Shah ibni Almarhum Sultan Abdul Jalil Radziallah Hu-'an-hu.

Negri Sembilan (*Regent*), His Highness Tunku Munawir ibni Tuanku Abdul Rahman.

Governors

Malacca, Leong Yew Koh.

Penang, Raja Uda bin Raja Muhammad.

THE FEDERAL CABINET

Prime Minister, Y. T. M. Tunku Abdul Rahman Putra.

Deputy Prime Minister, Dato' Abdul Razak bin Dato Hussein.

Minister of Finance, Henry Hau-Shik Lee.

Health, V. T. Sambanthan.

Interior and Justice, Suleiman bin Dato' Abdul Rahman.

Agriculture, Abdul Aziz bin Ishak.

Works, Posts and Telecommunications, Sardon bin Haji Jubir.

Labour and Social Welfare, Ong Yoke Lin.

Commerce and Industry, Tan Siew Sin.

Education, Mohamed Khir bin Johari.

Natural Resources, Bahaman bin Samsudin.

Transport, Abdul Rahman bin Haji Talib.

Minister without Portfolio, Dr. Ismail bin Dato Abdul Rahman.

FEDERAL REPRESENTATIVES OVERSEAS

UNITED KINGDOM

Malaya House, 57 Trafalgar Square, W.C.2.

High Commissioner, Y. T. M. Tunku Ya'acob ibni Almarhum Sultan Abdul Hamid Halim Shah.

CANADA (*High Commissioner*), A. R. Menzies.

CEYLON (*High Commissioner*), D. C. R. Gunawardene.

INDIA (*High Commissioner*), S. K. Banerji.

PAKISTAN (*High Commissioner*), Maj.-Gen. Al-Haj Nawabzada Sher Ali Khan.

THE JUDICATURE

The Judicial System includes a Supreme Court, composed of a High Court and a Court of Appeal, Sessions Courts, Magistrates' Courts and Local Courts, called Penghulus' Courts. The Supreme Court consists of a Chief Justice and up to 15 Puisne Judges.

Chief Justice, J. B. Thompson.

LOCAL GOVERNMENT

There are five main types of local government authorities operating under the State Governments: the fully elected City Council of George Town (Penang); second, the two financially autonomous

municipalities of Kuala Lumpur and Malacca with elected Councils empowered to raise revenue from rates, fees and licences and responsible for public health, roads, fire fighting, etc.; 27 of the larger towns in the Federation have elected Town Councils. Twelve of these are already financially autonomous. Most of the smaller towns still have nominated Town Boards but these are being gradually replaced by elected Councils. The functions of Town Councils and Town Boards are similar to those of the Municipalities, though on a smaller scale. Elected Local Councils with financial powers are being developed rapidly in the rural areas. Over 286 are already functioning, including over 200 in the New Villages created by resettlement of the rural population from areas menaced by the Communist terrorists.

Defence

The Armed Forces of the Federation consist of the Army, Navy and Air Force, together with volunteer and auxiliary forces for each arm. The responsibility for command, discipline and administration, under the general authority of the Supreme Head of the Federation, rests with the Armed Forces Council under the Chairmanship of the Minister of Defence. The Council is not responsible for the operational use of the Forces. The General Officer Commanding, Federation Army, is also Chief of Staff, Federation Armed Forces.

An agreement exists between the Government of the United Kingdom and the Government of the Federation of Malaya on external defence and mutual assistance under which the United Kingdom has the right to maintain in the Federation such military forces, including a Commonwealth Strategic Reserve, as are agreed to be necessary for the fulfilment of Commonwealth and international obligations. The United Kingdom Government, on the other hand, has agreed to provide personnel, facilities, advice and assistance in the development of the Federal Armed Forces in addition to the financial assistance already being granted towards the capital cost of their expansion.

Finance

	1956
Revenue	$802,312,216
Expenditure	748,672,655

Trade and Industry

The Federation of Malaya is primarily a producer of raw materials, the chief of which are rubber and tin (of which it is the world's biggest individual supplier), iron ore, palm oil and kernels, coconut oil and copra and other agricultural products. These constitute nearly four-fifths of the total export trade, the other one-fifth being *entrepôt* trade consisting of re-export of raw materials and produce of neighbouring countries and manufactured and industrial goods of foreign countries. Imports consist mainly of foodstuffs, beverages and tobacco, mineral fuels and lubricants, chemicals, textiles, manufactured and capital goods and raw products of neighbouring countries. The chief suppliers are the United Kingdom, Australia, the United States of America, Netherlands, W. Germany, Hong Kong, India, Japan, China, Thailand and Indonesia. Domestic rice production totalled 488,000 tons in the 1956–57 season. The balance was imported mainly from Thailand and Burma. From January 1955, when the remaining price control of rice was lifted, the import trade in all commodities was returned to commercial hands and for the first time since the end of the war, no price control at consumer level was enforced. Domestic industry includes manufacture of rubber goods, tobacco, cigarettes, pottery, cement, matches, pewter-ware, furniture, timber, bricks, ties, soap, biscuits and aerated waters.

Trade	1957
Imports	$1,809,900,000
Exports	2,182,200,000
Imports from U.K.	£38,117,127
Exports to U.K.	43,990,244

Federal Capital.—Kuala Lumpur, capital of Selangor (population 300,000).

SINGAPORE, SARAWAK AND BRITISH BORNEO

The British and British-protected territories in South East Asia consist of the following units:

(1) The Colony of Singapore, formerly one of the Straits Settlements.

(2) The Colony of Sarawak in North-West Borneo.

(3) The Colony of North Borneo (including Labuan, formerly part of the Straits Settlements).

(4) The British Protected State of Brunei.

THE COLONY OF SINGAPORE

The Crown Colony of Singapore consists of the island of Singapore and Christmas Island, with a total area of 217 sq. miles.

Singapore is an island situated off the southern extremity of the Malay Peninsula, to which it is joined by a causeway, carrying a road and a railway, across the Straits of Johore, which are about three-quarters of a mile in width; its length is 26 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 224 square miles, and an estimated population in 1956 of 1,290,493, of whom 987,201 were Chinese, 101,093 Indians and Pakistanis, 157,121 Malaysians, 19,587 Europeans, 12,185 Eurasians and 13,306 others. Singapore was in the 13th century a Malay city of importance till it was destroyed by the Javanese about 1365. The present settlement was founded on January 30, 1819, by Sir Stamford Raffles, then Lieut.-Governor of Bencoolen, Sumatra. The original lease by the Sultan of Johore and the Dato Temenggon, the Chief of Singapore in 1819, was followed in 1824 by the cession of the island in perpetuity by the Dutch in the Treaty of Holland. The island was surrendered to the Japanese on Feb. 15, 1942; it was restored to British rule Sept. 5, 1945, and returned to civil government on April 1, 1946, at the end of the period of the British Military Administration.

Christmas Island, in the Indian Ocean, about 190 miles S. of Java Head and 529 miles E. of the Cocos-Keeling Islands, has an area of 64 square miles and a population (1955) of 2,201. It has been administered as a separate colony since Jan. 1, 1958. The island, which is densely wooded, contains extensive deposits of phosphate of lime worked by the Christmas Island Phosphate Company. Exports, 1955, 390,226 tons.

Finance

	1955	1956
Revenue	$208,833,167	$215,902,120
Expenditure	197,911,662	231,181,975

The currency is linked to sterling and the rate of exchange is $1 = 2*s.* 4*d.*

Trade

Singapore is primarily a commercial and strategic centre. It handles 71 per cent. of the external trade of Malaya and is the chief *entrepôt* centre for south-east Asia and Indonesia. Its total trade in 1955 reached the value of $5,647,235,041. 41 major shipping-lines and 9 international air-lines

serve Singapore. The new International Airport, with a runway of 8,000 feet, is now in operation. Tin smelting, the manufacture of rubber goods, saw-mills, brick works, oil wells, and the canning of locally-grown pineapples are the more important of these; products of secondary importance are beer, biscuits, soap, furniture, asbestos packing, aluminium manufactures, paints, rattan works, etc.; but the prosperity of the colony mainly depends on the production and volume of trade of the surrounding territories.

TRADE WITH U.K.

	1956	1957
Imports from U.K....	£41,505,124	£39,525,464
Exports to U.K.....	34,354,836	26,379,450

GOVERNMENT

The Crown Colony of Singapore is a separate unit of Government. In 1955 a new constitution giving a large measure of internal self-government came into force. It provides for a Legislative Assembly of 32 members, presided over by a Speaker. There are 25 members elected from 25 one-member constituencies. The electorate of 347,000 consists of resident citizens of the U.K. and the Colonies (and those born in the Federation of Malaya) over 21 years of age. The remaining 7 members are the 3 *ex officio* members (the Chief Secretary, the Attorney-General and the Financial Secretary) and 4 members nominated by the Governor. The Government consists of a Council of Ministers collectively responsible to the Assembly and individually responsible for the administration of a department or group of departments. It consists of 7 unofficial members, including the Chief Minister, of whom 6 must be elected members of the Assembly, and the three *ex officio* members of the Assembly. The Governor, who presides over the Council, is responsible for defence, foreign affairs and internal security, and has certain emergency reserve powers. The first elections were held on April 2, 1955. The municipal area is administered by a two-thirds elected City Council of 27 members.

Governor and Commander-in-Chief of the Colony of Singapore, His Excellency Sir William Allmond Codrington Goode, K.C.M.G. (1957) (+*duty allce.* £1,500 *and entertainment allce.* £1,000)	£5,000

BRITISH BORNEO

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4′ N. to 4° 10′ S. and from long. 108° 50′ to 119° 20′ E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 2,750,000. It is thought that the island was discovered by the Portuguese in 1521. About 202,000 sq. miles are included within Indonesia. Of the remainder of the island (the North Coast) approximately 50,000 sq. miles form the Colony of Sarawak and 30,000 sq. miles the Colony of North Borneo (including Labuan), all British.

NORTH BORNEO

The former State of North Borneo was governed by the British North Borneo (Chartered) Company, the last Chartered Company to administer an area of the British Empire, from 1882 to 1942, and became part of the new Crown Colony of North Borneo on July 15, 1946.

The Colony of North Borneo occupies the northern part of the island of Borneo, and has an area of 29,388 square miles with a coast-line of approximately 900 miles. The interior is mountainous. Mt. Kinabalu, sacred to the Dusuns, is the highest mountain in the East Indies, rising to 13,455 feet. Most of the Colony is densely timbered. On the west coast there is a narrow coastal plain which supports the main agricultural and rubber production of the Colony.

The census of the population was completed in June, 1951. The Census Report shows that since 1931, the year in which the last census was held, the total population of the Colony has increased by 20·4 per cent. from 277,476 to 334,141 and the native population by 18·4 per cent. from 205,218 to 243,009. The Chinese population has increased by 48·6 per cent. from 50,056 to 74,374. The number of Europeans, including Eurasians, has increased from 647 to 1,213. The native population comprises Dusuns (mainly agricultural), Bajaus and Bruneis (fishing and agricultural), Muruts and Suluks and several smaller tribes. Labuan has a population of 8,784 (mainly Malays and Chinese).

The main towns of the Colony are situated on the coast. These are Jesselton (the capital) (11,704),

Kudat (1,895), Sandakan (14,499) and Tawau (4,282) on the mainland and Victoria (2,526) on the island of Labuan.

Climate.—North Borneo is favoured by a relatively cool climate for a place situated so near the Equator. The average mean temperature varies between a maximum of 88° and a minimum of 66° F. The annual rainfall varies from 60 to 180 inches according to locality.

Communications.—The only railway is a metre gauge line running from Jesselton on the coast through Beaufort (57 miles) to Melalap in the interior, a distance of 96 miles, with a branch line from Beaufort to Weston (20 miles). There are 225 miles of metalled road with sealed surface, 118 miles of other metalled roads and 359 miles of earth roads. There is an airstrip suitable for Sky-master aircraft at Labuan, and Dakota strips at Jesselton and Sandakan. The construction of additional landing grounds for the operation of an internal air service has been completed, and the service is now in operation. There is a daily service to and from Singapore, a weekly service from Labuan *viâ* Manila to and from Hong Kong, and a fortnightly service between Labuan and Australia.

Production.—The main industries of the Colony are the cultivation of rubber (estimated at 135,150 acres), rice (75,000 acres), coconuts and coconut products (47,860 acres), tobacco (1,600 acres) and hemp (3,695 acres). Fishing gives employment to a large number of local natives and Chinese. About four-fifths of the territory is still heavily timbered with many valuable species of hardwoods and soft hardwoods, of which the more important are seraya (Borneo cedar) and camphor.

Trade.—The main imports in 1957 were machinery, provisions, metals and rice. Rubber is the greatest export (valued in 1957 at $37,042,500); other exports are timber, copra, tobacco, cutch and hemp.

Headquarters of the Government, Jesselton (population 11,704).

Brunei

Sultan, H. H. Sir Omar Ali Saifuddin Wasa'dul Khairi Waddin, K.C.M.G., *acceded* 1950.
British Resident, D. C. White, O.B.E.

Brunei is a British Protected State on the north-west coast of the island of Borneo, total area about 2,226 sq. miles, population (1947 census figure) 40,657, of whom 31,161 were of Malay or Bornean race. The chief town, Brunei, has a population of about 15,000. The supreme authority in the State is vested in the Sultan-in-Council. By virtue of a Royal Commission published on May 1, 1948, the Officer for the time being administering the Government of the Colony of Sarawak is High Commissioner for Brunei. The general functions of Administration are carried out by a British Resident whose advice, in accordance with the Treaty of 1906, must be asked and acted upon in all questions other than those affecting the Moslem religion. The climate is of the humid tropical type.

Sarawak

Sarawak is a British Colony on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population estimated in 1956 at 631,431, composed of various races, of whom the Sea Dyaks (Ibans), Malays, Chinese, Land Dyaks, Melanaus, Kayans and Kenyahs are the most numerous. The government of Sarawak was granted in 1841 by the Sultan of Brunei to Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions were made in 1861, 1882, 1885, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent State, and under

an agreement of 1888 the State was placed under British protection. In 1941 the centenary of Brooke rule was celebrated throughout the State.

Sarawak was ceded to Great Britain by the Rajah on July 1, 1946.

The territory of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of North Borneo. The southern boundary is, except for a few short stretches, formed by outstanding ridges of hills; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles).

The country produces rubber, oil, sago, rice, illipe nuts, birds' nests, gold, pepper, rattans and jungle produce. There are also known coal and cinnabar deposits.

FINANCE	(Estimated) 1957
Revenue	$50,588,400
Expenditure	51,351,838

GOVERNMENT

By the Sarawak (Constitution) Order in Council, 1956, a new constitution was granted to Sarawak, which came into force on April 1, 1957. Under this the Council Negri, in which legislative powers and the control of finance are vested, has a majority of elected unofficial members. There are 24 elected members, 14 *ex officio* members, 4 nominated members and 2 standing members who were elected for life prior to cession. The new Supreme Council (i.e. Executive Council) has 3 *ex officio* and two nominated members and 5 members elected by the elected members of the Council Negri by secret ballot from among the elected, nominated or standing members of the Council Negri. The elected members of Council Negri are elected by divisional advisory councils (except for the Kuching Municipal and Sibu and Miri Urban District Councils which each elect one representative directly). The divisional advisory councils are elected by district and other local councils.

Chief Town, Ψ Kuching; estimated population 56,000. Distance from London 8,700 miles; distance from Singapore 400 miles.

THE MALDIVE ISLANDS

The Maldive Islands 420 miles south-west of Ceylon, are a number of islands naturally divided into groups. There are 17 such groups, forming 17 atolls. The total number of islands is over 7,000, some being very small indeed. They are richly covered with coconut palms, and yield millet, fruit and edible nuts. About 215 islands are inhabited. The old form of Government was abolished in 1932, and a new Constitution was introduced. In February, 1954, after a short period of republican government, the Sultanate was restored. The international relations of the Maldives, which is a Protected State, are conducted by the United Kingdom Government, which continues to protect the Islands.

Population is from 85,000 to 90,000. The people are Moslems. They are highly civilized and are great navigators and traders.

The Capital of the Maldives is Malé, on King's Island.

MALTA, GC,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 94·9 square miles. The colony includes also the adjoining island of *Gozo* (area 25·9 sq. miles): *Comino* and several islets. The estimated population in February, 1957 was 317,182.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in A.D. 58. In 870 it was taken by the Arabs, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Normandy. It passed successively under the rule of the Angevins and Aragonese, and followed the fortunes of their kingdoms. In 1530 it was handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grandmaster La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and, with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then, at their own wish, admitted into the British Empire, the act being confirmed by the Treaty of Paris in 1814.

Malta was again closely besieged in the last war and again withstood the attacks of all its enemies. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged.

The Parliament of the United Kingdom made a free grant of £10,000,000 for restoring war damage, and for rebuilding after the war. A further grant of £20,000,000 has been made.

The climate, although not tropical, is hot in summer. The islands are intensively cultivated. The chief export crops are potatoes and onions. Wheat, barley, clover and tomatoes are extensively grown on dry lands, while on irrigated land all the usual temperate climate and sub-tropical vegetables are grown. Tomatoes are grown on irrigated and non-irrigated land. Agriculture and fishing are among the principal occupations of the inhabitants.

Mdina (Notabile), the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Old Seminary; its population has now dwindled to 1,122, but its suburb, Rabat, has 13,388 inhabitants. Notabile has been entirely eclipsed in importance by the modern capital, Ψ Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet and N.A.T.O. Mediterranean Command.

Malta possesses a University (about 300 students) and a Lyceum (1,300 students); 109 Government primary schools, 8 secondary schools (two of them preparatory) and 3 technical schools. There are numerous private elementary and secondary schools. English and Maltese are the only languages taught in the primary schools. In religion the Maltese are Roman Catholics. The Maltese language is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognized by the Crown, consisting of 28 families.

English and Maltese are the official languages of administration and Maltese is the official language in all the Courts of Law and the language of general use in the islands. Provision has been made for the use of the English language in any Court proceedings where any party or any accused person does not speak Maltese as the principal language to which he is accustomed. Where the proceedings are in a language not known to the party or parties or to the accused they are translated. In 1934, Maltese was substituted for Italian as the principal language of the Courts of Law.

FINANCE

	1955–56	*1957–58
Public revenue.....	£7,096,665	£8,272,605
Ordinary expenditure.	7,683,793	9,232,056
Capital expenditure...	2,000,005	4,341,062

* Estimated.

Bank of England notes ceased to be legal tender in the island as from Sept. 21, 1949, and only notes issued by the Commissioners of Currency are now legal tender. In addition, British coins, including silver, cupro-nickel and bronze coins, are legal tender.

TRADE

	1956	1957
Imports.....	£26,429,426	£27,105,223
Exports.....	3,837,155	3,345,318

The principal imports for home consumption are foodstuffs—mainly wheat, meat and bullocks, milk and fruit—fodder, beverages and tobacco, fuels, chemicals, textiles and machinery (industrial, agricultural and transport). The chief domestic exports are scrap-metal, hides and skins, potatoes and onions, smoking requisites, gloves, buttons, beer, mineral waters, preserved fruits, edible oil and tallow.

CAPITAL, Ψ Valletta. Population (1957) 18,175.

MALTA'S NATIONAL DAY is September 8, commemorating the raising of the sieges of 1565 and 1940–43.

GOVERNMENT

By Letters Patent dated September 5, 1947, Responsible Government was re-established in Malta and the new Legislative Assembly was opened by H.R.H. The Duke of Gloucester on November 10, 1947. The Maltese Legislature may not pass laws touching the public safety or defence of Her Majesty's dominions and the general interests of British subjects outside Malta. In addition to this general reservation, certain subjects are specifically withheld from the Legislature's competence. The principal subjects so reserved are matters dealing with the defence of the Island and naval, military or air force matters generally, aliens, immigration, currency and treaties and relations with foreign states except in so far as it may be necessary for laws to be made in Malta to enable effect to be given to any treaty extending to Malta. Laws dealing with "reserved matters" may be made by the Governor subject to Her Majesty's approval, or by Order in Council.

The Governor is assisted by two Councils: the Executive Council, consisting of such Ministers as he selects; and the Nominated Council, consisting of the Lieutenant-Governor, the Legal Secretary (who are *ex officio* members) and three Officers chosen from the Navy, the Army and the Air Force. There is a Privy Council which consists of the members of the Executive Council and the members of the Nominated Council, and the Governor may, as occasion may require, appoint a Joint Committee of the Privy Council consisting of three members of the Executive Council, nominated by the Prime Minister, and three members of the Nominated Council selected by the Governor

Following protracted negotiations between the Cabinet and the United Kingdom Government on economic matters, the then Ministers resigned on April 21, 1958, and the Assembly was dissolved. The Governor assumed the administration of the islands and on April 29 proclaimed a state of public emergency. A general ban on public meetings was lifted on August 18, 1958, and it was proposed by H.M. Government to invite the Maltese parties to join in discussions on Malta's future constitutional arrangements in November, 1958.

Governor and Commander-in-Chief. His Excellency Maj.-Gen. Sir Robert Edward Laycock, K.C.M.G., C.B., D.S.O. (1954, *re-appointed* 1958).....£7,000
Lieutenant-Governor, His Honour Trafford Smith, C.M.G..... £2,860
Legal Secretary, Hon. D. S. Stephens £2,120

Secretary to the Government, (vacant).

MAURITIUS

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17′–57° 46′ E. long. and S. lat. 19° 58′–20° 33′, and comprising with its dependencies an area of 805 square miles. The resident population at the census of 1952 was 501,415, made up of Indians, Europeans (mainly French), and persons of mixed descent. The total population, including dependencies, was estimated (Dec. 31, 1957) at 614,923.

Mauritius was discovered in 1511 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1638 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Isle de France, but did not settle it until 1721. Under the French it became a great centre of trade. In 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule though the ancient name, Mauritius, was restored.

Of the total cultivable area of about 210,000 acres, 191,000 are under sugar, about 2,700 under aloe (regular plantations), 1,700 under maize, 3,600 under tea, 800 under tobacco and the rest under other foodcrops and mixed farming. The sugar crop of 1957 was about 562,000 metric tons.

Situated just within the tropics but being a small land mass in a large ocean area, Mauritius has a climate more subtropical than tropical except at low altitudes. In summer conditions are sometimes trying because of high humidities and light winds rather than because of the relatively high temperatures. The island lies in that region of the South Indian Ocean where tropical cyclones are most frequent. At times, as in 1892, 1931 and 1945 they are very severe and do much damage to crops and buildings.

Railways and Shipping.—There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered in 1957 amounted to 1,343,918 tons, and the shipping cleared to 1,326,786 tons. In 1956 there were 62 miles of railway (4 ft. 8½ in. gauge), 75 post-offices and postal agencies, 47 telegraph offices and 14 telephone-exchange offices in the island, with 210 miles of telegraph, including block telegraph of the railway and 20,890 miles of underground and overhead (Government) telephone wires and 7,690 telephone installations.

Civil Aviation.—The island is linked by air with Africa, U.K. and Europe through the scheduled services of *Air France*, twice weekly with Super Constellation aircraft. South African Airways, flying DC7B aircraft, and Qantas Empire Airways with Super Constellations, provide scheduled services from South Africa and Australia respectively, *viâ* Mauritius and Cocos Islands. The Airport at Plaisance, in the Grand Port district, received the first passenger aircraft on July 15, 1946.

The inhabitants of European descent are mostly Roman Catholic. Educational facilities are available up to University entrance level. Primary education is provided in 327 schools, of which 98 are Government, 77 aided and 152 unaided schools. There are 3 Government secondary schools, 2 for boys and 1 for girls, and 66 non-Government secondary schools, 8 of which are grant-aided.

FINANCE

Public expenditure	132,556,664	164,843,680

*Estimated.

Currency—Rs. = Rupee = 1*s.* 6*d.*

TRADE

	1956	1957
Total imports	Rs.224,149,482	Rs.263,817,888
Total exports	291,150,148	322,793,658
Imports from U.K.	£4,992,517	£7,131,647
Exports to U.K.	20,530,094	6,692,373

The necessities of life have all to be imported from abroad. In 1957 rice and grain were obtained from Siam, Burma and Ethiopia, flour from Australia, oxen from Madagascar and minor food imports from South Africa, Australia and elsewhere; 83·8 per cent. of the island's trade was with Great Britain and other Commonwealth countries in 1957.

GOVERNMENT

The Government is administered by a Governor, aided by an Executive Council consisting of three officials (the Colonial Secretary, the Financial Secretary and the Attorney-General), four members selected for appointment by the Legislative Council, from among the non-official members, and such other members as the Governor may appoint in accordance with Section 5(b) of the Royal Instructions, 1947, formerly two in number. On the introduction of the Ministerial System in July, 1957, the unofficial membership of the Executive Council was increased to nine. The Executive Council, which was formerly a purely advisory body, now has executive responsibility exercised through Ministers and has become in effect the principal instrument of policy; the conferment of executive responsibility was symbolized by the introduction of the title "Minister" for all the members.

The Legislative Council is composed of three *ex-officio* members (The Colonial Secretary, the Financial Secretary and the Attorney-General), 19 elected and 12 nominated non-official members. The franchise is enjoyed virtually by all men and women of 21 years of age or upwards.

Chief Architect, J. B. S. Dahi 26,500
Registrar of Co-operative Societies, D. R. F. Warren 24,000
Director, Mauritius Institute, J. Vinson 24,000
British Council Representative, P. J. Seccombe.

CAPITAL, Ψ Port Louis. Population (1957), 82,900; other centres are Curepipe (26,250), Beau Bassin and Rose Hill (33,600), Vacoas (22,500), Quatre Bornes (20,650), Phoenix (10,590) and Ψ Mahebourg (10,850).

DEPENDENCIES OF MAURITIUS

Rodrigues, 350 miles east-north-east of Mauritius, area, 40 square miles. Population (1957) 16,535. Cattle, beans, salt fish, sheep and goats are the principal exports. The island is under the administration of a Magistrate and Civil Commissioner from Mauritius, who takes his orders from the Governor of Mauritius. *Magistrate*, C. Rochecouste.

Trade with Mauritius

	1956	1957
Total imports	Rs.3,059,851	Rs.4,285,141
Total exports	1,591,683	1,405,717

Other Dependencies.—Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coconut oil. The most important are the Oil Islands Group, the largest of which, Ψ *Diego Garcia* (pop. 1957, 583), lies on the direct route from the Red Sea to Australia, and possesses a good harbour; other islands are Six Islands, Peros Banhos, Agalega, St. Brandon, Salomon, and Trois Frères. The total area of the "Other Dependencies" is about 47½ square miles, with a population (1957) of 1,767.

Trade with Mauritius

	1956	1957
Imports	Rs.958,677	Rs.785,635
Exports	1,333,572	1,423,915

THE NEW HEBRIDES

The New Hebrides Group, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of roughly 5,700 square miles, is administered by a British-French Condominium Government.

The principal islands are Espiritu Santo, Malekula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna, Aneityum, Aoba, Maewo and Pentecost. The British Resident Commissioner, exercising powers delegated to him by the High Commissioner for the Western Pacific, and the French Resident Commissioner, representing the High Commissioner for France in the Pacific Ocean, are the joint heads of the Administration. They each have small staffs of national officers who assist them in general administrative work and the running of social services (health and education) financed from national funds, part of which come from the Metropolitan Governments. In addition they jointly control the "mixed" public services (posts and telegraphs, public works, mines, meteorology, etc.) which are financed from funds raised in the Territory. The population (Dec. 31, 1957) was 53,888, of which 49,304 is the estimated number of native inhabitants. Principal products are copra, coffee, cocoa, kauri timber, sandalwood and shell. Imports for 1957 totalled £1,232,847, of which £696,187 was the value of imports from Australia, Exports in 1957 were valued at £1,693,734, £1,531,165 being the value of exports to France. Joint revenue, 1957, £384,013; expenditure, £361,399.

Attached to the New Hebrides are the Banks (309 sq. miles, pop. 2,400) and Torres (40 sq. miles, pop. 150) Islands.

Seat of New Hebrides Administration—Ψ Vila, pop. about 1,600.

British High Commissioner, Sir John Gutch, K.C.M.G., O.B.E.
French High Commissioner, A. Grimald.
British Resident Commissioner, J. S. Rennie, C.M.G., O.B.E.
French Resident Commissioner, P. Anthonioz.

NIGERIA

Nigeria, the largest British Colonial Territory, is situated on the west coast of Africa. It is bounded on the south by the Gulf of Guinea, on the west and north by Dahomey and French Niger and on the east by the French Cameroons. A small portion of the old German colony of the Cameroons is administered by the United Kingdom under United Nations' Trusteeship as an integral part of Nigeria. The area including this portion is about 373,250 sq. miles. A belt of mangrove swamp forest 10–60 miles in width lies along the entire coastline. North of this there is a zone 50–100 miles wide of tropical rain forest and oil-palm bush. North of this the country rises and the vegetation changes to open woodland and savannah. In the extreme north the country is almost desert. There are few mountains except along the eastern boundary, where the highest peak is the 13,000-foot Cameroon Mountain. In Northern Nigeria, the central plateau rises to 6,000 feet, with an average level of 4,000 feet. The Niger, Benue, and Cross are the main rivers.

The climate varies with the types of country described above, but Nigeria lies entirely within the tropics and temperatures are high. Temperatures of over 100° in the north are common while coast temperatures are seldom over 90°. The humidity at the coast, however, is much higher than in the north. The rainy season is from about May to October; rainfall varies from under 25 inches a year in the extreme north to 150 inches on the eastern coast line. An area at the foot of the Cameroon Mountain has a freak rainfall of over 350 inches. During the dry season the *harmattan* wind blows from the desert: it is laden with fine particles of dust.

The 1952–53 Census returns gave a total population of 31,200,000 (Northern Region 16,800,000; Eastern Region 8,000,000; Western Region 6,400,000). It is estimated that at mid-1957 the total population was about 34,000,000. The population is almost entirely African. There are some 15,000 Europeans, Americans, Lebanese and others engaged in Government posts, commerce and Missionary work. The most important towns are ΨLagos (pop. 320,000), Ibadan (500,000), Kano (130,000), Iwo (100,000), Ogomosho (139,000), Oyo (72,000), Oshogobo (122,000), Onitsha (77,000), Ife (111,000), Abeokuta (84,000), Ilesha (72,000), Enugu (63,000), Aba (58,000), Yerwa (55,000), Katsina (53,000), Port Harcourt (72,000), Sokoto (48,000), Zaria (54,000).

Health Services.—There are 188 general hospitals and nursing homes in Nigeria and the Cameroons and 623 doctors. There are also 479 maternity hospitals and homes and 1,120 dispensaries. The country has many formidable health problems, chief among which are annual outbreaks of smallpox and cerebrospinal fever (mainly in the Northern Region), and of yellow fever (mainly in the Eastern Region), and the widespread prevalence of malaria, yaws, bilharziasis, intestinal helminth infestations and malnutrition. These are being combated by the expansion of medical facilities as fast as finance and the training of staff will allow, the emphasis being on preventive medicine, raising the standard of living and education of the people.

Education.—Education is the responsibility of the Regional Governments, the Federal Government retaining responsibility for education in Lagos and for those institutions of higher learning which have Nigerian significance, such as the University College at Ibadan, the Nigerian College of Arts, Science and Technology, King's College and the Man O' War Training Centre. Free and universal primary education for all children within the 6–12 year age group is now available in West and East Nigeria and in the Federal Territory of Lagos.

Production and Industry.—Nigeria is mainly an agricultural country. Five of the country's main agricultural products, *viz.* palm-oil and palm kernels, cocoa, cotton, bananas (from the Cameroons) and ground-nuts are of the greatest importance in Nigeria's export trade (see figures under "Trade" below). Other crops include benniseed, capsicums, cassava, coffee, copra, guinea-corn, gum arabic, kola-nuts, maize, millet, plassava, rice, rubber, tobacco and yams. There are important tin and coal-mining industries, at Jos and Enugu respectively. The coal is mainly used within the country; in 1956 766,116 tons were produced. Nigeria supplies 95 per cent. of the world's requirements of columbite. Timber and hides and skins are other major exports. Industrial products include soap, cigarettes, beer, margarine, groundnut oil, meal and cake, concentrated fruit juices, soft drinks, canned food, metal containers, plywood, textiles and ceramic products.

Railways.—The Nigerian railway system, which is controlled by the Nigerian Railway Corporation, is the most extensive in any British Colonial territory. There are 1,903 route miles of line. There are two major bridges, one over the Niger at Jebba and one over the Benue at Makurdi. The latter is 2,624 ft. long, and it is believed to be the second longest in Africa. The North-western main line runs from Lagos to Kano (700 miles) through the important towns of Abeokuta, Ibadan, Ilorin, Jebba, Minna, Kaduna and Zaria. From Kano the line continues for another 143 miles in a north-easterly direction to its terminus at Nguru, and there is a branch line from Zaria *vid* Gusau to Kaura Namoda to serve north-western Nigeria. This line is also linked with Sokoto by a scheduled railway road service from Gusau. The eastern line runs from Port Harcourt deep-water quay on the Bonny river through the thickly populated oil palm area to Enugu, where it serves the collieries. It then crosses the Benue and joins the north-western line at Kaduna, 569 miles from Port Harcourt. A branch line of 63 miles from Kafanchan serves the tin mines at Jos. The railway hauled 2,653,000 tons of freight in 1956, and its passenger traffic totalled over 394,814,000 passenger miles.

Roads.—There are 37,033 miles of motorable road. Most of the roads have gravelled or earth surfaces, but about 3,439 miles are tarred. An extensive programme of bituminous surfacing is now being carried out.

Civil Aviation.—Trunk route services operated by British, Netherlands, French and Belgian airlines bring Nigeria within less than 20 hours of the Western European capitals and South Africa. There are also connections to French Africa and the United States. A network of internal air services operated by the West African Airways Corporation connects the main internal centres, the annual number of aircraft movements at Nigerian airfields exceeding 30,000. Comprehensive radio navigational aids are installed at Kano and Lagos airports, and basic radio navigational facilities are provided at the twelve other aerodromes in regular use. There is a network of meteorological reporting stations.

FEDERAL FINANCE

	1956–57	1957–58*
Revenue	£66,273,200	£61,476,420
Expenditure	62,225,040	60,514,090
Public debt	17,050,000	17,050,000

* Estimated.

Trade.—Exports to the U.K. include about one-third of the U.K.'s total cocoa imports, one-quarter of her tin imports, one-quarter of her dry hides, and 10 per cent. of her hardwoods.

	1955	1956
Total imports	£136,117,000	£152,577,000
Total exports	131,464,000	134,613,000
	1956	1957
Imports from U.K.	£62,072,804	£58,223,705
Exports to U.K.	90,870,915	85,358,169

The principal imports (1956) were cotton piece goods (£14,406,000), unmanufactured tobacco and cigarettes (£1,512,000), jute bags and sacks (£2,303,000), artificial silk piece-goods (£14,915,000), motor-vehicles and spares (£10,994,000), bicycles and spare parts (£2,029,000) other machinery (£32,065,000), cement (£4,307,000), corrugated iron sheets (£4,480,000), stockfish (£6,269,000), beverages (£3,893,000), and petroleum products (£5,244,000). The

principal exports were cocoa (£23,985,000), tin ore (£7,297,000), groundnuts (£27,764,000), palm-kernels (£20,440,000), palm oil (£14,866,000), timber, sawn and logs (£3,917,000), hides and skins (£3,078,000), cotton (£7,113,000), bananas (£2,403,000), columbite (£1,762,000) and rubber (£6,409,000).

GOVERNMENT

Nigeria is divided into three Regions known as the Northern Region, the Eastern Region and the Western Region (with Regional Headquarters at Kaduna, Enugu and Ibadan respectively), the quasi-Federal Trusteeship Territory of the Southern Cameroons (with Headquarters at Buea), and the Federal Capital of Lagos. On October 1, 1954, Nigeria became a Federation. The *Nigeria (Constitution) Order in Council*, 1954, provides for a Council of Ministers for the Federation and for Executive Councils for the three Regions and the Southern Cameroons. The Council of Ministers consists of the Governor-General as President, ten Federal Ministers (three from each Region and one from the Southern Cameroons) and three *ex officio* Members. The Executive Council of the Northern Region is composed of the Governor as President, thirteen Regional Ministers and three *ex officio* Members. The Executive Councils of the Eastern and Western Regions consist of the Governor as President and not fewer than nine Regional Ministers. In the Southern Cameroons, the Executive Council consists of the Commissioner of the Cameroons as President, four Unofficial Members and three *ex officio* Members.

There is a House of Representatives for the Federation consisting of the Speaker and 184 elected Members, 92 from the Northern Region, 42 each from the Western and Eastern Regions, 6 from the Southern Cameroons and 2 from Lagos. There are also three *ex officio* Members and there may be Special Members, not exceeding six, appointed by the Governor-General to represent communities and interests not otherwise adequately represented in the House. In the Northern and Western Regions there are two-chamber systems of Government consisting in each case of a House of Chiefs and a House of Assembly. In the Eastern Region and in the Southern Cameroons there are Houses of Assembly only.

The executive authority of the Federation extends to all matters with respect to which the Federal legislature has power to make laws. Under the 1954 Constitution certain subjects became exclusively a matter for the Federal Legislature. Such subjects include external affairs, aviation, banks, census, customs, defence, police, shipping, mines and minerals, posts and telegraphs, trunk roads and railways.

Governor-General and Commander-in-Chief, His Excellency Sir James Wilson Robertson, G.C.M.G., G.C.V.O., K.B.E. (1955).
Deputy Governor-General, Sir Ralph Grey, K.C.V.O., C.M.G., O.B.E.

COUNCIL OF MINISTERS

Prime Minister, Hon. A. T. Balewa, C.B.E.
Minister of Lagos Affairs, Mines and Power, Hon. M. M. Ribadu, M.B.E.
Minister of Communications and Aviation, Hon. Chief S. L. A. Akintola.
Minister of Transport, Hon. R. A. Njoku.
Minister of Finance, Hon. Chief Festus Okotie-Eboh.
Minister of Commerce and Industries, Hon. Z. B. M. Dipcharima.
Minister of Health, Hon. A. Rosiji.
Minister of Research and Information, Hon. V. Mukete.
Minister of Education, Hon. A. Wachuku.
Minister of Internal Affairs and of Labour and Welfare, Hon. J. M. Johnson.
Minister of Works and Surveys, Hon. Chief Kola Balogun.

EXECUTIVE COUNCIL, NORTHERN REGION

Governor, Northern Region, His Excellency Sir Gawain Bell, K.C.M.G., C.B.E.
Civil Secretary (vacant).
Attorney-General, H. H. Marshall, Q.C.
Financial Secretary, P. H. G. Scott, C.M.G.
Premier and Minister of Local Government, Hon. The Sardauna of Sokoto, C.B.E.
Ministers, Hons. A. Aliuju, O.B.E.; A. I. Kaita, O.B.E.; G. U. Ohikere; M. A. Habib; M. A. Buba; M. I. M. Gashash; M. A. M. Dutse; A. A. G. Pategi; M. M. Mongonou; M. A. D. Jada; The Galadima of Maska; M. M. Lamido; M. M. Kabiru; D. O. A. Obekpa; The Sultan of Sokoto, G.B.E., C.M.G.; The Emir of Kano, C.M.G.; The Aku of Wakari, O.B.E.; The Emir of Katsina, C.M.G., C.B.E.

EXECUTIVE COUNCIL, EASTERN REGION

Governor, Eastern Region, His Excellency Sir Robert Stapeldon de Stapledon, K.C.M.G.
Premier and Minister of Internal Affairs, Dr. the Hon. Nnamdi Azikiwe.
Ministers, Hons. Dr. M. I. Okpara; E. Emole; P. O. Ururuka; Dr. S. E. Imoke; I. U. Akpabio; B. C. Okwu; R. O. Iwuagwu; G. E. Okeke; J. U. Nwodo; Chief A. N. Onyiuke; O. O. Affiah; E. A. Chime; P. O. Okoya; P. O. Nwoga.

EXECUTIVE COUNCIL, WESTERN REGION

Governor, Western Region, His Excellency Sir John Rankine, K.C.M.G., K.C.V.O.
Premier, Hon. Chief Obafemi Awolowo.
Ministers, Hons. Chief C. D. Akran; Chief A. Enahoro; Chief F. R. A. Williams; Chief J. A. O. Odebiyi; Chief J. O. Oshuntokon; Chief G. A. Deko; A. O. Ogedengbe; A. Okusaga; J. O. Adigun; D. S. Adegbenro; A. O. Adeyi; The Oba of Benin; The Olowo of Owo.

EXECUTIVE COUNCIL, SOUTHERN CAMEROONS

Commissioner, J. O. Field.
Financial and Development Secretary, J. Murray.
Legal Secretary, G. Amachree (*acting*).
Deputy Commissioner, J. Dudding.
Members, Hons. Dr. E. M. L. Endeley, O.B.E.; Rev. J. C. Kangsu; S. T. Muna.

JUDICATURE

Chief Justice, Federal Supreme Court, Sir Adetokunbo Ademola.
Chief Justice, High Court of Lagos, M. C. N. de Lestang.
Chief Justice, Northern Region High Court, Sir Algernon Brown.
Chief Justice, Eastern Region High Court, Sir John Ainley, M.C.
Chief Justice, Western Region High Court (vacant).
Commissioner in U.K., M. Mbu, 41 Buckingham Palace Road, S.W.1.

CAMEROONS

(Trusteeship Territory of the Cameroons)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by Franco-British forces during the War of 1914–18.

The approximate geographical limits of the German territory were 2°–12° 30′ N. lat. and 8° 30′–16° E. long. and the area was about 177,496 square miles. By the Milner-Simon Agreement of July 10, 1919 the whole area was divided into

a British sphere (about 34,081 square miles) and a French sphere (about 143,415 square miles). In 1922 the territories were placed by the League of Nations under British and French Mandates, and in 1946 by the United Nations under British and French Trusteeship. The Cameroons under United Kingdom Trusteeship marches the whole distance of the Nigerian Eastern boundary, save for one short break. A census conducted in 1952 and 1953 showed the population of the British sphere to be 1,440,000.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 700 miles, and lie diagonally between 4°–12° 30′ N. lat. and 8° 30′–14° 45′ E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at heights of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic and erupted in 1954, though without discharging lava, as it did on the previous occasion in 1922.

The Cameroons under United Kingdom Trusteeship is administered as part of Nigeria. The Northern areas, which are administered as part of the Northern Region of Nigeria, are administered by the Residents of the adjoining Provinces of Adamawa, Bornu and Benue. The Executive Council of the Northern Region of Nigeria includes a Minister with a portfolio for Northern Cameroons Affairs who is a representative of the Territory. The Southern section, formerly administered as two provinces of the Eastern Region of Nigeria, became, on October 1, 1954, quasi-Federal territory within the Federation of Nigeria, with its own Legislature (known as the Southern Cameroons House of Assembly) and Executive Council, competent, subject to the assent of the Governor-General of Nigeria, in all matters reserved to the Regions by the Federal constitution of Nigeria. A Commissioner of the Cameroons continues to be responsible for the overall administration of the Southern section as well as acting as the United Kingdom's special representative for the whole territory when Cameroons affairs are before the Trusteeship Council. His headquarters are at Buea.

Cattle breeding and the production of guinea corn are the chief occupations of the population of Dikwa, which consists mainly of Shuwa Arabs and Kanuri. The inhabitants of the areas which for administrative purposes form part of the Adamawa Province are mostly primitive hillmen whose chief occupation is agriculture. Cattle breeding and agriculture, of which coffee is becoming the main economic crop, are the chief occupations in the Bamenda area, which consists mostly of high grassland.

The country nearer the sea-coast is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile. 250,000 acres of this land, formerly German-owned plantations, have been leased to the Cameroons Development Corporation, which was set up in 1946 for the production of bananas, oil palm products, rubber and cocoa, almost all of which are exported. Profits earned by the Corporation accrue to the general revenue of the Southern Cameroons, in which section the properties operated by the Corporation are situated.

The chief exports from the Territory are bananas, cocoa, rubber, palm oil and kernels, coffee and timber; the chief imports are textiles, motor spirit, provisions, ironware and salt.

A Colonial Development and Welfare allocation of about £1,500,000 will be available for the territory's development plan for 1955–60. The major part of this is devoted to the improvement of the territory's road system. Other schemes will include the provision of water supplies in urban and rural areas, the development of medical and health services and the expansion of educational facilities in the territory.

The seaports Victoria and Tiko are connected with Buea and all divisional headquarters by motor road.

Commissioner, J. O. Field £2,880
Deputy Commissioner, J. S. Dudding.
Prime Minister, Dr. Hon. E. M. L. Endeley, O.B.E.
Ministers, Hons. Rev. J. C. Kangsu; S. T. Muna.
Buea, population (1953), 3,009.

PACIFIC ISLANDS

(*Western Pacific High Commission*)

High Commissioner, His Excellency Sir John Gutch, K.C.M.G., O.B.E. (1955) (+ *allce.* £1,150) £3,500
Chief Secretary, M. D. I. Gass 2,820
Financial Sec., A. M. Wilkie 2,610
Legal Adviser and Attorney-General of British Solomon Islands Protectorate, J. N. Glover 2,610
Secretary for Protectorate Affairs, V. J. Andersen, M.B.E. 2,460
Senior Assistant Secs., C. H. Allan; L. M. Davies (*Finance*) 2,280
Assist. Secs., T. Russell; M. A. Andrew; M. M. Townsend; A. G. Mitchell, D.F.M. 1,290

The principal groups, under the High Commissioner in, over, and for the Western Pacific Islands are (1) The Gilbert and Ellice Islands Colony; (2) The British Solomon Islands Protectorate; (3) The New Hebrides; (4) There are also a number of scattered groups and isolated islands, including Caroline, Flint, Malden, Starbuck and Vostock Islands, which are not attached to any group.

The Gilbert and Ellice Islands Colony, which includes Ocean, Christmas, Fanning and Washington Islands, besides the Gilbert, Ellice and Phoenix Groups, was formerly a Protectorate, and was formally annexed to the Empire in November, 1915. The total land area of the Colony is about 360 sq. miles with a population (Census, 1947) of 36,000 (304 Europeans, 142 Chinese, 29,923 Micronesians and 5,066 Polynesians), estimated at 42,738 at the end of 1957. Expressed in Australian currency, the revenue of the Colony in 1957 was £368,200; expenditure £492,117.

The Government maintains one boys' boarding school and 16 primary schools. Village school primary education is mainly run by missionary societies, with financial assistance from the Government, and at the end of 1957 these schools were attended by 7,100 pupils.

The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° E. longitude, consists of 16 islands, Makin, Butaritari, Marakei, Abaiang, Tarawa (Headquarters of the Colony), Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nikunau, Onotoa, Tamana and Arorae. The area of the group is 114 sq. miles and the population (estimated 1956) 29,575. The *Ellice Group* of 9 islands (Nanumea, Nanumanga, Niutaio, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaelae and Nuilakita) lies between lat. 5° 30′ and 11° SE. and long. 176° E. and 180° E. The area of the group is 9½ sq. miles and the population (estimated

1956) 4,819. *Ocean Island* (or Banaba), in lat. 0° 52′ S. and long. 169° 35′ E. was proclaimed British in 1900. The *Line Islands* between lat. 4° 40′ and 2° N. and long. 160° 20′ and 157° W. include Fanning, Washington and Christmas Islands. *Fanning* and *Washington Islands* were included in the Colony in 1916. *Christmas Island* in 1919. Christmas Island is the largest atoll in the Pacific. The boundaries of the Colony were extended (March 18, 1937) to include the *Phœnix Islands* (Birnie, Canton, Enderbury, Gardner, Hull, McKean, Phœnix and Sydney Islands), between 3° and 5° S. and 170° and 175° W. Enderbury and Canton Islands are for common use of Gt. Britain and U.S.A. for aviation and communications, under an agreement made on April 6, 1939. Canton Island is an international airport on the Trans-Pacific route between Fiji and Honolulu.

In each island of the Gilbert and Ellice Groups (except Niulakita) and in three islands in the Phœnix Group there is a native Government under an appointed native magistrate whose court administers a code of native laws. The Colony is administered by the High Commissioner through a Resident Commissioner.

Resident Commissioner, Gilbert and Ellice Islands, Michael Louis Bernacchi, C.M.G., O.B.E., (1952) .....(+*allce.* £175) £A3,645

The British Solomon Islands Protectorate, established in 1893, now includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Ysabel, Shortland Group, Vella Lavella, Kolumbangara, Ganongga, Gizo, New Georgia, Florida, Guadalcanal, Russells, Malaita and San Cristobal, and the outlying islands of Bellona, Rennell, Santa Cruz, Vanikoro, Tikopia, Cherry, Mitre, Utupua, Swallow (or Reef Islands) and Duff Groups, Sikaiana (or Stewart) and Ontong Java (or Lord Howe Atoll). The Protectorate is situated between 5°–13° S. lat. and 155°–170° 20′ E. long. It has a total land area of about 11,500 square miles and ocean area of about 270,000 square miles, and a population (est. 1955) of 700 Europeans, 650 Chinese, Indians and Fijians, 98,000 Melanesians and 5,000 Polynesians. Estimated revenue (1958) £A1,421,072 (including Colonial Development and Welfare Funds and Grant-in-Aid from the United Kingdom); estimated expenditure (1958) £A1,421,072; imports (1957) £A1,497,845; exports £A1,457,222. The main imports are foodstuffs and building materials. Principal exports are copra, trochus shell and timber. The headquarters of the Western Pacific High Commission were moved from Suva in Fiji to Honiara, the capital of the British Solomon Islands Protectorate, in December, 1952, and the High Commissioner for the Western Pacific assumed the direct administration of the Protectorate on Jan. 1, 1953.

SOUTH PACIFIC COMMISSION

The South Pacific Commission, an advisory and consultative body set up by the six Governments responsible for the administration of island territories in the South Pacific region, recommends to the member Governments means for promoting the well-being of the peoples of these territories. It is concerned with social, economic and health matters. *Headquarters*, Nouméa, New Caledonia.

The Commission was established by an Agreement between the Governments of Australia, France, the Netherlands, New Zealand, the United Kingdom and the United States of America, signed at Canberra in 1947 and ratified on July 29, 1948. Until November 7, 1951, the area of the Commission's activities comprised territories lying generally south of the Equator from and including Netherlands New Guinea in the west to the French Establishments in Oceania and Pitcairn in the east. On November 7, 1951, an additional Agreement was signed extending the scope of the Commission to include Guam and the Trust Territory of the Pacific Islands under United States administration. The Commission consists of twelve Commissioners, two from each Government, and meets once or twice a year. The first Session was held in May, 1948.

There are two auxiliary bodies, the Research Council and the South Pacific Conference. There is a Research Council meeting yearly, which may be either a meeting of the full Council, or of one or other of its three main sections, specializing in health, economic development and social development. Members of the Council are appointed by the Commission and are selected for their special knowledge of the questions with which the Commission is concerned, and the problems of the Territories in these fields. The chief function of the Research Council is to advise the Commission what investigations are necessary. Arrangements to carry out those which are approved are the responsibility of the Secretary-General and other principal officers. The South Pacific Conference, which meets at intervals not exceeding three years, consists of delegates from the territories who may be accompanied by advisers.

Secretary-General, T. R. Smith.

Executive Officers, Dr. E. Massal (*Health*); Dr. A. H. J. Kroon (*Economic Development*); Dr. R. Seddon (*Social Development*).

FEDERATION OF RHODESIA AND NYASALAND

AREA AND POPULATION

The Federation of Rhodesia and Nyasaland covers an area of 486,973 square miles (S. Rhodesia, 150,333; N. Rhodesia, 287,640; and Nyasaland, 49,000 square miles), including approximately 12,000 square miles of water.

Population.—The total population of the Federation (December, 1957) is 7,540,000 of all races (S. Rhodesia 2,590,000; N. Rhodesia 2,270,000; Nyasaland 2,680,000).

PHYSIOGRAPHY

Boundaries.—The Federation extends from latitude 22° 30′ South to latitude 8° 15′ South. On the South it is bordered by the Union of South Africa, on the West by the Bechuanaland Protectorate, and Portuguese West Africa, on the North-West and North by the Belgian Congo, on the North by Tanganyika and on the East by Portuguese East Africa.

Relief.—Most of Rhodesia is at an altitude of between 3,000 and 5,000 feet above sea level, the highest land lying on the eastern border of Southern Rhodesia where some mountains rise above 8,000 feet above sea level. In the large river valleys, the Zambezi, Sabi, Kafue and Luangwa the level of the land falls to below 2,000 feet.

In Nyasaland the level of the littoral of Lake Nyasa and of parts of the Shire River Valley is 1,500 feet above sea level. Elsewhere the altitude varies between 2,500 and 7,000 feet with the crest of the Mlanje Mountain massif rising to 10,000 feet above sea level. Lake Nyasa itself, the greatest depth of which is 2,300 feet, is a southward extension of the Great Rift Valley.

Rivers.—Portions of the Zambezi River, Lake Nyasa, Lake Bangweulu, the Luapula River and the Chambeshi River are navigable and are extensively used by waterborne transport. The Federation has, however, no great natural water-

ways, either to provide access to the sea or to connect major industrial centres, but there are a number of large rivers which could be brought into the service of agriculture for irrigation and of power supplies for hydro-electric schemes. The principal rivers of this type, in addition to the Zambezi, are—in Southern Rhodesia: the Sabi River and its tributaries (irrigation and power potentialities); the Hunyani River (already dammed at several points); and the Umfuli River (irrigation potentialities). In Northern Rhodesia: the Kafue River (power potentialities); the Mulungushi and Lunsemfwa Rivers (already supplying hydro-electric power to Broken Hill mine and town); and the Zambezi River at the Victoria Falls (supplying hydro-electric power to Livingstone). In Nyasaland: the Shire River (power and irrigation potentialities).

Climate.—Though the entire Federal area lies within the tropics most of it is at an altitude which gives climatic conditions favouring permanent European settlement. The main rainfall throughout the area is concentrated into a season extending from about November to March. Average rainfall (except for certain somewhat arid low-lying regions on the one hand and some high altitude areas of very heavy rainfall on the other) is in the vicinity of 25 to 30 inches a year.

HISTORY

The Federation of Rhodesia and Nyasaland came into being on September 4, 1953, when the first Governor-General assumed office. The Order-in-Council authorizing the setting up of the Federation was approved by Her Majesty the Queen on August 1, 1953. An interim Ministry was sworn in on September 7. The first elections to the Federal Assembly took place on December 15, 1953. In the first months of the Federation only the minimum administrative machine was created and the Federal Government assumed its functions from the territories by degrees. By July 1, 1954, the Federal Ministries had taken over most of their duties.

British rule and occupation in Southern Rhodesia followed the march into Mashonaland in 1890 of Cecil Rhodes' Pioneer Column. British influence was extended northwards to Northern Rhodesia from Southern Rhodesia during the nineties and eastwards from Nyasaland where a protectorate had been declared in 1889. Both Rhodesias were administered till 1923 by the British South Africa Company, the Resident Commissioner at Salisbury represented the United Kingdom in respect of both countries, the Rhodesias shared the same railway system and all three countries made use of the same port, Beira. In more recent years the two northern territories provided an important and growing market for the manufactures of Southern Rhodesia and the three countries have shared in the provision of a number of technical services such as airways, currency, statistics, archives, town planning and broadcasting.

The suggestion for closer association seems to have been mooted first in about 1910 and a proposal to amalgamate the Rhodesias was made officially by Dr. Jameson in 1916 on behalf of the British South Africa Company. It was opposed by the settlers of Southern Rhodesia who feared that amalgamation would defer indefinitely hopes of responsible government. The changes of status of the two Rhodesias in 1923 diverted attention for the time being from the question of closer association but the issue was raised a few years later. The Bledisloe Commission, appointed in 1938, reported against immediate amalgamation but recognized the community of interest between the three territories by suggesting the creation of a body to co-ordinate common services. The suggestion was implemented in 1945 when the Central African Council was established. Conferences were held in London and at Victoria Falls in 1951–53 to examine the possibility of a closer working arrangement and to frame recommendations. The final proposals were endorsed by a referendum in Southern Rhodesia in April, 1953, by approximately a two-thirds majority. Later, the proposals were approved by the United Kingdom Parliament and the Legislative Councils of Northern Rhodesia and Nyasaland, and the final steps to set up the new Federation were taken.

GOVERNOR-GENERAL AND STAFF

Governor-General, His Excellency the Earl of Dalhousie, G.B.E., M.C.; *born* Oct. 17, 1914; *assumed office*, October, 1957
(+£3,500 *allce.*) £5,000
Official Secretary and Comptroller, Commander J. P. P. Michell, M.V.O., O.B.E., R.N. (*ret.*).
Aides-de-Camp, Capt. J. Batten, M.V.O.; Lord James Crichton-Stuart.

THE FEDERAL MINISTRY

(November, 1956)

Prime Minister and Minister of External Affairs and of Defence, Hon. Sir Roy Welensky, C.M.G.
(+£1,000 *tax free allce.*) £4,000
Minister of Transport and Works, Hon. W. H. Eastwood, C.B.E. *£3,250
Minister of Commerce and Industry, Hon. F. S. Owen *£3,250
Minister of Finance and of Posts, Hon. Donald Macintyre, C.B.E. *£3,250
Minister of Agriculture, of Health and of the Public Services, Hon. J. M. Caldicott, C.M.G. ...*£3,250
Minister of Law and of Education, Hon. J. M. Greenfield, C.M.G., Q.C. *£3,250
Minister of Home Affairs and of Power, Hon. Sir Malcolm Barrow, C.B.E. *£3,250
Secretary, Department of the Prime Minister, F. H. N. Parry, C.B.E.
Secretary for External Affairs, F. H. N. Parry, C.B.E.
Secretary for Defence, T. C. Gisborne, C.B.E.
Secretary to the Treasury, R. M. Taylor, C.B.E.
Secretary for Transport and Communications, H. M. McDowell.
Postmaster-General, N. A. Thomson, C.B.E.
Secretary for Commerce and Industry, N. R. Bertram, M.B.E.
Secretary for Home Affairs, A. D. Evans, C.B.E.
Attorney-General, V. L. Robinson, C.B.E., Q.C.
Secretary for Education, D. C. Ferrer.
Secretary for Agriculture, J. R. Corry.
Secretary for Health, Dr. D. M. Blair, O.B.E.
Secretary for Power, J. Ward.
Secretary for Law, D. D. O'Donovan.

* *Plus* £500 tax free allowance.

REPRESENTATIVES ABROAD

United Kingdom

Rhodesia House, 429 Strand, W.C.2

High Commissioner, Sir Gilbert Rennie, G.B.E., K.C.M.G., M.C.
Deputy High Commissioner, P. B. Barrett, O.B.E.
East Africa, Nairobi (*Commissioner*).—N. R. Heathcote.
Union of S. Africa, Pretoria (*High Commissioner*).—J. W. M. Fitt, O.B.E.
Portugal, Lisbon (*Representative*).—R. G. Feltham.
U.S.A., Washington (*Minister*).—H. W. Jeffreys.

COMMONWEALTH REPRESENTATIVES IN SALISBURY

AUSTRALIA (*Trade Commissioner*).—H. M. le Marchand.
CANADA (*Trade Commissioner*).—L. S. Glass.
INDIA (*Asst. Commissioner*).—Surendra Sinh of Alirajpur.
UNION OF S. AFRICA (*High Commissioner*).—R. Kirsten.

UNITED KINGDOM

High Commissioner, M. R. Metcalf, C.M.G., O.B.E.
Deputy High Commissioner, E. L. Sykes.
Military Adviser, Brig. R. G. T. Collins, C.B.E.
Air Adviser, Wing Commander P. L. Arnott, D.F.C.
Economic Adviser, J. W. Stoodley.

LEGISLATURE

The Federal Assembly consists of 35 members and is composed as follows: twenty-six elected members (Southern Rhodesia, 14; Northern Rhodesia, 8; Nyasaland, 4); six African elected members (two from each territory); and three European members charged with special responsibility for African interests, of whom one is elected in Southern Rhodesia and the other two appointed, one each by the Governors of Northern Rhodesia and Nyasaland.

The main matters on which the Federal Legislature has power to make laws are external affairs, defence, immigration, financial and economic affairs, inter-territorial roads, railways, European agriculture in Southern Rhodesia, posts and telegraphs, education except African primary and secondary education and Federal courts. In addition, there are a number of matters on which both the Federal and Territorial Legislatures have powers to make laws. They include the development of industries, electricity, scientific and industrial research, health, town planning, archives, census, and statistics.

African Affairs Board.—A Standing Committee of the Federal Assembly, known as the African Affairs Board, consists of the three European members representing African interests and one of the elected African members from each territory. The Board makes representations to the Federal Government on matters within the authority of the Federation in the interests of Africans and assists a Territorial Government, at its request, in the study of matters affecting Africans. It is also the function of the Board to draw attention to any Federal legislation of a differentiating character and to ask that it should be reserved for the signification of Her Majesty's pleasure.

Speaker of the Federal Assembly, Hon. T. I. F. Wilson, C.M.G.
Clerk of the House, Col. G. E. Wells, O.B.E., E.D.

FEDERAL SUPREME COURT

The Court, constituted under the Federal Constitution of 1953, came into being on July 1, 1955.

Chief Justice of the Federation, Rt. Hon. Sir Robert Tredgold, K.C.M.G.
Federal Justices, Hon. Sir Henry Clayden; Hon. F. A. Briggs.

The Chief Justices of Southern Rhodesia, Northern Rhodesia and Nyasaland are *ex officio* members of the Court.

DEFENCE

The regular and Territorial forces of the Federation form the Central African Command which has its headquarters in Salisbury. The regular forces on peace-time establishment include a battalion of The Rhodesian African Rifles, now serving in Malaya, a battalion of the Northern Rhodesia Regiment and two battalions of the King's African Rifles, units of the Rhodesian and Nyasaland Engineer Corps, the Rhodesia and Nyasaland Signals, Ordinance Supply and Transport, and the Rhodesia and Nyasaland Medical Corps. In addition Southern and Northern Rhodesia have an European Territorial Force comprising three battalions of The Royal Rhodesia Regiment, with headquarters at Salisbury, Bulawayo and Kitwe respectively. The Federation has its own regular air force, the Royal Rhodesia Air Force, which is equipped with Vampire jet fighters and transport aircraft.

EDUCATION

The Federal Government is responsible for all education other than that of Africans, that is for European, Asian and Coloured children. In 1957 the numbers of such children at school were as follows: Southern Rhodesia, 40,729 (162 schools); Northern Rhodesia, 14,167 (66 schools); Nyasaland, 2,532 (22 schools). In addition to the Government Schools, there are over 60 State-aided private schools, attended by a further 10,000 children.

FINANCE

The fifth Federal Budget was presented on June 28, 1958. Loan vote estimates for 1958–59 totalled £21,942,431, of which £16,042,431 related to the fourth year of the Federal Development Plan for 1955–59, the remaining £5,900,000 of the loan vote being applied towards meeting part of the fiscal year's expenditure on the Kariba hydro-electric project. This project is now estimated to cost £80,000,000 in its first stage. A total of £46,600,000 has been secured from external sources, the International Bank confributing £28,600,000, the Commonwealth Development Finance Co. Ltd., £3,000,000 and £34,000,000 is being found from internal sources.

Revenue vote expenditure in 1958–59 is estimated at £51,300,552 against a total estimated revenue of £53,916,968 (including a provisional accumulated surplus of £2,475,968 estimated carried forward from 1957–58).

	(1957–58) (Provisional)	(1958–59) (Estimated)
Revenue.....	£56,350,588	£51,441,000
Expenditure from revenue funds....	£55,031,946	£51,300,552
Expenditure from loan funds.....	£21,930,842	£21,942,431

The public debt amounted to £196,466,911 (provisional) at June 30, 1958.

Currency.—Federal currency is linked to British sterling and currency backing is held in London in balances, in British Treasury Bills and in Government securities issued in the United Kingdom. The Bank of Rhodesia and Nyasaland, which was established by an Act of the Federal Assembly in 1956, is responsible for the issue of the currency.

PRODUCTION, TRADE AND INDUSTRY

Agriculture.—European agriculture in Southern and Northern Rhodesia is the administrative responsibility of the Federal Government, the remainder of the agricultural industry of the Federal area being in the charge of the various Territorial

Governments. Sales of principal crops in 1957 were:

	Southern Rhodesia '000 lb.	Northern Rhodesia '000 lb.	Nyasaland '000 lb.	Total '000 lb.
Tobacco‡	144,433	1,501	33,763	179,697
Cotton	234	28	9,268	9,530
Tea	1,356	—	19,904	21,260
Tung oil	—	—	2,688	2,688

‡ All types except Turkish. Production of flue-cured tobacco, mainly in Southern Rhodesia, totalled 148,558,000 lb. and of fire-cured tobacco, mainly in Nyasaland, 25,510,000 lb.

NUMBERS OF LIVESTOCK, 1957

	Southern Rhodesia	Northern Rhodesia	Nyasaland	Total
Cattle	3,415,000	1,047,000	328,000	4,790,000
Sheep	248,000	191,000	58,000	1,255,000
Goats	407,000		361,000	
Pigs	116,000	62,000	89,000	267,000

MINERAL PRODUCTION, 1957

	Quantity	Value
Copper	466,000 tons	£89,137,000
Gold	541,000 oz.	6,788,000
Asbestos	132,000 tons	9,016,000
Chrome	651,000 tons	4,517,000
Zinc	33,000 tons	2,396,000
Coal	4,247,000 tons	3,920,000
Lead	17,000 tons	1,437,000
Cobalt	—	2,495,000

Manufactures.—Since 1955–56, the census of industrial production has been held on a federal basis, giving a gross output of £227,600,000 and a net output of £130,600,000 for the year 1956–57. These figures include copper, lead and zinc smelting, without which net output was £44,800,000. Tobacco, textiles and garments, foodstuffs and metal products remain the most important groups, drawing largely for their materials on local sources.

EXTERNAL TRADE

In 1957, the fourth year for which statistics of external trade were available for the Federation as a single trading entity, total external trade was valued at over £340,000,000.

With exports valued at £163,000,000 and imports at £177,000,000, there was a visible adverse balance of trade of £14,000,000.

About 73 per cent. of the exports consisted of minerals—copper, gold, asbestos, lead, zinc, chrome being the most important. About 18 per cent. of all exports consisted of tobacco.

The remaining 9 per cent. was made up of a wide range of products, including manufactured articles of which textiles are the most important.

Nearly 42 per cent. of imports in 1957 were in the metal manufactures category, a high proportion being mining, electrical and agricultural machinery, railway materials and other durable producers' goods required for the growth of industry, agriculture and basic services such as communications and the provision of electric power.

The most important market for the Federation's products and supplier of its requirements was the United Kingdom. Exports to the United Kingdom in 1957 were made up mainly of copper (£40,000,000), tobacco (£18,000,000), asbestos and tea.

	1956	1957
Imports from U.K.	£58,490,911	£60,254,672
Exports to U.K.	107,891,470	83,200,853

COMMUNICATIONS

Railways.—The two Rhodesias are served by the Rhodesia Railways which connect with the South African Railways at Mafeking. The main line forks at Bulawayo; the northern branch runs *viâ* the Victoria Falls through Northern Rhodesia to the Copperbelt and on to the Belgian Congo Border where it connects with the Belgian system. The eastern branch runs along the watershed of Southern Rhodesia to serve the main centres and ends at Umtali where it joins the Portuguese system to provide access to Beira. With branch lines, the total mileage of the Rhodesia Railways is nearly 2,500 miles, but an important new line, linking the Midlands of Southern Rhodesia with the port of Lourenço Marques in Portuguese East Africa was completed in 1955.

Nyasaland is served by the Nyasaland Railway system (the Trans-Zambezian Railway, the Central African Railway and the Nyasaland Railways) which connects Beira with Nyasaland. The total length of the system is nearly 500 miles.

Roads.—Main roads, which are in process of modernization, connect all the main centres of the Federation with one another and with adjacent territories, and secondary roads serve rural areas. The total route mileage of roads is over 52,000 miles (28,500 miles in Southern Rhodesia, 18,000 miles in Northern Rhodesia and nearly 5,000 miles in Nyasaland) of which some 11,000 miles are designated as main or principal roads (6,000 miles in Southern Rhodesia, excluding roads in towns, 4,300 miles in Northern Rhodesia and 1,700 miles in Nyasaland). Major bridges, the gift of the Beit Trustees, span the larger rivers on main roads, the Beit Bridge over the Limpopo, the Ottobeit Bridge at Chirundu over the Zambezi and the Birchenough Bridge over the Sabi River being noteworthy. American financial aid has been given for the up-grading of the Northern Rhodesia section of the Great North military road which links the railhead at Broken Hill with Nairobi in Kenya.

Air Services.—Civil aviation has made rapid progress in the Federal area since the war. The existing airline was reconstituted in partnership between the three territories as the Central African Airways Corporation. Flying Viscount, Viking, Dakota and Beaver aircraft, Central African Airways provide daily services between the major towns of the Federation and between them and Nairobi and Johannesburg, as well as a weekly service to London, and services to out-lying parts of the Federation. In addition there are many air charter firms and the major world airlines link the Federation with overseas countries. The new international airport at Salisbury is in full use and the Federal capital is now less than 24 hours from London.

Broadcasting.—During 1957, all broadcasting was taken over by a newly-formed Federal Broadcasting Corporation.

CAPITAL

SALISBURY, the Federal capital, is also the principal city of Southern Rhodesia. It is built round the site where the Pioneer Column ended its march into Mashonaland in 1890. Situated in the north-east of Southern Rhodesia, it is on the main railway line which traverses the more closely settled areas of the Colony. Branch railway lines run north-east and north-west. It is the centre of the tobacco industry—the tobacco auction sales at Salisbury are the largest in the world—and an industrial centre of considerable importance. Estimated population, including townships on the periphery of Salisbury: Europeans, 62,000; Africans, 153,000; Asians and Coloured (mixed race), 3,750.

SOUTHERN RHODESIA

Southern Rhodesia, comprising Matabeleland, Mashonaland and Manicaland, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,333 square miles. The population (1956 census) numbered 178,000 Europeans, 5,100 Asiatics and 8,100 Coloureds; Natives are estimated at 2,290,000, giving a combined total of approximately 2,480,000. In 1956 there were 4,557 European births and 1,169 deaths, giving a birth-rate of 26 and a death-rate of 7 per 1,000.

The great majority of the natives of Southern Rhodesia (members of the so-called Bantu race), are known as Mashona. In the Western portion of the Colony are the descendants of the Amandebele who conquered and settled down among the Mashona, and from whom the Province of Matabeleland derives its name.

Southern Rhodesia was administered by the British South Africa Company from the date of occupation (1890) to 1923, when responsible government was granted. On this latter date the Company relinquished all rights and interests in the land of Southern Rhodesia except in those estates which it was already developing on July 10, 1923. A Land and Agricultural Bank grants loans for farm development and acquisition of residential property on easy terms of repayment. Of the Colony's 96,000,000 acres, some 38,604,000 have been set apart for native occupation (Native Reserves) and purchase (Native Purchase Areas).

FINANCE

	1956–57	1957–58*
Revenue	£14,196,000	£18,786,000
Expenditure from revenue funds	16,530,000	18,847,000
Expenditure from loan funds	6,917,000	6,331,000

* Estimated.

(A large proportion of the Public Debt has been taken over by the Federal Government.)

EDUCATION

Native education is controlled by Government and comes under the Minister for Native Education. Expenditure is now over £2,000,000 per annum: Capital expenditure, in addition to revenue funds, amounts to £276,000. There are over 2,600 schools enrolling 400,000 pupils with 11,000 teachers. Both Mission and Government training centres provide for lower and higher primary teachers' courses. Secondary schools provided a standard of education up to Cambridge Certificate, while post primary schools include such subjects as building, carpentry, agriculture and home craft. In addition three special schools cater for the blind, the deaf and dumb. Eighty per cent. of pupils of school-going age are now able to attend schools.

GOVERNMENT

The Colony obtained self-government in 1923 and has a Parliament of 30 members and a Cabinet of 5 members. The Queen is represented by a Governor who presides over the Executive Council. The Southern Rhodesian Government is responsible for native policy and differential legislation affecting the native population, which is subject to the consent of the Secretary of State for Commonwealth Relations.

Municipal self-government has been established in the city of Salisbury, the city of Bulawayo, and in the towns of Umtali, Gwelo, Gatooma, Que Que and Fort Victoria. Smaller areas are administered by Town Management Boards. Over the past ten years local self-government among the Africans has been encouraged and by the end of 1956 there were 56 Native Councils raising their own rates.

Governor, Vice-Admiral Sir Peveril William-Powlett, K.C.B., C.B.E., D.S.O.

MINISTRY

(Feb. 18, 1958)

Prime Minister and Minister of Native Affairs, Hon. Sir Edgar Whitehead, K.C.M.G., O.B.E.
Minister of Labour, Social Welfare and Housing, Hon. A. E. Abrahamson.
Minister of the Treasury and of Mines, Hon. C. J. Hatty.
Minister of Roads and Irrigation and of Lands, Hon. A. R. W. Stumbles.
Minister of Justice and Internal Affairs, Hon. R. Knight.
Minister of Local Government and of Native Education, Hon. R. M. Cleveland.

Speaker, Legislative Assembly, Hon. W. Addison, O.B.E., M.C., D.C.M.
Secretary to Prime Minister and Cabinet Office, G. B. Clarke, I.S.O.
Secretary, Dept. of Justice and Internal Affairs, J. W. Pithey.
Secretary, Dept. of Mines, Lands and Surveys, C. L. Honey.
Secretary for Native Affairs and Chief Native Commissioner, S. E. Morris.
Secretary to Treasury, C. E. M. Greenfield, C.M.G., M.B.E.
Secretary, Dept. of Local Government and Housing, H. M. M. Mackenzie, M.B.E.
Secretary for Labour, J. Armstrong.

SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,831 ft., population (estimated) 215,600, including 65,600 Europeans. BULAWAYO, the largest town in Matabeleland, altitude 4,405 ft., estimated population 154,000, including 41,000 Europeans. Other centres are Umtali, Gwelo, Gatooma, Que Que and Fort Victoria.

Salisbury is 5,600 miles from London (air route) transit 24 hours; by sea 17 days (approx.).

NORTHERN RHODESIA

The Protectorate of Northern Rhodesia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33′ E. and between the latitudes 8° 15′ S. and 18° S. Its area is 288,130 square miles, and its boundaries are 3,515 miles in length.

With the exception of the valleys of the Zambezi, the Luapula, the Kafue and the Luangwa Rivers the greater part of Northern Rhodesia has a flat to rolling topography, with elevations varying from 3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 5,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring as chains which develop into areas of broken country. The highest group of hills is the Muchinga Mountains which form part of the Great Escarpment running down the western edge of the Luangwa River Valley, and of these, individual peaks rise to about 8,000 feet.

Although Northern Rhodesia lies within the tropics, and fairly centrally in the great land mass of the African continent, its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambezi, Luangwa and Kafue

rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

The census of May 8, 1956, showed a European population of 64,800, a Coloured population of 1,550 and an Asiatic population of 5,400. At June 30, 1957, the estimated African population was 2,160,000.

FINANCE

	1956–57	1957–58*
Revenue	£18,277,073	£19,298,986
Expenditure	18,240,147	18,504,205

* Estimated.

With the coming into being of the Federation of Rhodesia and Nyasaland the period of the financial year was changed from the calendar year to the period 1st July to 30th June. The Federal Government assumed, under the Constitution, powers to impose certain important taxes formerly enjoyed by the Northern Rhodesia Government and also took over responsibility for the administration of various departments and services.

GOVERNMENT

Government is carried on by a Governor appointed by the Crown, assisted by an Executive Council of five official and four unofficial members. The Legislative Council consists of twenty-six members, of whom eight are official, twelve are elected Europeans, two Europeans nominated by the Governor to represent African interests and four Africans nominated by the Governor (who usually nominates those selected by the African Representative Council from among its own members). The Legislative Council is presided over by a Speaker who is an unofficial but not a member of the Council.

Governor of Northern Rhodesia, His Excellency Sir Arthur Edward Trevor Benson, K.C.M.G. (1954). £3,550

Chief Justice of the High Court, G. M. Paterson, O.B.E. £3,550

Economic Secretary, L. F. Leversedge, C.M.G. 3,200

Secretary for Native Affairs, D. B. Hall, C.M.G. 3,200

Member for Mines and Works W. G. Dunlop. 3,150*

Member for Education and Social Services, H. Franklin, O.B.E. 3,150*

Member for Agriculture and Natural Resources, H. A. Watmore, C.M.G. 3,150*

* Includes special allowance £500.

Puisne Judges, W. E. Evans; A. G. C. Somerhough, O.B.E.; W. E. Windham. 2,900

Senior Provincial Commissioner, J. P. Murray, C.M.G. 3,050

Provincial Commissioners, M. G. Billings; N. S. Price, O.B.E.; G. C. R. Clay; F. R. G. Phillips; F. M. Thomas; G. S. Jones, C.M.G., M.B.E.; R. S. Foster; E. C. Thomson. 2,900

British Council Representative in N. Rhodesia, A. A. G. Anderton.

CAPITAL AND SEAT OF GOVERNMENT, Lusaka, situated in the Midlands (1956 Census, European pop. 9,440). Other centres are Livingstone, Broken Hill, Fort Jameson, Mazabuka, Abercorn, Kasama, Mongu, Ndola, Luanshya, Mufulira, Chingola, Bancroft and Kitwe (the main copper mining town of the copper belt—European pop. 9,680).

Commissioner in London, J. H. Wallace, C.M.G., 57 Haymarket, S.W.1.

NYASALAND PROTECTORATE

The Nyasaland Protectorate comprises the western shore of Lake Nyasa, with the high tableland separating it from the basin of the Luangwa River, and the region lying between the watershed of the Zambesi and Shire Rivers on the west, and the Lakes Chiuta and Chilwa and the River Ruo (a tributary of the Shire) on the east, including the mountain systems of the Shire Highlands and Mlanje.

The Protectorate is bounded on the North by Tanganyika Territory, on the West by Northern Rhodesia and on the South and East by Portuguese East Africa (Mozambique). The rainy season is from November to March, and it is dry for the rest of the year.

Nyasaland has a total area of 46,257 sq. miles (land area, 36,879) with an estimated population in 1957 of 2,678,700 (2,660,000 Africans, 7,900 Europeans and 10,800 Asians and other races).

The seat of Government is Zomba (est. pop., 1956, 5,500), other centres being Blantyre and Limbe in the Shire highlands, ΨFort Johnston (on Lake Nyasa), Lilongwe, Mlanje and Mzimba.

FINANCE

	1956–57	1957–58*
Revenue	£6,270,584	£8,415,006
Expenditure	6,033,740	8,568,491

* Estimated.

In 1953, the Government of the Federation of Rhodesia and Nyasaland assumed responsibility for the servicing of the public debt of the Protectorate, then amounting to £6,228,488. Since then the public debt has been increased by an estimated £4,350,000. The Nyasaland Government is itself responsible for servicing that part of the debt incurred since 1953.

GOVERNMENT

The Government consists of the Governor and an Executive and Legislative Council, the former being nominated. The legislative council is presided over by a Speaker, appointed by the Governor, who is not a member of the council, and consists of *ex officio* and official members appointed by the Governor, unofficial non-African members elected by direct vote and unofficial African members elected by electoral colleges.

In 1944 and 1945 African Provincial Councils were established in each of the three provinces. These councils, which are advisory, are composed of chiefs and other responsible African members under the presidency of the Provincial Commissioner.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55′ S. lat. and 5° 42′ W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with an estimated population at Dec. 31, 1957 of 4,682. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. A phormium (flax fibre) and lacemaking industry has been established. Ψ St. James's Bay, on the north-west of the Island, possesses a good anchorage.

Government

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of up to 4 official and 3 unofficial members. The Governor is also assisted by an Advisory Council of up to 10 unofficial members chosen to represent, as far as possible, all unofficial sections of the community, the Governor alone making all ordinances.

CAPITAL, Ψ Jamestown, population (1956), 1,568.

Governor, His Excellency Robert Edmund Alford, C.M.G. (1958) ..... (+*allce.*) £1,500

ASCENSION

An isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55′ 55″ S. lat. and 14° 25′ 55″ W. long. It is said to have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabitated till 1815, when the English took possession of it; on Dec. 31, 1957, the population was 434. Ascension was administered by the Board of Admiralty until 1922, when by Royal Letters Patent it became a Dependency of St. Helena, and was transferred to the Colonial Office. Ψ Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited from January to May by the sea-turtle, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

Resident Magistrate, A. R. Harrison.

TRISTAN DA CUNHA

Is the chief of a group of islands of volcanic origin lying in lat. 37° 6′ S. and long. 12° 2 W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles and in 1921 the inhabitants numbered 127, increased in 1957 to 290; they are stated to be very long-lived. The main island is about 1,800 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817. William Glass, a corporal of artillery (*died* 1853), remaining at his own request, with his wife and two children. This party, with two ex-Navy men, Alexander Cotton and John Mooney, and three masons imported for the purpose of housing the garrison, formed the present settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1885 many of the able-bodied men were drowned through the loss of a boat, and in 1886 a grant of stores and provisions was made by Parliament. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the former Duke of Edinburgh in 1867. The inhabitants grow potatoes and some vegetables, and possess cattle, sheep, pigs and donkeys. They are also able to earn money by fishing for the canning factory.

From the death of Corporal Glass until 1933 the oldest inhabitant acted as Governor; in 1933 a council of four was set up (with one of its members as Chairman), the chairman, or chief, acting as island spokesman and conducting marriages in the absence of a chaplain. In 1948 an Administrator was appointed by the Governor of St. Helena. The Council now has 24 members, including the Administrator as President, and 6 women members. The separate women's Council has been abolished. Communications with the outside world were infrequent until the outbreak of war in 1939, but have improved since that time. There is now a South African Government meteorological station equipped with wireless. The recent commencement of operations by a South African fishing company has led to more frequent visits of vessels to the island.

CAPITAL, Ψ Edinburgh.

Administrator. G. F. Harris, M.C. (1957).
Resident Chaplain, Rev. P. H. Bell.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ mile wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20′ S. and 9° 44′ W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South African Government and manned by South Africans.

By Letters Patent dated January 12, 1938, the Islands of *Tristan da Cunha, Gough, Nightingale* and *Inaccessible* in the South Atlantic were made Dependencies of the Island of St. Helena.

SEYCHELLES

The Seychelles Islands, in the Indian Ocean, which number altogether 92, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By Letters Patent of Sept., 1903, they were erected into a separate colony. The principal islands of the group are Mahé (56 sq. miles), Praslin (6,700 acres), Silhouette (4,900 acres), La Digue (2,500 acres), Curieuse (900 acres), Félicité (689 acres), North Island (525 acres), St. Anne (500 acres), Providence (500 acres), Frigate (700 acres), Denis (340 acres), Cerf (290 acres), and Bird, or Sea Cow Island (160 acres), and the total area of the Colony, with dependencies, is estimated at 156½ square miles; the dependencies are the Amirantes, Alphonse, Bijoutier, St. Francois, St. Pierre, the Cosmoledo Group, Astove, Assumption, Coëtivy, Aldabra and Farquhar Island. The population on June 30, 1956 was estimated at 40,417. Although only 4° S. of the Equator the islands are healthy, the death-rate in 1956 being 12·0 per 1,000 and the birth-rate 36·1 per 1,000. There are 28 Roman Catholic and Church of England and Government primary schools, and Government technical and homecraft centres. There are also 5 private schools. There are 2 secondary grammar and 2 secondary modern schools. Aldabra, one of the dependencies of the Seychelles, and about 630 miles from Mahé, is famous for the gigantic land tortoises, while the unique double coconut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 *ex officio* members and 5 unofficial members appointed by the Government, and by a Legislative Council of 6 official and 6 unofficial members, 4 of whom are elected.

SIERRA LEONE

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs to be used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony, including those portions administered as Protectorate, lies along the coast, extending from the boundary of French Guinea—north of the mouth of the Scarcies River—to the boundary of Liberia at the mouth of the Mano River, a distance of approximately 210 miles; having an approximate area of 2,500 square miles. Those portions of the Colony which are strictly administered as Colony (viz. the Sierra Leone Peninsula, Tasso Island, Banana Islands, the township of Bonthe on Sherbro Island and York Island) cover areas totalling approximately 271 square miles, with a population (1949) of approximately 125,000, of whom about 600 were resident Europeans and about 900 resident Asiatics. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes; a babel of tongues is thus to be heard in the streets of Freetown. The total area of the Colony and Protectorate is about 28,000 sq. miles, and the total population about 1,860,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 212 miles, lying between 6° 55′, and 10° N. lat., and the extreme breadth from east to west is 207 miles, between 10° 16′ and 13° 18′ of W. long. For administrative purposes the Protectorate is divided into 3 Provinces covering 12 Districts, each administered by a Commissioner. The principal peoples are the Limbas and Korankos in the north; the Temnes in the centre, and the Mendis in the south.

Communications.—A railway runs inland from Freetown to Pendembu (227½ miles) and a branch line of 83 miles extends in a north-easterly direction from Bauya to Makeni. There are 2,984 miles of road in the country, of which 1,674 miles are trunk routes, maintained by Government, and 1,310 miles feeder routes, maintained by local authorities. Of the trunk routes, 152 miles are bitumen-surfaced. The Posts and Telecommunications Department maintains a trunk line network of 951 miles of telephone and telegraph routes connecting Freetown with the Colony and Protectorate. Telegraph services exist between Freetown and 60 towns in the Protectorate. Trunk telephone facilities are available between Freetown and 24 centres in the Protectorate by landline, carrier and radio-telephone.

Education.—In 1957 there were 497 primary schools with 41,832 boys and 20,049 girls on the rolls, and 24 secondary schools with 3,953 boys and 1,971 girls enrolled. Fourah Bay College provides University and other post-secondary courses. There are 6 teacher training institutions.

The total expenditure in 1957 was approximately £1,562,609.

FINANCE

	1956	1957
Public revenue	£9,585,738	£10,358,296
Public expenditure	9,846,278	9,351,285
Net public debt (Dec. 31)	4,410,582	5,660,582

TRADE

	1956	1957
Total imports	£23,093,100	£28,238,510
Total exports	13,184,605	18,345,713
Imports from U.K.	11,475,655	11,606,297
Exports to U.K.	6,797,112	7,384,319

The principal exports are iron ore, palm kernels, diamonds, cocoa, piassava, raw coffee, chrome ore, ginger and kola nuts. Some of the largest diamonds known have been found in the Colony; in 1943 one of 530 carats and in 1945 one of 770 carats. The chief imports are cotton piece goods apparel, ale and stout, artificial silk piece goods, machinery, motor vehicles, petroleum products, potable spirits, wheaten flour, tobacco, cement, corrugated iron sheets, sugar, soap, fish and fish preparations, electrical machinery, apparatus and appliances and rice.

GOVERNMENT

Under the Constitution of 1956, there is a House of Representatives consisting of the Speaker (who is not an *ex officio* member of the House or a person who holds any public office), 4 *ex officio* members, fifty-one elected members and 2 nominated members. 24 members are elected in the Colony and 37 elected in the Protectorate. The House has full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council of 4 official and not less than four persons, who shall be elected members of the House of Representatives, and who shall be styled Ministers, selected and appointed by the Governor. There is thus an unofficial majority in both the House of Representatives and the Executive Council. Eight of the unofficial members of the Executive Council hold ministerial portfolios, and the ninth is a Minister without portfolio.

SINGAPORE

(*See* MALAYA)

SOMALILAND PROTECTORATE

The Somaliland Protectorate occupies part of the north-east horn of the African Continent along the south of the Gulf of Aden up to 49° E. longitude. It is bordered to the west by French Somaliland (Djibouti) and Ethiopia, and to the south and east by Somalia (ex-Italian Somaliland). The territory covers an area of approximately 68,000 square miles, and lies between 11° 27′ north latitude and 42° 40′ and 49° east longitude. The interior of the Protectorate is characterized by an elevated plateau rising towards the north to an altitude of from 2,000 to 7,000 feet, and descending in scarps and broken hills to the coastal plain which varies in width from 30 to 60 miles. Vegetation consists largely of nutritious grasses and thorn and acacia trees, which furnish good grazing for camels, sheep and goats.

The nomadic population is estimated at from 500,000 to 700,000, and consists entirely of various Moslem Somali tribes of the Qadrayeh, Ahmediyeh and Salahiyeh sects. The life and wealth of the people is centred round their stock (camels, sheep and goats). Agriculture is confined to small but increasing areas with sufficient rainfall. Frankincense and myrrh are found in the east. The coastline abounds in fish, and the presence of oil and minerals is suspected in the interior. The chief exports are meat on the hoof, skins and hides. Game in the Protectorate includes lion, leopard, kudu, ostrich and numerous types of gazelle.

Climatic conditions are governed by the south-west monsoon (Kharif) which blows from May to September, and the north-east monsoon which lasts from November to March. Much of the interior is generally cool and healthy owing to its elevation.

The Egyptians bought the port of Massawa in Eritrea in 1864 and subsequently spread their

jurisdiction south to Zeilah and Berbera. As they were pre-occupied by events in the Sudan and the rise of the Mahdi, the Egyptians withdrew from the Somali coast in 1884. On July 20, 1887, the Powers were notified that a British Protectorate had been established on the Somali Coast from Ras Jibuti to Bender Ziada. Its boundaries were later defined by treaties with France, Italy and Ethiopia; but they are still artificial. The frontiers between ex-Italian Somaliland and the Protectorate, save for the Bender Ziada Enclave, and those between Ethiopia and the Protectorate have been demarcated.

The Protectorate was invaded by Italian forces on August 4, 1940; and after resistance against greatly superior numbers the British forces were evacuated on August 18, leaving the Italians temporarily in occupation. British sovereignty was restored in 1941 in the course of the East African campaign.

A treaty signed in November 1954 reaffirmed Ethiopian sovereignty over the Haud and Reserved Areas, land to the south of the Protectorate, recognised by earlier treaties to be Ethiopian territory but traditionally used by Somali tribes as grazing grounds. Under the 1954 agreement, the Somalis retain their grazing rights and a staff of liaison officers looks after their needs in the areas.

SOUTH EAST ASIA

OFFICE OF THE COMMISSIONER-GENERAL FOR THE UNITED KINGDOM IN SOUTH EAST ASIA

Commissioner-General, His Excellency Sir Robert Heatlie Scott, G.C.M.G., C.B.E. £6,000
Deputy Commissioner-General, A. M. MacKintosh, C.M.G.

The appointment of Commissioner-General for the United Kingdom in South East Asia, whose headquarters are at Phoenix Park, Singapore, was first made in 1948, being a combination of the responsibilities of two appointments, that of Governor-General of the Malayan Union and the Colony of Singapore with authority also in Borneo, and that of Special Commissioner in South East Asia, a diplomatic appointment established in 1946 primarily for co-ordinating measures to meet the critical supply situation in that area at that time.

The main task of the newly appointed Commissioner-General was to co-ordinate British policy, including defence, in South East Asia, and he was responsible to both the Colonial Secretary and the Foreign Secretary in London. In addition he was made Chairman of the British Defence Co-ordination Committee (Far East). In 1955 the Commissioner-General became also the United Kingdom Representative on the Council of the South-East Asia Treaty Organisation.

When Sir Robert Scott succeeded Mr. Malcolm MacDonald as Commissioner-General in October, 1955, the form of appointment was changed. Sir Robert Scott holds his appointment from the Prime Minister, to whom he reports direct as well as to the two Secretaries of State.

The Commissioner-General has the personal rank of Ambassador.

TANGANYIKA

The *Trust Territory of Tanganyika* (formerly *German East Africa*, 1884–1918) occupies the east central portion of the African continent, between 1°–11° 45′ S. lat. and 29° 20′–40° 38′ E. long. The Territory is bounded on the N. by Kenya and Uganda; on S&W. by Lake Nyasa, Nyasaland and N. Rhodesia; on S. by Portuguese E. Africa; on the W. it is bounded by the Belgian trust territory of Ruanda-Urundi and Belgian Congo; on the E. the boundary is the Indian Ocean. Tanganyika has a coast-line of about 500 miles and an area of 361,800 square miles (including 20,650 square miles of water). The coast-line extends from the mouth of the Umba to the mouth of the Rovuma.

The greater part of Tanganyika is occupied by the Central African Plateau from which rise many mighty mountains, including Mt. Kilimanjaro, the highest point in the Continent of Africa (19,340 ft.) and Mt. Meru (14,979 ft.). The Rovuma, Rufiji, Pangani, Wami and Ruvu rivers flow into the Indian Ocean; the Mara and Kagera into Lake Victoria; the Malagarasi into Lake Tanganyika; the Songwe into Nyasa; and the Rungwa and Lupa-Songwe into Lake Rukwa. A *National Park*, created in the Ngorongoro-Serengeti area of the Northern and Lake Provinces, covers several thousand square miles of the finest game country in Africa.

The native population consists mostly of tribes of mixed Bantu race. The 1957 Census figure for non-African residents is: Asian, 77,000, European, 21,000, other non-African, 25,000. The African population is estimated at 8,365,666. Swahili, the language of the coastal people, is understood throughout the country, and forms an invaluable *lingua franca*. It has been adopted as the basic standard dialect for literature, both for educational and general purposes.

Expenditure by Government on education in 1957 was £4,744,000. In 1957 there were 721 Government and Native authority African primary schools, and 1,921 voluntary agency assisted primary schools. The total primary school enrolment was

355,632. There were 221 middle schools for boys and 40 for girls. Government or Native authorities managed 89 of the boys' and 10 of the girls' schools. The enrolments were 29,359 boys and 6,152 girls. There were 10 secondary schools run by Government and 16 by voluntary agencies. The enrolments were 2,759 boys and 230 girls. Five teacher-training centres were maintained by Government and 23 by voluntary agencies. The number of students in training was 1,602 men and 614 women. Facilities for post-secondary education are provided by the University College of Makerere at Kampala, where there were 182 Tanganyika students, and at the Royal Technical College of East Africa, Nairobi. Vocational training is given at Ifunda and Moshi Trade Schools; at Dar es Salaam Technical Institute and the Tengeru Natural Resources School.

Educational facilities for Europeans are administered by the Education Department and financed from the European Education Fund, which derives its revenue from Education Tax paid by Europeans, fees in Government European schools and a contribution from Government. There are eight Government primary schools, of which three are boarding schools, and 16 private schools receiving financial assistance from the Fund, as well as nine unassisted private schools. There is also a Government correspondence course for children who cannot attend a school. In 1957 there were 2,404 primary pupils. There is one Government secondary boarding school, at Kongwa, which had 290 pupils in 1957. A new grant-aided secondary school, St. Michael's and St. George's, will be opened at Iringa in January, 1959, and the school at Kongwa will be closed down.

As in the case of European education there is a separate authority for Indian Education with its own fund. There are Government primary and secondary schools in Dar es Salaam and Tanga, but most of the educational facilities for Indians are provided by non-Government schools receiving grants in respect of staff, buildings and equipment; in 1957 there were 115 of these assisted schools.

Production, etc.—The economy is primarily agricultural and industry, other than mining, is mainly concerned with the processing of primary products.

Sisal, tea and sugar, and the treatment of mineral ores, are processed by the producers themselves. Cotton ginning, coffee and tobacco curing are operated at commercially run establishments to which the raw produce is brought.

Established industries include meat and vegetable canning and the manufacture of a variety of meat products for local consumption and export; the manufacture of fabricated steel work, mining and agricultural machinery, storage tanks, tin cans and containers, paints and varnishes and bottling factories. Other industries are tanning, the manufacture of macaroni, coir and sisal mat manufacture, leather works, wire nails, textile dyeing and printing, fruit juice and fruit canning, breweries, soap factories, brick and tile works, furniture making, rubber and canvas footwear and rubber products, shipbuilding and ship repairing.

The value of Tanganyika's principal exports in 1957 was: sisal, £9,480,000; coffee, £7,140,000; raw cotton, £6,580,000; diamonds, £3,290,000; lead ore, £1,130,000; groundnuts, £1,070,000; cashew nuts, £1,510,000; hides and skins, £1,220,000. Other exports include castor, sesame and sunflower seeds, copra, cottonseed oil cakes, wood and timber, beeswax, unmanufactured tobacco and gold.

Live Stock.—In 1957 there were 7,057,000 cattle, 2,885,000 sheep, 4,233,000 goats, 18,500 pigs, 127,000 donkeys and 250 horses in the Territory.

Minerals.—The value of mineral production in 1957 was £5,530,000. Principal exports were as follows: diamonds, £3,290,000; gold, £678,000; lead concentrates, £882,000; sheet mica, £70,000; salt, £85,000; tin concentrates, £12,000; tungsten concentrates, £11,000; gypsum, £18,000.

Communications.—The Railways in Tanganyika are operated by the East African Railways and Harbours Administration. They are metre gauge and comprise the following lines:—*Tanga Line.* Tanga to Moshi, 218 miles, with a branch line 54 miles in length from Moshi to Arusha. There is a connection with the Kenya and Uganda Section at Kahe near Moshi. *Central Line.* Dar es Salaam to Kigoma on Lake Tanganyika, 780 miles, with branch lines from Tabora to Mwanza on Lake Victoria (236 miles); and Kaliuwa to Mpanda (131 miles). *Southern Province Line.* Mtwara to Nachingwea (132 miles) with a branch to Masasi (24 miles). Steamers run on Lakes Victoria (to Uganda and Kenya) and Tanganyika (to Rhodesia and the Belgian Congo). Railway road services operate over 2,200 miles, the main routes being from Morogoro to Korogwe (178 miles), Dodoma to Arusha (273 miles), Dodoma to Mbeya (406 miles), Itigi to Mbeya (305 miles) and Morogoro to Iringa (200 miles). A first-class bitumen-surfaced road, 131 miles long, runs from Namanga (on the Kenya border) to Himo, *vid* Moshi and Arusha. New roads between Dar es Salaam-Morogoro-Iringa and Tanga-Korogwe have been completed. The Tanganyika section of the Cape to Cairo road, from the Northern Rhodesian border to the Kenya border is 810 miles in length and a new mountain section of this road, north of Mbeya, has just been re-aligned. A section of the East–West road from Morogoro to Dodoma is nearing completion.

Tanganyika has an extensive telephone and telegraph network consisting of 66 telephone exchanges and 199 telegraph offices. These services are available to Kenya and Uganda. A radio telephone service is also available to most countries of the world, to suitably equipped ships in East African coastal waters within 400 miles of Mombasa and to certain ships in the North Atlantic. There are 172 Post Offices.

There is a bi-weekly direct air service between London and Dar es Salaam operated by East African Airways Corporation. Internal air services are operated by the Corporation, which connects with the daily London to Nairobi services. There are daily airmail services between Dar es Salaam, Nairobi, Mombasa, Tanga and Zanzibar.

Ψ The chief seaports are Dar es Salaam, Tanga, Lindi, Mtwara and Kilwa. Dar es Salaam has three deep-water berths and Mtwara two. Tanga is a lighterage port.

FINANCE AND TRADE

	1957–58	1958–59
Estimated Revenue:		
Territorial	£19,027,000	£19,787,000

Total Imports	£42,234,000	£47,000,000
Total Exports	48,315,000	43,123,000
Imports from U.K.	13,337,523	11,236,870
Exports to U.K.	10,351,718	9,926,772

CAPITAL, Ψ Dar es Salaam. Population (1957), Europeans, 4,479; other non-natives, 30,900; Africans, 93,363; total, 128,742.

GOVERNMENT

The Trust Territory of Tanganyika is administered by a Governor, who is assisted by an Executive

Council of 3 *ex officio* members, 6 official members and 7 unofficial members. The Legislative Council, presided over by a Speaker, has a membership of 67. There are 34 seats on the Government side of which 15 are held by *ex officio* members and the remaining 19 seats are filled by Government officials and by unofficials, with no fixed proportion between officials and unofficials or between races.

On the Representative side there are 33 members, made up of 11 members of each of the three main races—one of each race for each of the ten constituencies, and the remaining three members representing the general interests of the territory. Hitherto representative members have been nominated by the Governor but in 1958 there were elections in five constituencies. Elections will be held in the remaining areas in 1959. The representatives of general interests will continue to be nominated.

Governor and Commander-in-Chief, His Excellency Sir Richard Gordon Turnbull, K.C.M.G., *assumed office* July, 1958 (*and* £2,500 *Duty Allowance*)..... £5,500
Private Sec., B. Eccles.
Chief Secretary, A. J. Grattan-Bellew, C.M.G., Q.C..... 3,400
Minister for Constitutional Affairs, J. Fletcher-Cooke, C.M.G..... 3,100
Attorney-General, J. S. R. Cole, Q.C..... 3,200
Financial Secretary and Minister for Finance and Economics, C. E. Tilney, C.M.G..... 3,200
Minister for Natural Resources, A. E. Trotman, C.M.G..... 3,100
Minister for Local Government and Administration, E. G. Rowe, C.M.G. 3,100
Minister for Lands and Mineral Resources, A. H. Pike, C.M.G., O.B.E..... 3,100
Minister for Social Services (vacant) 3,100
Minister for Communications and Works, Col. W. L. Rolleston, C.M.G., O.B.E. .. 3,100
Speaker of the Legislative Council, Sir Barclay Nihill, K.B.E., M.C., Q.C. 1,500

Chief Justice, Sir Edward Davies..... 3,500
Puisne Judges, G. M. Mahon; E. D. W. Crawshaw; E. J. E. Law; E. B. Simmons 2,900

Director of Education, W. W. Lewis-Jones, C.B.E. 2,900
Senior Provincial Commissioners, S. A. Walden, C.M.G.; M. J. B. Maloban, C.M.G., M.B.E. 2,000
Director of Public Works, F. H. Woodrow, C.B.E. 2,900
Director of Agriculture, A. P. S. Forbes .. 2,900
Director of Veterinary Services, J. E. R. Roe, O.B.E. 2,900
Commissioner of Police, G. S. Wilson..... 2,900
Director of Lands and Surveys, C. Mace, O.B.E. 2,900
Director of Establishments, W. Wenban-Smith, C.B.E..... 2,900
Labour Commissioner, K. L. Sanders, O.B.E., E.R.D..... 2,900
Director of Water Development and Irrigation, W. A. Guthrie, O.B.E. 2,900
British Council Representative, W. R. Keight, M.B.E.
Trade Enquiry Office in London, The East African Office, Grand Buildings, Trafalgar Square, W.C.2.

TONGA

The Tongan or *Friendly Islands* form a self-governing State under the protection of Great Britain by Treaty made in 1900. These islands are situated in the Southern Pacific some 300 miles to the E.S.E. of Fiji, with an area of 270 square miles, and population (September 26, 1956) of 56,838, made up of 55,156 Tongans and 1,682 others, including 277 Europeans. The largest island, Tongatapu, was discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30′ S., and 173° and 177° W. Nukualofa, on the island of Tongatapu, is the seat of government. The present Queen Salote Tubou, G.C.V.O., G.B.E., succeeded her father the late King George Tubou II on April 12, 1918. The constitution provides for a Government consisting of the Sovereign, a privy council and cabinet, a legislative assembly and a judiciary. The legislative assembly has 21 members, with a Speaker, and includes the Ministers of the Crown, the two Governors of island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially. Soil generally is fertile, the principal export is copra. Revenue 1956–57 £T731,633; expenditure £T613,121 There is no debt. Total imports (1957) £T1,810,721; total exports £T2,106,770. The total shipping cleared in 1957 was 126,604 tons. Tongan currency is on parity with Australian currency in relation to sterling.

British Agent and Consul, A. C. Reid (1957) (*and duty allowance* £200) £2,700.

TRINIDAD AND TOBAGO

(*See* WEST INDIES)

THE UGANDA PROTECTORATE

The territories now comprised within this Protectorate came under British influence in 1890. The present limits are approximately as follows:—On the north, the Sudan; on the east, the western boundary of Kenya Colony; on the south, Tanganyika Territory and Belgian Ruanda-Urundi; and on the west, the eastern boundary of the Belgian Congo. Within these boundaries lie Lake Victoria (part), Lake Edward (part), Lake George, Lake Albert (half), Lake Kyoga, Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to the Sudan frontier post at Nimule. Total area, 93,981 square miles, including 13,689 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) *Buganda* (East Mengo, West Mengo, Masaka and Mubende).

(2) *Eastern* (Teso, Busoga, Bugisu, Bukedi, Mbale Township).

(3) *Western* (Bunyoro, Toro, Ankole and Kigezi).

(4) *Northern* (Acholi, Lango, West Nile and Karamoja).

The estimated population of Uganda (1956) is 5,593,000, composed as follows: Africans 5,527,000; Indians 54,300; Europeans 8,400; others 3,300. About 2,500,000 Africans, who occupy the Central and Southern parts of the Protectorate, speak Bantu languages of which the most important is Luganda (the language of the Baganda tribe, from whom the present name of the Protectorate was originally derived). Ki-Swahili in a debased form is also spoken as a trading and, in a few districts, administrative language. The tribes occupying the North of the Protectorate are closely related to various tribes in the South of the Sudan. They speak a series of widely differing languages, now distinguished as belonging to the Sudanian, Nilotic and Nilo-hamitic clusters.

Development.—A five-year development plan for the period July, 1955–July, 1960 has been drawn up, involving the expenditure of approximately £34,000,000.

A dam has been erected at the Owen Falls on the Nile, near Jinja, to provide hydro-electric power for industrial development. A generating capacity of 90,000 kW. is now available. The potential generating capacity of the dam is 150,000 kW. Power is now available over a wide area.

Mineral resources are mainly concentrated in two widely separated areas. In the west on the slopes of the Ruwenzori Mountains are found limestone, copper, cobalt and salt whilst around Tororo in the east the Sukulu mineral complex includes limestone, magnetite, apatite (phosphate), and pyrochlore (niobium).

In 1952, the Uganda Development Corporation Limited was established with a capital of £5,000,000 now increased to £8,000,000, of which £5,500,000 has been issued. Its object is to promote and assist the further expansion of the economy of the Protectorate by the establishment of enterprises with the co-operation of private capital wherever possible. The Corporation's Technical Development Division also undertakes research into technical aspects of industrial development and its services are available not only to its own associated and subsidiary companies but to industry generally. Developments which the Uganda Development Corporation has sponsored in participation with private enterprise include the mining and production of copper and cobalt from Kilembe, in the Ruwenzori Range, the successful exploration of the apatite and pyorochlore deposits at Tororo, and the manufacture of textiles at Jinja from locally grown cotton.

A subsidiary of the Corporation, the Uganda Cement Industry Limited, at Tororo, can produce sufficient cement to meet all Uganda's requirements with a surplus for export. The Corporation is also concerned through subsidiaries with fish marketing, building, hotel development, cattle ranching and tea growing.

Education.—Separate schools are provided for members of the African, Asian and European communities, though in 1957 an experiment was tried in public and private schools for children of all races. The majority of African schools are managed by voluntary agencies, especially by Mission Societies. Substantial grants are provided by Government towards teachers' salaries, boarding and equipment, and there are about 266,000 children in grant-aided primary schools and about 19,000 in post-primary institutions, including training colleges and technical schools. There are 13,500 in Government and grant-aided Asian primary schools and 4,200 in secondary schools and training colleges. About 1,400 European children attend Government and grant-aided schools in the Protectorate, but there are no secondary schools in Uganda for European children and the majority of them attend secondary schools in Kenya or the United Kingdom. Approximately £4,400,000 was spent on education, including capital projects, during the financial year 1956/57. Makerere College, the University College of East Africa, is an autonomous inter-territorial foundation. It was granted special relationship with London University in 1949, and London external degrees were awarded for the first time at the end of 1953. In 1957 there were 696 students attending the College, of whom 241 came from Uganda.

Communications.—The main line of the East African Railways in Kenya and Uganda extends from Mombasa, *vid* Nairobi, Tororo, Jinja and Kampala to Kasese near the Belgian Congo border. There are branches from Tororo to Soroti, from Jinja through Mbulamuti to Namasagali on Lake Kyoga, and from Kampala to Port Bell on Lake Victoria. The Railway Administration maintains a regular steamer service on Lake Kyoga between Namasagali and Masindi Port; and on Lake Victoria between Port Bell, Entebbe, Kisumu and Tanganyika Ports. A service is maintained on Lake Albert and the Nile between Butiaba and Nimulo (connected by motor road with Juba in the Sudan) and between Butiaba and the Belgian Congo port of Kasenyi. A road transport service operates between Masindi Port and Butiaba, and a freight service between Butiaba and Kampala. A through service is thus provided by the Railway Administration from Mombasa to the Sudan and the Belgian Congo. The Uganda Public Works Department maintains 458 miles of tarmac road and 2,468 miles of all-weather murram roads connecting the principal towns; the various African local governments between them maintain a further 4,418 miles of all-weather murram roads and 3,881½ miles of lesser murram roads of variable standard. There is a joint East African Posts and Telecommunications Service which operates throughout Kenya, Uganda and Tanganyika. Entebbe has a first-class international airport, and is a principal stopping place on the main B.O.A.C. routes through East Africa. Other airlines operating regularly through Entebbe include Sabena, Central African Airways, and E.A.A.C., Hunting-Clan and Airworks. It is also a stopping point on many charter flights. There are landing grounds at Jinja, Tororo, Masindi, Lomej, Gulu, Soroti, Arua, Lira, Mbarara, Moroto, Murchison Falls, Kisenyi (on Lake George) and Kasese. There are hotels at Entebbe, Kampala, Jinja, Tororo, Masindi, Fort Portal, Kabale, Mbarara, Kichwamba and Masaka.

Production.—Agricultural production is largely in the hands of Africans, the most important crops being cotton, coffee, tobacco, maize and groundnuts. Sugar, coffee and tea are the main crops on non-African estates. The potential mineral wealth is considerable, tin ore, wolfram and copper being won in the Western Province.

FINANCE

A. *Revenue Budget:*

	1956–57 (actual)	1957–58 (estimated)
Revenue	£19,046,812	£20,018,841
Expenditure (excluding loans)	18,260,920	20,818,298

B. *Capital Budget:*

Revenue	£5,542,840	£2,938,568
Expenditure	6,647,086	6,282,851

TRADE

	1956	1957
Total imports	£28,105,774	£28,869,412
Total exports	41,507,723	46,832,577

The Customs Services of Uganda, Kenya and Tanganyika are administered jointly by the Customs and Excise Department of the East Africa High Commission. The country's export trade is mainly in raw cotton, coffee, oil seed cake, tea, hides and skins and groundnuts. The chief imports are cotton fabrics, machinery and transport equipment, base metals and metal manufactures. The trade is chiefly with Great Britain, India, Japan and West Germany.

GOVERNMENT

The Executive Council consists of the Governor and 12 members. Of these 12 members, the Chief Secretary, the Attorney-General and the Minister

of Finance are *ex officio* members. The remaining places are filled by the Ministers of Social Service, of Local Government, of Natural Resources, of Commerce and Works, of Corporations and Regional Communications, of Rural Development and of Land Tenure, the Assistant Minister of Social Services and the present Resident, Buganda, in his personal capacity. The Legislative Council consists of 3 *ex officio* members (the Chief Secretary, the Attorney-General and the Minister of Finance), 13 Ministers and officials and 16 other members (total 33) on the Government side and 30 representative members, of whom 18 are African, 6 Asian and 6 European. The Governor is President of the Council, but the Speaker now normally presides.

The whole territory is under British Administration; but in particular areas local powers are specifically reserved by treaty or "Agreement" to the local tribal government.

There are four "Agreement States," all monarchical in constitution—Buganda, Ankole, Toro and Bunyoro.

Generally throughout the whole country, government has been and still is administered through a system of county, sub-county and parish chiefs, first developed during the latter half of the 19th century in Buganda and extended by British and Ganda influence to all parts of the country. Chiefs consequently are to be regarded everywhere not as hereditary leaders of the original social groups, but as salaried civil servants selected and promoted by merit. Native courts of varying limited jurisdiction deal with cases, both civil and criminal, involving Africans only, but certain classes of cases are reserved to the Protectorate courts. Such native courts are supervised, in Buganda, by a judicial adviser, and elsewhere by the administrative staff, the High Court having appellate powers in such cases in Buganda and exercising appellate and revisional jurisdiction over such courts elsewhere. There are Protectorate Courts dealing with certain reserved offences, and cases in which a non-African is a party. Appeal from these courts lies to the High Court of Uganda and ultimately to the Court of Appeal for Eastern Africa. During the last twenty years a system of councils extending from the parish through the sub-county and county up to the District Councils has been established; the District Councils are being developed as local government bodies which will gradually take over from the Central Government responsibility for certain local services. The Legislative Council of the Protectorate is representative of all races, and has African members from all Districts.

Governor and Commander-in-Chief, His Excellency Sir Frederick Crawford, K.C.M.G., O.B.E. (Jan. 1957) (*and £2,500 duty allowance*) £5,300
Chief Justice, Sir Audley McKisack 3,500
Chief Secretary, C. H. Hartwell, C.M.G. 3,400
Attorney-General, R. L. E. Dreschfield, C.M.G., Q.C. 3,200
Minister of Finance, C. G. F. F. Melmoth 3,200
Minister of Local Government, L. M. Boyd, C.M.G. 3,100
Minister of Social Services, G. B. Cartland, C.M.G. 3,100
Minister for Natural Resources, A. B. Killick, C.M.G. 3,100

THE WEST INDIES

Trade Enquiry Office in London, Trade Commissioner for the British West Indies, British Guiana and British Honduras, 6–10 Bruton Street, W.1.

The West Indies are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30′ to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, *Cuba* (44,000 sq. miles) and *Hispaniola* (Haiti and the Dominican Republic) (30,000 sq. miles), Jamaica and Puerto Rico; II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela; the British colonies in the Lesser Antilles are Barbados, Leeward and Windward Islands and Trinidad and Tobago. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are *Independent*, 12,300 *British*, 3,890 *United States*, 1,350 *French*, 430 *Netherlands*, and 90 *Venezuelan*.

The West India Islands that lie nearest the East have been called the *Windward Islands*; the others the *Leeward Islands*, on account of the winds blowing generally from the eastern point in those quarters.

CARIBBEAN COMMISSION

Kent House,
Port of Spain, Trinidad, B.W.I.

Co-Chairmen, M. Philippe Grousset (*France*); Dr. H. R. van Houten (*Netherlands*); Sir Stephen Luke, K.C.M.G. (*Great Britain*); R. L. O'Connor (*U.S.A.*).

Secretary-General, C. F. Beauregard.
Deputy Secretary-General, J. E. Heesterman.
Administrative Secretary, C. E. P. Erskine-Lindop.

The Caribbean Commission is an international advisory body of which the four member nations —France, Netherlands, the United Kingdom, and the United States—all have departments, colonies or countries associated with them in the Caribbean area. The Commission is an expansion of the original Anglo-American Caribbean Commission which was set up by the Governments of Great Britain and the United States in 1942 "for the purpose of encouraging and strengthening social and economic co-operation between the U.S.A. and its possessions and bases in the area . . . and the United Kingdom and the British Colonies in the same area." The two-nation body was expanded into the present organization when the French and Netherlands Governments accepted invitations to join it at the end of 1945, with the stated purpose of "encouraging and strengthening co-operation among themselves and their territories with a view towards improving the economic and social well-being of the peoples of those territories and . . . of promoting scientific, technological and economic development in the Caribbean area and facilitating the use of resources and concerted treatment of mutual problems, avoiding duplication in the work of existing research agencies, surveying needs, ascertaining what research has been done, facilitating research on a co-operation basis, and recommending further research. . . ." The Commission has two subsidiary bodies—the Caribbean Research Council, which advises the Commission on scientific and technical matters, and the West Indian Conference, a forum attended by the representatives of the peoples of the area, which assembles every two years, and in which matters of common social and economic interest can be discussed. The Commission itself meets approximately once every six months. The most recent meeting was held in Port of Spain, Trinidad, in May, 1958. The Commission issues a monthly magazine, *The Caribbean*, in French and English, and technical publications and reports. The Commission has also sponsored many technical conferences. The Commission's administrative and executive work is carried on by an international Secretariat with headquarters in Port of Spain.

FEDERATION OF THE WEST INDIES

The Federation of the West Indies was set up on January 3, 1958, by Order in Council as provided for in the British Caribbean (Federation) Act, 1956, and consists of ten colonies with dependencies.

Area and Population.—The Federation has an area of 7,900 square miles and an estimated total population of 3,043,000.

Territories	*Area sq. miles*	*Population*
Antigua and Barbuda	170	54,000
Barbados	166	232,000
Dominica	305	64,000
Grenada	133	87,000
Jamaica	4,706	1,624,000
Montserrat	32	14,000
St. Kitts-Nevis-Anguilla	153	55,000
St. Lucia	238	91,000
St. Vincent	150	79,000
Trinidad and Tobago	1,860	743,000

Government.—The Federal Legislature consists of a Senate and a House of Representatives. The executive authority in the Federation is exercised on behalf of Her Majesty by the Governor-General. Legislation by Order in Council may be enacted for the Federation in the United Kingdom on matters relating to defence, foreign relations or the maintenance of financial stability. As to other internal matters, division of legislatory powers between the Federal and Territorial Legislatures is defined in two Legislative Lists, the Exclusive and the Concurrent Legislative Lists. The Federal Government may legislate on matters in either list; Territorial Legislatures have power to make laws for the territory on any subject included in the Concurrent List. In the event of inconsistency between federal and territorial law, the federal law prevails. No federal law is applicable to the Cayman Islands or Turks and Caicos Islands except where explicitly stated.

Governor-General, The Lord Hailes, P.C.

The Senate.—The Governor-General appoints a Senate of 19 members on a basis of 2 members from each Territory except Montserrat (1 member). Senators may not simultaneously be members of the House of Representatives or of the Legislative or Executive Council of a Territory. Bills, other than money bills, may be introduced in the Senate which has a term of 5 years. A quorum of 8 members is required.

President of the Senate, A. M. Lewis (*St. Lucia*).

The House of Representatives.—On March 25, 1958, elections were held in the Federation for the first House of Representatives. The House consists of 45 members elected for a term not exceeding 5 years: from Jamaica, 17; Trinidad and Tobago, 10; other territories, 2 each, except Montserrat (1). An alternate member is elected for Montserrat who does not sit unless the member is absent or the seat vacant. Principal parties contesting the elections were the *Federal Labour Party*, which won 25 seats, and the *Democratic Labour Party* (anti-socialist), 19 seats, the remaining seat being won by the *Barbados National Party*. 26 per cent. of the electorate of 1,500,000 voted. The quorum of the House is 17, of which 4 members must be elected in different territories. The English language is used in the Senate and House of Representatives. On April 20, 1958, Princess Margaret inaugurated the first Federal Parliament at Port of Spain, on behalf of Her Majesty the Queen.

Council of State.—The Council of State consists of the Prime Minister and ten other Ministers, of whom at least three must be Senators. The Council is the principal instrument of policy for the Federation and advises the Governor-General in the exercise of his functions. Ministers are appointed by the Governor-General on the advice of the Prime Minister. The Constitution provides for three persons holding office in the public service of the Federation to be nominated by the Governor-General to attend any meetings of the Council of State and to take part in discussions at such meetings.

COUNCIL OF STATE

Prime Minister, Sir Grantley Herbert Adams, C.M.G., Q.C.
Minister of Finance, R. L. Bradshaw (*St. Kitts.*).
Trade and Industries, C. D. Lacorbiniere (*St. Lucia*).
Natural Resources, F. B. Ricketts (*Jamaica*).
Communications and Works, W. A. Rose (*Trinidad*).
Social Affairs, Mrs. P. Allfrey (*Dominica*).
Ministers without Portfolio, V. B. Vaughan (*Barbados*); N. H. Richards (*Antigua*).

Senators

A. G. Byfield (*Jamaica*); J. L. Charles (*St. Lucia*); J. W. Liburd (*Nevis*).

Judicature.—The Constitution provides for a Federal Supreme Court with jurisdiction *inter alia* in proceedings between the Federation and a territory, or between one territory and another; and for the appointment by the Governor-General of a Chief Justice and three Federal Justices. Responsibility for the initiation and conduct of criminal proceedings is vested in the Attorney-General of the Federation.

Finance.—In each calendar year 1958–1962 the Federal Government will derive its revenue from a mandatory levy on the territorial governments, provided that the total amount levied in a year does not exceed $B.W.I.9,120,000. Each territory is required to contribute proportionately.

CAPITAL.—Ψ Port of Spain, Trinidad (pop. 120,000). FLAG.—"Sun and Seas": white wavy lines on a background of Caribbean blue with an orange sun in the centre.

BARBADOS,

the most easterly of the West India Islands, is situated in 13° 4′ N., and longitude 59° 37′ W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 166 sq. miles, about 68,000 acres being cultivated. The population (Dec. 31, 1957) was 232,227. The principal exports are sugar, molasses, rum, cotton and building lime, and the imports rice, salted meat, corn, salted fish, butter, flour, corn meal, lumber, textiles and chemical fertilizers.

FINANCE

	1956–57	1957–58
Revenue	$ 19,124,815	$20,684,927
Expenditure	16,216,542	19,276,318
Public debt	7,655,728	9,655,728

TRADE

	1956	1957
Total imports	$60,917,500	$68,247,312
Total exports	35,887,300	49,669,694
Imports from U.K.	24,193,143	26,900,023
Exports to U.K.	14,820,547	28,435,996

Barbados $=4s. 2d.

Net tonnage of merchant shipping entered and cleared in 1957, 2,026,586 tons (992,288 tons British).

GOVERNMENT

Barbados has always remained in the possession of Great Britain, by which it was settled in 1627. The Crown has a veto on legislation. The Legislature consists of the Governor, a Legislative Council of 14 members appointed by the Sovereign, and a House of Assembly of 24 members elected every five years by adult suffrage.

A ministerial system of Government was introduced in 1954 and a cabinet system in Jan. 1958. There are a Premier and four other Ministers, responsible for the executive functions of Government except defence and security, personnel, establishment and external affairs.

Governor, Brig. Sir Robert Duncan Harris Arundell, K.C.M.G., O.B.E. (1952) (*plus duty allowance* $4,800)	$14,400
A.D.C., A. N. Fisher	2,640 to 2,880

Premier and Minister of Finance, Education and Police, Dr. Hon. H. G. Cummins, C.B.E.	
Minister of Social Services, Hon. F. E. Miller.	
Minister of Trade, Industry and Labour, Hon. M. E. Cox.	
Minister of Communications, Works and Housing, Hon. R. G. Mapp.	
Minister of Agriculture, Lands and Fisheries, Hon. D. D. Garner.	

Chief Secretary, G. T. Barton, O.B.E.	$11,520
Chief Judge (vacant)	12,000
President of Legislative Council, Dr. Hon. H. G. Massiah, C.B.E.	
Speaker, House of Assembly (vacant).	
Attorney-General, C. A. Burton	10,320
Solicitor-General (vacant)	8,160
Financial Secretary, E. S. S. Burrowes	10,320
Accountant-General, H. S. Jervois	7,630
Auditor-General, C. D. Gittens	7,680
Director of Agriculture, C. C. Skeete, O.B.E.	9,360
Director of Medical Services, Dr. M. A. Byer	9,360
Comptroller of Customs, C. D. Evelyn	7,680
Director of Education (vacant)	8,640
British Council Representative (*Bridgetown*). W. L. Clough.	

The CAPITAL and port is Ψ Bridgetown (estimated pop., 18,000), on the shores of an open roadstead (Carlisle Bay); Ψ Speightstown (pop. 1,200).

JAMAICA,

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42′—18° 32′ North lat. and 76° 11′—78° 23′ W. long.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

Area and Population.—It is the largest and most valuable of the British West Indian Islands, being 148 miles in length and 49 in extreme breadth, containing an area of 4,411 square miles (with Dependencies 4,706 sq. miles). The island is divided into 3 counties (Surrey, Middlesex and Cornwall) and 14 parishes. The census taken on January 4, 1943, shows a total of 1,237,063 persons resident on the island (598,267 males and 638,796 females). The estimated population in 1957 was 1,610,573.

The climate attracts many winter visitors, mainly from U.S.A.

Physical Features.—From the sea-level on all sides of Jamaica a series of ridges gradually ascends towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,402 feet. From these mountains at least 70 streams descend to the north and south shores, but none is navigable except the Black River, and that only for small craft.

Communications.—There are several excellent harbours, and the island is intersected by good roads. There are 246 miles of railway open.

Telegraph stations and post offices are established in every town and in very many villages. The Palisadoes Airport at Kingston is used by British West Indian Airways Ltd., British Overseas Airways Corporation, Pan-American Airways, K.L.M., Trans-Canada Air Lines, Avianca and Resort Airlines, which provide air communications with Europe, North and South America and the Caribbean Islands. The Montego Bay Airport is used by Delta, Chicago and Southern Airlines and the above-mentioned Airlines with the exception of K.L.M. A number of non-scheduled airlines operate through the Colony for non-traffic purposes in accordance with the provisions of International Air Services Transit Agreement.

Production and Industry.—Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world, and the coffee raised in certain districts of the Blue Mountains is of fine quality and fetches a high price. There is an extensive trade in fruits, chiefly bananas, with the U.K. Citrus (and juices), cocoa and pimento are important export crops. Jamaica has developed a breed of dairy cattle known as the Jamaica Hope which is being exported to other tropical countries on an increasing scale. Good beef cattle are also raised. The large bauxite deposits are worked by one Canadian and two American companies; the Canadian company processes bauxite into alumina. Gypsum is also mined. Cement is manufactured locally, the daily output of the factory being 137,000 tons in 1957. There is a textile mill and local factories a so manufacture garments, shoes, paints, corrugated cardboard containers, and small plastic articles.

FINANCE

	1955–56	1956–57
Revenue	£19,328,700	£22,402,474
Expenditure	18,930,910	21,818,584
Public debt	18,210,580	20,696,365

TRADE

Imports from U.K.	22,108,017	22,674,685
Exports to U.K.	17,787,274	25,370,490

* Provisional

Chief exports (1957); sugar, £13,399,453; rum, £1,430,314; bananas, £5,450,348; coffee, £632,600; bauxite, £9,562,859; pimento, £816,302; alumina, £11,910,559; fruit juices, £679,727; cocoa beans, £46,996.

GOVERNMENT

Under the constitution of 1944 there is a Legislative Council (appointed by the Governor) and a House of Representatives of 32 members elected by universal adult suffrage. By an amendment to the Constitution, which came into effect in June 1953, the Executive Council which previously consisted of 10 members, 3 official, 2 nominated and 5 chosen by the House of Representatives, was enlarged to include a Chief Minister, appointed by the Governor, and 8 other ministers chosen by the Chief Minister from the House of Representatives—with executive responsibilities, for Finance, Home Affairs, Education, Housing and Social Welfare, Health, Agriculture, Trade and Industry, Communications and Works, Labour and Development. A further amendment, in 1957, excluded all official members and included two Ministers without Portfolio, also changing the name to Council of Ministers.

Changes in Jamaica Constitution—Council Membership.—Three interim changes in the constitution have come into effect pending a general revision which is under study. These are the removal of nominated official members from the Legislative Council (Upper Chamber), the election by the House of Representatives of an acting Speaker in the absence of the Speaker at any time, and the election by the Legislative Council of an acting president in the absence of the president. Unofficial members now replace the Director of Agriculture and the Director of Education in the Legislative Council. The Attorney-General is now the only *ex officio* member and there are not fewer than 14 nor more than 16 unofficial members.

The President of the Legislative Council and the Speaker of the House are elected respectively from among unofficial members of the Council and members of the House who are not Ministers.

Captain-General and Governor-in-Chief, His Excellency Sir Kenneth William Blackburne, K.C.M.G., O.B.E. (*appt.* Dec. 1957) (*duty allowance* £1,500) £4,800
Chief Minister and Minister of Development, Hon. Norman Washington Manley, M.M., Q.C. 2,500

Attorney-General, Hon. J. L. Cundall, Q.C. 2,500
British Council Representative, Kingston, E. W. Burbridge, O.B.E. .....

The principal city is ΨKingston, the seat of government and the largest port and town, pop. (1957) 162,258.

Kingston is distant from London 4,000 miles; transit, 14 days.

The Cayman Islands

The Cayman Islands, forming a dependency of Jamaica, between 79° 44′ and 81° 26′ W. and 19° 15′ and 19° 46′ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. Population (1943) 6,670. A Commissioner, assisted by an Assembly of Justices of the Peace and vestrymen, administers the islands. The Caymanians are expert sailors and seafaring is the mainstay of the economy. The only local industries are turtle fishing, rope-making and a little shipbuilding.

The principal town is ΨGeorge Town, in Grand Cayman, population (1943) 1,462.

Finance

	1955–56	1956–57
Revenue	£104,551	£114,525*
Expenditure	84,909	102,444*

* Revised estimate.

Trade

	1955	1956
Total imports	£330,175	£450,610
Total exports	66,235	60,710

Commissioner, Maj. A. H. Donald, O.B.E. (+*allce.* £100) £1,700

Stipendiary Magistrate and Judge, R. C. Rattray 1,200

Turks and Caicos Islands

These West India islands geographically form a sort of annexe of the Bahamas group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from which they are distant about 450 miles. They have an area of about 166 square miles, and a population of about 6,500 of which the principal island, Grand Turk, contains about 1,800. ΨGrand Turk is an important cable station. The islands are celebrated for producing some of the finest salt in the world. Other exports are sisal, crawfish and conches. A considerable number of men are employed overseas in the Bahamas. There is a U.S. Air Force base and a Naval facility at Grand Turk, and a government-owned airstrip at South Caicos, at present used mainly for emergency purposes only.

Finance

	1955–56	1956–57
Revenue	£88,726	£54,651
Expenditure	98,078	94,502

The deficit between revenue and expenditure is met by grant-in-aid from the U.K. Treasury.

Trade

	1955	1956
Total imports	£125,800	£143,218
Total exports	48,600	52,207

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. The Legislature of Jamaica has the power to pass laws applying to the Islands. The Supreme Court of Jamaica is a Court of Appeal.

Commissioner, E. G. Lewis, O.B.E. (+*allce.* £100) £1,500

THE LEEWARD ISLANDS

The Leeward Islands consist of the four colonies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher, Nevis and Anguilla; (3) Montserrat; and (4) the British Virgin Islands (*see* pp. 766–7); all having their own Legislature. These colonies are administered by a Governor to whom the Administrators are subordinate. By the Leeward Islands Act, 1956, the federation of the colony of the Leeward Islands was abolished and each of the four presidencies became a colony, and the Federal Executive and General Legislative Councils were dissolved. In each colony there is an elected majority in the Legislature. In Antigua and St. Christopher-Nevis-Anguilla, there is also a ministerial system of Government. The estimated population of the Leeward Islands at December 31, 1956, was 131,644.

Leeward Islands

Area 422 sq. miles.

Population (1956 estimated), 131,644.

Governor, His Excellency Sir Alexander Thomas Williams, K.C.M.G., M.B.E. (1957) £3,000

Chief Justice of Leeward and Windward Islands, C. H. V. Archer 2,280

Chief Secretary, O. R. Kelsick, D.F.C. ... 1,750

Asst. Chief Secretary, E. H. M. Edwards ..... £900 to £1,200

Puisne Judges (*Leeward and Windward Islands*), K. L. Gordon; J. L. Wills; P. C. Lewis; G. L. Taylor 1,680

Attorney-General, W. E. Jacobs 1,680

Economic and Financial Adviser, O. L. Williams 1,680

Commissioner of Police, H. G. Seward 1,320

Principal Auditor, M. F. Ollerenshaw 1,350

(1) Antigua and Barbuda

Antigua is the seat of government and residence of the Governor of the Leeward Islands. It lies in 17° 6′ N. lat. and 61° 45′ W. long., and is nearly 108 square miles in area with a coast line of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which one central sugar factory has been erected. Cotton is now planted on a large scale and the island also exports molasses, tomatoes and rum. The population, with Barbuda (estimated, 1956) was 54,228.

Finance and Trade

	1954	1955
Revenue	£898,347	£1,270,531
Expenditure	858,063	1,288,171
Public debt	53,427	48,739
Total imports	1,545,224	2,154,375
Total exports	541,323	1,025,208

Government

The Legislative Council (as reconstituted 1951) consists of the Administrator, 2 official members, 3 nominated and 8 elected members.

Administrator (vacant) (*plus* £300 *allce. and house*) £1,740

Financial Secretary, P. N. Reynolds (*acting*) ..... £900 to £1,200

Magistrate (vacant) 1,050

Senior Medical Officer, K. H. Uttley, M.D. .. 1,500

Labour Commissioner, C. A. Rodgers 1,140

Director of Agriculture, M. Park, O.B.E. ... 1,600

Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35′ N., long. 61° 42′ W. Area, 62 square miles. Population, 1,000. The island is flat and mostly stony, producing cotton, corn and ground-nuts. Wild deer are found, and there is good tarpon and other fishing.

Warden, J. H. Joseph (*and quarters*), £660 to £750.

Redonda is uninhabited.

Capital, ΨSt. John. Population (1948), 11,000.

(2) ST. KITTS-NEVIS WITH ANGUILLA

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they have a population (1956) of 55,335, and a total area of about 153 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population 1956, 35,019), the principal island, was the first possession of the British West Indies to be colonized (1623); it is situated in lat. 17° 18′ N. and long. 62° 48′ W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Ψ Basseterre, is a port of registry.

Nevis (population 1956, 15,193) is separated from St. Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton and coconuts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,596 feet. The chief town, Ψ Charlestown, is a port of entry.

Anguilla (population 1956, 5,123) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

Finance and Trade

	1955	1956
Public revenue	£913,598	£970,955
Expenditure	937,950	1,085,191
Public debt	193,458	206,281
Imports	1,942,605	2,132,300
Exports	1,948,244	2,038,113

Government

The Administrator is assisted by an Executive Council and a Legislative Council. The Executive Council consists of the Governor of the Leeward Islands (who seldom sits), the Administrator, two official members, one nominated unofficial member and five members chosen by the Legislative Council from among the elected members of that body. The Legislative Council consists of two official members, three nominated members and eight elected members. Since January 19, 1956, three of the five elected members in the Executive Council have held the portfolios of Ministers of Trade and Production, Public Works and Communications and Social Services respectively.

Administrator, Lt.-Col. Hon. H. A. C. Howard (1957) (*+allce.* $2,000) $8,640
Treasurer, Collector of Customs and Registrar of Shipping, C. A. Jacobs (*acting*) 5,760
Financial Secretary, Hon. P. R. Ellis 6,720
Magistrate, D. F. Johnson 4,752
Crown Attorney, Hon. W. E. Jacobs 6,720
Warden, Nevis, D. S. Brookes 4,464
Warden, Anguilla, J. D. Maloney, M.B.E. . . 4,896
Senior Medical Officer, Dr. J. M. Semple . . 7,776
Agricultural Superintendent, S. H. Abbott . . 5,760
$4·80 = £1

CAPITAL, Ψ Basseterre (St. Kitts). Estimated population (1956), 16,000.

(3) MONTSERRAT,

is situated in 16° 45′ N. lat. and 62° 15′ W. long., 27 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, population (1956) 14,321. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1783. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest well cultivated. The chief exports are sea island cotton, tomatoes, carrots, onions, limes and lime products. There is a wireless station on the island.

CHIEF TOWN. Ψ Plymouth.

(4) BRITISH VIRGIN ISLANDS, *see* pp. 766–7.

TRINIDAD AND TOBAGO

Trinidad, the second largest and most southerly of the West Indian Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 2′—10° 50′ N. lat. and 60° 55′—61° 56′ W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,864 square miles, and a population estimated (June 30, 1956), at 742,500 (including Tobago). The racial groups at the 1946 census were: African 47 per cent., East Indian 35 per cent., Mixed or Coloured 14 per cent., European 3 per cent., Chinese 1 per cent. The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). Two mountain systems, the Northern and Southern Ranges, stretch across almost its entire width and a third, the Central Range, lies somewhat diagonally across its middle portion; otherwise the island is mostly flat. The highest peaks are in the Northern Range (Aripo 3,085 ft., El Tucuche 3,072 ft.). The climate is tropical with temperatures ranging from 70° to 90°F. and a rainfall ranging from 100 inches in the north east to 50 inches in the west. There is a well-marked dry season from January to May and a wet season from June to December. The nights are invariably cool. The main tourist season is from December to April.

Oil is the principal export. A remarkable phenomenon is the asphalt lake, 114 acres in extent, near the village of La Brea, from which in 1956 141,127 tons of natural asphalt were removed. The soil of Trinidad is rich and productive, the most important products being sugar, molasses, rum, cocoa, coconuts and coconut products, citrus and coffee. Agricultural exports totalled $46,542,512 in 1957.

In 1957 there were 67 Government and 344 denominational (assisted) primary and intermediate schools, with an enrolment of 160,011 and average attendance of 135,252.

In 1957 the Government of the Colony allocated $11,322,070 for expenditure on medical services for hospitals and clinics, malaria, tuberculosis, dental services, leprosy, hookworm, maternity and infant welfare, nutrition and health education.

There are 109 miles of public railway and the total mileage of main and local roads maintained during 1957 was 3,969. There are 174 post offices and postal agencies, 57 of which transact savings bank and money order business. There is an internal telegraph system and two local broadcasting stations.

Trinidad is well served by steamship lines and there are deep water wharf facilities at Port of Spain. Ten international scheduled airlines operate to and through Trinidad (Piarco), which acts as a focal point for air traffic between the Americas. There were 12,556 movements of aircraft in 1957. A domestic air service between Trinidad and Tobago is operated by B.W.I.A. Flights in 1957 averaged two per day.

TRADE

	1957
Imports	$356,194,756
Exports	392,979,810
Imports from U.K.	£24,872,444
Exports to U.K.	32,863,510

The chief town and port of entry, ΨPort of Spain (pop. 120,000), is one of the finest towns in the West Indies, with sewerage, electric lighting, trolley-bus and telephone services. Other towns of importance are ΨSan Fernando (pop. 37,800), about 33 miles south of the capital, and Arima (pop. 11,500).

Tobago lies between 11° 8′ and 11° 21′ N. lat. and between 60° 30′ and 60° 50′ W. long., about 75 miles south-east of Grenada, 19 miles north-east of Trinidad, and 120 miles S.W. of Barbados. It was ceded to the British Crown in 1814 and amalgamated with Trinidad in 1888. The island is 26 miles long, and 7½ broad, and has an area of 116 square miles, with a population estimated (1956) at 34,450. It is one of the healthiest of the West Indies and a popular tourist resort. The main town is ΨScarborough (estimated pop. 15,000)

Other Islands.—Corozal Point and Icacos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria, and west of Corozal Point lie several islands, of which Chacachacare, Huevos, Monos and Gaspar Grande are the most important. On Chacachacare is a leper settlement, the Medical Superintendent of which appeals for Sunday and weekly editions of British newspapers.

GOVERNMENT

The Colony is administered by a Governor in accordance with the provisions of the Trinidad and Tobago (Constitution) Order in Council, 1950, as amended in 1956, which provides for Executive and Legislative Councils, on which there are unofficial elected majorities. The Executive Council, which is the chief instrument of policy, consists of the Governor, as chairman, 2 Chief Minister, 2 *ex officio* members, and 7 elected members of the Legislative Council. The Legislative Council consists of a Speaker who presides, 2 *ex officio* members, 5 nominated members and 24 elected members.

Governor of Trinidad and Tobago, His Excellency Sir Edward Betham Beetham, K.C.M.G., C.V.O., O.B.E. (+*allces.* $11,520)	$24,000
Governor's Secretary (vacant)	8,640

THE WINDWARD ISLANDS

The Windward Islands consist of the four colonies of Grenada (the seat of government), St. Vincent, St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent, and (since Jan. 1, 1940) of the Island of Dominica (formerly part of the Leeward Group). The total area is 821 square miles, with a population estimated at 252,000. There is one Governor for the four islands, and in July 1950 the Colonial Office announced that a majority of members of the Legislative Councils of each of the four colonies would be elected by universal adult suffrage.

Governor and Commander-in-Chief, His Excellency Sir Colville Montgomery Deverell, K.C.M.G., C.V.O., O.B.E. (1955) (+£1,000 *duty allce.*)	£3,250
Chief Justice of Windward and Leeward Islands, C. V. H. Arden	2,280

Attorney-General, K. H. C. Alleyene, Q.C.. £1,560
Principal Auditor, T. Byrne..... 1,440

Transit to Grenada from London about 14 days.

Grenada and the Grenadines

Grenada is situated between the parallels of 12° 13′ 11″ 58 N. lat. and 61° 20′–61° 35′ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 133 square miles; estimated population (including some of the Grenadines), 89,100 (1956). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonized by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, sugar cane, cotton, coconuts, limes and fruit are grown. The imports chiefly comprise dry goods, wheat flour, dried fish, bread-stuffs, hardware, etc.

Ψ St. George's (population approximately 6,000), on the south-west coast, is the chief town, and possesses a good harbour.

Finance

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1946), 7,237.

St. Lucia,

the second largest and the most picturesque of the Windward group, situated in 13° 54′ N. lat. and 60° 50′ W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with a population (1957) of 91,102. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are sugar, bananas, copra, coconuts, cacao, edible oil, lime oil, fresh fruit and vegetables.

Ψ Castries, the capital, is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. The town was greatly damaged by fire in 1948, but the work of reconstruction and rehabilitation has been made possible by a grant from H.M. Government. In 1957, 1,086 vessels with a total tonnage of 1,142,642 called at Castries.

Finance and Trade

	1956	1957
Public revenue.....	$4,559,049	$5,527,455

Total exports.....	4,515,371	4,608,675

Government

There is an Executive Council partly nominated and partly elected, and a Legislative Council with a majority of elected members.

Administrator, The Earl of Oxford and Asquith (+*allce.* $2,160) $7,440
Assistant Administrator, E. S. Gittens, O.B.E. 4,911
Accountant-General, A. C. H. Baynes 5,280
Financial Secretary, Col. A. G. Tubb, O.B.E. 5,520
Development Commissioner (vacant).

St. Vincent,

an island about 95 miles west of Barbados, situate in 13° 10′ N. lat. and 60° 57′ W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (1956) of 78,594. In 1846, a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the three other islands of the group. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, copra, coconuts, rum, sugar, bananas, cassava, cocoa, ground provisions, and spices. Its chief imports are foodstuffs (including canned and pickled meat, salted and pickled fish, butter, rice and flour), cotton and woollen piece goods, hardware, lumber, iron and steel manufactures, cement and fertilizers.

There were 48 primary schools with 18,499 pupils enrolled in 1957, and 2 secondary schools with an attendance of 548.

Capital, Ψ Kingstown. Population (1957), 7,200.

Registrar and Additional Magistrate, C. O. R. Phillips ..... $2,880 to $4,080

Dominica

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 1, 1940. It is situated between

15° 20′—15° 45′ N. lat. and 61° 13′—61° 30′ W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 305 sq. miles, or 195,200 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa, copra and vanilla. The population was (1956), 64,000. Included in this total are about 400 Caribs, of whom about 40 are of pure blood. The principal towns are ΨRoseau, on the south-west coast, population 13,500, and Portsmouth, population 2,000.

Education.—There are 47 elementary schools, of which 44 are Government and 3 assisted. Of the 4 secondary schools, 3 receive a grant-in-aid and one is maintained by Government.

Senior Medical Officer, J. S. Robinson, M.B.E. £1,250
Director of Works, T. H. Shillingford £1,500

ZANZIBAR

(*The Zanzibar Protectorate*)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, G.C.M.G., G.B.E., *born* Aug. 26, 1879; *succeeded* Dec. 9, 1911.
Heir-Apparent, Seyyid Abdullah bin Khalifa, C.M.G., *born* Feb. 12, 1910.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north to Warskeikh; but since the cession of the coast-line from Ruvuma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadir and Kismayu coasts to Italy in 1904 and 1924 respectively, they are confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head), the islands of Lamu, Manda, Patta, and Siu, for which His Highness' Government receives annual rentals of £10,000 from the Government of Kenya, and £1,000 from Her Majesty's Government in respect of part of the Somali coast-line.

Zanzibar has an area of 640 square miles with a population of 149,575 (1948 Census); Pemba (380 square miles) population, 114,587; total area, 1,020 square miles; total population, 264,162. (Estimated, 1957, 282,000.)

Production, etc.—The islands produce a large percentage of the world's supply of cloves and clove oil (cloves exported in 1956 were valued at £3,924,117 and clove oil at £90,757). They also exported £327,808 of coconut oil and £382,312 of copra in 1955. Other important products are chillies, oil cake, soap, tobacco and coir rope. Rice and cassava are grown extensively for local consumption. The importance of Zanzibar as a port of transhipment and distribution has decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the adjacent mainland coast.

Education.—There are 61 Government primary schools for Arab and African children and 3 for Indians; the 11 grant-aided primary schools are mainly for Indian girls. Five secondary schools are open to pupils from all communities: they are the Government Boys Grammar School, the Government Boys Technical School, the H.H. the Aga Khan Secondary School for Boys; the St. Joseph's Convent School for boys and girls and the Government Girls Secondary School. Students are sent for higher education, including degree courses, to Makerere College, Kampala, the Nairobi Royal Technical College, and institutions in the United Kingdom and India. There are government training colleges for men and women primary teachers in Zanzibar. The total enrolment in all Government and grant-aided primary and secondary schools in November, 1956, was 15,424. The total expenditure from local revenue in 1956 was £331,823.

Communications.—There are 206 miles of road suitable for motor traffic in Zanzibar and 80 miles in Pemba. There are 5 post offices in the two islands and a Government telephone system. The city of ΨZanzibar, on the island of the same name, had a population of (1948) of 45,284. It possesses a magnificent harbour, which presents great facilities for shipping and trade generally. Net tonnage of ocean-going steamers which entered the port in 1954 was 1,558,102. Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies.

A civil aerodrome is situated 4 miles south-east of the city, linked with Tanganyika and Kenya by charter and daily scheduled services. There is also an all-weather aerodrome in Pemba linking the island with Zanzibar, Kenya and Tanganyika by regular services with the East African Airways Corporation.

FINANCE

	1955	1956
Revenue	£2,413,477	£2,430,834
Expenditure	2,265,016	2,394,543

Trade

The principal imports are rice, grain, groceries, sugar, tobacco, ivory, petroleum and piece-goods; the exports are cloves, copra, soap, clove oil, coconut oil, oil cakes and coir rope in addition to re-exports of previously imported ivory and piece-goods.

	1955	1956
Imports	£6,702,661	£6,387,050
Exports	6,781,695	6,162,458
	1956	1957

Exports to U.K.	151,641	192,285

Government

Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

The government is administered by a British Resident. His Highness the Sultan presides over a Privy Council, and the British Resident presides over the Executive Council, on which there are 4 *ex officio*, 3 official and 3 representative members, and the Legislative Council of 25 members (4 *ex officio*, 9 official and 12 representative members). In 1957 the first general election for 6 of the representative members was held in the Protectorate.

British Resident, Sir Henry Steven Potter, K.C.M.G. (1954) (*and duty allowance* £1,250) £3,600

Zanzibar is distant 6,850 miles; transit, 20 days by sea; 2 days by air.

THE ARCTIC OCEAN

The Arctic Ocean consists of a deep sea over 2,000 fathoms, on the southern margin of which there is a broad continental shelf with numerous islands. Into this deeper sea there is only one broad channel, about 700 miles, between Greenland and Scandinavia. Behring Strait is only 49 miles wide and 27 fathoms deep. The southern boundary of the Arctic Ocean is the Wyville-Thomson and Faeroe-Icelandic submarine ridge, which separates the North Atlantic from the Norwegian and Greenland Seas. The Norwegian Deep lies between Norway and Jan Mayen and Iceland; it exceeds 1,500 fathoms. The Greenland Deep, of similar depth, lies between Spitsbergen and Greenland. These two depressions are separated by a somewhat deeply submerged ridge from the east of Jan Mayen to Bear Island, south of Spitsbergen. A shallow ridge from the north-west of Spitsbergen to Greenland separates the Greenland Sea from the deep North Polar Basin. This extends from the north of Spitsbergen and Franz Josef Land to the north of the New Siberia Islands and of the North American Arctic Archipelago.

Another more shallow depression is Baffin Bay, less than 1,000 fathoms. This is separated from the North Atlantic by a submarine ridge. Barent's Sea, between Spitsbergen, Norway and Novaya Zemlya, and the Kara Sea, between Novaya Zemlya and the Siberian coast, are respectively below 200 and 100 fathoms.

The total area of the Arctic Sea is about 5·5 million square miles, of which 2·3 million square miles are probably covered with floating ice.

CROWN AGENTS FOR OVERSEA GOVERNMENTS AND ADMINISTRATIONS

4 Millbank, S.W.1.

The Crown Agents act as commercial and financial agents in the United Kingdom for the Governments of oversea territories, including Colonies, Protectorates, etc., and for many municipalities and public authorities in those territories. They also transact business for certain independent Governments such as Ceylon, Ghana, the Federation of Malaya, and Iraq, Jordan and Libya.

Crown Agents, Sir George Seel, K.C.M.G.; Sir Alfred Savage, K.C.M.G.

Secretary to the Crown Agents, A. H. Hicks, C.B.E.

IRELAND

See also Northern Ireland, pp. 687–690; Republic of Ireland, pp. 811–14.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between 51° 26′ and 55° 21′ N. latitude and from 5° 25′ to 10° 30′ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough *Neagh* (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Boderg*, *Forbes*, *Ree* and *Derg*, and the Erne Chain of *Gowna*, *Oughter*, *Lower Erne*, and *Erne*; *Melvin*, *Gill*, *Gara* and *Conn* in the north-west; and *Corrib* and *Mask* (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with −17° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaids-tir, Laigins-tir, Mumans-tir and Kunnak-tir). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermod MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermod's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII., Sir Edward Poynings, as Lord Deputy had passed at the *Parliament of Drogheda* (1494) the act later known as *Poynings' Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII. began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. *St. Patrick* was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

GOVERNMENT

The Constitution.—The Constitution of Ireland, approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the re-integration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.—The President of Eire—*Uachtarán na hÉireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves Dáil Éireann on the advice of the *Taoiseach* (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.—The Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—*Seanad Éireann.*

Dáil Éireann is composed of 147 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the Taoiseach and 49 are elected; three by the National University of Ireland, three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

The Executive.—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The Taoiseach is appointed by the President on the nomination of Dáil Éireann. The other members of the Government are appointed by the President on the nomination of the Taoiseach with the previous approval of Dáil Éireann. The Taoiseach appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the Taoiseach in the event of the death, permanent incapacitation, or temporary absence of the Taoiseach. The Taoiseach, the Tánaiste and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or Seanad Éireann, but not more than two may be members of Seanad Éireann.

CAPITAL

Dublin (*Baile Átha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1956, its population was 539,476. There are many notable public buildings in the City, among them the two Cathedrals of Christ Church and St. Patrick, the Bank of Ireland (formerly the House of Parliament) and Trinity College (the only constituent College of the University of Dublin). University College is a constituent college of the National University of Ireland. A large export trade of agricultural products passes through the city and there is a considerable brewing industry, while there is an increasing amount of light manufacturing.

Other cities and towns are Cork (pop. 80,011), Dún Laoghaire, formerly Kingstown (47,553), Limerick (50,886), Waterford (28,878), Galway (21,219), Dundalk (20,154), Drogheda (17,008), Sligo (12,947), Wexford (10,838), Bray (10,856), Kilkenny (10,607), Tralee (10,928), Clonmel (10,697) and Athlone (9,393).

THE PRESIDENT

Uachtarán na hÉireann (*President of Eire*), *elected* June 25, 1945, *re-elected* June 25, 1952, Seán T. Ó. Ceallaigh (Seán T. O'Kelly).

Secretary to the President: Domhnall Ó Donnabháin (Daniel J. O'Donovan).

MEMBERS OF THE GOVERNMENT

Taoiseach, Éamon de Valéra	£3,000
Tánaiste and Minister for Industry and Commerce, Seán F. Lemass	2,125
Minister for Health and Minister for Social Welfare, Seán Mac an tSaoi (Seán MacEntee)	2,125
Minister for Finance, An Dr. Séamas Ó Riain (Dr. James Ryan)	2,125
Minister for External Affairs, Proinsias Mac Aogáin (Frank Aiken)	2,125
Minister for Justice, Oscar Mac Tréinfhir (Oscar Traynor)	2,125
Minister for Agriculture, Pádraig Mac Gabhann (Patrick Smith)	2,125
Minister for Lands, Erskine H. Childers	2,125
Minister for Education, Seán Ó Loingsigh (John Lynch)	2,125
Minister for Local Government, Niall Bléine (Neil T. Blancy)	2,125
Minister for Defence, Caoimhghin Ó Beoláin (Kevin Boland)	£2,125
Minister for the Gaeltacht, Micheál Ó Móráin (Michael Moran)	2,125
Minister for Posts and Telegraphs, Seán Mac Urmhúmhain (John Ormonde)	2,125

THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). Dáil Éireann is composed of 147 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 21 years and are not disqualified by law have the right to vote. The same Dáil does not continue for a longer period than seven years, but a shorter period of five years has been fixed by existing legislation. The present (16th) Dáil was elected on March 5, 1957, and met on March 20, 1957.

Party Strength (Dáil Éireann)

*** Members of Dáil Éireann, other than Ministers and Parliamentary Secretaries, are allowed £52 (and members of Seanad Éireann £39) a month towards expenses, together with free travelling facilities between Dublin and their constituencies.

Parliamentary Secretaries.

Parliamentary Secretary to the Taoiseach and to the Minister for Defence. Donnchadh Ó Briain.
Do. to Minister for Social Welfare, Micheál S. Ó. Cinnéide (Michael J. Kennedy).
Do. to the Minister for Finance, Gearóid Mac Phartholáin (Gerald Bartley)
Do. to Minister for Industry and Commerce, Micheál Hilliard (Michael Hilliard).

Attorney-General, Aindrias Ó Caoimh, A.S.
Secretary to the Government, Muiris Ó Muimhneacháin (Maurice Moynihan).
Assistant Secretary to the Government, Nioclás Ó Nuallain, Ph.D. (Nicholas G. Nolan, Ph.D.).

United Kingdom Ambassador to the Republic of Ireland

H. E. Sir Alexander Clutterbuck, G.C.M.G., M.C., 39 Merrion Square, Dublin.
Counsellor, G. Kimber, C.M.G.
First Secretary, G. D. Anderson.
Military Attache, Brig. R. N. Thicknesse.
Trade Commissioner, K. R. Allen.

Diplomatic Representatives Abroad

The Holy See: L. T. McCauley (*Ambassador*).
Argentina: T. J. Horan (*Chargé d'Affaires*).
Australia: W. B. Butler (*Chargé d'Affaires*).
Austria: Mrs. J. MacNeill (*Minister*).
Belgium: D. R. McDonald (*Minister*).
Canada: T. J. Kiernan (*Ambassador*).
France: W. P. Fay (*Ambassador*).
Federal Republic of Germany: W. Warnock (*Minister*).
Great Britain: H. J. McCann (*Ambassador*), 17 Grosvenor Place, London, S.W. 1.
Italy: D. A. Devlin (*Minister*).
Netherlands: B. Gallagher (*Minister*).
Norway: J. D. Brennan (*Minister*).
Portugal: T. V. Commins (*Chargé d'Affaires*).
Spain: M. Rynne (*Ambassador*).
Sweden: J. D. Brennan (*Minister*).
Switzerland: Mrs. J. MacNeill (*Minister*).
Turkey: D. A. Devlin (*Minister*).
U.S.A.: J. J. Hearne (*Ambassador*).

THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach.* The Courts of First Instance include a High Court—*Ard-Chúirt*—invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, subject to exceptions and regulations prescribed by law. No law may, however, be enacted excepting the question of the validity of any law from the appellate jurisdiction of the Supreme Court.

Chief Justice, Hon. Conor Maguire	£4,850
President of the High Court, Hon. Cahir Davitt	3,700
Judges, Supreme Court, Hon. Martin C. Maguire; Hon. Cecil Lavery; Hon. T. C. Kingsmill Moore; Hon. C. O'Daly, each	3,700
Judges, High Court, Hon. Kevin Haugh; Hon. Kevin J. Dixon; Hon. F. G. O. Budd; Hon. R. McLoughlin; Hon. Thomas Teevan; Hon. George Murnaghan; Hon. W. G. Shannon (*ex officio*) each	3,250
Master of High Court, John O. Leary, S.C.	

DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister of Defence. To aid and counsel the Minister for Defence on all matters in relation to the business of the Department of Defence on which he may consult it, there is a Council of Defence consisting of the Parliamentary Secretary to the Minister, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 14,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending March 31, 1959, provide for approximately 25,000 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. Minimum term of enlistment for the Army is three years in the Permanent Defence Force with, in most cases, nine years in the Reserve Defence Force. Suitable men may complete twenty-one years service in the Permanent Defence Force. For the Naval Service, enlistment is for six years in the Permanent Defence Force and six years in the Reserve Defence Force. The Naval Service comprises three corvettes and auxiliary vessels. The Defence Estimates for the year ending March 31, 1958, provide for an expenditure of £6,208,560.

FINANCE

	1957–58 (Actual)	1958–59 (Estimated)
Revenue	£122,921,000	£124,733,000
Expenditure	139,220,000	136,474,000

The expenditure figures include certain services of a capital nature regarded as proper to be met from borrowing. Issues for these services in 1957–58 amounted to £10,417,000 and for 1958–59 are estimated at £11,741,000.

The estimated *Revenue* for 1958–59 includes: Customs and Special Import Levy, £47,558,000; Excise, £17,415,000; Estate, etc., Duties, £2,660,000; Income Tax, Sur-tax and Super-tax, £24,965,000; Corporation Profits Tax, etc., £2,925,000; Motor Vehicle Duties, £5,400,000; Stamp Duties, £1,985,000; Post Office Services, £8,600,000.

The principal items of estimated *Expenditure* for

1958-59 are Debt Service, £24,812,000: Agriculture, land division, etc., £19,164,000: Army, £6,399,000: Police, £4,060,000: Education, £13,487,000: Social Insurance, £4,251,000: Social Assistance, £20 561,000: Health Services £8,198,000: Postal Services, £7,163,000: Superannuation, £5,198,000.

The *Gross Debt* on March 31, 1958, was £412,000,000 with *Assets* £230,000,000, leaving the *net* total of the debt at £182,000,000.

RELIGION

(Census of 1946)

Catholics	2,786,033
Protestant Episcopalians	124,849
Presbyterians	23,870
Methodists	8,355
Others	12,020
Total	2,955,107

EDUCATION

Primary Education is directed by the State (4,869 schools with an enrolment of 503,381, and average daily attendance 86·8 per cent.). Secondary Education is in private hands and is largely conducted by Religious Orders (489 recognized schools with 66,221 pupils 12–20 years of age). Vocational (Continuation and Technical) Education is conducted by 38 local Committees in 260 permanent schools (excluding 12 residential schools of domestic training and one day trades preparatory school) and a large number of temporary centres (22,491 whole-time day students and 66,133 other students). There are two Universities in Dublin, of which the National University has 3 constituent colleges (Cork, Galway and Dublin) with 517 Professors, etc., and 6,426 students; and Trinity College, Dublin with 179 Professors, etc., and 1,967 students in the academic year 1956–57. The estimated State expenditure on education in 1958-59, excluding administration and inspection, is Primary £9,225,530; Secondary £2,171,840; Vocational £1,246,960; Science and Art £186,870. The vote for Universities and Colleges for 1958–59 amounts to £670,220, while in addition grants of £85,000 are provided in respect of the Faculties of General Agricultural and Dairy Science.

PRODUCTION AND INDUSTRY

Agriculture and Live Stock.—In 1957 there were 1,176,900 acres under corn crops, 568,500 under root and green crops, 400 under flax, 12,300 under fruit, and 1,944,700 under hay, a total of 3,702,800 acres. The principal produce in 1957 was: oats, 426,000 tons: wheat, 502,000 tons: barley, 401,000 tons: turnips, 2,142,000 tons: potatoes, 2,319,000 tons: mangolds, 1,181,000 tons. sugar beet, 795,000 tons: and hay, 4,045,000 tons. The *Live Stock* included 4,452,600 cattle, 3,723,400 sheep, 906,700 pigs, and 260,700 horses.

Minerals.—1,481 persons were employed in the coal mines in 1956 and 236,000 tons of coal won.

Sea Fisheries.—6,112 persons were employed in the fisheries in 1957, the total value of all fish excluding salmon landed being £1,147,000.

COMMUNICATIONS

Railways.—There were (1957) 2,221 miles of railway of which 2,039 miles are of standard (5ft. 3 in.) gauge. 17,479,000 passengers and 2,940,208 tons of merchandise were conveyed. The gross receipts (1956) were £19,048,485* and the net loss £1,254,145.*

*Figures relate to the year ended March 31, 1957 for Córas Iompair Éireann, to the year ended Sept. 30, 1956 for the Great Northern Railway and to the calendar year 1956 for other railways.

These figures include receipts from road transport services, canals, etc., operated by the railway companies.

Road Motor Services.—In 1957 road motor vehicles carried 311,899,000 passengers, the gross receipts being approximately £5,689,000.

Shipping.—In 1957 the number of ships with cargoes and in ballast entered at the various Ψ ports, Dublin, Cobh (Queenstown), Dún Laoghaire (Kingstown), Cork, Galway, Waterford, Rosslare, Limerick and Foynes, Dundalk, etc., was 9,322 of 8,805,000 tons, of which 1,640 (1,291,000 tons) were Republic of Ireland flag, and 4,904 (5,140,000 tons) British.

CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, is on the main transatlantic air route. In 1957 the airport handled 443,585 passengers and 33,891,392 lb. of cargo.

Dublin Airport, 6 miles N. of Dublin, serves the cross-Channel and European services operated by the Irish national airline *Aer Lingus* and other airlines. During 1957 the airport handled 494,473 passengers and 18,683,288 lb. of cargo.

Licensed private aerodromes include: Weston, 9 miles W. of Dublin; Dunmore East, 10 miles S.E. of Waterford; Coonagh, 2 miles W. of Limerick; Oranmore, 5 miles E. of Galway; Killarney Racecourse, 1 mile S.W. of Killarney; Farmers' Cross, 4 miles S.W. of Cork.

OVERSEAS TRADE

* Births based on 50 per cent. sample. § Estimated.

Note.—Deaths exclude foetal death and deaths among armed forces overseas. Birth and death rates for 1950 are based on the population at census of April 1; for other years as estimated on July 1. Birth rates for 1946 are based on total population including armed forces overseas. For other years armed forces overseas are excluded.

IMMIGRATION AND EMIGRATION

From 1820 to 1957, 41,061,612 alien immigrants were admitted to the United States. Of the inward total in 1957, 27,750 were born in the United Kingdom; 49,339 in Germany and Austria; 6,875 in Scandinavia; 19,061 in Italy; and 4,180 in France. The total number of alien immigrants admitted in the year ending June 30, 1957, was 326,867. During the same period 23,933 residents left the United States for permanent residence abroad.

MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolutions.

Year	Marriages	Per 1,000 Pop.	Estimated Divorces	Per 1,000 Pop.
1946	2,291,000	16·4	610,000	4·3

The total number, including countries not specified, was 10,161,168 in 1950 compared with 11,419,138 in 1940. 1950 figures include a total of 180,024 from all Asian countries, 120,297 from countries in America other than Canada and Mexico and 86,375 from European countries not listed above.

PHYSIOGRAPHY

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°–49° North and longitude 67°–124° 30′ West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 3,561 miles on the Atlantic, 1,872 miles on the Pacific, 2,908 miles on the Gulf of Mexico, and 2,470 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follow:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Highlands, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, mined chiefly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,495 feet above sea-level, and the lowest point of dry land is in Death Valley, 280 feet below sea-level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

GOVERNMENT

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 28 were admitted after such organization), and of 2 organized Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-second Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933 and Feb. 27, 1951), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election to one additional term. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the *first Monday after the second Wednesday in December* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *sixth day of January* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the

representation from each State having one vote. There is also a Vice President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a salary of $100,000 with a taxable expense allowance of $50,000 and a non-taxable travelling allowance of not exceeding $40,000. Under the XXIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT

President of the United States (January 20, 1953, to January 20,1961), DWIGHT D. EISENHOWER, *born* Oct. 14, 1890, *sworn in as President* (in succession to Harry S. Truman) Jan. 20 1953. *Republican.*
Vice-President, Richard Milhous Nixon, of California, *born* Jan. 9, 1913, *elected* Nov. 4, 1952. *Republican.*

THE CABINET

(Each $22,500).

Secretary of State, John Foster Dulles, of New York (*born* Feb. 25, 1888), *appointed* Jan. 21, 1953.
Secretary of the Treasury, Robert B. Anderson, of Texas (*born* June 4, 1910), *appointed* May 29, 1957.
Secretary of Defence, Neil H. McElroy, of Ohio (*born* Oct. 30, 1904), *appointed* Aug. 7, 1957.
Attorney-General, William P. Rogers, of Maryland (*born* June 23, 1913) *appointed* Jan. 1958.
Postmaster-General, Arthur E. Summerfield, of Michigan (*born* Mar. 17, 1899), *appointed* Jan. 21, 1953.
Secretary of the Interior, Fred. A. Seaton of Nebraska (*born* Dec. 11, 1909), *appointed* May 29, 1956.
Secretary of Agriculture, Ezra T. Benson, of Utah (*born* Aug. 4, 1899), *appointed* Jan. 21, 1953.
Secretary of Commerce, Sinclair Weeks, of Massachusetts (*born* June 15, 1893), *appointed* Jan. 21, 1953.
Secretary of Labour, James Paul Mitchell, of New Jersey (*born* Nov. 12, 1900), *appointed* Oct. 9, 1953.
Secretary of Health, Education and Welfare, Dr. Arthur S. Fleming, of Ohio (*born* June 12,1905), *appointed* July 1958.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 301,164. The *Senate* consists of 96 members. The salary of a Senator is $22,500 per annum, with mileage at 20 cents per mile each session. The *House of Representatives* consists of 435 Representatives besides a delegate from Alaska, a delegate from Hawaii, and a resident commissioner from Puerto Rico. The salary of a Representative is $22,500 per annum with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On July 1, 1950, there were 47,860,228 men and 49,556,137 women of voting age, excluding members of the armed forces overseas.

THE EIGHTY-FIFTH CONGRESS

Noon of Jan. 3, 1957, to Noon of Jan. 3, 1959.

President of the Senate, Richard M. Nixon, *Calif.*	$30,000
Speaker of the House of Representatives, Sam Rayburn, *Tex.*	$30,000
Secretary of the Senate, Felton M. Johnston, *Miss.*	
Clerk of the House of Representatives, Ralph R. Roberts, *Ind.*	

Members of the 85th Congress were elected on Nov. 6, 1956.

The 85th Congress is constituted as follows:

Senate.—Democrats 49, Republicans 47. Total 96.

House of Representatives.—Democrats 233, Republicans 198. Four vacancies. Total 435.

LIBRARY OF CONGRESS

(National Library)

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, Congress purchased Thomas Jefferson's library of some 6,000 volumes as the basis for a new collection, which was partially destroyed by fire in 1851. Since that date increased (1) by regular annual appropriations by Congress; (2) by deposits under the copyright law; (3) by gifts and exchanges. The collection is the largest in the Western Hemisphere and one of the largest in the world. Exclusive of unbound newspapers and parts of serials awaiting binding, its collections contained, on June 30, 1958, more than 36,900,000 items. These included more than 11,400,000 volumes and pamphlets; 161,000 bound newspaper volumes; 15,680,000 manuscripts; 2,380,000 maps and views; 35,000 microcards; 155,000 reels and strips of microfilm; 121,000 reels of motion pictures; 1,980,000 pieces of music; 104,000 phonograph records; 414,000 "talking books" for the blind; 2,960,000 photographic negatives, prints and slides; 582,800 fine prints and reproductions, 100,000

microprint cards, and other materials such as broadsides, photostats, posters and miscellaneous items. The main building was first occupied in 1897. Considerable additions, including an annex completed in 1939, have brought the total cost to approximately $28,880,000 and the floor space to 1,563,189 square feet (nearly 36 acres), with more than 250 miles of shelving. During the fiscal year 1958, $16,757,356 was available for use by the Library. Of this sum $11,770,500 was appropriated directly by Congress; $3,781,381 was transferred from other Government agencies and $1,205,425 was derived from gifts. During the fiscal year 1958, the Library registered copyright claims for 238,935 works and received $945,231 as earned receipts from fees. From the sale of 28,351,083 catalogue cards to approximately 10,000 subscribers and the sale of other library publications, it also transferred to the Treasury $1,558,762 in earned receipts. As the national library, the Library of Congress serves other Government agencies, other libraries throughout the world, scholars, and the general public as well as the Congress. In addition to providing reference service on the materials in its collections and publishing catalogues and other guides, the Library administers a national programme to provide books for the blind, sponsors music concerts, literary readings and other cultural affairs, and participates in international professional and cultural activities.

Librarian of Congress, L. Quincy Mumford.
Chief Assistant Librarian, Rutherford D. Rogers.
Deputy Chief Assistant Librarian, Lucile M. Morsch.
Assistant Librarian for the American Collections, David C. Mearns.
Director, Administrative Department, Robert C. Gooch.
Director, Legislative Reference Service, Hugh L. Elsbree.
Director, Processing Department, John W. Cronin.
Director, Reference Department, Roy P. Basler.
Law Librarian, W. Lawrence Keitt.
Register of Copyrights, Arthur Fisher.

THE SMITHSONIAN INSTITUTION

The Mall, Washington, 25 D.C.

Secretary, Leonard Carmichael.
Assistant Secretaries, A. R. Kellogg; J. L. Keddy.
Administrative Assistant, Louise M. Pearson.
Treasurer, T. F. Clark.
Chief, Editorial and Publications Division, P. H. Oehser.
Librarian, Ruth E. Blanchard.

Board of Regents
Chancellor, The Chief Justice of the U.S.
Chairman, Executive Committee, R. V. Fleming.

Bureaux of the Smithsonian Institution

United States National Museum
Director, A. R. Kellogg.

Museum of Natural History
Head Curators, F. M. Setzler; Herbert Friedmann (*acting*); J. R. Swallen; G. A. Cooper.

Museum of History and Technology
Director, F. A. Taylor.
Head Curators, R. P. Multhauf; P. W. Bishop (*acting*); A. N. B. Garvan; M. L. Peterson.

Bureau of American Ethnology
Director, F. H. H. Roberts, Jr.

Astrophysical Observatory
Director, F. L. Whipple.
Chief, Radiation and Organisms, W. H. Klein (*acting*).

National Gallery of Art
Director, John Walker.
Administrator, E. R. Feidler.
Secretary-Treasurer and General Counsel, Huntington Cairns.
Chief Curator, P. B. Cott.

National Collection of Fine Arts
Director, T. M. Beggs.

Freer Gallery of Art
Director, A. G. Wenley.
Assistant Director, J. A. Pope.

National Zoological Park
Director, T. H. Reed.
Asst. Director, J. L. Grimmer.

International Exchange Service
Chief, J. A. Collins.

National Art Museum
Director, P. S. Hopkins.
Head Curator, P. E. Garber.

Canal Zone Biological Area
Resident Naturalist, M. H. Moynihan.

NATIONAL COMMISSION OF FINE ARTS

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings and public parks, within the D.C. An expenditure not exceeding $35,000 in any one year is authorized by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, David E. Finley.
Members, Felix W. de Weldon; Wallace K. Harrison; Emily L. Muir; Douglas W. Orr; William G. Perry; Michael Rapuano.
Secretary and Administrative Officer, L. R. Wilson.

THE JUDICATURE

The *Federal Judiciary* consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) The *United States Courts of Appeals*, dealing with appeals from District Courts, and consisting of the justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The *93 District Courts*, served by 199 District Court Judges.

THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C.)
Chief Justice, Earl Warren, *Cal.*, *born* March 19, 1891, *appointed* Sept. 30, 1953..... $35,500

Associate Justices (each $35,000)

Name.	Born.	Apptd.
Hugo L. Black, *Ala.*	1886	1937

Supreme Court Officers.

Clerk, John T. Fey.
Deputy Clerks, Edmund P. Cullinan; Richard J. Blanchard.
Marshal, T. Perry Lippitt.
Reporter of Decisions, Walter Wyatt.
Librarian, Helen Newman.

DEFENCE

Department of Defence.

Secretary of Defence (*in the Cabinet*), Neil H. McElroy (Oct. 9, 1957).
Secretary of the Army (*not in the Cabinet*), Wilbur M. Brucker.
Secretary of the Navy (*not in the Cabinet*), Thomas S. Gates, jr.
Secretary of the Air Force (*not in the Cabinet*), James H. Douglas.

Army.—The Army of U.S. had a strength of 8,291,336 on V.E. Day, reduced by June 30, 1950, to 591,700 (excluding Air Corps). The strength on April 30, 1958, was 905,638.

Navy.—The peak strength of the Navy (including Marine Corps) in the summer of 1945 was 3,855,497. The strength on June 30, 1950, was 454,800, and on April 30, 1958, it was 828,471.

Air.—The U.S. Air Force was formerly the Army Air Corps and directly under command of the War Department. In 1947 an independent Department of the Air Force was established under a Secretary of the Air Force. The Navy and Marine Corps retained separate air organizations. Strength of the Air Force (April 30, 1958), 873,800.

SHIPS OF U.S. NAVY

	1940	1945 Aug. 31	1958 April
Battleships	15	23	..
Attack Aircraft Carriers	4	28	14
Support Carriers	8	71	5
Heavy Cruisers	18	25	14
Light Cruisers	19	48	3
Destroyers and Destroyer-type craft	220	737	249
Submarines	94	234	110

In April, 1957, there were also 3 escort aircraft carriers, 1 small aircraft carrier and 805 miscellaneous patrol ships and auxiliaries.

CAPITAL OF THE U.S.

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the Capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is considered co-extensive) is 69·245 square miles, with a population at the Census of 1950 of 802,178.

The District of Columbia is ruled directly by the President and Congress through a Board of Commissioners appointed by the President, one being chosen from the Engineer Corps of the United States Army and two from civil life.

The *City of Washington*, the Capital of the United States, is considered co-extensive with the District of Columbia. It is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

EDUCATION

State School Systems

Almost every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. In the States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In 1955–56 the total number of children in the United States of 5 to 17 years of age was 37,262,000, of whom 31,163,000 were enrolled in public elementary and secondary schools. The average daily attendance in the public schools was 27,731,000, the average length of school term was 178·0 days, and the average number of days attended by each pupil enrolled was 158·4 days. In 1955–56, 1,138,000 teachers (295,000 men and 843,000 women) were employed. The average annual salary of all teachers was $4,100.

The total revenue receipts for school purposes, excluding balances on hand, was $9,694,000,000. Of this amount, $406,000,000 was received from Federal sources, $3,870,000,000 from State sources and $5,418,000,000 from county and local sources. Current expenditure was $8,159,208,000. $2,581,000,000 was expended for sites, buildings, furniture and equipment and $209,000,000 for interest.

Institutions of Higher Education

In the autumn of 1957 enrolment in institutions of higher education numbered 3,068,417.

Institutions of higher education include universities, colleges, professional schools, teachers' colleges and normal schools, and junior colleges. The 1957 survey of enrolments covered 1,890 institutions classified as follows: 1,397 universities, colleges and professional schools enrolling 2,698,454 students; and 493 junior colleges enrolling 369,963 students. There are 98 institutions of higher education attended predominantly by Negroes, enrolling 78,244 students included in the foregoing figures.

During the school year 1956–57, 340,347 bachelor's degrees were conferred, 222,738 to men and 117,609 to women; 61,955 masters' degrees, 41,332 to men and 20,623 to women; and 8,756 doctor's degrees, 7,817 to men and 939 to women. Education, Business and Commerce, and Engineering, were, in that order, the fields in which most students received baccalaureate degrees. There were 77,722 bachelor's degrees in Education, 46,760 in Business and Commerce, and 31,211 in Engineering. The three leading fields of study for the master's degree were Education (30,972), Engineering (5,233) and Buisness and Commerce (3,270).

The most popular fields of study on the doctorate level were Education (1,533), Chemistry (1,003) and Engineering (596).

Particulars of some of the Universities are: Harvard (13,131 students, including 1,900 women in 1957), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; Yale (7,229 students, including 523 women, in 1957), founded at New Haven, Connecticut, in 1701; Bowdoin, Brunswick, Me. (founded 1794); Brown, Providence, R.I. (founded 1764; 3,773 students, including 1,025 women, in 1957); Columbia, New York, N.Y. (founded 1754; 26,787 students, including 10,055 women, in 1957); Cornell (founded at Ithaca, N.Y., 1865; 11,102 students, including 2,624 women, in 1957); Dartmouth, Hanover, N.H. (founded 1769; 3,039 students in 1957); Georgetown, Washington, D.C. (founded 1789; 5,713 students in 1957); North Carolina, Chapel Hill, N.C. (founded in 1789; 7,186 students, including 1,396 women, in 1957); Pennsylvania, Philadelphia, Pa. (founded 1740; 17,125 students, including 4,540 women, in 1957); Pittsburgh, Pittsburgh, Pa. (founded 1787; 16,075 students, including 3,892 women in 1957); Princeton, Princeton, N.J. (founded 1746); Tennessee, Knoxville, Tenn. (founded 1794; 14,602 students, including 3,880 women, in 1957); William and Mary, Williamsburg, Va. (founded 1693); New York University, founded in 1831 at New York, had 31,068 students, including 7,464 women, in 1957.

Private Schools and Colleges

In 1955–56 there were 3,768,000 pupils in private kindergarten and elementary schools, 823,000 pupils in private high schools and academies, an estimated 50,000 pupils in elementary and secondary departments of private universities and colleges, and 1,309,000 students in privately controlled institutions of higher education. In addition there were some 10,000 pupils enrolled in privately controlled elementary and secondary schools for exceptional children.

RELIGIONS IN U.S.

	1952	1955
Adventist	253,889	277,162
Baptist	17,306,684	18,702,157

GOLD AND SILVER MOVEMENTS

Year	Gold		Silver	
	Imports $	Exports $	Imports $	Exports $
1954	37,853,000	21,731,000	79,699,000	4,523,000
1955	104,592,000	7,257,000	72,932,000	8,331,000
1956	132,667,000	26,562,000	129,068,000	7,049,000
1957	272,641,000	168,332,000	158,354,000	11,163,000

PUBLIC DEBT

On June 30, 1957, the *Federal Public Debt* of the United States stood at $270,527,000,000; the level at the end of fiscal year 1956 was $272,571,000,000.

COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical worker families in 46 cities representative of all cities in the United States) showed a monthly average during the calendar year 1957 of 120·2 (the basic figure of 100 being the 1947–49 average). The average of consumer prices for the first four months of 1958 was: January, 122·3, February, 122·5, March, 123·3 and April, 123·5.

According to figures prepared by the Bureau of Labour Statistics, the index of consumer prices (all items) rose from 118·0 to 121·6 during the calendar year 1957, displaying a persistent upward movement. Each group increased. Transportation rose from 133·1 to 138·9, medical care from 134·7 to 140·8, and food from 112·9 to 116·1. Personal care rose from 121·8 to 127·0, apparel from 107·0 to 107·6, rent from 134·2 to 136·7, and reading and recreation from 109·3 to 114·6. During the first four months of 1958, the consumer price index for all items rose from 122·3 to 123·5. Transportation fell from 138·7 to 138·3 and apparel from 106·9 to 106·7, but all other major groups increased: reading and recreation from 116·6 to 117·0, medical care from 141·7 to 142·7, food from 118·2 to 121·6, personal care from 127·8 to 128·5 and rent from 136·8 to 137·3.

The wholesale price index showed a monthly average during 1956 of 114·3 (the average for the years 1947–49 = 100). The monthly average rose to 117·6 in 1957 and rose further to 119·5 in May, 1958. Wholesale prices for farm products rose from 88·4 in 1956 to 90·9 in 1957 and further to 98·4 in May, 1958. Industrial prices rose from 122·2 in 1956 to 125·6 in 1957, but fell to 125·3 in May, 1958.

PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from $326·9 billion in 1956 to $343·4 billion in 1957. Increases were registered in this period in all types of income: labour income rose by $11·9 billion, business and professional income by $0·7 billion, dividends by $0·2 billion, personal interest income by $1·2 billion, and transfer payments by $2·7 billion. Farm proprietors' income increased by $0·5 billion. Preliminary estimates for May, 1958 (seasonally adjusted annual rate) showed personal income at $344·3 billion, an increase of $1·1 billion over the 1957 level. Labour income fell from $246·1 billion in 1957 to $241·6 billion in May, 1958, a decrease of $4·5 billion. Transfer payments rose from $21·6 billion in 1957 to $26·1 billion in May, 1958, business and professional proprietors' income fell from $28·7 billion in 1957 to $28·0 billion in May, 1958, but personal interest income rose from $18·6 billion in 1957 to $19·7 billion in May, 1958. All other types of personal income also rose from 1957 to May, 1958, except rental income of persons which fell from $10·4 billion to $10·3 billion and dividends, which fell from $12·5 billion to $12·1 billion.

PRODUCTION

AGRICULTURE AND LIVE STOCK

Agriculture.—The total land surface, excluding island possessions and Alaska, is 1,903,824,640 acres, of which about 61 per cent. is in farms. The total number of farms in 1954 (1954 Census of Agriculture) was 4,782,416. The cash income from crops in 1951 was $13,239,000,000; in 1952, $14,257,000,000; in 1953, $14,035,000,000; in 1954, $13,660,000,000; in 1955, $13,663,000,000; in 1956, $14,122,000,000 and in 1957, $13,885,000,000. Cash income from livestock and livestock products in 1951, $19,689,000,000; in 1954, $16,284,000,000; in 1955, $15,879,000,000; in 1956, $16,250,000,000 and in 1957, $17,134,000,000.

Total crop production in 1957 equalled the previous record, despite the smallest total acreage planted or grown since 1919. Overall yield levels were also a record, despite many local and sectional setbacks which delayed planting and slowed harvest of some crops to the latest stage for several years. At 106 (1947–49 = 100), the index of all crop production for the third successive year equalled the record level first attained in 1948. The yield per acre index reached a new record of 127 per cent. This is the fourth successive record figure for this index. The harvested acreage of 50 crops at 319,000,000 was slightly larger than last year, but otherwise, the lowest since the drought disaster year of 1936.

Live Stock on Farms, Jan. 1.

	1956	1957	1958*
All cattle ...	96,804,000	95,502,000	93,967,000
Milch cows.	23,213,000	22,916,000	22,357,000
Hogs.....	55,173,000	52,703,000	51,559,000
Sheep.....	31,273,000	30,840,000	31,328,000
Horses & Mules	3,928,000	3,574,000	3,348,000
Chickens....	382,846,000	396,137,000	370,473,000
Turkeys....	4,923,000	5,799,000	5,477,000

* Preliminary figures.

Livestock and poultry on farms and ranches on January 1, 1958, showed a net decline of 1 per cent. from 1957. Cattle were down 1 per cent., hogs, very slightly, horses and mules, 6 per cent., chickens 5 per cent. and turkeys 6 per cent. Sheep increased 2 per cent.

RECLAMATION

Bureau of Reclamation, Department of the Interior, Interior Building, 18th and 19th Streets (between C and E streets), N.W., Washington, D.C. *Commissioner*, Wilbur A. Dexheimer.

The Bureau of Reclamation constructs and operates irrigation, power and other multiple-purpose projects in the area west of the 97th meridian and is the Federal agency with principal responsibility for water conservation in this region. More than 7,658,801 acres of lands in the arid and semi-arid west can be irrigated by works constructed by the Bureau. In June, 1958, the Bureau had in operation, under construction or authorized, 111 irrigation and multiple-purpose projects. Among them is the *Missouri River Basin project*, with more than 250 units, authorized by the Flood Control Acts of 1944 and 1946. In 1956 construction started on the Colorado River Storage Project which will permit economic expansion in five Western States—Colorado, Utah, Wyoming, Arizona, and New Mexico—in an area of rich resources now virtually untapped. The total harvest from all reclamation projects in 1956 was valued at $952,623,656, increasing the cumulative value of all reclamation harvests since 1902 to $12,349,504,073.

Grand Coulee Dam, on the Columbia River in the State of Washington, the largest concrete structure in the world by volume (10,585,000 cubic yards), and with the greatest hydro-electric power-plant capacity, began operating in March, 1941;

its installed capacity is 1,974,000 kW. The dam will provide storage for the ultimate irrigation of 1,029,000 acres in the Columbia Basin project.

Hoover Dam (Arizona and Nevada), on the Colorado River, is the highest dam in the world (726 ft.), and has an operating power plant with a capacity of 1,249,800 kW., and an ultimate capacity of 1,354,300 kW.

Shasta Dam (602 ft.), on the Sacramento River in California, is the world's second highest. It was completed in 1944, and the power plant has a rated capacity of 379,000 kW.

Hungry Horse Dam, completed in 1952, on the Flathead River in Montana, is 565 ft. high, the third highest in the world. It has a power capacity of 285,000 kW.

MINERALS

The value of mineral production in continental United States in 1957 totalled an estimated $18·3 billion. The comparable value for 1956 was $17·5 billion and for 1955 $16·0 billion.

Nearly three-quarters of the mineral production of the United States (in value) consists of fuels. In 1957 U.S. production of crude petroleum amounted to 2,611 million barrels.

Bituminous coal and lignite produced in 1957 totalled 490,000,000 tons, 2·2 per cent. less than in 1956.

WEIGHTS, MEASURES AND CURRENCY

The *Weights and Measures* in the United States in common use are of British origin and in the case of weights and linear units correspond in large part with those now employed in Great Britain. The *short ton* of 2,000 pounds (20 hundred weight of 100 pounds each) is generally used instead of the *long ton* of 2,240 pounds. The old "Winchester" bushel and the wine gallon and their subdivisions are used instead of the British Imperial units of capacity; 1 U.S. bushel = 0·9689 British bushel, and 1 U.S. gallon = 0·83268 British gallon. The U.S. *liquid quart* is divided into 32 fluid ounces. The Metric System of Weights and Measures is permissive, but is not extensively used except in scientific and pharmaceutical work. The unit of currency is the *dollar* of 100 *cents*. The rate of exchange with sterling will be found on p. 84.

MANUFACTURES

The leading 5 States according to value added by manufacture in the 1954 Census of Manufactures were: New York ($14,149,000,000), Ohio ($10,154,000,000), Pennsylvania ($9,940,000,000), Illinois ($9,642,000,000) and Michigan ($8,734,000,000).

The average number of employees in 1954 for the United States as a whole was 16,135,000, salaries and wages totalling $66,011,000,000. The value added by manufacture (value of output less cost of materials and supplies) was $116,001,000,000.

GEOGRAPHIC DIVISIONS, 1954

Division	No. of Employees	Salaries and Wages	Value added by Manufacture
New England	1,450,000	$ 5,467,000,000	$9,060,000,000
Middle Atlantic	4,306,000	17,909,000,000	31,356,000,000
East North Central	4,612,000	20,951,000,000	36,457,000,000
West North Central	961,000	3,841,000,000	7,068,000,000
South Atlantic	1,781,000	5,706,000,000	10,601,000,000
East South Central	731,000	2,370,000,000	4,694,000,000
West South Central	738,000	2,804,000,000	5,743,000,000
Mountain	191,000	768,000,000	1,495,000,000
Pacific	1,384,000	6,232,000,000	11,287,000,000

MAJOR INDUSTRY GROUPS, 1956

Group	No. of Employees	Payroll	Value added by Manufacture
Food and kindred products	1,707,000	$8,965,000,000	$15,977,000,000
Tobacco manufactures	93,000	278,000,000	1,173,000,000
Textile mill products	1,044,000	3,298,000,000	5,456,000,000
Apparel, etc.	1,271,000	3,612,000,000	5,973,000,000
Lumber and wood products	698,000	2,276,000,000	3,817,000,000
Furniture and fixtures	376,000	1,417,000,000	2,510,000,000
Pulp, paper, etc.	565,000	2,629,000,000	5,609,000,000
Printing and publishing	854,000	4,124,000,000	7,556,000,000
Chemicals and products	760,000	3,889,000,000	12,022,000,000
Petroleum and coal	184,000	1,083,000,000	3,318,000,000
Rubber and products	265,000	1,260,000,000	2,418,000,000
Leather and products	367,000	1,149,000,000	1,882,000,000
Stone, clay and glass	536,000	2,344,000,000	5,036,000,000
Primary metal industries	1,319,000	6,893,000,000	13,848,000,000
Fabricated do. products	1,102,000	5,127,000,000	9,244,000,000
Machinery (except electrical)	1,718,000	8,902,000,000	16,092,000,000
Electrical machinery	1,081,000	4,915,000,000	9,135,000,000
Transportation equipment	1,792,000	9,702,000,000	16,628,000,000
Instruments, etc.	297,000	1,458,000,000	2,690,000,000
Miscellaneous	675,000	2,755,000,000	4,620,000,000
Total	17,178,000	$77,059,000,000	$145,003,000,000

LABOUR IN THE UNITED STATES

Organized Labour.—On December 5, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of Industrial Organizations (CIO), formally established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership is now 16,900,000 (including 987,000 members in Canada). There are also 1,580,000 members of unions not affiliated to the AFL–CIO.

Approximately one-third of the non-agricultural labour force of the United States is estimated to be organized.

Work Stoppages.—There were 3,673 stoppages recorded in 1957, involving 1,390,000 workers and 16,500,000 man-days of idleness. The number of work stoppages beginning in the year was the lowest since the war.

Employment and Unemployment.—The civilian labour force (working population) was 68,965,000 in May, 1958. This includes self-employed, wage and salary-earners, employed and unemployed. Unemployment was estimated at 4,904,000 (7·2 per cent.). In addition there were 1,779,000 temporarily stopped, and 10,371,000 working fewer than 35 hours a week.

Wages.—In March, 1958, gross average weekly earnings by industry ranged from $132·17 per week in electrical work to $43·68 in laundries. The average for all manufacturing was $81·45, a three-fold increase since 1939 but in terms of 1947–49 purchasing power, the increase was 1½ times.

March 1957	Average Weekly Earnings	Hours Per Week	Average Hourly Earnings
Manufacturing	$81·45	38·6	2·11
Durable	87·75	39·0	2·25
Non-durable	73·53	38·1	1·93
Coal Mining:			
Anthracite	73·25	25·0	2·93
Bituminous	96·37	31·7	3·04
Building construction	107·71	35·2	3.06
Electrical work	132·17	38·2	3·46
Gas and Electricity	97·77	40·4	2·42
Wholesale trade	85·57	39·8	2·15
Retail trade (except eating and drinking places)	63·13	37·8	1·67
Laundries	43·68	39·0	1·12

A minimum wages of $1 an hour is set by federal law for employees engaged in interstate commerce or in the production of goods for interstate commerce, or in activities directly essential to such production. The act requires time and a half for all hours over 40 a week. While national averages by industry are generally above the minimum, rates for individuals in some occupations are close to the minimum.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health funds financed by the employer or by employer and employees jointly.

INDIAN POPULATION

On Jan. 1, 1956, the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 483,662. There are many persons of Indian blood who are not enrolled with any recognized tribe, have no rights in tribal property and receive no services from the Government. The States with the largest resident Indian population are: Arizona, 77,300; Oklahoma, 56,300; New Mexico, 53,100; South Dakota, 25,000; Montana, 15,850.

POSTS, TELEGRAPHS AND TELEPHONES

On June 30, 1957, there were 45,222 post offices, postal branches and postal stations in the U.S., handling 59,077,633,000 "pieces" of mail matter. The postal revenue was $2,496,600,000, and the expenditure $3,018,438,000 for the fiscal year of 1957. The telegraphs and telephones are operated by private companies.

On June 30, 1957, the postal savings deposits amounted to $1,462,268,304, a decrease of $303,201,542 since June 30, 1956.

On May 27, 1958, the President signed a measure, enacted by Congress, which granted a general increase in postage rates. This included an increase from 3 cents to 4 cents an ounce on ordinary first class mail, and from 6 cents to 7 cents an ounce on air mail letters. First class letters and air mail comprise approximately 75 per cent. of all mail in the U.S.

GOVERNMENT PRINTING OFFICE

North Capitol and H. Streets, Washington, D.C.

The Office was established by Congress in 1860 and has been in continuous operation from that time. It carries out all the printing and binding ordered by Congress and the departments, independent establishments and agencies of the Federal Government, and provides them with stationery. It also distributes Government publications as required by law, maintains the necessary catalogues and a library of these publications, and prints for sale to the public such documents as are not confidential.

Public Printer, Raymond Blattenberger, N.J., $20,000.

CRIMINAL STATISTICS, U.S.

Crime	No. of Offences 1956	1957
Murder and non-negligent Manslaughter	6,970	6,920
Manslaughter by negligence	5,650	5,740
Rape	20,300	21,080
Robbery	56,770	61,410
Aggravated Assault	96,430	100,110

Roads

In 1956 there were 3,430,000 miles of roads and streets in the United States, of which 3,051,000 miles were in rural areas and 379,000 miles were in urban areas. Surfaced roads and streets account for 2,323,000 miles of the total; 1,107,000 miles are unimproved and graded and drained. State primary roads, including extensions in urban areas, total 425,000 miles (423,000 surfaced). Other roads under State control total 245,000 miles (205,000 surfaced); 2,666,000 miles are under local control (1,675,000 surfaced); and 94,000 miles (23,000 surfaced) are under Federal control.

An estimated total of $8,628,000,000 was spent in 1957 for roads and streets in the United States. Of this total $5,628,000,000 was spent for State highways, $1,601,000,000 was spent for county and local rural roads, $1,277,000,000 was spent for city streets, and $122,000,000 was spent on roads in Federal areas. Capital outlay accounted for 65.6 per cent. of the total expenditures; 24.5 per cent. was spent for maintenance; 4.1 per cent. for administration; 1.8 per cent. for highway police and safety; and 4.0 per cent. for interest on highway bonds.

Motor Vehicles and Taxation.—The number of motor vehicles registered in 1957 in the United States was 67,135,546, an increase of 3.0 per cent. over the 1956 total of 65,153,810. In 1941 the registrations in the U.S.A. were 34,804,134. The State Governments received $1,468,554,000 in 1941 and $4,568,463,000 in 1957, respectively, from motor-fuel, motor-vehicle and motor-carrier taxes. In 1957 the Federal Government received $3,722,269,000 from excise taxes on motor vehicles and parts, tyres and tubes, gasoline, diesel and special fuels and lubricating oil.

Accidents.—In 1957 there were 38,500 deaths caused by motor vehicle accidents. The death rate per 100,000,000 miles of travel was 6.0 in 1957, compared with 6.4 in 1956.

Shipping

The active ocean-going Merchant Marine of the U.S. on June 1, 1958, consisted of 1,937 vessels of 1,000 gross tons and over, of which 905 were privately owned and 32 were government-owned ships under charter or general agency agreement with private companies. There were 2,072 government-owned vessels in the reserve fleets. Of the active vessels, 628 were dry cargo ships, 40 were combination passenger and cargo and 269 were tankers.

Air Transport

United States domestic and international scheduled airlines in 1956 were estimated to have carried 45,943,000 passengers 27,615,100,000 passenger miles. The combined express and freight flown by the scheduled airliners during 1956 totalled 486,534,000 ton-miles. In addition, the airlines flew 152,098,000 ton miles of mail, an increase of 1.169 per cent. over 1948.

Domestic air coach or tourist service is becoming increasingly popular in the United States. During 1955, scheduled domestic airlines flew 6,662,529,000 air coach passenger miles, an increase of more than 25 per cent. over the 1954 total.

Seven principal classes of commercial air carriers can be distinguished in the United States, (*a*) The Domestic Trunk Lines (12); (*b*) Local Service Lines, operating the low-density traffic routes between the smaller traffic centres and between small and large centres (13); (*c*) The International and Overseas Group, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, between foreign countries and into Mexico and the Caribbean (18); (*d*) Territorial Air Carriers, operating in Hawaii (2) and in Alaska (15); other classes are (*e*) Certificated All Cargo Lines (6); (*f*) Helicopter Airmail Operators (3); and (*g*) Non-Certificated Air Carriers, including supplemental and irregular transport carriers (49), air freight forwarders (80), air taxi operators and Alaskan pilot-owners and air carriers.

546 stations of the United States are served by domestic trunk and local service airlines and 6,927 airports of all classes are in use, including 363 military. In 1956, 126,970 persons were employed by the domestic and international airlines.

Air Statistics, 1956

	Domestic Trunk Lines	Local Service Airlines	Territorial Airlines	International Airlines
Revenue passengers	37,598,000	3,453,000	627,000	3,888,000
Revenue passenger miles	21,643,100,000	633,200,000	83,900,000	5,116,400,000

Total revenue plane miles flown	622,100,000	59,500,000	4,600,000	146,000,000

* Express and Freight.

STATE AND LOCAL GOVERNMENT

State Government

Each State has a constitution drafted to suit its own problems. States vary greatly in size, population and character but they are in most respects similar in the form of government organization. Like the National Government, State governments have three branches, legislative, executive and judicial.

State Legislatures.—With one exception, State legislatures consist of two Houses, a Senate and a House of Representatives; Nebraska has a single legislative body. The basis of representation in both Senate and House is the county, counties being combined or divided into districts which return one Senator and one or more Representatives. With a few variations, Senators serve for four and Representatives for two years. Fourteen state and three territorial legislatures now meet annually in regular session and several states are considering proposals for changing to annual regular sessions. In addition, many states whose regular sessions are biennial have special sessions in between.

Most of the business of the State legislature is carried on by committees. A bill, introduced either in the Senate or the House of Representatives, is first considered by a committee of the same house. Public hearings are usually held by committees at which representations may be made by opponents and supporters of the measure. If the committee approves the bill it makes a report to the house, when the bill may be further debated before a vote is taken. When passed by one house it is sent to the other where treatment is much the same. A bill which has been changed by the second house is sent to a " conference committee " of both houses for adjustment and if this is successful the bill is voted on favourably by both houses and sent to the governor for signature when it becomes law. Failing a report by the committee, a bill is not considered by the legislature unless a majority of the house votes for consideration without a committee report. In every State except North Carolina the governor may veto a bill and, ordinarily, prevent it from becoming law. The legislators have a right to vote again on a bill to decide whether it shall become law without the governor's approval; in some cases a two-thirds majority is required.

State Executives.—The chief executive of the State is the governor, who is elected by popular vote for a four year, or, in some States, a two year term. His powers are outlined in the State constitution. The governor may advise the legislature on new laws which he considers necessary and may call special sessions of the legislature to consider such laws. He appoints members of many boards and commissions, subject in some cases to Senate approval. He is head of the National Guard of his State and may use it to keep order if need arises. The governor may pardon persons convicted of crimes by the State courts or reduce sentences. Elected with the governor is a lieutenant governor whose regular duty it is to preside over the Senate and who succeeds if the governor dies or is removed from office.

Other important officers of the executive are the Secretary of State, whose duties concern the official records of the State, publication of the State laws and elections; the attorney-general, chief law officer of the State; the State auditor or comptroller and the State treasurer. There are also many departments and commissions such as labour boards, boards of health, banking commissions and highway commissions. In some States the governor has a considerable control over the work of the other State officials and in others little or none. A civil service system, intended to put much of the work of government offices into the hands of qualified workers not subject to political control and change, has been adopted by some States.

State Courts.—The simplest form of State court is usually presided over by a justice of the peace and hears minor civil and criminal cases. In large cities this work is done by police courts or special municipal courts. More important cases are dealt with in district courts, superior courts, circuit courts or common pleas courts, all dealing usually with both civil and criminal matters. Supreme courts of States deal largely with appeals and references from lower courts. Some States have a large number of special courts such as probate, children's, domestic relations and small debts courts. Judges, usually elected (but in some States appointed by the Governor or by the State legislature) preside over all trials. Many of the court practices in the United States have come from the English courts.

Local Government

Cities.—There is a number of different forms of government organization. Usually there is an elected central council with a mayor or manager to act as head of the organization. The three main forms of city government are (1) *The mayor-council plan.* The oldest type of city government, this compares with National and State organizations. The mayor is elected and usually appoints the heads of departments and many other officers, sometimes subject to the council's confirmation. He may sign or veto city ordinances and in general is responsible for putting them into effect. The mayor may also be required to produce a budget. The council passes the city laws which must not violate the city charter or conflict with State or National laws or constitutions. (2) *The commission form of government.* Three or more commissioners are elected from the city as a whole, rather than from districts or wards, and are given both law-making and law-enforcing powers. One of the commissioners is chairman and is usually called the mayor although his powers may be no greater than those of the other commissioners. Each commissioner supervises the work of one or more of the departments and is responsible for them. (3) *The City-Manager plan.* A small elected council makes city ordinances and decides general policy. It appoints a professional administrator as city-manager. The city manager appoints the heads of departments and some of the other officers; he advises the council on the needs of the city, suggests plans for finance and city improvements and enforces city ordinances. In most cases he holds office as long as the council is satisfied with his work.

County and other Local Governments.—The county, a subdivision of the State usually containing two or more townships and a number of villages, is administered by a board of commissioners or supervisors elected by the voters of the entire county. In recent years a number of counties have appointed County Managers to be responsible to a small board for the county government as a whole. In many townships, officials such as justices of the peace, constables and road supervisors are elected. The voters of some New England townships meet once a year and make their own laws on purely local matters, fix rates, decide how the money is to be spent and elect officials. Village or town government is usually in the hands of a council of elected members and some villages elect a president or mayor and employ local officials.

* Re-elected Nov. 6, 1956. † Died in office. § Assassinated. (*a*) Elected as Vice-President.
‡ Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

TERRITORIES AND PRINCIPAL ISLAND POSSESSIONS OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: the Territory of Alaska (which includes all of the Aleutian Islands east of longitude 167° east of Greenwich); the Territory of Hawaii (including Ocean or Kure Island, and Palmyra Island); Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longtitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of 67,000 in 1957. Nine individual languages are spoken in the Territory. Copra is the only export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570–5578 of the Revised Statutes, are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of Territories, Dept. of the Interior, Washington, D.C.

HAWAII

The Hawaiian (or Sandwich) Islands form a Territory of the U.S. and consist of a chain of 24 (named) islands in the N. Pacific Ocean between 18° 55′—22° 15′ N. lat. and 154° 4′—160° 30′ W. long. Of the 24 islands 9 are inhabited. The total area is 6,435 sq. miles.

For Administrative purposes the Territory of Hawaii is divided into four counties. The county of Honolulu comprises the island of Oahu and all other areas not falling within the other three counties. The other counties are Hawaii, including the island of that name; Maui, including the islands of Maui, Kahoolawe, Lanai and all of Molokai except the leper settlement; and Kauai, including the islands of Kauai and Niihau. The leper settlement on Molokai (where Father Damien worked from 1873–1889) constitutes a fifth "county", Kalawao, which is under the control of the Territorial Board of Health. The estimated population of the Territory of Hawaii on July 1, 1957, was:—

County	Pop.
City and County of Honolulu	416,112
County of Hawaii	62,503
Counties of Maui and Kalawao	44,087
County of Kauai	28,835
Total	551,537

The islands were discovered by Capt. James Cook, R.N., in 1778 (he was killed there in 1779) and formed a kingdom under native rulers until Queen Liliuokalani was driven from the throne in 1893, a republic being proclaimed in 1894. In 1898 the group was annexed by the U.S., being organized as a Territory on June 14, 1900. The Governor is appointed by the President of the U.S. There is a Senate of 15 and House of Representatives of 30 members (to be increased in the 1958 elections to 25 and 51 respectively), the Territory sending an elected Delegate to Congress at Washington, D.C.

The majority of native Hawaiians are Christians. School attendance is compulsory for all children, 6 to 16 years of age. Kindergarten work is offered to 5-year-old children. The University of Hawaii (founded 1907) has an enrolment of 6,736.

The group is of volcanic origin and contains many craters, Haleakala on Maui being the largest in the world. Kilauea and Mauna Loa, on Hawaii, are active volcanoes, with Mauna Kea (13,823 ft. above mean sea level) extinct. The islands are very fertile, and rice, cane sugar, pineapples, coffee, bananas and other tropical and sub-tropical products are abundantly grown.

	1955–56
Tax collections (Territorial).....	$85,021,683
U.S. Internal Revenue collections...	145,000,000
Net Territorial Debt (June 30, 1955)	59,911,000
	1956
Exports to U.S.....	$270,000,000
Imports from U.S.....	421,000,000

The U.S. Government maintains large military bases on the island of Oahu, including an important naval base at Pearl Harbour.

Governor, William F. Quinn $19,000
Territorial Secretary, Farrant L. Turner.

CAPITAL, ΨHonolulu, on the island of Oahu, population (1957), 292,179. ΨHilo, on the island of Hawaii, has a population of 25,205.

CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands are about midway between Hawaii and Australia.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 25′ N. lat. and 144° 39′ E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 217 square miles, with a population of 68,900 (1955), of whom 30,800 are Guamanians. The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. A governor is appointed for a four-year term. A 21-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

Governor, Richard Barrett Lowe.
Secretary, Marcellus Boss.
CAPITAL, Agaña. Port of entry, ΨApra.

WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 1 sq. mile and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945.

Midway Islands, with a total area of 22 sq. miles and a population (1940) of 437, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population. The group is under the jurisdiction of the U.S. Navy.

PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50′–18° 30′ N. lat. and 65° 30′–67° 15′ W. long., with a total area of 3,435 square miles and a population of 2,264,000 at the census of 1955. The majority of the inhabitants are of Spanish descent and Spanish is the official language. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. 4,283 miles of paved roads were in use in 1955. There are good harbours at San Juan and Ponce. The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local self-government. Legislation functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 5 members is appointed by the Governor, with the advice and consent of the Senate. There are 8 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all inferior judges. Puerto Rico is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote. Great improvement has been made in the progress, industrialization and welfare of the Island during the present century. A programme of tax exemption has

Ψ Seaport.

raised income from industry to the level of that from agriculture. Public schools are established throughout—enrolment in 1956 reached 700,000. The capital, Ψ San Juan, had 224,767 inhabitants in 1955, other towns being Rio Piedras 143,989, Ψ Ponce 126,810, Ψ Mayaguez 87,307, Caguas 60,132, Ψ Arecibo 75,361 Bayamón 48,000.

Finance	1955–56
Receipts	$1,003,000,000
Expenditure	178,400,000

Trade	1955–56
Total Imports	$632,672,116
Total Exports	406,283,310

Governor, Luis Muñoz Marín, *elected* 1948; *re-elected* 1952 and 1956.
Resident Commissioner, Antonio Fernós Isern.

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76·5 square miles and a population of 20,154 in 1956, distributed as follows:—Tutuila and Aunu'u 17,307; Rose Island, uninhabited; Manu'a Group (Ofu and Ta'u Islands) 2,767; and Swain's Island (annexed May 13, 1925) 80.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at ΨPago Pago (pop. 1950, 3,531), the capital and seat of government. The remaining islands have an area of about 30 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, an advisory bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces.

Governor, Peter T. Coleman.
Secretary, Alan M. MacQuarrie.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1957 was 67,000. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary markedly among island groups and even more among islands and atolls in the same geographic area. Nine mutually unintelligible languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947. From the cessation of hostilities to that date, the area was administered under United States Military Government. On July 18, 1947, the islands were placed under the jurisdiction of the Secretary of the Navy. On July 1, 1951, civilian government was established with the transfer of responsibility for the Trust Territory to the Secretary of the Interior. By July 17, 1953, responsibility for the administration of all the islands in the Northern Marianas, except Rota, had been retransferred to the Secretary of the Navy.

For administrative purposes, the territory is divided into seven districts: Saipan, Rota, Koror, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner, Delmas H. Nucker.
Deputy High Commissioner, Eugene R. Gilmartin.
Temporary seat of government: Agaña, Guam.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of $25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1956 of 30,061. *St. Thomas* (28 sq. miles) has a population of 15,695; *St. Croix* (84 sq. miles) has a population of 13,557; *St. John* (20 sq. miles) has a population of 809. St. Croix exports sugar and rum; ΨSt. Thomas is famous for its harbour.

CAPITAL, ΨCharlotte Amalie contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Walter Gordon.
Government Secretary, John D. Merwin.

ALASKA

Alaska is the largest peninsula of the North American continent and includes an area of approximately 586,400 square miles or one-fifth the area of the United States. The population on April 1, 1950, totalled 128,643, of which 33,884 were Alaska Natives (Eskimos, Indians and Aleuts).

Alaska was acquired by the United States in 1867 when the Territory was purchased from Russia for $7,200,000. The present Organic Act which created the Territory of Alaska was enacted in 1912 and provides the basis for the Territory's government. The Governor is appointed by the President of the United States. The Territory every two years elects a delegate to the Federal Congress. The Territorial Legislature meets biennially in odd-numbered years and consists of two houses, the Senate with 16 members and the House of Representatives with 24 members. The University of Alaska is widely recognized for its mining courses and is a growing centre for Arctic research.

The principal industry of Alaska is its fisheries, and the total annual value of its production is in excess of $100,000,000. Alaska produces 85 per cent. of the U.S. production of canned salmon. Mining is also important to the economy of the Territory; since 1880 the total value of mineral production has been about one billion dollars. Total timber resources of Alaska are estimated in the order of 435 billion board feet. The interior of Alaska is served by the Alaska Railroad, owned and operated by the U.S. Government. The line extends from the port of Seward northwards 470·6 miles to Fairbanks. The principal cities in the interior are connected with each other by road and to the United States and Canada *via* the Alaska Highway, built by the United States during the Second World War. The Alaska Highway extends from Dawson Creek, British Columbia, Canada, to a junction with Alaska's Richardson Highway, near Fairbanks; only 302 miles of this 1,523-mile road are in Alaska. The Territory is also served by steamship and airlines and lies on one of the principal air routes to the Orient.

Ψ Seaport.

Territorial Treasury

Net Cash Balance, June 30, 1957 . $13,318,449·47
Receipts, July 1, 1956 to June 30, 1957 ..... 47,122,152·94
Expenditure, July 1, 1956 to June 30, 1957 ..... 44,976,733·29

Governor, Michael A. Stepovich.

Capital.—Juneau (population 5,956).

Other cities are Anchorage (pop. 11,254), Fairbanks (pop. 5,771); and Ketchikan (pop. 5,305).

THE PANAMA CANAL

The Panama Canal and its adjuncts, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July 1, 1951, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General W. E. Potter, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation which conducted surveys during a period of two years and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government acquired the effects of the French company in Panama.

Congress authorized the President in 1902 to purchase the rights and property of the French company for $40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of $10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognized by the United States, and a treaty was ratified on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the isthmus, were ceded to the United States. The U.S. guaranteed the Republic of Panama's independence and agreed to pay it $10,000,000 and an annuity which was to begin nine years after the ratification of the treaty. The canal is built through the centre of this territory. Under the terms of a treaty between Panama and the United States, signed at Panama in January, 1955, the United States increased its annual annuity to Panama from $430,000 to $1,930,000 and agreed to hand over to Panama some land no longer needed for the operation of the Canal and to extend various commercial and other privileges to the Republic.

The canal is fifty statute miles long (44·08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea usually takes 8 hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The Panama Canal Company is engaged in a $20,000,000 improvement programme. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 42 feet in the Atlantic entrance. The depth through Gaillard Cut is 45 feet.

Including only ocean-going vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last 23 fiscal years is shown below:—

Fiscal Year	No. of Transits	Canal. *Net Tons	Cargo Tons
1935	5,180	25,720,000	25,309,527
1936	5,382	25,923,000	26,505,943
1937	5,387	25,430,000	28,108,375
1938	5,524	25,950,000	27,385,921
1939	5,903	27,170,007	27,866,627

Ambassador Extraordinary and Plenipotentiary, Hon. Henry Byroade.

U.S. AMBASSADOR TO CEYLON

Ambassador Extraordinary and Plenipotentiary, Hon. Maxwell Gluck.

U.S. AMBASSADOR TO INDIA

Ambassador Extraordinary and Plenipotentiary, Hon. Ellsworth Bunker.

U.S. AMBASSADOR TO PAKISTAN

Ambassador Extraordinary and Plenipotentiary, Hon. James M. Langley.

U.S. AMBASSADOR TO REPUBLIC OF IRELAND

Ambassador Extraordinary and Plenipotentiary, Hon. Scott McLeod.

The United Nations

CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21–Oct. 7, 1944. The design was discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York.

The following eighty-one States are members of the United Nations:—

Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussian Soviet Socialist Republic, Cambodia, Canada, Ceylon, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Ethiopia, Finland, France, Ghana, Greece, Guatemala, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Israel, Italy, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Luxemburg, Malaya, Mexico, Morocco, Nepal, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Roumania, Republic of Ireland, Salvador, Saudi Arabia, Spain, Sudan, Sweden, Thailand, Tunisia, Turkey, Ukrainian Soviet Socialist Republic, Union of South Africa, Union of Soviet Socialist Republics, United Arab Republic, United Kingdom, United States of America, Uruguay, Venezuela, Yemen, Yugoslavia.

The principal organs of the United Nations are:—(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. THE GENERAL ASSEMBLY

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally beginning on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided between six Main Committees, on each of which every Member has the right to be represented:—(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also a special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and two standing committees—an Advisory Committee on Administrative and Budgetary Questions and a Committee on Contributions.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission.

2. THE SECURITY COUNCIL

The Security Council consists of eleven Members, each of which has one representative and one vote. There are five *permanent Members* (China, France, U.K., U.S.A., U.S.S.R.) and six non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of seven Members must include the concurring votes of the *permanent Members*, and it is this clause which makes the *Veto* possible. The only exception to this rule is that in regard to measures for peaceful settlement a party to a dispute must refrain from voting.

Until 1952 two separate Commissions, the *Atomic Energy Commission* and the *Commission for Conventional Armaments*, reporting to the Security Council, dealt with different aspects of the armaments problem. On January 11, 1952, the General Assembly approved the establishment of a new *Disarmament Commission*, bringing atomic and conventional armaments under one body. A subcommittee of the Disarmament Commission, consisting of representatives of Canada, France, U.K., U.S.A. and U.S.S.R., held its fourth session in London in 1957. During the first half of 1958, the Disarmament Commission and its sub-committee were virtually inactive, owing to the refusal of the U.S.S.R. to take part in their work in their present form.

A *Committee on the Admission of New Members* was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes.

3. THE ECONOMIC AND SOCIAL COUNCIL

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Transport and Communications, Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, International Commodity Trade, Regional Economic Commissions for Europe, Asia and the Far East, Latin America and Africa. The Council also supervises and co-ordinates the work of eleven specialized agencies established to cover the main fields of international co-operation.

United Nations Children's Fund
UNICEF

United Nations, New York.
London Office: 14–15 Stratford Place, W.1

Established by the United Nations in 1946, to meet the emergency needs of children, particularly

in war devastated countries. In 1950 emphasis was shifted to long-range needs of children in underdeveloped areas. In 1953 the United Nations General Assembly approved unanimously the indefinite extension of the Fund's mandate. UNICEF is financed by voluntary contributions from Governments and from the public. It was calculated that some 50,000,000 children and mothers in 100 countries would benefit from major UNICEF programmes in 1958.

4. TRUSTEESHIP COUNCIL

The establishment of a Trusteeship Council in connexion with territories placed under United Nations supervision through individual Trusteeship Agreements was made possible after the General Assembly on December 13, 1946, approved the following eight Trusteeship Agreements: *New Guinea* (agreement submitted by Australia); *Ruanda-Urundi* (agreement submitted by Belgium); *French Cameroons and French Togoland* (agreements submitted by France); *Western Samoa* (agreement submitted by New Zealand); *British Cameroons, British Togoland* and *Tanganyika* (agreements submitted by the United Kingdom); a ninth agreement was afterwards approved concerning *Nauru* (administered by Australia on behalf of Australia, New Zealand and U.K.).

A Trusteeship Agreement for the former Japanese mandated islands, the *Marshalls, Marianas* and *Carolinas*, was submitted by the United States to the United Nations, and after approval by the Security Council, came into force on July 18, 1947.

A Trusteeship Agreement for the former Italian Colony of *Somaliland* was approved by the General Assembly on Dec. 2, 1950.

The Trusteeship Agreement for British Togoland ceased to have effect in March, 1957, when that country was united with Ghana.

The Trusteeship Council is composed of countries administering Trust Territories: permanent members of the Security Council; and enough other countries (elected by the General Assembly for three-year terms) to make an equal division between countries which administer Trust Territories and countries which do not.

The functions of the Trusteeship Council are to consider reports from administering authorities; examine petitions in consultation with the administering authority; make periodic inspection visits; and check conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

5. THE INTERNATIONAL COURT OF JUSTICE

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at the Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

THE SECRETARIAT

The Secretariat is composed of the Secretary-General, who is the chief administrative officer of the Organization, and an international staff appointed by him under regulations established by the General Assembly. The Secretary-General is appointed for a term of five years.

Secretary-General, Dag Hammarskjöld (*Sweden*).
Executive Assistant to Secretary-General, Andrew W. Cardier (*U.S.A.*).
Under Secretaries, Ralph J. Bunche (*U.S.A.*); Sir Humphrey Trevelyan (*U.K.*).
Do. (*Conference Services*), Victor Hoo (*China*).
Do. (*Public Information*), Ahmed S. Bokhari (*Pakistan*).
Do. (*Economic and Social Affairs*), Philippe de Seynes (*France*).
Do. (*Trusteeship and Information from Non-Self-Governing Territories*), Dragoslav Protić (*Yugoslavia*).
Do. (*Political and Security Council Affairs*), Anatoly Dobrynin (*U.S.S.R.*).
Director, Office of General Services, David B. Vaughan (*U.S.A.*).
Director-General, Technical Assistance Administration, Hugh L. Keenleyside (*Canada*).
Chairman, Technical Assistance Board, David Owen (*U.K.*).

BUDGET OF THE UNITED NATIONS

The financial year coincides with the calendar year. On February 13, 1946, the General Assembly established a Working Capital Fund of $25,000,000 (U.S.).

For the year 1958, the appropriation was $55,062,850. The scale of assessments for the 1958 budget for British Commonwealth countries was; Australia, 1·61 per cent.; Canada, 3·09 per cent.; India, 2·90 per cent.; Pakistan, 0·54 per cent.; New Zealand, 0·42 per cent.; Union of South Africa, 0·67 per cent.; United Kingdom, 7·62 per cent. The United States contribution was 32·51 per cent.; U.S.S.R. was 13·62 per cent.; France was 5·56 per cent.; and China was 5·01 per cent.

UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION

UNESCO

9 Place de Fontenoy, Paris, 7 éme.

The purpose and functions of the United Nations Educational, Scientific and Cultural Organization, as stated in its Constitution, are: "to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations; to collaborate in the work of advancing the mutual knowledge and understanding of peoples, . . . to give fresh impulse to popular education and to the spread of culture, . . . to maintain, increase and diffuse knowledge."

The three main bodies of the Organization are: the General Conference which meets every two years to approve the programme and budget, an Executive Board of 24 members and the Secretariat with Headquarters in Paris. In addition, National Commissions are set up in Member States to serve as a link with Unesco and carry out the programme of the Organization.

The programme of Unesco is now of a continuing nature, with priority tasks. Its principal sections relate to education, natural sciences, social sciences, cultural activities and mass communication. Three major projects on which special efforts are being

concentrated are the development of compulsory primary education in Latin America, research on the problems of arid lands and the mutual appreciation of Eastern and Western cultural values. Unesco also seeks to increase the international movement of persons.

While in its various fields of activity, Unesco's efforts are more and more concentrated on the realization of certain articles of the Universal Declaration of Human Rights, its task is carried out in a number of ways. Thus, the Organization has set up a clearing house of information. It has established several international professional organizations. It calls seminars and meetings of experts to deal with technical problems and to prepare programmes of work. Missions of technicians are sent to member states to study educational and other problems facing these countries. Pilot projects and training centres have been started to experiment in methods for solving problems. International action in the form of agreements and conventions is also promoted to achieve Unesco's aims. The budget for 1957 and 1958 stands at $23,849,355.

Director-General, Luther H. Evans (*U.S.A.*).

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

FAO

Viale delle Terme di Caracalla, Rome.

The Food and Agriculture Organization of the United Nations was established in October, 1945, as an agency to further separate and collective action of member nations for the purposes of:—

(i) Raising levels of nutrition and standards of living of the peoples under their respective jurisdiction.

(ii) Securing improvements in the efficiency of the production and distribution of all foods and agricultural products.

(iii) Bettering the condition of rural populations, and thus contributing toward an expanding world economy.

FAO works toward these ends by (1) collecting, analysing, interpreting, and disseminating information relating to nutrition, agriculture, forestry and fisheries; (2) promoting national and international action; and (3) furnishing technical assistance to governments which request it.

The general policies of the organization are directed by its two-yearly Conference on which each of the 77 member nations has one vote. A council composed of 24 member nations acts for the Conference between its sessions.

The budget, voted by the member nations at the Conference, has increased from $4,000,000 in 1946 to $17,000,000 for 1958–59. To this is added a sum allocated from the U.N. Special Fund for Technical Assistance, which in 1958 was approximately $9,000,000. Under this fund FAO operates its share of the Expanded Technical Assistance Programme, through which, by June 1958, some 2,200 assignments had been completed covering the whole field of the Organization's activities. At that time, some 450 experts were at work in 60 countries, and over 1,400 fellowships for training experts from those countries had been awarded.

Director-General, B. R. Sen (*India*).

Deputy Director-General, Dr. F. T. Wahlen (*Switzerland*).

Secretary-General, Marc Veillet-Lavallée (*France*).

INTERNATIONAL CIVIL AVIATION ORGANIZATION

ICAO

International Aviation Building, Montreal (with regional offices in Lima, Paris, Cairo, Bangkok and Mexico City).

The International Civil Aviation Organization came into being on April 4, 1947, when the required number of states (26) ratified the Convention on International Civil Aviation which was drawn up at the International Civil Aviation Conference held at Chicago, U.S.A., in November-December, 1944.

The objectives of the Organization are described in the Preamble to the Convention on International Civil Aviation as "to ensure that international civil aviation should be developed in a safe and orderly manner and that international air transport services should be established on the basis of equality of opportunity and operated soundly and economically."

ICAO's governing bodies are the Assembly and the Council. The Assembly is the legislative body, composed of delegates from member states with each state being entitled to one vote; the Council is the executive body, composed of 21 members elected by the Assembly. The first meeting of the Assembly was held in Montreal from May 6 to 27, 1947. The Fourth Council of ICAO was elected by the Tenth Session of the Assembly in 1956.

President of the Council, Walter Binaghi.
Secretary-General, E. C. R. Ljungberg.

INTERNATIONAL LABOUR ORGANIZATION

ILO

International Labour Office, Geneva.

The ILO, established in 1919 as an autonomous institution associated with the League of Nations, is a tripartite organization, in which governments, employers and workers are directly represented. It seeks through international action to improve labour conditions, raise living standards, and promote economic and social stability. In 1946, the United Nations and the ILO concluded an agreement under which the ILO was recognized as the specialized agency responsible for international action in the above fields towards the accomplishment of the purposes set forth in the ILO's Constitution.

The ILO consists of the International Labour Conference, which usually meets yearly, the Governing Body, and the International Labour Office.

The *Conference* is composed of national delegations comprising two government representatives and one delegate each from the most representative worker and employer organizations within each country, together with their advisers.

The 40-member *Governing Body* is composed of the representatives of 20 Governments, ten worker members and ten employer members. It is selected by the Conference every three years. It selects items for the agenda of the Conference, and supervises the work of the Office and of the various committees and commissions.

Ten Governments hold seats on the Governing Body because of their industrial importance. These are at present Canada, China, France, Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States.

The *Office* undertakes research on labour, social and economic questions, acts as an advisory service to Governments, and prepares documents on the items of the agenda of the various conferences and meetings. It also publishes a number of periodicals, including the *International Labour Review*, *Occupational Safety and Health*, *Industry and Labour*, *Legislative Series*, and the *Year Book of Labour Statistics*. In addition, it issues frequent reports on a wide range of social and economic questions. Most of these are published in English, French and Spanish.

One of the ILO's principal functions is the formulation of international standards in the form of International Labour Conventions and Recommendations. Member countries are required to submit Conventions to their competent national authorities with a view to ratification. If a country ratifies a Convention, it agrees to bring its laws into line with its terms and to report annually how these regulations are being applied. More than 1,800 ratifications of 111 Conventions have been deposited to date. Machinery is available to ascertain whether Conventions thus ratified are effectively applied.

Recommendations do not require ratification, but Member States are obliged to consider them with a view to giving effect to their provisions by legislation or other action. Member States also undertake to report regularly on their position in regard to Recommendations and unratified Conventions.

Chairman, Julio Barboza-Carneiro (*Government Member*).
Vice-Chairmen, Pierre Waline (*Employers' Member*); Sir Alfred Roberts (*Workers' Member*).
Director-General, David A. Morse.
London Branch Office, 38–39 Parliament Street, S.W.1.

Other branch offices are located at Ottawa, Washington, D.C., Paris, New Delhi, Bonn, Rome, Tokyo and Rio de Janeiro.

WORLD HEALTH ORGANIZATION
WHO

Palais des Nations, Geneva.

The World Health Organization came into being on April 7, 1948, after its constitution had been ratified by 26 U.N. member states. On June 1, 1958, WHO had a total of 85 members and 3 associate members. Since 1948, eleven sessions of the World Health Assembly have been held.

Director-General, Dr. M. G. Candau (*Brazil*).
Deputy Director-General, Dr. P. Doroile (*France*).

UNIVERSAL POSTAL UNION
UPU

Schosshaldenstrasse 46, Berne.

The Universal Postal Union was founded at Berne, Switzerland, by the Postal Convention, October 9, 1874. The Union was extended and improved by 14 Postal Congresses between 1874 and 1957.

The Union is composed of all the countries of the world with the exception of the Maldive and Laccadive Islands. The international Bureau functions as the central office of the Union. The Union was established to alleviate the uncertainty, confusion and excessive cost of international postal communications by uniting its member countries in a single postal territory for the reciprocal exchange of mail. The Bureau acts as a liaison organ, and furnishes information and advice to the countries belonging to the Union.

INTERNATIONAL TELECOMMUNICATION UNION
ITU

Palais Wilson, Geneva.

The Convention establishing an International Telegraph Union was signed at Paris in 1865. The first International Radiotelegraph Convention was signed at Berlin in 1906.

In 1932, at Madrid, the International Telegraph Convention and the International Radiotelegraph Convention were merged to form the International Telecommunication Convention. The Madrid Convention of 1932 was replaced by the Atlantic City Convention of 1947 and this in turn was replaced by the Buenos Aires Convention of 1952.

Under the Atlantic City Convention, the structure of the I.T.U. was considerably developed. This structure was not radically changed by the Buenos Aires Convention. It consists of a Plenipotentiary Conference, Administrative Conferences and the permanent organs of the Union: the Administrative Council, the General Secretariat, the International Frequency Registration Board (I.F.R.B.), the International Telegraph and Telephone Consultative Committee (C.C.I.T.T.) and the International Radio Consultative Committee (C.C.I.R.).

The main purpose of I.T.U. is "to maintain and extend international cooperation for the improvement and rational use of telecommunication". I.T.U. also promotes the development and most efficient operation of technical facilities. It allocates the radio frequency spectrum and registers radio frequency assignments to avoid harmful interference between radio stations of different countries, encourages the establishment of as low rates as possible and promotes the adoption of measures for ensuring safety of life through the co-operation of telecommunication service.

The seat of the Union was removed from Berne to Geneva in 1948.

Secretary-General (vacant).

THE OFFICE OF THE UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES
UNHCR

Palais des Nations, Geneva

UNHCR, established by the General Assembly of the United Nations on January 1, 1951, promotes, organizes, co-ordinates and supervises international action on behalf of the refugees under the High Commissioner's mandate. Its task is to provide international protection, under UN auspices, to UNHCR refugees, and to bring about their permanent re-establishment through facilitating their voluntary repatriation or their assimilation within new national communities.

On October 21, 1954, the General Assembly approved a permanent programme to benefit unsettled UNHCR refugees. In November, 1957, the High Commissioner was authorized to implement camp clearance measures to provide permanent solutions, by the end of 1960, for all those UNHCR refugees who had been living in camps for ten years or more.

The High Commissioner's programme is administered by a 24-nations Executive Committee. Members are selected by the Economic and Social Council, at the request of the General Assembly.

High Commissioner, Dr. August R. Lindt (*Switzerland*).
Deputy High Commissioner, James M. Read (*U.S.A.*).

Foreign Countries

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

Salaries and Allowances.

The Salaries of Officers of Branch "A" of H.M. Foreign Service are shown below. In addition foreign allowances and furnished accommodation (or rent allowances in lieu thereof) are assigned to Officers serving abroad:—

Grade I—£6,000.	Grade V—£2,700.
Grade II—£4,250.	Grade VI—£2,100 to £2,700.
Grade III—£3,600.	Grade VII—£1,450 to £2,050.
Grade IV—£3,400.	Grade VIII—£1,190 to £1,410.

Grade IX—£635 to £1,110.

NOTE.—Salaries of Ambassadors and of Ministers Plenipotentiary at British Embassies and Legations abroad shown in the following articles are in each case the maximum salary for the post and exclude *Frais de Représentation*.

ABYSSINIA. *See* Ethiopia.

AFGHANISTAN

(Afghānistān)

King of Afghanistan, H.M. Zahir Shah, *born* Oct. 15, 1914, *acceded* Nov. 8, 1933 (on the assassination of his father, Nadir Shah); *married* Nov. 7, 1931, Humaira, daughter of Sardar Ahmad Shah Khan, and has surviving issue five sons and two daughters: H.R.H. Prince Ahmed Shah Khan, *b.* Sept. 23, 1934; H.R.H. Prince Mohammad Nadir, *b.* 1941; H.R.H. Prince Shah Mahmud Khan, *b.* 1946; H.R.H. Princess Bilqis, *b.* 1931; H.R.H. Princess Maryam, *b.* 1936; and H.R.H. Prince Daud, *b.* 1949; and H.R.H. Prince Mir Wais, *b.* 1957.

EMBASSY IN LONDON
31 Princes Gate, S.W.7.
[Kensington: 8891.]

Ambassador in London, Mohammed Kabir Ludin.
1st Secretary, Mohammed Ebrahim Nouri.
2nd Secretary, Mohammed Aziz Rahim.

Afghanistan lies to the N. and W. of Western Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population is estimated (1946) at about 10 to 12 millions. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Geilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Moslems, except the Hazaras and Kizilbashes, who belong to the Shia sect.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (now W. Pakistan) (boundary fixed 1896–7), on the N. by Asiatic Russia (boundary fixed 1886–7 and 1893–5), and on the E. by the N.W. Frontier Province (now W. Pakistan) (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier on the branch line from Merv, and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into seven major provinces, Kabul, Mazar-i-Sharif, Kandahar, Herat, Nengrahar (formerly Eastern), Paktya (formerly Southern) and Qataghan, and seven minor provinces, Parwan, Ghazni, Farah-Chakhansur, Girishk, Maimana, Badakhshan and Shibarghan. Each province is under a Governor (called in major provinces *Naib-ul-Hakumah*, and in minor provinces *Hakim-i-Ala*).

Government.—Amir Abdurrahman (1880–1901) established a strong central government, with a regular civil and military organization, including offices for public works, posts, police, finance, trade, &c. The Army has been reorganized and is recruited by annual calls; service is for two years with the colours and eight with the reserve. The peace strength is about 64,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. Factories for munitions, and for various commercial products, have been erected in Kabul and elsewhere.

As the result of a British mission to Kabul in 1904–5, the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by King Amanulla of Afghanistan and a treaty of peace was signed in August. By this treaty Afghanistan is left formally free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular officers. As successor state to the British Government in India, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Under the Constitution of Oct. 31, 1931, there is a Senate of 43 nominated members and a National Council of 171 elected members, with a Grand Assembly (*Loe Jirgeh*) which is summoned on important occasions. The administration is entrusted to a Council of Ministers.

The laws of Afghanistan are based on the "Shariat," or Islamic law, and tribal custom.

Production.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and

transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic, but are mostly unmetalled—Kabul-Khyber (175 miles); Kabul-Gardez (80 miles); Kabul-Kandahar-Chaman (380 miles); Kandahar-Farah-Herat (400 miles); Kabul-Bamian (140 miles); Kabul - Mazar - i - Sharif (380 miles); Mazar-i-Sharif-Maimana-Herat (500 miles) and Kabul-Khanabad-Faizabad (450 miles). A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles).

Language and Literature.—The languages of the country are Persian and Pushtu and Turki (spoken by Uzbaks and Turkoman tribes in the North). Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

Finance.	*Afghanis.*
National Income	2,000,000,000

The annual revenue consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties.

Afghani (of 100 *Puls*=about 5*d.* at official rate of exchange).

1040 *Afghanis* = 100 Indian Rupees.
700 „ = 100 Pakistani Rupees.
165 „ = £1.
58 „ = $1.

Trade With U.K.

	1956	1967
Imports from U.K.	£352,558	£437,588
Exports to U.K.	1,890,500	4,475,098

Exports are mainly Persian lambskins (Karakuli) fruits, cotton, raw wool, carpets and spices, while the imports are chiefly cotton yarn and piece goods, metals, leather goods, tea, sugar, jute manufactures, paper and cement.

Capital, Kabul (about 300,000). The chief commercial centres are Kabul and Kandahar (77,000). Other provincial capitals are Herat (75,000), Mazar-i-Sharif (42,000), Jalalabad (22,000) and Khanabad (18,000).

Flag; Green, red and black, with white device in centre.

British Embassy
(Kabul)

Ambassador Extraordinary and Plenipotentiary, His Excellency Michael Cavenagh Gillett, C.M.G. (1957) £3,400
1st Secretary, C. N. Jupp.
Military Attaché, Col. W. H. R. Clifford, M.B.E.
2nd Secretaries, W. M. Sadler, M.C., M.M.; B. O. White; T. Grady.

Kabul is distant 7,500 miles from London, transit: 21 days; by air 4-6 days.

ALBANIA

Head of the State, Hadji Lechi, *assumed office*, July 24, 1953.

Prime Minister, General Enver Hodja, *recognized* by Gt. Britain, U.S.A. and U.S.S.R., Nov. 10, 1945.

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (1955) of 1,394,000.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hodja as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed. Elections were held in December, 1945, on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic, and on Aug. 7, 1946, Albania applied for admission to the United Nations, but its entry was vetoed by Great Britain and the U.S.A. It was admitted in 1955. United Kingdom diplomatic relations with Albania ceased in 1946.

Albania is almost entirely an agricultural country and the staple crops are wheat and maize. Imports from U.K. in 1957 were £1,507; exports to U.K., £65,992.

Capital: Tirana (pop. 50,000).

ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrenees, between Spain and France with an approximate area of 180 square miles and population of approximately 6,000. It is surrounded by mountains which attain an altitude of from 6,500 to 10,000 feet. Historians place the origin between the eighth and ninth centuries. Andorra is divided into six Parishes each of which has four Councillors elected by popular vote to the Valleys of Andorra Council of Twenty-four. The Council is presided over by a President who is in charge of the Government of the country, with the support of a co-sovereignty between the Bishop of the Seu d'Urgell and the Head of the French Republic (this last as successor in the name of the Count of Foix). Each co-Prince nominates his own representative and has a Permanent Delegation and a Supreme Tribune for the hearing of civil causes. These two Tribunes together form the Supreme Courts. The official language of the country is Catalan. Spanish *pesetas* and French *francs* are the accepted currency. A good road crosses the Valleys from Spain to France. Andorra has abundant deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Timber includes pine, fir, oak, birch and box-tree. Potatoes and cereals are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that 400,000 tourists visit the Valleys during the year. The imports from U.K. during 1957 were £24,953.

Capital: Andorra la Vella (population 2,200).

Flag: Three horizontal bands, azure, yellow, red; crown on yellow band.

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30′—60° E. long. and 12° 45′—34° 50′ N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due

east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Muscat and Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 10,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

THE KINGDOM OF SAUDI ARABIA

(al Mamlaka al Arabiya as-Sa'udiya.)

King of Saudi Arabia, H.M. King Saud bin Abdul Aziz, G.B.E., *born* 1902, *succeeded* Nov. 9, 1953. The Saud family previously ruled in *Nejd* but was deposed by Ibn al Rashid and took refuge in Kuwait. Ibn Saud, the father of the present king, occupied *Riyadh* in 1900 and conquered the larger part of *Nejd* in 1913. In 1921 he became *Sultan of Nejd*, conquered the *Hejaz* and became King in 1926. He changed the name of his Kingdom to *Saudi Arabia* in 1932.
Crown Prince, H.R.H. Amir Faisal bin Abdul Aziz, G.B.E., *born* 1904.

Foreign Affairs, H.R.H. Amir Faisal, G.B.E.
Finance, Sheikh Mohammed Suroor.
Interior, H.R.H. Amir Abdullah Faisal.
Defence and Aviation, H.R.H. Fahd bin Saud.
Agriculture, H.H. Khalid bin Ahmed as Sidayri.
Education, H.R.H. Amir Fahd bin Abdul Aziz.
Commerce, Sheikh Mohammed Ali Reza.
Communications, H.R.H. Amir Sultan.

EMBASSY IN LONDON.

(Diplomatic relations suspended.)

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

By the *Treaty of Jedda* (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with an estimated population of not more than 6 millions.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at close on 3,000,000, the majority being Mosiems of the Wahhabi movement. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Kharj, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa in 1938, and by 1955 production of crude oil from field storage amounted to over 350,000,000 barrels per annum. Exports other than oil are negligible. The capital is Riyadh (100,000), and the principal trading centres are Hofuf (the chief town of the Hasa province) (100,000), Ψ Al Khobar and Ψ Dammam on the Persian Gulf littoral, Anaiza, Buraida, Hail (20,000), and Jauf. The old ports (Persian Gulf) were Ψ Qatif, Ψ Uqair and Ψ Al Khobar, which were suitable only for sailing craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ψ Ras Tannura, and a civil deep-water port, with a pier seven miles long, was brought into use at Ψ Dammam in 1950. A railway is now in operation from Dammam through Hofuf to Riyadh.

The *Hejaz* ("The Boundary"—between Nejd and Tihama) extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wejh, Yanbu', Rabegh, Gizan and Ψ Jedda, the main port of Saudi Arabia. Jedda contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the disused Saudi-Arabian section of the Hejaz Railway which is scheduled for reconstruction. The *Oasis of Khaibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina* (*al-Medinat al-Munowarrat*, "The City of Light"), once the terminus of the Hejaz Railway, 820 miles from Damascus, has a permanent population of about 20,000 and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birthplace of the Prophet, is 45 miles east of the seaport of Jedda, by road, and about 200 miles south of Medina, and has a fixed population estimated at 100,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone

"given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Ψ*Jedda* (200,000) is the principal port and commercial centre.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meidi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered as a part of the Yemen. The territory includes the Farsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abha.

Trade and Finance.—Formerly the annual pilgrimage to the Holy Places of the Hejaz provided Saudi Arabia with virtually the whole of her means of payment for imports; it is estimated to have brought £10,000,000 in foreign exchange to the Hejaz in each of the years 1948–50. It is therefore not surprising that the foreign trade of the country was largely conducted by the merchant communities of Jedda and Mecca. Industry was, and is, almost non-existent. Imports are estimated to have averaged about £2,500,000 annually before 1939, of which the United Kingdom contributed less than £100,000. India was traditionally Saudi Arabia's principal commercial connection; and indeed the legal tender of Saudi Arabia, the silver riyal, is of the same weight and fineness as the old Indian rupee. Religious objections to usury have affected the development of banking in Saudi Arabia. Though paper money is widely used, it is not officially recognised as currency. It has virtually supplanted gold as a means of payment for transactions nevertheless. Exchange rates, which were formerly subject to violent fluctuations, have now been given a considerable degree of stability by the operations of the Saudi Arabian Monetary Agency. The country shared the inflationary experiences of other Middle East countries during the war years. The effect of oil developments and of investment, mainly American, in Saudi Arabia has been to revolutionize the country's foreign exchange position and greatly to increase the size of the market.

	1956	1957
Imports from U.K.	£9,075,294	£7,561,961
Exports to U.K.....	5,044,881	5,585,398

Communications.—The railway from the new port of Dammam to the oilfields at Abqaiq and through Hofuf to Riyadh was opened late in 1951. The only completed metalled road, apart from those in the oilfields area, connects Mecca with its Port of Jedda, but a new road from Jedda to Medina (about 410 miles) was partially completed by a British firm and the remainder has been completed by a local contractor. The Saudi Arabian Government employs Transworld Airlines to pilot and maintain the Government-owned Saudi Arabian Airlines with Dakota, Skymaster, Convair and Bristol aircraft. Scheduled services are flown between Jedda, Taif, Riyadh, Hofuf and Dhahran. There are first-class airports at Dhahran, originally built by the United States Army as a military base, and at Jedda. The other airfields named are being developed. Saudi Arabian airlines also maintain regular services to Cairo and Beirut. Twice-weekly services operated by Aden Airways, Arab Airways (both subsidiaries of B.O.A.C.), Air Liban and Misrair call at Jedda, the route of Aden Airways including Cairo-Luxor-Jedda-Port Sudan-Asmara-Kamaran-Aden and return.

Education.—There are over 300 Government schools, mostly primary, but including seven secondary schools and one preparatory school, which prepares students who have completed their secondary course for University training, in Egypt or elsewhere. There is no University in Saudi Arabia. With three exceptions, all schools are maintained by the Government. Instruction is given to boys only. There are no girls' schools.

SAUDI ARABIAN FLAG: Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

CAPITAL, Riyadh, population about 100,000.

BRITISH EMBASSY

Saudi Arabia severed diplomatic relations with the United Kingdom on November 6, 1956. The Government of Pakistan has assumed responsibility for the protection of British interests in Saudi Arabia.

THE SHAIKHDOM OF KUWAIT

Ruler, Shaikh Sir Abdullah as-Salim As-Sabah, K.C.M.G., C.I.E., *born* 1895, *acceded* Jan. 28, 1950.

Kuwait is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 5,800 square miles and a population, according to a census taken in 1957, of just over 206,000. The total European and American population was about 3,100 in 1957. The port of ΨKuwait, the capital (pop. about 180,000), is an entrepôt for goods for the interior, and for the export of pearls (in diminishing quantities), skins and wool. Imports for the year 1957 amounted to approximately £57,000,000, while exports, including re-exports, amounted to £5,000,000, excluding oil. Kuwait was traditionally the dhow-building centre for the Persian Gulf, but the craft is declining. The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait town. An oil port has been constructed by the company at Mina-al-Ahmadi, about five miles from Ahmadi, the company's administrative and residential centre. Production of crude oil in 1957 totalled 56,376,000 tons. The Company is jointly owned by the British Petroleum Company and the American Gulf Oil Corporation. It employs over 9,000 men, including British, Americans, Indians, Pakistanis, Kuwaitis and Arabs from neighbouring territories. Oil was also struck in the Kuwait-Saudi Arabian Neutral Zone to the South of the State early in 1953. Concessions for this area are held by the American Independent Oil Co. from Kuwait and the Getty Oil Company from Saudi Arabia: their shipments of crude oil in 1957 were 1,237,987 tons and 999,217 tons respectively. In June, 1958, the Arabian Oil Company, of Japan, having already been awarded the oil concession for the Saudi Arabian half share in the Neutral Zone off-shore sea-bed was awarded a similar concession by Kuwait for its half share.

As a result of the very considerable oil revenues, the Kuwait Government has embarked on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. In 1957–58 there were nearly 19,000 boys and nearly 11,000 girls at school. Kuwait has a domestic water supply from a State-owned sea water plant which operates on waste natural gas from the oil fields. The plant can produce over

4,000,000 gallons of fresh water daily. For storage there are two 15,000,000 gallon reservoirs and one of 3,000,000 gallons. The power station has a capacity of 70,000 kw. The town is now served by a network of dual carriage way roads and more are under construction.

Ships of British, Dutch and other lines make regular calls at Kuwait. B.O.A.C., Iraqi Airways and several Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wireless communications and postal services are conducted by the Kuwaiti Government. The Post Office is run by the British G.P.O. Banking is done by the British Bank of the Middle East and the National Bank of Kuwait. The currency is the Indian rupee.

FLAG: Red, with white lettering ("Kuwait" in Arabic).

British Political Agent, A. S. Halford, C.M.G.
Assistant Political Agent, A. K. Rothnie.
British Council Representative, in the Persian Gulf, J. J. G. Muir, D.S.C.

THE SULTANATE OF MUSCAT & OMAN

Sultan, Said bin Taimur, *born*, Aug. 13, 1910, *succeeded his father* (as 13th of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932.

The independent State of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from near Tibba on the west coast of the Musandam Peninsula round to Ras Darbat Ali. Ras Darbat Ali marks the boundary between the Sultanate and the territory of the Sultan of Qishin and Soqotra, a Sultanate within the Aden Protectorate. A small strip of the coast on the east side of the Musandam Peninsula from Dibbah to Khor Kalba belongs to chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Rub'al Khali or "Empty Quarter" as the South-Eastern Arabian Desert is called. Physically, the Sultanate consists of 3 divisions, a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation, North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles, Batinah dates (which ripen in the first half of July, well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised in this province. Frankincense is also exported. Its principal town is Salalah on the coast, while Ψ Murbat is the port. On the north coast of the Gulf of Oman is the port of Ψ *Gwadur* and a small tract of country surrounding the town belonging to the Sultan.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman. Possessing a natural harbour, though exposed to the north-west wind (*Shumal*), and at one time a town of some commercial importance, it has lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior. Other ports on the Gulf of Oman are Sohar, Khaburah and Sur. None, however, provides sheltered anchorage.

The area of the Sultanate has been estimated as about 82,000 square miles and the population as 550,000. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat (pop. 3,500) and Matrah (pop. 8,500) are composed of one third Indian, one third Baluch and one third Negro. The Baluchis have originally mostly migrated from Mekran and the Negroes from Zanzibar. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development if the water supply were more certain. The inland tribes breed large numbers of camel, which are prized in Arabia for their quality. There are no industries of importance.

The only port of call for steamers is Ψ Muscat (one of the ports on the mail route between Bombay and Basra). 150 vessels of all nationalities with a total tonnage of 509,733 entered the port in the foreign trade of Muscat in 1957. The mail service between Muscat and Basra is normally weekly in each direction, and Gwadur is also served by these steamers. The G.P.O., London, operates the post office in Muscat. The postage stamps are ordinary British stamps surcharged with their value in Indian currency. Cable and Wireless, Ltd., operates the telegraph office, and an automatic telephone service in Muscat and Matrah.

Inland transport is by pack animals. A motor road connects Muscat with Matrah and a motorable track extends to Khor Fakhan at the far end of the Batinah, a distance of 210 miles. There is also a motor road running up the Wadi Samail to the interior for about 180 miles. Hajar and Bosher are also connected by motorable tracks with Matrah. Cars run frequently between Muscat and the towns in the Batinah. Other routes are being developed, but none should be used without previous arrangement.

In December, 1951, a new treaty of friendship, to remain in force for 15 years, was signed between the United Kingdom and the Sultanate of Muscat.

FINANCE.

Annual Revenue (estimated).....Rs. 40,00,000

The common medium of exchange is the Maria Theresa dollar. On the coast the Indian rupee circulates, and is the official currency of the Sultanate, although not generally in use in the interior. There are also three denominations of copper coins, twenty, ten, and five, called "baizas." The normal rate of exchange is 170 baizas = 1 M.T. dollar = Rs.3¼ (approx.). The weights in use are one kiyas = the weight of six dollars or 5·9375 oz.; 24 kiyas = one Muscat maund; 10 maunds = one Farasala; 200 maunds = 1 Bahar. Rice is sold by the bag, other cereals by the following measurement: 40 Palis = one Farrah; 20 Farrahs = one Khandi.

TRADE.

	1954–55	1955–56
Total imports.....	Rs.3,58,44,000	Rs.3,54,76,000
Total exports.....	1,77,12,000	1,69,12,700

	1956	1957
Imports from U.K...	£527,849	£543,548
Exports to U.K.....	8,433	17,555

Trade is mainly in the hands of Hindu Banias and Muslim Khojas, many of whom derive British nationality by descent, and is mainly to and from India and Pakistan. The chief imports are cereals, tea, cigarettes, matches, sugar and cotton piece goods. The chief exports are dates, limes, pomegranates and dried fish.

CAPITAL, ΨMuscat, population (estimated) 3,500. *Muscat—British Consul-General*, Major F. C. L. Chauncy, C.B.E.

THE YEMEN

(The Mutawakilite Kingdom of The Yemen)

King of The Yemen. Imam Ahmed bin Yehya Muhammad Hamid Ud Din, *b.* 1895, proclaimed March 14, 1948 after the assassination in February, 1948 of his father the late King, Imam Yehya Muhammad Hamid Ud Din. *Heir Apparent*, Saif al Islam Muhammad al Badr.

YEMEN LEGATION IN LONDON.
41 South Street, W.1.
[Grosvenor: 5246]

Chargé d'Affaires, Assayed Mohamed Ibrahim.

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 4,000,000. It extends inland to the borders of the Hadramaut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, with an abundant and regular rainfall. The main exports are coffee, food-grains, hides, and raisins. Trade agreements have been concluded with a number of countries. Imports from U.K. in 1957 totalled £8,011; exports to U.K., £18,861. The chief port of Yemen is ΨHodeida, which is at present being enlarged. From Hodeida the famous Yemeni coffee is shipped to Masawa and Aden, and thence to Europe. Aden is an important centre for imports to the Yemen.

The Imam is the head of one branch of the Zeidi sect of the Shiah Division of the Islamic religion. The ruins of Marib, the ancient Sabæan capital and its dam are in the Yemen.

On March 8, 1958, an agreement was signed in Cairo whereby the Yemen joined the United Arab Republic in a federation to be known as the United Arab States (*see* United Arab Republic).

FLAG: Red, with horizontal Arabian sword in centre with 3 stars above and 2 below.

CAPITAL, Taiz (pop. about 14,000); Sana'a has about 60,000 inhabitants. Other cities of the Yemen are ΨHodeida, Ibb, Mocha and Beidha.

British Chargé d'Affaires, K. Oldfield.

BAHRAIN

Ruler, H. H. Shaikh Sulman bin Hamad Alkhalifah, K.C.M.G., K.C.I.E., *born* 1895; *acceded* February 3, 1942.

The Bahrain Islands form an archipelago in the Persian Gulf 20 miles from al Hasa on the Arabian coast. *Bahrain* ("Two Seas"), the largest island, is 27 miles long and 10 miles wide. *Muharraq*, to the north east, 4 miles long and 1 mile wide, is connected with Bahrain by a wide causeway nearly two miles in length carrying a motor road. The deep-water channel between the two islands is spanned by a swing bridge. Other islands are *Sitra*, to the east (3 miles long and 1 mile wide); *Nabih Saleh* (about 2 miles in circumference) and several uninhabited islets. The islands are low-lying, the highest ground being a hill in the centre of Bahrain 450 ft. high.

The total area is about 213 square miles with a population of 125,000, of whom about half are the original inhabitants belonging to the Shia sect, the remainder, including the ruling family, being Sunnis. The Sunnis live mainly in the towns of Manamah and Muharraq. There is a community of nearly 3,000 British and Americans, including the staff of the Petroleum Company and other firms and a community of 4,000–5000 Indians and Pakistanis—the majority of whom live in Manamah.

The ruling family (Al Khalifa) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The State is administered, under the Ruler, by numerous departmental heads assisted by a number of committees and councils. Local Government is the responsibility of the municipalities of which there are six, four for the towns of Manama, Muharraq, Hedd and Rifaa and two for the main rural areas. Half of the members of the Municipal Councils are elected by the public and half nominated by the Government. There is free primary and secondary education and free medical treatment. The Government has also built workers' houses and there is a Department of Rural Affairs, which caters for the needs of the villagers, and a Labour Department.

About a twentieth part of Bahrain is cultivated, dates, vegetables, semi-tropical fruits and lucerne being the chief crops. Bahrain is the centre of the famous pearl fishing industry of the Persian Gulf, which lasts for six months during the summer. During the pearling season, Bahrain is visited by numerous Arab, Indian and continental pearl merchants. Oil was discovered in the island in 1932, operations being conducted by an American-owned company, the Bahrein Petroleum Company, registered in Canada, under a concession granted by the Ruler. Its refinery is the fifth largest in the world. Other island industries are boat-building, manufacture of sailcloth and reed mats and date cultivation.

The revenue of the State is derived from oil royalties and from customs duties which range from 5 to 15 per cent. *ad valorem* on all imports. Much of the trade of Eastern Saudi Arabia passes through Bahrain, which since January 1, 1958, has been a free transit area, the Government having abolished all customs duty on goods stored in the area or in transit through Bahrain. The chief imports are foodstuffs, textiles and clothing, timber and building materials, vehicles, machinery and manufactured goods, some of which are re-exported, and the chief exports are petroleum products and pearls.

ΨManama, the capital and commercial centre, extends 1½ miles along the northern shore of Bahrain Island. A six-berth harbour for ocean going ships is at present being constructed and will be in operation in 1960. At present the ships of numerous lines which visit Bahrain discharge their cargoes from the anchorage some miles north of the town into barges. Bahrain Airport is also served by airlines of many nationalities and is the headquarters of the local company of Gulf Aviation which provides services to most parts of the Gulf. There are three banks in Bahrain, the Bahrain Bank, the British Bank of the Middle East and the

Eastern Bank. There is a radio-telephone service between Bahrain and most parts of the world, including the U.K. Electricity from the two Goverment power stations in Manama supplies light and power to all the towns and many of the villages of Bahrain. Water in Manama is obtained from the town water supply operated by the Municipality; a similar supply is at present being constructed in Muharraq.

The official currency is the Indian rupee (13·285=£1). British weights and measures are used.

FLAG: Red, with vertical white bar next to staff.

CAPITAL, Ψ Manama; population, about 50,000.

Secretary to the Government, G. W. R. Smith, M.B.E.

British Political Agent, C. A. Gault, O.B.E. (1954).

QATAR

Shaikh of Qatar, Ali bin Abdullah bin Jasim al Thani, *succeeded* August 20, 1949.

Qatar is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 8,000 sq. miles, with a population estimated at 35,000.

Oil deposits are being exploited by a British Company, under a concession granted by the Shaikh, and the first oil shipment was made on December 31, 1949. Oil is now being extracted at the rate of about 8,000,000 tons a year. Considerable development has resulted from this source of income. Outside Doha and the oil company's installations, conditions are primitive. The inhabitants are semi-settled tribesmen and Bedouin; apart from employment with the oil company and on development projects, pearling, which has greatly declined in recent years, and fishing, are the only alternatives to poor grazing as a means of livelihood. Such towns as exist are merely enlarged villages, with the exception of Doha, which boasts a bazaar, a good harbour for native craft, an airport, an increasing number of modern buildings, and an expanding population. The oil company has constructed a deep water port at Umm Said on the East coast of the peninsula. A regular air service connects Qatar with Sharjah on the Trucial Coast and with Bahrain, Kuwait, Beirut and Nicosia. The Shaikh has a British Adviser with a staff of British technical assistants. Wireless communications are managed by Cable and Wireless, Ltd. The Post Office is run by the British G.P.O. The currency is the Indian rupee.

Foreign affairs are in the charge of the British Political Agent who lives in Doha.

CAPITAL, Doha. Population. Approximately 25,000.

FLAG: White and coffee-coloured, white portion nearer the mast; vertical indented line comprising 17 angles divides the colours.

British Political Agent, J. S. R. Duncan, M.B.E.

Adviser to the Government of Qatar, G. M. Hancock, O.B.E.

TRUCIAL STATES

Six Shaikhdoms, Ras al Khaimah, Umm al Qaiwain, Ajman, Sharjah, Dubai, and Abu Dhabi, on the Persian Gulf seaboard of the Oman promontory between Khor ash Sham and Khor al Odaid and Fujairah, on the Gulf of Oman, have treaty relations with the British Government to prevent piracy and slavery and to maintain a perpetual truce in regard to all hostile acts at sea. Their territories have a combined area of approximately 30,000 square miles with a population of 75,000 to 85,000. The main port is Ψ Dubai, other centres being the coastal towns of Sharjah, Ras al Khaimah, Umm al Qaiwain and Abu Dhabi. The British Political Resident in the Persian Gulf, at Bahrain, through the Political Agent, Trucial States, is responsible for the external relations of the Shaikhdoms and all foreigners are subject to the legal jurisdiction of Her Majesty the Queen. The trade of the area passes through Dubai, which is a thriving *entrépôt*. Pearls and dried fish are the chief exports.

ARGENTINE REPUBLIC

(República Argentina.)

President, Dr. Arturo Frondizi; *born* October 28, 1908; *elected* February 23, 1958; *assumed office*, May 1, 1958.

Vice President, Dr. Alejandro F. Gomez.

CABINET

(July 1, 1958)

Minister of the Interior, Dr. Alberto R. Vitolo.
Foreign Affairs and Worship, Dr. Carlos A. Florit.
Economy, Dr. Emilio Donato del Carril.
Education and Justice, Dr. Luis R. MacKay.
National Defence, (vacant).
Social Assistance and Public Health, Dr. Hector V. Noblia.
Labour and Social Security, Sr. Alfredo Allende.
Public Works and Service, Dr. Justo P. Villar.

Secretaries of State (*Subordinate to the Minister of Economy*):
Agriculture and Livestock, Dr. Bernardino C. Horne.
Treasury, Dr. Ricardo Lumi.
Finance, Dr. Antonio López.
Commerce, Dr. José C. Orfila.
Industry and Mining, Dr. Alberto V. Tedín.
Power and Fuel, Dr. Gregorio A. Meira.
(*Subordinate to the Minister of National Defence*):
War, Gen. Hector Solanas Pacheco.
Marine, Rear-Adm. Adolfo B. Estévez.
Air, Comodoro Roberto Huerta.
(*Subordinate to the Minister of Public Works and Services*):
Public Works, Eng. Alberto R. Constantini.
Communications, Sr. Teodosio A. Cosentino.
Transport, Dr. Alberto López Abuin.

EMBASSY IN LONDON.

9 Wilton Crescent, S.W.1.

Ambassador, Rear-Admiral Teodoro Hartung (1958).
Minister-Counsellor, Sr. Ernesto Roque Piaggio.
Air Attaché, Brig. Raul Horacio Street.
Military Attaché, Lt.-Col. Julio Eladio Aguirre.
Naval Attaché, Capitán de Navío Benjamin Moritán Colman.
Economic Counsellor, Sr. José Santos Sidoti.
First Secretaries, Dr. Tomás Alva Negri; Marcelo Patrón Costas; Patricio Perez Quesdada.
Second Secretaries, Luis Adrian Gallardo; Federico E. Massot.
Attaché, Ricardo Maria Argerich.
Financial Counsellor, Manuel Aris.
6th Official, Señorita Clemencia Massa Lynch.
6th Official, Nemo Tessieri.

Asst. Military Attaché, Felipe Giunta.
Consul-General, Raul Eduardo Sidders.
Consulate-General, 53 Hans Place, S.W.1.

There are also Consulates in *Liverpool* and *Cardiff*.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. (For the statue of Christ the Redeemer, *see* Chile.) On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries: on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of 23 provinces and one federal district (Buenos Aires), comprising in all an area of 1,079,965 square miles, with an estimated population of 20,057,700 (December, 1957).

In 1957 births numbered 464,700 and deaths 172,300.

Immigration is encouraged. In 1957 the number of passengers travelling by sea was: arriving 70,200, departing 51,500.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mandoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucuman. A revolt in September 1955 overthrew the Government under the presidency of General Juan D. Perón and an interim Provisional Government was formed by the late General Eduardo Lonardi. This Provisional Presidency passed to General Pedro Aramburu in November 1955.

A Constituent Assembly, elected on July 28, 1957, decided that the country should revert to the 1853 Constitution, in accordance with which, on February 23, 1958, general elections were held and Dr. Arturo Frondizi was elected President and Dr. Alejandro F. Gomez Vice-President for the normal period of six years. They assumed office on May 1, 1958.

Agriculture.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, horses, goats and pigs.

The results (official figures) of harvests are:

Crop	1956–57 Metric Tons	1957–58 Metric Tons
Wheat	7,100,000	5,300,000
Maize	2,698,000	(a) 4,810,000
Linseed	620,000	605,000
Oats	1,140,000	972,000
Barley	1,364,400	1,008,000
Rye	880,000	644,000
Sunflower-seed	625,000	(a) 810,000
Rice	192,600	(a) 206,000
Canary-seed	40,600	42,800
Cotton (fibre prod.)	104,740	(a) 167,500
Ground-nuts	318,000	(a) 270,000
Sugar cane	9,810,000	..
Millet	157,100	..
Tea	49,000	..
Tobacco	42,400	..

(a) provisional or estimated.

Mineral Production.—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut) and Tartagal (Salta) as also at Mendoza and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. An oil pipeline from Campo Durán (Salta) to a refinery at San Lorenzo (Santa Fé) is now under construction, and part of it is already in service. The crude oil output in 1956 and 1957 was as follows:—

	1956	1957
	Cubic Metres	
State	4,153,360	4,656,037
Private companies	777,106	741,839
Total	4,930,466	5,397,876

Coal, tin, lead, zinc, manganese, copper, silver, gold, tungsten, beryllium and uranium are mined. The coal production is approximately 100,000 tons a year. The most important mine is that of Rio Turbio (Province of Santa Cruz) the development of which is now being given special attention by the State.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile industry and the development of a wide range of heavy and light industries is actively encouraged by the Government.

Communications.—There are 27,874 miles of railways of which 15,604 miles are broad gauge (5′ 6″), 2,940 miles standard (4′ 8½″), 9,664 miles of 1 metre, 537 miles of 0.75 metre and 129 miles of 0.60 metre. They are all State property. The combined national and provincial road network totals approximately 91,500 miles of which 7,500 miles are surfaced. There are air services between Argentina and all the neighbouring Republics, Europe, Canada and the U.S.A.

The tonnage of vessels entering Argentine ports was 8,549,858 in 1956 and 11,259,600 in 1957. Of the latter figure, 1,922,100 tons were Argentine, 2,086,000 British, 1,058,800 Norwegian, 974,700 U.S.A., 948,100 Liberian, 807,500 Dutch, 657,700 Italian, 446,200 French and 419,700 tons, German. (1957 provisional figures.)

There are 77 radio broadcasting stations of which 12 are short-wave and 65 medium-wave (55 commercial and 10 official). The only television transmitting station in Argentina is in Buenos Aires but

it is planned to instal another in that city and one in Rosario de Santa Fé, by 1959.

Defence.—The Army is organized in 5 infantry, 1 motorised, 1 armoured and 3 cavalry divisions and 3 mountain groups and numbers about 3,000 officers, 5,000 N.C.O.s and 65–70,000 men on a peace footing.

The Navy consists of 2 cruisers, 3 training cruisers, 11 destroyers, 7 frigates, 1 icebreaker, 8 minesweepers, 9 motor torpedo boats, 1 submarine, 23 landing craft, 7 oilers, 8 transports, 2 survey ships and auxiliary vessels; 4 squadrons Naval Air Arm. Strength about 2,000 officers and 25,000 men.

The Air Force consists of 9 operational groups and a training force. The operational groups are 1 bomber, 2 fighter, 2 tactical, 1 observation and 3 transport. The aircraft include Meteor IV., Lincoln, Lancaster, Viking, Bristol 170 and Dove.

Education.— *Primary* Education is free and compulsory for four years between the ages of 6 and 14. The scattered population of the country districts constitutes a problem in attendance which is being gradually solved. Illiteracy of adults has fallen in the last 20 years; it is now almost non-existent except in the north and far south, where it is still about 42 per cent. *Secondary* Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are *National Universities* at Córdoba, Buenos Aires, San Miguel de Tucumán, Santa Fé, Mendoza, La Plata and Bahia Blanca.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism. Under the Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. Since the 1955 revolution the traditional freedoms have been restored. Over 400 daily newspapers are published in Argentina, including 64 in the city of Buenos Aires. The English language newspapers are the *Buenos Aires Herald* (daily) and *Standard* (weekly).

FINANCE

(1958 Budget Estimates)	Paper *pesos*
Revenue	43,622,000,000
Cash expenditure	43,615,000,000

Transport and Electricity Industry, Ing. Karl Waldbrunner (*Socialist*).
Social Welfare, Karl Proksch (*Socialist*).

AUSTRIAN EMBASSY IN LONDON.
18 Belgrave Square, S.W.1.
[Belgravia: 3731]

Ambassador in London, Dr. Johannes Schwarzenberg (1955).

Counsellor, Dr. Georg Schlumberger.
3rd Secretary, Dr. Wolfgang Schallenberg.
Military and Air Attaché, Col. Heinrich Jordis-Lohansen.
Attachés, Dr. Christoph Cornaro; Dr. Wolfgang Seifert.
Press Attaché, Otto Seifert.

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 34,064 square miles and its population 6,968,500 (1954).

Government.—The Austrian Republic comprises nine provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-Hungarian Empire. On March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German *Reich* under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional government, a freely elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938. It entered into force on July 27, 1955.

There is a National Assembly of 165 Deputies. At the last general elections in May, 1956, the Government Coalition of Austrian People's and Socialist Parties increased its large majority by nine seats. The present state of the parties is as follows:

Austrian People's Party	82
Socialist Party	74
Freedom Party (right wing)	6
Communists	3

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 14, and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz and Innsbruck.

Language and Literature.—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are now 11 daily papers in Vienna and 23 in the provinces, as well as numerous weeklies and monthlies.

Production and Industry.—Agriculture is the most important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth with about 35 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hard-wood trees are mainly confined to Lower Austria. Spruce is the most common among the conifers (about 60 per cent. of the total) and beech is the most prevalent of the broad leaf trees.

Austria has important heavy industries. Production figures for 1956 include (in thousands of metric tons): iron ore 3,258, pig iron 1,736, crude steel 2,077, raw magnesite 1,083, nitrogenous fertilisers 662, paper 421, chemical pulp 404. In addition 45,612 motor cycles and motor-scooters, 18,432 tractors and 4,224 motor lorries were produced.

Hydro-electric power offers great possibilities in Austria. Much has already been done to develop it, and a long-term plan has been evolved for further development including greater export of electric current to surrounding countries. Production in 1956 was 11,718 million kWh.

Minerals.—There are large iron ore deposits and, in Eastern Austria, large oil deposits. In addition there are useful deposits of brown coal, magnesite, salt and lead. There are also limited deposits of copper.

FINANCE.

Budget	1956 (*Schillings*)
Ordinary Budget:	
Expenditure	29,327,000,000
Revenue	29,969,000,000
Extraordinary Budget:	
Expenditure	1,668,000,000
Revenue	301,000,000

TRADE WITH U.K.

	1956	1957
Imports from U.K.	£12,348,176	£14,256,187
Exports to U.K.	11,273,023	9,343,946

Currency.—The unit of currency is the *Schilling* of 100 *Groschen*, reintroduced in December, 1945. The official rate of exchange was fixed in May, 1953, at 72·80 Austrian schillings=£1, for all purposes.

CAPITAL, Vienna, on the Danube, population 1,614,287. Other towns are Graz (226,453), Linz (185,218), Salzburg (105,439), Innsbruck (102,759) and Klagenfurt (66,336).

Agricultural Attaché, M. Maurice Cammaerts.
Attachés, M. Maurice Carmen; Mlle. F. van Haelewyck.

A Kingdom of Western Europe, with a total area of 11,775 square miles and a population, Dec. 31, 1956 (including Eupen and Malmedy) of 8,951,000. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxembourg, and on the W. by the North Sea.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Since 1938 there has been an increase in the Flemish population by 100,000 and a decrease in the Walloon population of about the same number. Nearly all the inhabitants are Roman Catholics.

GOVERNMENT.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. A monument at Hertain in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 106 members out of 175 are directly elected. The Chamber of Representatives consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The elections of June 1, 1958, returned to the Senate 90 Social Christians (Catholics), 65 Socialists, 18 Liberals, 1 Communist and 1 other, total, 175; and to the Chamber of Representatives 104 Social Christians (Catholics), 81 Socialists, 22 Liberals, 2 Communists and 3 others, total 212.

PRODUCTION.—Belgium is essentially a manufacturing country. With no natural resources except coal, of which an average of 30,000,000 tons is mined yearly, industry is based largely on the processing for re-export of imported raw materials. A large proportion of the population is engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainaut, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Steel output in 1957 was 6,330,000 metric tons.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 261 State grammar and high schools. In addition there are 83 elementary schools under the control of the State and 296 under the control of local government authorities. There are 1,037 private colleges and secondary schools. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are independent institutions. After considerable opposition, Ghent University was in 1930 turned into a purely Flemish institution.

LANGUAGE AND LITERATURE.—Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainault, Namur, Luxembourg, Liège and the southern half of Brabant. The town of Brussels is bilingual. The official languages are both Flemish and French, and also German in the districts acquired after the 1914–18 war. The literature of France and the Netherlands is supplemented by a current of indigenous Belgian literary activity, in both French and Flemish. Maurice Maeterlinck (1862–1949) was awarded the Nobel Prize for Literature in 1911. Louvain library, which ranked among the great libraries of the world, was destroyed by German invaders in the war of 1914–18; reconstructed, mainly by American funds, after peace was declared, it was again destroyed in May, 1940, by German invaders. There are about 58 daily newspapers (French, Flemish and some German) in Belgium.

FINANCE.	*Francs*
Revenue (1958) Ordinary Budget estimate)	98,269,400,000
Expenditure (1958 Ordinary Budget estimate)	93,256,700,000
Extraordinary Expenditure (1958 Extraordinary Budget estimate)	12,659,400,000
Debt (June 30, 1958)	336,400,000,000

The unit of currency is the Belgian *franc*. On July. 1, 1958, the Bank of England official rate of exchange was 140 *francs*=£1. (*See also* p. 84.)

TRADE.

	1956	1957
Total Imports	*Fr.*163,624,364,000	*Fr.*171,622,026,000
Total Exports	158,123,721,000	159,301,749,000

	1956	1957

Exports to U.K.....	72,922,264	60,187,750

COMMUNICATIONS.—On Dec. 31, 1957, there were 4,838 kilometres of normal gauge railways operated by the Belgian National Railways, of which 848 kilometres were electrified; the length of light railways operated in 1957 was 1,853 kilometres (of which 1,118 were electrified). Belgian National Railways also operate 8,217 kilometres of regular bus routes. On Dec. 31, 1957, there were 685,473 telephone subscribers in Belgium. Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825–27); *Roupel* (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922); and *Bruges* (from Zeebrugge on the North Sea to Bruges, 6¼ miles; opened in 1922). The *Albert Canal* (79 miles), which figured prominently in the fighting (Sept. 1944), for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. Plans for the expansion and modernization of the port of Antwerp were announced in June, 1956. The estimated cost of the project is £36,000,000, of which the State will contribute £31,000,000, and work is expected to be complete by 1963. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels–Charleroi Canal will be widened or deepened to take barges up to 1,350 tons. These improvements are expected to be completed in 1966 and to cost £78,500,000. There are 9,869 kilometres of State roads and 1,337 kilometres of provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1957) of 91 vessels (531,187 tons), in addition to which there are 465 fishing boats (29,502 tons).

The Belgian National Airline operates regular services between Brussels and London, Manchester and many continental centres, as well as overseas services to the United States, the Congo and the U.S.S.R. A passenger and mail-carrying helicopter service, the first of its kind in the world, was inaugurated in 1953. Many foreign air-lines call at Brussels.

The Capital, BRUSSELS, had a population (Dec. 31, 1957) of 993,766 (with suburbs). Other towns are ΨAntwerp, the chief port (534,113); ΨGhent (229,860), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (405,095), the centre of the iron industry, and Charleroi (286,667), the important coal-mining and metallurgical centre; Mechlin or Malines (63,298); ΨOstend (54,297); ΨBruges (52,278). Brussels is 224 miles from London; transit, 8 hours by rail and sea.

NATIONAL FLAG: 3 vertical bands, black, yellow, red.

THE BELGIAN CONGO

Governor-General, His Excellency M. Henri Cornélis.

The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 12°–31° E. and lat. 5° N.–13° S., the colony comprises an area of 905,582 sq. miles, with a native population (Dec. 31, 1957) of 13,174,883 and a non-native population of 115,804, of which about 79 per cent. are Belgians.

It is administered by the Minister of the Colonies at Brussels, assisted by a Colonial Council of 14 members, of whom 8 are nominated by the King, 3 by the Senate and 3 by the Chamber. The Governor-General in Leopoldville is assisted by a Government Council of nominated members.

The Congo River is navigable from its mouth at Banana for 95 miles to Matadi, the chief port, which handles 68 per cent. of the total imports and 46 per cent. of exports; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 227 miles in length. Above Leopoldville the main stream is navigable for 1,000 miles to Stanleyville and there is another major waterways service to Port Franqui on the River Kasai. Services are also operated on many other tributaries. From Stanleyville there is a further 78 miles of railway to Ponthierville whence the Lualaba (as the Congo is called in its upper reaches) is again navigable to Kindu. Another railway from Kindu to Albertville on Lake Tanganyika (444 miles) in conjunction with the lake steamers and the Tanganyika railway, gives a connection to Dar-es-Salaam. From Port Franqui there is a direct rail route *vid* Elizabethville to Sakania on the Rhodesian frontier (1,234 miles) and on to Capetown. A branch line to Dilolo on the Angolan frontier connects with the Benguela railway to Lobito and another to Kabalo on the Kindu-Albertville line with the eastern system. A further connection between the two systems is provided by the upper Lualaba

which is navigable for part of the year between Kabalo and Bukama on the Port Franqui-Elisabethville line. Other railways are from Boma-Tchela in the Mayumbe (87 miles) and Aketi–Mungbere in the north-east (447 miles) with a branch to Bondo. There are regular Sabena air services to all the principal centres and air charter services are available to many smaller places. External air services are operated to Kano, Tripoli, Rome, Lisbon, Cairo, Athens, Brussels, Luanda, Nairobi and Johannesburg and to London (South African Airways) and New York (Pan-American). From Brazzaville, the capital of French Equatorial Africa, directly across the river from Leopoldville (20 minutes by ferry) there are French and Dutch air services to Europe, South Africa and Rhodesia.

Motor roads including private roads total 87,900 miles, of which 21,000 miles are classified as of national importance. Principal roads include those from Leopoldville to Matadi, Luluabourg, Elisabethville and Sakania, from Luluabourg to Bukavu and Usumbura, from Stanleyville to Bukavu, and from Aketi to the Sudan frontier and on to the Nile. Extensive road building is planned, of which 1,500 asphalted miles will be completed by 1960. These will include a direct route between Stanleyville and Bukavu and thence to Usumbura. A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 80° F., but in the South the winter temperature can fall nearly to freezing point. Sleeping sickness, once very prevalent and destructive, is now decreasing, and malaria is under control in Leopoldville and Matadi.

Extensive forest cover the central districts.

Production.—Oil palms are plentiful, and supply an increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. The metallic mineral output in 1957 was: copper, 242,244 tons; raw zinc concentrates, 188,183 tons; coal, 43,063 tons; manganese ore, 367,022 tons; cobalt (alloys), 6,342 tons; (granulated), 5,506 tons; cassiterite, 15,116 tons and smelted tin, 3,155 tons. Refined gold amounted in 1957 to 11,540 kg.; diamonds (Lubilash) 15,015,807 carats and (Kasai) 630,923 carats. Extensive radium deposits exist in the Elisabethville Province, where there are enormous deposits of copper. Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. There are important secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, clothing, beer, cigarettes, paint, cement and sugar. There are very large reserves of hydro-electric power.

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language in the East and South, and Lingala along the river. It is estimated there are 5,000,000 African Christians in the Colony (Roman Catholic 4,200,000, Protestant 800,000). Most schools are run by Missions, usually with a Government grant, but the number of State schools is increasing. Multi-racial universities have been established at Leopoldville and Elisabethville. In 1957 there was a total of 1,732,809 pupils in educational establishments. The official languages are French and Flemish.

CAPITAL, Leopoldville (pop. 308,314; 20,982 whites). Principal towns, ΨMatadi (55,861); Elisabethville (185,255); Jadotville (78,387); Stanleyville (78,458); Luluabourg (64,140); Coquilhatville (33,169); Kolwezi (21,721) and ΨBoma (27,911).

Imports from U.K.	£10,156,533
Exports to U.K.	3,405,929

* Including Ruanda-Urundi.

The chief exports are copper, palm-kernels and palm oil, coffee, diamonds, cotton and ores (manganese, wolfram, etc.).

Ruanda and *Urundi* (Mandated July, 1919, now Trust Territory), formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of Uganda and have an area of about 20,540 square miles, with a total native population (1956) of 4,415,595, 6,486 Europeans, and 2,492 Asiatics. The territories lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The chief crop is coffee, which forms one of the territories' most important exports. Other exports are livestock and hides derived from the large herds maintained by the African population. The administrative capitals are Nianza (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi). There are 4,870 miles of roads and no railways. Budget (1958): Revenue *francs* 1,024,000,000; Expenditure *francs* 1,018,000,000.

CONSULAR OFFICES.

There is a British Consulate-General at *Leopoldville* and a Consulate at *Elisabethville*.

BHUTAN

Bhutan (area, about 18,000 sq. miles; pop. about 700,000, mainly Buddhists) is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a Protectorate of the Republic of India. In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains complete independence, issues its own passports and has diplomatic representatives in Tibet as well as in India. It also receives from the Government of India an annual payment of about £35,000 as compensation for portions of its territory annexed by the British Government in India in 1864. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. The present Ruler is Maharaja Jigme Dorji Wangchuk who was born in 1929 and succeeded his father in March, 1952. The Government of India has a diplomatic representative whose headquarters are situated at Gangtok, capital of the neighbouring State of Sikkim.

BOLIVIA

(República de Bolivia)

President of the Republic, Señor Hernán Siles, *assumed office*, August 6, 1956.

EMBASSY IN LONDON.
106 Eaton Square, S.W.1
[Sloane: 3231.]

Ambassador, His Excellency Dr. Victor Paz Estenssoro.

Consulate, 106 Eccleston Mews, S.W.1.
Consul-General, Senor Jorge Sanchez Peña.

There are Bolivian Consular Offices in *Liverpool, Birmingham, Hull, Cardiff* and *Glasgow*.

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30′ and 69° 45′ W., and its area is estimated at 415,000 square miles with an estimated population (Dec. 31, 1953) of 3,990,000. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The executive power is vested in a President elected for 4 years by direct popular vote. A President is ineligible for re-election for a further term until 4 years have elapsed after a former term has ended. A Vice-President is elected for four years and is ineligible for re-election either as President or Vice-President. In May, 1951, a military *coup d'état* took place and a *junta* of senior officers was formed under the leadership of General Ballivian. In April, 1952, after three days of heavy fighting, the National Revolutionary Movement took over the government of the country.

The National Congress consists of a Senate of 18 members elected for 6 years, with one-third renewable every two years and a Chamber of Deputies of 68 members elected for four years, one-half renewable every two years.

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamore, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after those of Malaya and Indonesia, the largest in the world, 26,842 metric tons being exported in 1956: copper, antimony, wolfram, bismuth, salt and sulphur are also found, and petroleum is being produced in growing quantities. The Republic has been self-supporting in petroleum and its by-products since January 1954 and exports have started to the Argentine, Chile, Brazil, Paraguay and Peru. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts, &c. Manufactures are in a very undeveloped state, but the Government plans to encourage their development under a policy of "diversification of the economy." There are 1,454 miles of railways in operation. New lines are under construction from Corumbá to Santa Cruz (405 miles) and from Yacuiba to Santa Cruz (312); the first of these is complete except for one bridge and the second is expected to be finished within three years. Work on a third new line, from Cochabamba to Santa Cruz, was suspended some years ago. There are about 10,950 miles of telegraphs, and wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi, and from Potosi to Sucre, the legal capital. The principal railway line is the Antofagasta and Bolivia railroad (749 miles), which is British owned. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno.

Commercial Aviation in Bolivia is conducted by Pan American-Grace Airways and Braniff International Airways (American) and Lloyd Aereo Boliviano (Bolivian), the two former providing international connexions with U.S.A., West coast South American countries, Canal Zone, Brazil and Argentina; Lloyd Aereo Boliviano, attending to local flights, links La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, &c., and connects with LAN of Chile, Argentine Airlines and Cruzeiro do Sul of Brazil. There is a new line from La Paz to Asuncion, also operated by Lloyd Aereo Boliviano.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882. The Peace Army amounts to about 5,000 all ranks, the War Effective being about 105,000.

Language and Literature.—The official language of the country is Spanish, but the Indian inhabitants (about two-thirds of the population) speak either Quichua or Aymará, the two races being more or less equal in numbers.

The Roman Catholic religion is established and subsidized. Elementary education is compulsory and free and there are secondary schools in urban centres. The high percentage of illiterates is yielding to modern methods; all illiterates under 21 are nominally compelled to attend school. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are seven other universities, the largest being the University of San Andres at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are five daily newspapers in Bolivia, with an estimated daily circulation of 87,000.

FINANCE.

Estimated revenue (1958)..... Bs.304,549,616,500
Estimated expenditure (1958).. Bs.307,489,900,370
Bs=Bolivianos.

On December 15, 1956, a number of decrees were issued to introduce a programme to stabilise the currency, in support of which the International Monetary Fund and the U.S. Government provided a fund of U.S. $25,000,000. Artificial rates of exchange, import licensing and price subsidies and controls were abolished. The *Boliviano* was made freely convertible for all purposes without restriction. After this policy was introduced, the rate was *Bs.* 7,500=U.S. $1, and by April 1958 it had fallen to *Bs.* 8,850=U.S. $1.

TRADE.

	1956	1957
Exports to U.K..	£11,214,503	£16,010,848
Imports from U.K.	1,537,652	1,548,720

The principal exports are tin (almost all of which is exported to the U.K.), lead and antimony ores, wolfram, cocoa and hides; Bolivia also ranks as the second rubber-exporting country in South America after Brazil. The chief imports are wheat and flour, sugar, iron and steel products, machinery and textiles.

SEAT OF GOVERNMENT, La Paz. Population (estimated 1957) 339,279. Other large centres are Cochabamba (87,200), Potosí (51,100), Santa Cruz (58,300), Sucre, the legal capital and seat of the judiciary (53,800), Tarija (19,100), and Oruro (75,500).

FLAG: Three horizontal bands; Red, yellow, green.

POSITION AND EXTENT.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay: and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16′ N. and 33° 45′ S. and long. 34° 45′ and 73° 59′ 22″ W., being 2,685 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles with a population (estimated July, 1956) of 60,000,000.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparao 9,393 feet) between Minas Gerais and Espirito Santo, the *Serra do Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaço* (Itacolumi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paranán*, between Goiaz and Minas Gerais, the *Serra dos Aymores*, which divide Espirito Santo from Minas Gerais; and the *Serra do Gurgueia, Branca* and *Araripe*, which envelop Piauí.

Brazil is unequalled for its rivers. The River *Amazon* has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco, Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá, Purus, Madeira* and *Tapajos*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Mato Grosso and the mountains of Goias to the Gulf of Pará. The *Parnaiba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Iguassu*, which unites with the Upper Parana at the Brazil-Argentine-Paraguay boundary, are the majestic *Falls of the Iguassu* (200 ft.), and on the São Francisco are the no less famous falls of *Paulo Affonso* (260 ft.).

GOVERNMENT.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Dr. Getulio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 20, 1934. By a *coup d'état* of Nov. 10, 1937, he closed Congress, abolished the old political parties and issued a new Constitution. On Sept. 18, 1946, the *Estado Novo* established by Vargas was superseded by a new constitution, limiting the Presidential term to 5 years (in place of 7) and restoring a Congress of two chambers. In October, 1955, elections took place in which Dr. Juscelino Kubitschek was elected the new President.

PRODUCTION.—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is still exploited to only a very limited extent. Production is increasing, but is capable of great further development. The iron ore deposits are particularly rich. The estimated production of iron ore in 1957 was 4,085,835 tons. Oil production in

1957 was estimated at 10,000,000 barrels. Coal production in 1957 was estimated at 2,085,000 tons. Over 1,500,000 tons of steel, and 45,055,000 tons of refined petroleum products were produced in 1957.

Foreign investments without exchange cover totalled U.S. $108, 184, 000 in 1957, almost double the 1956 figure. These investments were in a variety of industries, including industrial chemicals, fertilizers, food packaging, air-conditioning equipment, fountain-pens, paper and cellulose, motor cars, and motor car parts, security printing, pharmacuticals, synthetic resins and heavy electrical equipment.

Brazil's agricultural and vegetable produce is abundant, coffee, cotton, maize, sugar, cocoa, rice, citrus fruits and bananas being the main agricultural products, and rubber, carnauba wax, maté, jute and other fibres being the main vegetable extracts. Timber is also important.

The main exports of agricultural produce in 1957 were:—

	Metric Tons	Value $U.S.
Coffee	859,153	845,531,000
Cotton	66,179	44,208,000
Cocoa	109,677	69,692,000

Coffee is grown mainly in the States of São Paulo and Paraná and to a lesser extent in Minas Gerais and Espírito Santo.

DEFENCE.—The peace effective of the Army is about 200,000 all ranks. The Navy consists of 2 cruisers, 15 destroyers and escorts, 11 corvettes, 3 submarines, 15 submarine chasers, 2 sail training ships, 3 ocean-going tugs, 2 survey vessels, 2 river monitors and various auxiliaries. The strength of the Navy is about 25,000 officers and men. The Air Force has about 800 aircraft, and is the largest in South America.

EDUCATION.—*Primary* education is carried out by State governments and municipalities and private initiative, in some cases with a Federal subsidy. In 1957 there were 80,178 primary schools (not including kindergartens) with an enrolment at the beginning of the school year (March) of 5,406,251 pupils.

Secondary education is carried out by the Federal Government, State and Municipal Governments and by private schools. In 1957, there were 2,945 schools and 668,845 pupils. Other establishments classified at an intermediate level are: 1,058 commercial schools with an enrolment of 139,278 pupils; 1,044 normal schools with 74,157 scholars; 401 industrial training schools with 19,131 pupils; 64 agricultural schools with 3,671 students.

A total of 79,505 students attended 20 Federal and State Universities and 385 other establishments offering courses at a university level, in 1957.

LANGUAGE AND LITERATURE.—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers; 25 daily newspapers are published at Rio de Janeiro.

COMMUNICATIONS.—In 1955 there were 37,000 kilometres of railways in service, including 2,624 broad (1·6 m.) gauge, 33,374 kms. of 1 m. gauge and 1,002 of narrower gauges. The greater part, 28,955 kilometres (78 per cent.) is owned by the Federal Government and a further 3,452 kilometres (9 per cent.) are owned by State Governments. Traffic carried in 1956 was—Passengers 36,481,000, Freight 40,025,000 tons, Livestock 4,872,000 head. The two largest ports are Rio de Janeiro, which was used by 12,976,000 tons of shipping and Santos, which was used by 13,567,000 tons, in 1956.

Eight foreign airlines, Air France, SAS, KLM, Aerolineas Argentinas, Swissair, Iberia, Alitalia and Lufthansa (in addition to Panair do Brasil) operate services between Brazil and Europe. Pan American World Airways, Braniff, Varig and Real Aerovias Brazil operate services between Brazil and U.S.A., and there are connections with all Latin American countries. Eight major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country. During 1957 the airports of Rio de Janeiro and São Paulo alone recorded 185,818 aircraft arrivals and departures.

Postal facilities in Brazil include 5,734 post offices and approximately 50,000 miles of telegraph. In 1957, 874,000 telephones were in use, of which about 87 per cent. are dial operated.

FINANCE.

	1957	1958*
Revenue	*Cr.*85,500,000,000	*Cr.*130,200,000,000
Expenditure	*Cr.*104,000,000,000	*Cr.*140,600,000,000

* Estimated.

The total external debt of Brazil on December 31, 1957, was $ U.S. 524,669,000. Internal debt, December 31, 1957, amounted to: Union, *Cr.* 10,700,000,000; States, *Cr.* 37,000,000,000.

The unit of currency is the *Cruzeiro* of 100 *Centavos*. The official selling rates of the Bank of Brazil (July, 1957) were *Crs.* 52·6060 = £1, *Crs.* 18·82 = U.S.$ 1, but for trade there is a complicated system of exchange bonuses for exports and exchange premiums for imports, which produce in effect a large number of different rates, while invisible transactions are carried out through a free market on which the quotations have in the twelve months preceding June 30, 1958, fluctuated between *Crs.* 194 and *Crs.* 400 = £1.

TRADE (1957)

Total Imports $U.S.1,489,000,000*
Total Exports $U.S.1,392,000,000*
*Converted at official exchange rate.

	1956	1957
Imports from U.K.	£15,074,592	£18,362,455
Exports to U.K.	26,739,815	30,715,518

The principal imports are fuel oils, machinery, wheat, chemicals, industrial raw materials and newsprint. The principal exports are coffee (over 70 per cent. of the total value of exports), cocoa, timber, iron ore, sugar, fruit, tobacco, wax, hides and skins and fibre.

CAPITAL, Ψ Rio de Janeiro. Population (est. 1957), 2,940,045. Other large centres are São Paulo, 3,149,504; Ψ Salvador (Bahia), 532,619; Ψ Recife (Pernambuco), 703,726; Ψ Belém (Pará), 260,608; Ψ Belo Horizonte (Minas Gerais), 501,428; Ψ Fortaleza (Ceará), 280,084; Ψ Niterol (Rio de Janeiro), 221,628; Curitiba (Paraná), 231,628; Ψ Porto Alegre (Rio Grande do Sul), 512,915; Santos (São Paulo), 253,629.

New Capital of Brazil.—Under a law signed on Sept. 20, 1956, preparations are in progress for the transfer of the capital from Rio de Janeiro to a new site in the interior, in the State of Goiás. The new capital will be named *Brasília*. It was stated that the new capital would be inaugurated before the end of 1960.

FLAG: Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.

Construction and Building Materials, R. Vidinski.

LEGATION IN LONDON.

12 Queen's Gate Gardens, S.W.7.
[Knightsbridge: 9400]

Minister, His Excellency Lubomir Ratchev Anguelov (1957).

The Republic of Bulgaria is bounded on the north by Roumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population (Dec., 1956) of 7,629,254. The prevailing religion of the Bulgarians is the Eastern Orthodox Church (83 per cent.); Moslems (Turks and Pomaks) (14 per cent.) and various others (3 per cent.). For secular purposes the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912–13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Roumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a *coup d'état* gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

GOVERNMENT.—On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 101 seats out of 465. According to the new Constitution the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage on the basis of one deputy to every 30,000 inhabitants for a maximum term of four years. The opposition Agrarian Party was suppressed on Aug. 24, 1947, following the pronouncement of the death sentence on its leader, Nikola Petkov. The opposition newspapers ceased to appear after April, 1947. Nine

opposition Social Democrats continued to sit in the National Assembly until they were placed under restraint in July, 1948. The Government Social Democratic Party fused with the Workers' (Communist) Party on Aug. 11, 1948.

Bulgaria linked herself to the other countries of Eastern Europe by a series of treaties of friendship, collaboration and mutual aid, the first of which was signed with Yugoslavia on November 27, 1947. This was followed by similar treaties with Roumania (January 16, 1948), the Soviet Union (March 18), Czechoslovakia (April 26), Poland (May 30) and Hungary (July 6). The treaty with Yugoslavia was abrogated in 1949.

PRODUCTION.—Bulgaria is essentially an agricultural country, but is engaged upon an elaborate programme of industrialization. Some 90 per cent. of the country's agriculture has been collectivized, and a much smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, soya beans, fruit, vegetables and cotton. Several of the basic crops were adversely affected by bad weather in 1956, and Bulgaria has continued to import considerable quantities of wheat from the U.S.S.R. The livestock includes sheep, goats, cattle, pigs, horses, asses, mules and water buffaloes.

Bulgarian statistics for 1956 show a 16 per cent. increase in electrical generating capacity, bringing the total to 2,397 million kWh. Much of this increase is from hydro-electric stations. The considerable progress which has been made in the exploitation of Bulgaria's mineral resources, is shown by the following production figures for 1956.

		Percentage increase over 1955
Brown coal.....	7,689,000 tons	9
Lead-Zinc ores...	1,670,000 ,,	12
Copper ores.....	470,000 ,,	35
Iron ores.....	236,000 ,,	109
Manganese ores...	76,000 ,,	23
Crude oil.....	246,000 ,,	65

There are other mineral deposits of varying importance, but no production figures are available. There are also a number of thermal and mineral springs, several of which have been modernized. Bulgaria's newly acquired heavy industry includes an iron and steel works which inaugurated its first blast furnace in 1957, a nitrogenous fertiliser plant and other chemical works.

DEFENCE.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 200,000 strong.

EDUCATION.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1956 there were 6,803 general education and evening schools, 359 gymnasia (general) for day and evening classes, and 506 gymnasia for technical schools; with 1,129,000 students and schoolchildren and 47,013 teachers.

There are 20 universities (known as Higher Educational Establishments and including universities proper and Academies of Music, Science, etc.), including those of Sofia, Plovdiv and Varna. In 1956 there were stated to be 36,000 students at Bulgarian Universities.

LANGUAGE AND LITERATURE.—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (*see* U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic, as in Russia. In 1958 there were 6 daily newspapers in Sofia.

FINANCE.	1957 *leva*
Budget revenue (estimated).....	28,500,299,000
Budget expenditure (estimated)...	28,424,299,000

TRADE.

The principal imports are wool, industrial and agricultural machinery, metals, tools, chemicals, dyestuffs, drugs, rubber, paper. The principal exports are cereals, tobacco, fruit, vegetables, oil seeds, oils, fats, textiles, eggs, chemicals, essential oils including attar of roses, hardwoods, non-ferrous metals, and livestock. Approximately 50 per cent. of Bulgaria's foreign trade is with the U.S.S.R., and this was planned to increase substantially in 1957. In 1955 trade with the Soviet bloc represented some 88 per cent of all Bulgarian trade.

Trade with U.K., 1957.—Imports, £374,221; Exports to U.K. £677,588.

CAPITAL, Sofia. Pop. (1956), 725,756, at the foot of the Vitosha Range, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of Ψ Varna (119,769) and 125 miles from Lom (23,015), on the Danube; Ψ Burgas (72,795) is also a Black Sea Port, those on the Danube being Ψ Rusé (83,472), Ψ Svishtov (28,537), Ψ Vidin (23,984). Other important trading and industrial centres are Plovdiv (162,518) and Pleven (57,758).

FLAG: 3 horizontal bands, white, green, red.

BRITISH LEGATION.

British Minister, His Excellency Anthony Edward Lambert, C.M.G. (1958)..... £3,400
Residence, 69 Boulevard Tolbuhin, Sofia.
1st Secretary, and Consul, J. L. W. Price.
Military Attaché, Colonel A. A. Edwards, M.C.
and Secretary (Commercial), E. E. D. Newman.
Vice-Consul, J. A. D. Stewart-Robinson.
Junior Attaché, J. Mayson.

BURMA

(Republic of the Union of Burma.)

President (from March 13, 1957), U Win Maung.
Prime Minister, U Nu.

BURMESE EMBASSY IN LONDON
19A Charles St., Berkeley Square, W.1.
Ambassador, His Excellency U Aung Soe (1957).

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58′ and 28° N. latitude and 92° 11′ and 101° 9′ E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. In the north the frontier with Tibet and China has not yet been demarcated, although the Government of Burma is endeavouring to negotiate a settlement with the Chinese Government; the north-west frontier touches Pakistan and the Republic of India; the Bay of Bengal forms the western frontier and on the north-east and east Burma marches with the Chinese province of Yunnan, French Indo-China and Siam. The area of the Union includes Burma proper with the Chin and Kachin Hills (192,158 sq. miles), the Shan State (57,816 sq. miles) and the Kayah State (4,519 sq. miles) making a total of 254,493 sq. miles. The population of the Union is probably about 19,000,000, showing an estimated density of 75 persons to the square mile.

Physical Features.—Burma falls into four natural divisions, Arakan (with the Chin Hills region), the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on

three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the Irrawaddy-Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Tai groups. The three important non-indigenous elements are Indians and Pakistanis (about 800,000), Chinese (about 300,000), with Europeans and Anglo-Burmans numbering in all about 10,000. Burmese, Shan, Karen, Kachin and Chin are the chief languages. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.—Burma formed part of British India until April 1, 1937, when it became a separate territory with a considerable measure of self-government. The country was invaded by the Japanese in December, 1941, and until October, 1945, the Civil Government functioned in India.

The Treaty which made Burma an Independent State outside the British Commonwealth was signed in London on Oct. 17, 1947, and came into force on Jan. 4, 1948. For the first three years of its existence the Republic was torn by insurrection, mutiny and disorder. By 1951 the Union Government had recovered control of most of the country, though Papun, the capital of the Karen rebels, was not recovered till 1955; and Communist and Karen insurgents continue to harass large areas.

The first general election under the new Constitution, during 1951, resulted in the return to power of the "Anti-Fascist People's Freedom League." At the second general election in April, 1956, the A.F.P.F.L. was returned with a reduced majority (171 out of 250 seats). The Opposition consists mostly of members of the National United Front, which has strong Communist sympathies.

Defence.—Burma has an army of fair strength and quality, but the navy and air force are small. The British Services Mission was withdrawn in 1954.

Education.—The literacy rate is high compared with other Asiatic countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture. The University of Rangoon was founded in 1920, with a Medical College, an Engineering College and a Teachers' Training College attached. The Intermediate College at Mandalay was granted full university status in 1958; there are also intermediate colleges at Moulmein and Kyaukpyu (in Arakan). Good progress is being made in re-orgainzation and extension of the educational system. An important feature of this programme is a "Mass Education" Scheme aimed at the adult population of the rural areas.

Finance.—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1957–58 were (in terms of sterling): receipts £101,300,000; expenditure £101,800,000.

Production, Industry and Commerce.—Two-thirds of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat and gram. Rice is the mainstay of Burma's economy; before the war Burma was the world's largest exporter of rice, her total production of over 7,000,000 tons a year being derived from 12,000,000 acres or 70 per cent. of the country's total cropped area. The pre-war yearly average of rice exports was over 3,000,000 tons. In 1957 exports were 1,845,000 tons. The net area sown to all crops in 1956–57 was 15,100,000 acres. The marketing of rice, timber and rubber is now a state monopoly. Reserved forests covered 22,200,000 acres in 1956; 1,360,000 acres were irrigated in 1955–56. The principal export after rice is teak of which some 200,000 tons were exported annually before the war. The 1956–57 figure was 22,000 tons. Burma is rich in minerals including petroleum, lead, silver, tungsten, zinc, tin and gemstones. Of these, petroleum is the most important. Production in 1957 was 105,000,000 gallons. A refinery has been built at the main oilfield, Chauk, and the Syriam refinery near Rangoon partly rehabilitated. Their combined output of petroleum products is sufficient for most of Burma's needs. The main production of petroleum is handled by a joint venture between the Burma Oil Company and the Union Government.

Under the Government's development plan, a steel rolling mill, a jute bag and twine mill, a pharmaceutical plant and a sugar factory are in production. Other projects still in preparation include a large hydro-electric scheme and extensions to the cotton mills.

Tariff preferences on Commonwealth goods ended on Oct. 1, 1953. Trade with the United Kingdom in 1957 was valued at: Imports £21,738,434; exports, £7,844,904.

Burma joined the Colombo Plan in 1952 and is now receiving important assistance from member countries.

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

Ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein.

The Burma Railways had a total length in 1940 of 2,300 miles, extending to Mytikyina, on the Upper Irrawaddy. The first diesel locomotives were introduced in 1958. There are about 5,472 miles of main roads. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 9 miles north of Rangoon, has been reconstructed and handles much international traffic.

Chief Towns.—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1953), about 740,000. Mandalay, the chief city of Upper Burma had a population of (1953) 186,000, Moulmein one of 103,000 and Bassein 78,000. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.

NATIONAL FLAG.

The Union flag is red, with a canton of blue bearing a large white five-pointed star surrounded by 5 smaller stars.

BRITISH EMBASSY.

(80 Strand Road, Rangoon.)

British Ambassador, His Excellency Richard Hugh Sedley Allen, C.M.G. (1956)..... £3,250

Consul, Señor Don Santiago Rogers.
Consulate, 3 Hamilton Place, W.1.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. 17° 15′ and 55° 59′ S., and long. 66° 30′ and 75° 48′ W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid.

Among the island possessions of Chile are the *Juan Fernandez group* (2 islands) about 360 miles distant from Valparaiso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (Robinson Crusoe) shipwreck. *Easter Island* (27° 8′ S. and 109° 28′ W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 25 provinces and the total area of the Republic is estimated at 290,000 square miles, with an estimated population of 6,872,000 (Jan. 1956). In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000. Included in the total are four racial divisions: (*a*) Spanish settlers and their descendants; (*b*) indigenous Araucanian Indians, Fuegians, and Changos; (*c*) mixed Spanish Indians; and (*d*) European immigrants.

In 1956 the registered births per thousand inhabitants numbered 35·4; marriages 8·3; and deaths 13·0.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipú* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), the President is elected by direct choice of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 147 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

PRODUCTION, &c.—Agriculture and mining are the principal occupations, though industrial development is being actively encouraged by the Government. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, Chili-pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish in the central zone and fruit is an important export item. Excellent wines are produced and exported and are becoming more widely known in world markets. There are large timber tracts in the central and southern zones of Chile, some types of which were exported to Europe and the Argentine, but high production costs and problems over rates of exchange have caused serious difficulties to this export trade. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. The production of refined copper in 1957 was 483,300 metric tons. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural sources in the world. Production in 1957 (including potassium nitrate) was 1,309,554 metric tons. Chile also produces iodine, manganese ore, coal, and a small quantity of gold. 2,101,000 metric tons of coal and 2,679,000 metric tons of iron ores were produced in 1957. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities. Annual production is between 45,000 and 50,000 metric tons. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945, and the industry is now self-supporting. Production in 1957 was 689,499 cubic metres. An oleoduct 70 kilometres long now joins the principal field in Cerro Manantiales with Clarence Bay. The first export shipment was made in February, 1950, and in 1953 a total of 150,248 metric tons was exported. The total production is now being refined at Concon, a few miles north of Valparaiso. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepcion. In 1957 the output of steel billets from Huachipato totalled 388,216 metric tons; rolling mill products totalled 221,488 metric tons.

In recent years a considerable cotton and woollen textile industry has developed. Minor industries include tanning, flour milling, lumbering, distilling, fish canning and whaling, brewing, and the manufacture of starch soap, biscuits, rope, glassware,

plastic goods, pottery, paint, boots and shoes, hosiery, millinery, cheese, furniture, matches, brushes, cordage, paper, radio receivers and valves, rubber products, synthetic detergents, motor vehicle tyres and cigarettes. Domestic industries include weaving and embroidery.

COMMUNICATIONS.—Most of the country's commerce is distributed along its lengthy sea-board in Chilean ships, which have a virtual monopoly of cabotage. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or *vid* the Panama Canal to Europe or *vid* the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine in 1955 numbered 122 vessels of a total gross tonnage of 213,317. Under a new law promulgated in June, 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels.

The first railway was opened in 1851 and there are now 6,100 miles of track. A line runs from Pisagua in the north to Puerto Montt in the south. With the completion of a section of 435 miles from Corumba, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentine) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaiso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft. In 1949 there were 12,500 miles of telegraph, 1,302 post offices and 55,000 miles of telephone.

DEFENCE.—Military service is compulsory but not universal. After exemptions those to be drafted are selected by ballot. In 1957 the Army had 6 infantry and 1 cavalry divisions with a total strength of 2,200 officers, 10,000 regular other ranks plus about 15,000 conscripts annually. In addition there is a para-military police force of "Carabineros" of some 20,000 officers and men. The Air Force had 500 officers and 6,000 other ranks plus 600 conscripts with a strength of some 200 aircraft. The Navy consisted of 2 cruisers, 6 destroyers (2 operational, 4 reserve), 3 frigates, 3 corvettes, 2 submarines, 1 submarine depot ship, 3 transports and various other small fighting ships. The present strength of the Navy's personnel is estimated to be 1,000 officers and 14,000 regular ratings plus 300 conscripts.

EDUCATION is free, elementary education being compulsory since 1920; there were (in 1957) 1,021,083 pupils at elementary, and about 155,936 at secondary schools. There are 7 Universities (3 in Santiago, 2 in Valparaiso, 1 in Concepcion and 1 in Valdivia). The religion is Roman Catholic.

LANGUAGE AND LITERATURE.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral, for Chilean verse and prose. There are over 100 newspapers and a large number of periodicals, including some devoted to professional, scientific and social subjects.

FINANCE.	1956 *Chilean pesos*
Revenue (Financial Year)	204,905,000,000
Expenditure (Financial Year)	230,736,000,000
Internal Debt (Dec. 31, 1957):—	
Direct—Long Term	$36,924,726,804
Short Term	1,911,380,658
Indirect	1,277,234,109
External Debt (Dec. 31, 1957):—	
Long Term:—	
Sterling	£15,458,617
U.S.	$95,159,500
Swiss Francs	Fr.77,074,500
Short Term:—	
Sterling	£563,551
U.S.	$1,227,205

Chile's official exchange rate registered with the International Monetary Fund is Ch. $110 = U.S. $1. The official "free" bank rate of exchange in June, 1958, was about Ch. $2,176 = £1. The brokers' rate of exchange (for use by tourists, etc., but not for commercial transactions) was about Ch. $2,000 = £1.

EXTERNAL TRADE.

	1957 *Gold Pesos*
Total imports	$2,142,639,000
Total exports	$2,224,375,000
Imports from U.K.	£6,825,433
Exports to U.K.	£25,392,282

Since 1949 the gold peso has been worth about 1*s.* 6*d.*

The principal exports in 1957 were metallic and non-metallic minerals (refined copper, ingots and bars, nitrates, etc.), cereals, vegetables, fruit and wool. The principal imports in 1957 were industrial oils, raw cotton, chemicals, machinery, tools, electrical and transport equipment and sugar.

CAPITAL, Santiago (December, 1956) 1,627,962 (Greater Santiago). Other large towns are:—ΨValparaiso (261,684), ΨConcepción (158,941), Temuco (109,141), Viña del Mar (107,563), Chillán (79,461), Talca (75,354), ΨAntofagasta (74,050), ΨValdivia (72,988), ΨTalcahuano (75,643), ΨIquique (47,906), ΨPunta Arenas (44,597). Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

FLAG: 2 horizontal bands, white, red; in top sixth a white star on blue square, next staff.

BRITISH EMBASSY.

Calle Bandera 227, Piso 3° Santiago (Casilla 72D).

Ambassador Extraordinary and Plenipotentiary, His Excellency Ivor Thomas Montague Pink, C.M.G. (1958) £3,400
Chancery, Calle Bandera 227, Piso 3°, Santiago.
First Secretary and Consul, J. N. Henderson.
Naval Attaché, Capt. J. R. Gower, D.S.C., R.N.
First Secretary (Commercial), G. G. Simpson.
First Secretary (Information), H. G. Balfour-Paul.
First Secretary (Labour), W. M. Wylie.
Second Secretary (Commercial), R. C. Robinson.
Third Secretary (Information), N. L. Shearman.

BRITISH CONSULAR OFFICES.

There are British Consular Offices at *Santiago*, *Antofagasta*, *Tocopilla*, *Iquique*, *Valparaiso*, *Concepción*, *Coquimbo*, *Valdivia*, *Osorno* and *Punta Arenas*.

BRITISH COUNCIL.—*Representative of the British Council in Chile*, R. A. H. Duke, Teatinos 307, Santiago.

There are Anglophil Societies at Santiago, Valparaiso and Concepción.

BRITISH CHAMBER OF COMMERCE IN THE REPUBLIC OF CHILE, Calle Bandera 227 (Piso 4°) Casilla 4087, *Santiago* and Calle Blanco 689, Casilla 1676, *Valparaiso* (Branches at *Concepción*, *Talcahuano* and *Punta Arenas*).

Valparaiso is distant from London 9,000 miles *vid* Panama, and 11,000 *vid* the Strait; transit 28 to 45 days.

CHINA

(Ta Chung-Hua Jen-Min Kung-Ho Kuo—
The People's Republic of China.)

Chairman of the Central People's Government Council, Mao Tse-Tung, *born* 1893, *assumed office* 1949.
Vice-Chairman, Gen. Chu Teh.
Prime Minister, Chou En-Lai.
Deputy Prime Minister and Foreign Secretary, Gen. Chen Yi.
Deputy Prime Ministers, Gen. Lin Piao; Gen. Ho Lung.

LONDON OFFICE.
49 Portland Place, W.1.
Chargé d'Affaires, Huan Hsiang.

AREA AND POPULATION.—Estimates of population vary considerably. A census was carried out in June, 1953, and on Nov. 1, 1954, the National Bureau of Statistics, Peking, announced a final figure of 582,603,417 for the population of mainland China. 11,743,320 Chinese were estimated to be resident or studying abroad. The Bureau stated that 51·82 per cent. of the mainland population were males and 48·18 per cent. females; the birth rate averaged 37 per 1,000 and the death rate 17 per thousand. Distribution of the population by nationalities was:—

Chinese	547,283,057	Mongolians	1,462,956
Tibetans	2,775,622	*Tribal peoples	20,824,421
Manchus	2,418,931	Other	6,718,025

* Incl. many aboriginal or primitive tribes in remote western districts of Western China. The total area has been stated as approximately 4,300,000 sq. miles.

THE PROVINCES OF CHINA.

The National Bureau of Statistics, Peking, published in 1954 the results of the 1953 Census of Population. Populations of the Chinese provinces, including Tibet and Inner Mongolia are shown below. The Provinces of Jehol and Sikang were abolished on July 19, 1955, their territories being divided up; those of Jehol among Hopei, Liaoning and the Inner Mongolian Region; those of Sikang being absorbed by Szechwan Province.

Population Census of 1953.

†Anhwei	30,343,637

Yunnan	17,472,737

* *Manchuria.*

† These 4 Eastern Provinces constitute the "East China People's Government" set up by the Communist Central Government in January, 1950. This regional régime includes the large centres of Shanghai, Nanking, Tsingtao and Foochow.

§ These 3 Provinces constitute the "North-Western China People's Government."

§ Sinkiang (Chinese Turkestan) was converted into Sinkiang-Uigur Autonomous Region in July, 1955. Autonomous local governments were set up by the various nationalities in the area—Uigurs, Kazakhs, Tadjikhs, etc. Sinkiang is the largest province of China, about one-sixth of the whole area of the country. Some 80 per cent. of its population are Uigurs, of the Moslem religion.

GOVERNMENT.—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang.

Many years of internal dissension followed the establishment of the Republic, but in 1928 the *Kuomintang* (Nationalist Party) achieved supremacy and established a one-party government in Nanking which was accorded recognition by the Foreign Powers. After more than seven years of war with Japan (July 7, 1937, to Aug. 5, 1945), disputes arose between the Central Government and the Chinese Communists. There were hopes of a peaceful settlement in January, 1946, when, as a result of mediation by General George C. Marshall (then President Truman's special Envoy in China), an armistice was signed at Chungking and an all-party Consultative Conference was convened to resolve the disputed issues. These hopes of agreement were disappointed and hostilities broke out again.

On April 18, 1947, President Chiang Kai-shek attempted to unite the country by declaring one-party rule in China at an end and by announcing the formation of a new State Council to include representatives of the main political parties. The Communists declined to co-operate in the formation of this body and the Central Government's offer to reserve a number of seats for Communist representatives was later withdrawn.

A National Assembly was elected on Nov. 21, 1947, for six years. It had the power to elect and recall the President and Vice-President of the Republic, to amend the Constitution and to ratify amendments thereto proposed by the Legislative Yuan.

The year 1949 was marked by a rising tide of Communist successes. In January, 1949, Marshal Chiang Kai-shek resigned office as President and the authority of the Nationalist Government rapidly declined as province after province was occupied by Communist forces. The Nationalist Government abandoned Nanking on April 23, 1949, and headquarters were removed to Chungking. In August, the Communist forces advanced into South China, and by January, 1950, the Nationalists retained control only in the islands of Formosa (Taiwan) and Hainan, and in some remote parts of Western China. Taipeh, in Formosa, is now the Nationalist capital.

On Sept. 30, 1949, the "People's Political Consultative Conference" of 636 Delegates meeting at Peking elected a council of 56 members and a National Committee of 180 members to make proposals and recommendations to the Council. On October 1, Mao Tse-Tung, Chairman of the Central People's Government, proclaimed at Peking the inauguration of the People's Republic of China.

The U.S.S.R. broke off negotiations with the Nationalist Government on October 2, 1949, and established diplomatic relations with the Central

People's Government. The régime was recognized by all the Communist-dominated countries, by Great Britain on Jan. 6, 1950, and by a number of other countries.

LOCAL GOVERNMENT.—In June 1950 the Communist Government passed legislation to set up provincial and city councils to be responsible for local government until provincial and city people's congresses should be elected.

DEFENCE.—An order introducing compulsory military service for all men between the ages of 18 and 40 was passed by the Chinese Parliament in 1955. Regulations were also approved for the creation of an officer corps with ranks similar to those of the Russian Army. Nearly 80,000 000 men were made liable for service in the Army (3 years), the Navy (5 years) or the Air Force (4 years). It was announced that the new Army would be organised in 14 combat and supporting corps, including a "political" division to serve with front-line troops.

RELIGION.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. All three are professed and practised by Chinese other than Moslems, Christians and Jews.

EDUCATION.—Under the Nationalist Government education was compulsory from the age of 6 to 12. This policy is stated to have been continued by the Communists. In 1952 there were about 550,000 primary schools in operation with about 45,000,000 pupils. There were also 5,100 secondary schools, with about 2,000,000 pupils. The majority of the 35 provinces have provincial universities in addition to national and private institutions. In August, 1950, the Communist Government took over all schools supported by foreign missions, and in October, 1950, closed the Roman Catholic University in Peking.

LANGUAGE AND LITERATURE.—The Chinese language has many dialects, Cantonese, Hakka, Swatow, Foochow, Wenchow, Ning-po and Wu, and, most important, Mandarin (of which the standard form is Pekinese). There are many sub-dialects of Mandarin, some of which are closely allied while others diverge so much as to be almost separate dialects. Chinese literature is among the richest in the world and paper has been employed for writing and printing for nearly 2,000 years, movable wooden blocks having superseded carved wooden slabs many centuries ago. Confucian books of religion, histories, works dealing with philosophy and the arts, poetry, and literary criticism, novels and romances are abundant and many have been translated into other tongues. In 1937 there were 337 daily newspapers and 1,881 periodicals published at Nanking, Shanghai, Peking, Tientsin, Hankow, Canton and other large centres All English-language newspapers in China had been closed down by March, 1951. As from Jan. 1, 1956, all Chinese newspapers appeared with characters printed horizontally, instead of in vertical form, and reading from left to right. Official approval was given in February, 1956, to a 30-letter Latin alphabet to replace some 30,000 ideographic characters at present used in written Chinese. The new alphabet has been introduced for trial in a Government campaign to modernize Chinese writing and eradicate illiteracy.

CURRENCY AND EXCHANGE.—The *yuan* was revalued with effect from March 1, 1955 on the basis of 10,000 old *yuan* for one new *yuan*. From the same date the official exchange rates for sterling and dollars were altered to:

6·893 *yuan*=£1; 2·46 *yuan*= $1.

PRODUCTION AND INDUSTRY.—China is essentially an agricultural and pastoral country. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops. In June, 1950, an Agrarian Reform Law, redistributing the land, was passed.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities, and flour and rice milling have grown important in late years. The mineral wealth of the country is very great, coal of excellent quality being produced; iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundantly found. Oil is produced in the province of Kansu and in South Manchuria.

TRADE.

The value of the Special Trade of China (Imports retained for home consumption and Exports of merchandise of home produce or manufacture) is shown below for a series of years in Standard Dollars.

Year	Imports	Exports
1939.....	$1,333,654,000	$1,027,247,000
1940.....	2,027,143,000	1,970,121,000
1942.....	1,444,340,000	191,700,000
1943.....	3,114,320,000	164,460,000
1946.....	1,501,160,000	412,110,000
1947.....	10,681,326,570	6,376,504,300

The principal articles of export were animals and animal products; oils; textiles fibres; ores and metals and tea. The principal imports were raw cotton, cotton yarn and thread; oils, fats and soap; motor cars and ships; books, paper and paper-making materials; chemicals; metals and ores; and dyes, paints and varnishes.

	1956	1957
Imports from U.K..	£10,681,733	£12,109,393
Exports to U.K.....	12,549,349	14,233,256

COMMUNICATIONS.—Of the total area of China about half consists of table lands and mountainous districts where communications and travel are generally difficult and dangerous, the highest point being *Minyaa Konka* (24,900 ft.) about 150 miles west of Chungking. To open up sea communications from the south-west the *Burma Road*, over 770 miles in length from Lashio, Burma, to Kunming in Yunnan, was constructed in 1937–39. The road was the chief highway for war supplies to China, until cut by the Japanese in 1942; the success of the Allies in Burma in 1945 restored the use of the road and of communication between Yunnan and Burmese ports. Motor lorries perform the journey in seven days, in contrast with the difficult and lengthy pack-mule transit before the road was constructed. There is motor road and railway connexion between Chungking and French Indo-China. In districts not served by roads the principal means of communication from E. to W. is afforded by the rivers, of which the principal are the Yangtse (3,400 miles), Hoangho or Yellow (2,600) and the West River (1,650), and from N. to S. by the Grand Canal.

Railways.—The length of the railways is less than 8,000 miles, inclusive of the Manchurian lines, or less than one-fifth (per 100 sq. miles) of those available in Turkey It was announced on June 23, 1955, that a 200-mile railway linking Litang with the port of Tsamkong, on the Liuchow

Peninsula off Hainan Island, had been completed. Major railway projects now under construction are two new lines across Mongolia and Sinkiang and a line linking Lanchow with Kunming.

Shipping.—In 1947 the number of vessels entered and cleared for abroad was 31,751 with a total tonnage of 9,980,000. Of these totals 19,366 vessels (1,412,260 tons) and 16,343 junks (1,325,994 tons) were under the Chinese flag and 3,682 vessels (8,997,219 tons) were under foreign flags.

Telegraphs connect Peking with Europe and Tibet. There are about 97,000 miles of land lines and several high-power wireless installations. Telephones, municipal and long-distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

SPECIAL TERRITORY

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population of 1,273,969 (1953 Census.) About one-fifth of the male population are monks and polyandry is common. There is an army with an establishment of 10,000 all ranks, consisting of infantry serving on a militia basis and armed with modern weapons. India imports from Tibet wool, borax, salt, and musk; musk, horn and herbs are sent to China. The imports are chiefly cotton and woollen goods, grain, hardware, glass, sugar, biscuits, dried fruits and tobacco, with silver bullion and coined rupees to balance the excess of exports. The present currency is reckoned in *sangs* (mostly paper). The 1939 value was about 8 *sangs* = 1 rupee, which has risen in favour of Tibet to about 3½ *sangs* = 1 rupee (1946). Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces.

Between the 7th and 9th centuries A.D. Tibet was a successful military power whose boundaries extended far into Shensi (China) and for a time to the kingdom of Magadha (India). Later, the influence of Buddhism softened earlier military aggressiveness and Tibet remained in contact with, and was influenced (but not dominated) by, its Mongolian and Chinese neighbours until early in the 18th century when the Manchu Emperor of China, K'Anghsi, taking advantage of internal dissensions in Tibet, invaded the country and established officers at Lhasa. Manchu authority in Tibet appears to have been always loose and by the end of the 19th century was merely nominal.

The Anglo-Chinese Convention of 1890 under which a trade mart was opened at Yatung was persistently flouted by the Tibetans and as a result a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes, and for payment of an indemnity.

From 1906 the Chinese took advantage of the confusion which followed the withdrawal of the British expedition from Tibet to establish by force a greater degree of authority in Tibet than they had previously enjoyed. This lasted only until 1912 when the Tibetans took the opportunity provided by the Chinese Revolution against the Manchus to evict the Chinese from Lhasa and to drive them beyond the Salween. They brought back the Dalai Lama who on the Chinese invasion had taken shelter in India.

In 1918 Chinese aggression on the border led to successful retaliation by Tibet in which the Chinese were driven beyond the upper waters of the Yangtse, but from 1931 to 1933 there was confused fighting on the China-Tibet border, as a result of which the Tibetans lost their hold on most of the territory to the East of the Upper Yangtse which they reoccupied in 1918. Since then the Upper Yantgse has remained roughly the *de facto* frontier between Tibet and China.

In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby Tibet accepted Chinese suzerainty. The Communist army was allowed entry into Tibet and a Communist military and administrative headquarters set up.

Principal Chinese Cities.—The Communist Government has reinstated Peiping as the National capital, under its old name of Peking. From 1928 to 1949 the capital was Nanking. Peking had a population of 2,768,149 at the 1953 Census. The population of the principal Ψports and trade marts is estimated as follows: Nanking, 1,020,000; ΨAmoy, 240,000; ΨAntung, 200,000; Ψ Canton, 1,496,000; Changsha, 700,000; ΨChefoo, 250,000; Chinkiang, 220,000; Chungking, 1,110,000; ΨFoochow, 400,000; ΨHangchow, 600,000; Hankow (including Wuchang and Hanyang), 800,000; Harbin, 638,000; Hsinking, 420,000; Ichang, 110,000; Kirin, 150,000; Mengtsz, 200,000; Mukden, 1,551,000; Newchwang, 170,000; ΨNingpo, 300,000; ΨShanghai, (1953) 6,204,417; Shasi, 150,000; Soochow, 300,000; ΨSwatow, 200,000; Tientsin, (1953) 2,693,831; ΨTsingtao, 756,000.

Flag of "People's Republic."—The "Gate of Heavenly Peace" at Peking, superimposed on the national flag, with a large star and four small stars at the top, and a wheel at the base. The whole is encircled by ears of wheat and rice.

COLOMBIA

(República de Colombia.)

President, Dr. Alberto Lleras Comargo, *elected* May 4, 1958.

Embassy in London.

3 Hans Crescent, S.W.1.
[Kensington: 9177]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Carlos A. Sardi.
1st Secretary, Dr. Gustavo Garcia Moreno.
Consulate-General, 3 Hans Crescent, S.W.1.
Consul-General, Señor Simon Martinez Emiliani.
Auxiliary Consul, Señor Pablo Uribe Grajales.

There are Colombian Consular Offices at *Liverpool* and *Glasgow*.

The Republic of Colombia lies in the extreme north-west of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40′ S. to 12° 25′ N. lat. and 68° to 79° W. long., with an estimated area of

461,606 square miles, and a population (1955 estimate) of 13,000,000.

The Colombian coast was visited in 1502 by *Christopher Columbus*, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811–1824. In 1819 *Simon Bolivar* (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829–1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

Following a period of dictatorship and government by decree from 1953, a military junta was established on May 10, 1957. Congressional elections were held on March 16, 1958, which yielded a Liberal majority of votes. A plebiscite voted on December 1 made constitutional changes by which the office of president would during the next twelve years alternate between candidates of the Liberal and Conservative parties who would hold office for terms of four years, while the two parties would have equal representation in Congress and in the national and departmental governments. On May 4 presidential elections returned the Liberal Señor Alberto Lleras Camargo, supported by Liberal and Conservative votes.

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caquetá, Meta, Putumayo and Patia. The Patia flows through the famous *Minuma Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guiatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Rio Bogotá is the Great *Fall of Tequendama*, 480 feet in height.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; in 1956 some 44 million barrels of petroleum were produced and prospecting for new sources of production is in progress in many parts of the Republic. The principal agricultural products are coffee, cotton, bananas, rice and maize, and in some parts tobacco, wheat and other cereals. Manufactures, mainly for home consumption, consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery, cigarettes, beer, cement, glass containers and, since the latter part of 1954, steel. Successive foreign exchange crises have led to the encouragement by the Government of the rapid development of new industries, including the local assembly and partial manufacture of motor vehicles, radio sets and office machinery.

The Navy consists of 2 destroyers, 3 frigates, and some small craft, with personnel about 2,500; a battalion of the Colombian army served with the United Nations forces in Korea. The first railway was opened in 1855, about 1,914 miles being open in 1949. A new railway is at present being constructed in the Magdalena Valley, which will link the departmental lines running down to the river, and is planned to reach the Atlantic coast. The Dorada Railway, 70 miles of 3 ft. gauge connecting La Dorada and Ambalena, was bought from its British owners by the Colombian Government in July, 1956, together with a 44 mile aerial ropeway connected to the railway, for $1,000,000. There are about 2,200 miles of rail in use at present. There were also (1955) some 13,125 miles of metalled roads, of which 8,440 miles are national highways and the remainder departmental and municipal highways; this excludes "dirt" roads (passable by motors in dry weather only). Colombia was granted loans totalling $47,300,000 (118,500,000 *pesos*) by the International Bank, towards the total of 515,000,000 *pesos* expected to be required to complete the rehabilitation of highways which is now in progress. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. A large volume of traffic is carried on the River Magdalena, which is navigable for 900 miles. The main port for Bogotá is ΨLa Dorada, 592 miles from Barranquilla. There are daily passenger and cargo air services between Bogotá and Barranquilla, Bogotá and Medellin and Bogotá and Cali. There are also subsidiary services to Cartagena, Santa Marta, Manizales, Pereira, Armenia Pasto, Buenaventura, Barrancabermeja, Popayan, Ipiales, Bucaramanga, Cúcuta and Vilavicencio. There are daily services to the U.S.A., Lima, Quito, Panama and Caracas, a weekly service to London *viâ* Jamaica and a daily service *viâ* New York. There are also four weekly air services direct to Europe and a direct twice-weekly service to Caracas. New York can be reached in one day and air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to Manizales, Medellin, Cali and Tunja.

Roman Catholicism is the established religion.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University at Bogotá (founded in 1572) there are universities in the towns of Medellin, Cartagena, Popoyan and Manizales and the department of Nariño. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

COSTA RICA

(República de Costa Rica.)

President (1953–58), Señor José Figueres, *elected* Nov. 8, 1953.

EMBASSY IN LONDON.

42 Draycott Place, S.W.3.

Ambassador, His Excellency Dr. Alfredo Alfaro-Sotela.
1st Secretary, Señor Franz Heck-Prestinary Gotay,
Consul-General.
Consulate-General, 20 Bramerton Street, S.W.3.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17′ and 11° 10′ N lat. and from 82° 30′ to 85° 45′ W. long., contains an area of about 23,000 English square miles, and an estimated population (Oct., 1956) of 1,000,000. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530–1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824–1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile.

The chief ports are Limón, on the Atlantic coast, through which passes most of the coffee exported, and Puntarenas on the Pacific coast. Bananas are principally exported from Golfito and Quepos, ports which have been developed on the Pacific Coast by the United Fruit Co. In 1956 916 ships of a gross tonnage of 2,811,980 entered at Costa Rican ports. About 400 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, K.L.M., LACSA and TACA call at San José, while feeder services link the main centres of population with the capital.

Spanish is the language of the country. Education is compulsory and free, but it is mainly from the leisured class that the executive, legislature and judicature are recruited.

FINANCE.	1956
Revenue	*Colones* 257,203,888
Expenditure	256,100,503

EMBASSY IN LONDON.

Flat 1, 18 Westbourne Street, W.2.
[Ambassador: 8264.]

Ambassador in London, His Excellency Señor Dr. Roberto Gonzalez Mendoza y de La Torre.
Consul-General, Señor Don Julio A. Brodermann (329, High Holborn, W.C.1).
Consul-General, Liverpool, Señor Eusebio Román.

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population (estimated, 1955) of 6,125,000.

The island of Cuba was visited by Christopher Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762–1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940, but its operation was suspended for various periods until February 24, 1955, when the Government elected on November 1, 1954, took office.

Of the total area of 28,000,000 acres, there were (1953), about 5,750,000 acres under cultivation, of which 61 per cent. was under sugar. Tobacco, sweet potatoes, bananas, rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are sugar and tobacco; sugar crop (1956) 4,600,557 Spanish long tons; tobacco crop (1956) 80,486,000 lb.; the chief product of the forests is mahogany. White cedar is also used for boxing the tobacco crop. The estimated livestock figures include (1955) 4,500,000 cattle and 400,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

11,256 route miles of railroad are open (public service 3,677; private lines on plantations and in mining areas 7,579) and about 12,000 miles of telegraph line; there are about 8,291 miles of roads. The island forms an important stopping place for many international airlines.

Language and Literature.—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728 but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. Public libraries have been established and there is a flourishing daily press with wide circulations.

FINANCE.

Attachés, Jan Mrázek; Jaroslav Kazbal; Zdenek Dobes.

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory thus affected having an area of 53,700 square miles.

Since the War of 1939–45 the territory and population of the Republic have undergone change. By a treaty with the Soviet Union (June 29, 1945) Ruthenia was ceded to U.S.S.R., thus reducing the area by over 4,000 square miles and the population by over 750,000. In addition, the expulsion of the Sudeten German minority sanctioned at the Potsdam Conference has been completed and the latest estimate of the population (Dec. 1, 1957) is 13,409,684.

Government.—In September, 1938, Adolf Hitler demanded the cession of the Sudeten districts. On Sept. 29, 1938, a Four Power Conference at Munich acquiesced in the annexation of the territory on the understanding that no further demands would be made, but on March 14, 1939, Nazi troops invaded Czechoslovakia, in flagrant violation of the terms of the Munich Conference, and two days later Adolf Hitler proclaimed that Czechoslovakia had "ceased to exist": a "Slovak State" was established and Bohemia and Moravia were declared a Protectorate of the Reich.

On July 22, 1940, Great Britain recognized the Czechoslovak National Committee set up in London as a provisional Czechoslovak Government, and on July 18, 1941, Great Britain fully recognized the Czechoslovak Government headed by President Benés.

Following the liberation of Eastern Slovakia by Soviet forces in 1945, President Benés and most of the members of his Government left London for Moscow for discussions with the Czechoslovak *émigré* movement in the Soviet Union on the formation of a new Government which would have its seat on Czechoslovak territory. The composition and programme of this Government, which was headed by M. Z. Fierlinger, were announced at Kosice in Slovakia on April 4, 1945. The Kosice Government included equal representation of four Czech parties (Czech Socialists, Social Democrats, Communists and Popular Party) and two Slovak parties (Democrats and Communists).

The first elections in the liberated Republic were held on May 26, 1946, the Communists emerging as the leading party with 38 per cent. of the votes cast. On July 3, 1946, K. Gottwald, the Communist leader, formed a Government of parties participating in a National Front. The uneasy alliance between the parties was terminated by a crisis precipitated by the mass resignation on February 20, 1948, of Ministers representing parties opposed to the Communists in protest against the widespread introduction of Communists into the police force by the Communist Minister of the Interior. The Communist Party, with the aid of Action Committees, seized power, and on February 25 a new Government, predominantly Communist, was formed. On May 30, 1948, new elections were held, the choice lying between a single joint election list of parties in the National Front, and a blank vote. The Communist control of the country is now unqualified. The first Five-Year plan which came to an end in December 1953 was largely concerned with extending heavy industry and industrializing Slovakia. It is officially claimed that production doubled during the plan, but it is also admitted that the economy has been thrown out of balance by poor progress in the development of ore reserves, fuel, power and agricultural production. The second Five-Year plan began on Jan. 1, 1956 after two interim years (1954 and 1955) devoted to correcting these faults.

Language and Literature.—Czech and Slovak are the official languages but the literature is mainly Czech in Bohemia, Moravia and Silesia. The Reformation gave a widespread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415) familiarising the people with Wyclif's teaching. This impulse endured to the close of the seventeenth century when Amos Komensky, or Comenius (1592–1670) was expelled from the country. Under Austrian repression, and with the outlawing of the national language, there was a period of stagnation until the national revival in the early nineteenth century. Modern prose drama and fiction are represented by several authors of international reputation, notably K. M. Capek-Chod (1860–1927), F. X. Svoboda (1860–1943), Jaroslav Hilbert (1871–1936), Viktor Dyk (1877–1931), Arnost Dvorák (1880–1933), Ivan Olbracht (*b.* 1882), K. Capek (1890–1938), and Vladimír Vancura (1891–1942). Liberty of the press ceased with the violation of independence in 1939. It was temporarily restored on the liberation of the country. After the Communist coup of February 25, 1948, however, freedom of the press was "curtailed." All papers and periodicals were forced to follow

the party line and a number of publications were banned. On July 1 serious cuts were made in internal print distribution, causing a further decline in the number of papers and periodicals available.

Education.—In 1956-57 the number of pupils in general (primary and secondary) schools was given as 1,952,171. In addition there were 200,274 pupils at technical schools. The Czech University of Prague was founded in 1348. There is also a university at Brno and additional universities are being instituted in other important towns. The number of students is now several times the pre-war figure. In the 16th century there was a University at Olomouc which was closed by the Hapsburgs at the end of the Thirty-Years' War. In 1947, President Benés opened a new University at Olomouc. Slovakia has its own university at Bratislava.

Finance.—The Czechoslovak currency is the Czechoslovak *Koruna* (Kcs=Czechoslovak crown) of 100 *heller*. From the devaluation of the pound in 1949 up to May 30, 1953, the exchange rate was Kcs. 139·58=£1. From June 1, 1953 the rate has been Kcs. 20·16=£1. This change took place as the result of an internal currency reform when a new currency was issued at a basic exchange rate of Kcs. 1·00 of the new currency for Kcs. 5·00 of the old. The new foreign exchange rate represents an appreciation of the new crown by 38·94 per cent. The Budget estimates for 1958 total Kcs. 94,725,000,000 for expenditure and Kcs. 94,530,000,000 for revenue.

Trade with U.K., 1957: Imports, £4,187,917; Exports to U.K., £8,261,202.

CAPITAL, Prague (Praha), on the Vltava (Moldau), the former capital of Bohemia with a population (1957) of 978,634. Other towns are Brno (Brunn), capital of Moravia (306,371), Bratislava (Pressburg), capital of Slovakia (246,695), Ostrava (199,206) and Plzen (Pilsen) (134,273).

Consul, Erik Wagtmann (*Commercial Secretary*).
Vice-Consul, Hans Jespersen (*Commercial Secretary*).
Vice-Consul, C. Jacobsen.
Vice-Consul, T. F. Germer.

AREA AND POPULATION.—A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zeeland, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54 34′–57° 45′ N. lat., and 8° 5′–15° 12′ E. long., with an area of 16,608 square miles, and a population estimated (October, 1955) at 4,448,000. In 1957 there were 75,169 births, 41,545 deaths and 34,341 marriages.

GOVERNMENT.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Faröe and 2 for Greenland. The voting age is 23 years. In the 1957 elections the Social Democrats obtained 70 seats; Venstre 45; Conservatives 30; Radicals 14; Single Tax Party 9; Communists 6; Faröe 2; Greenlanders 2; Slesvig Party (German Minority) 1.

EDUCATION is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478) and Aarhus (1933).

LANGUAGE AND LITERATURE.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805–1875), Soeren Kierkegaard (1813–1855) and Georges Brandes (1842–1927), with Henrik Pontoppidan (1857–1943) and Karl Gjellerup (1857–1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873–1950), who received the same award in 1945.

Over 200 newspapers are published in Denmark; 12 daily papers are published in Copenhagen.

PRODUCTION AND INDUSTRY.—Twenty-four per cent. of the population live exclusively by agriculture, and about 48 per cent. by manufactures and trade. The chief products are wheat, rye, oats, barley, potatoes, seeds, cattle, horses, pigs and dairy produce; manufactures based on imported raw material cover most of the home consumption.

COMMUNICATIONS.—Mercantile marine (ships above 100 gross tonnage) (December, 1957) 709 ships, with a gross tonnage of 1,963,000. In 1957 there were 4,821 kilometres of railway and 976,337 kilometres of telegraph and telephone lines.

FINANCE	1958–59
Revenue (*Budget estimate*)	*Kr.* 5,588,000,000
Expenditure (*Budget estimate*)	4,998,000,000
Government Debt (March 31, 1957):—	
Internal	7,740,000,000
External	1,172,000,000

Rate of Exchange—Kr. 19·36 = £1 (*see also* p. 84).

TRADE	1957
Total Imports	*Kr.*9,348,100,000
Total Exports	7,982,100,000

BRITISH COUNCIL.

Kastelsvej 40, Copenhagen. *Representative*, O. M. Williams, M.B.E.

Outlying Parts of the Kingdom

The outlying parts of Denmark have about 55,000 inhabitants. The FARÖE, or Sheep Islands (540 sq. m. pop. (1950) 31,667), capital, Thorshavn, are governed by a *Lagting* of 25 members, and send 2 representatives to the *Folketing* at Copenhagen. On September 14, 1946, the Lagting, with the consent of the Danish Government, for its own guidance held a plebiscite on the Faröe. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At a subsequent general election for the Lagting a great majority voted in favour of remaining a part of the Kingdom of Denmark with a certain extent of home rule. In 1948 the Faröe received a certain measure of home rule. Special Faröese affairs are administered by a council of 3 members. Trade with U.K. in 1957 totalled: Imports, £536,169; Exports, £95,825. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m. population, Dec. 31, 1952, 24,768), is divided into 3 provinces (West, North and East). West Greenland (capital Godthaab) has a *Landsraad* of 14 members and sends 2 representatives to the *Folketing* at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department; discoveries of lead were made in 1948. Imports from U.K. (1957), £131,210. The United States of America has acquired certain rights to maintain air bases in Greenland.

Copenhagen, distant from London 728 miles; transit 36 hours.

There are also Consular Offices at *Liverpool, Birmingham, Manchester, Nottingham, Grimsby, Southampton, Plymouth, Cardiff, Edinburgh, Glasgow* and *Belfast*.

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America.

The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out on Feb. 27, 1844, when the Dominican Republic was definitely proclaimed by the natives.

The country was occupied by American marines from 1916 until the adoption of a new Constitution in 1924. In July, 1924, a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the Customs and the redemption of foreign obligations, which continued to be administered by an American official. On Sept. 24, 1940, a new convention was signed at Washington; this provided for the withdrawal of the U.S. Receiver-General, the Customs to be collected by the Dominican Government, and the whole public revenue to be deposited in an agreed bank, the service of the debt being recognized as a first charge on the deposit. Congress consists of a Senate of 23 members, elected for 5 years, and of a Chamber of Deputies of 58 members, also elected for 5 years.

The Dominican Republic lies between Cuba on the west and Puerto Rico on the east and covers an area of about 19,322 square miles, with a population of 2,703,656 (July 1957). The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes. According to local classification there are 1,289 miles of first class and 1,412 miles of second class and inter-communal roads in the Republic. There is a direct road from Ciudad Trujillo to Port-au-Prince, the capital of Haiti, enabling the journey to be made in one day. There are about 80 miles (Sánchez–La Vega) of public railway, and a telephone system connects practically all the principal towns of the republic. The Dirección General de Comunicaciones, All American Cables and Radio Corporation of America maintain an efficient telegraph service with all parts of the world. There are 28 commercial broadcasting stations and there is a television station operated by La Voz Dominicana, which with the help of relay stations provides reception of its programmes throughout the Republic.

Spanish is the language of the Republic and education has made considerable progress.

Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, timber, cattle, iron ore, sisal products, honey and chocolate. There are several light industries producing sisal bags and rope, glass products, cotton textiles, matches, peanut oil and other products.

The Republic is served by seven airlines, Pan-American, KLM, Caribair, Delta Air Lines, Compania Brasileina de Aviacion (VARIG), Compania Cubana de Aviacion, and the Compania Dominicana de Aviacion, all using the General Andrews Field at Ciudad Trujillo.

FINANCE

	1957	1958†

Consuls at *Liverpool*, *Birmingham* and *Glasgow*.

Area and Population.—Ecuador is an equatorial State of South America, the mainland extending from lat. 1° 38′ N. to 4° 50′ S., and between 75° 20′ and 81° W. long., comprising an area, reduced by boundary settlements (Jan. 29, 1942) with Peru, to about 226,000 sq. miles.

The Republic of Ecuador is divided into 18 provinces and one territory. It has a population estimated (June, 1957) at 3,906,907, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,498 ft.), Iliniza (17,405 ft.), Cariahuairazo (16,515 ft.); Cotocachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The *Galápagos* (Tortoise) *Islands*, forming the province of Colon, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population of 1,687. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the *Antarctic Humboldt Current*. The islands export guano and orchilla moss. There is an increasing amount of fishing, mainly for the North American market.

Government.—The former *Kingdom of Quito* was conquered by the Incas of Peru in the latter part

of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). A new constitution was issued on Dec. 31, 1946. Elections were held on June 3, 1956 and Señor Ponce Enriquez was elected President.

Production and Industry.—The chief products are bananas, cocoa, coffee, rice, petroleum, straw hats, vegetable ivory and balsa wood. The petroleum, like the products of Ecuador's farm lands and cotton industry, which are extensive, is almost wholly consumed internally. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found.

Communications.—There are about 2,000 miles of permanent roads and 2,500 miles of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. The laying of a new track from Ibarra to San Lorenzo has now been completed. Seven commercial airlines (Panagra, Area, Braniff, K.L.M., Avianca, Tan, Air France, Lanica and A.P.A.) operate international flights, linking Ecuador with New York, Miami, Lima, Santiago, Rio de Janeiro, etc. Area and other Ecuadorian companies operate internal services between all important towns.

Defence.—The standing Army has a strength of about 8,000. There is an Air Force of some 40 front line aircraft and a small Navy. All are being advised by U.S. missions.

Language and Literature.—Spanish is the language of the country. The electorate of Congress is confined to adult male and female citizens who can read and write and in recent years considerable headway has been made in reducing the high figure of illiteracy. 3 daily newspapers are published at Quito and 6 at Guayaquil. Elementary education is free and compulsory. In 1956–57 there were 490,277 pupils at the 4,525 primary schools and 48,253 pupils at the 232 High Schools. The 6 Universities (at Quito, Guayaquil, Cuenca, Loja and Portoviejo) had 6,129 students in the same year.

FINANCE	1955
Revenue (*Budget Estimates*) ...	*Sucres* 935,300,000
Expenditure (*Budget Estimates*) .	935,300,000
Internal Debt (Sept. 30, 1957) .	640,476,000
External Debt (do.)	$U.S.24,822,000
Official rate of Exchange: (*See also* p. 84.)	*Sucres* 47=£1.

As from Jan. 1, 1954, imports were classified under two headings. List I contains essential and semi-essential items which are payable at the official rate of exchange. List II contains luxuries and semi-luxuries which are payable at the free rate of exchange (*Sucres* 49=£1, approx.). Import licences are required for all merchandise and these are issued by the Central Bank of Ecuador.

TRADE	1956	1957
Imports.....	U.S. $80,168,000	U.S. $91,880,890
Exports.....	93,613,000	98,636,448
Imports from U.K...	£2,411,683	£2,648,114
Exports to U.K.....	771,832	765,268

In 1957 the United States sent about 52 per cent. of Ecuadorean imports and received about 58 per cent. of her exports.

The chief exports are cocoa, coffee, bananas, rice, caoutchouc, vegetable, ivory and gold, cinchona bark, Panama hats and coffee; the chief imports are textiles, machinery, foodstuffs, and manufactured goods.

CAPITAL, Quito. Population (1954), 229,949. ΨGuayaquil (287,266) is the chief port; other centres are Cuenca (57,338); and Riobamba (34,268).

FLAG: Three horizontal bands, yellow, blue and red (the yellow band twice the width of the others).

3rd Secretary, Miss K. Makonnen.
Cultural Attaché, Ato Bekele Yilma.

Position and Extent.—Ethiopia (or Abyssinia) is an inland country in North-Eastern Africa, bounded on the North by the former Italian Colony of Eritrea, which was federated with Ethiopia under the Ethiopian Crown in September, 1952, in accordance with the United Nations Resolution of Dec. 2, 1950; on the South by Kenya; on the West by the Sudan; and on the East by French and British Somaliland, and the former Italian portion of Somaliland, which is now being administered by Italy as a Trusteeship territory. The area is estimated at 350,000 square miles, with a population officially estimated at 16,000,000 of whom fewer than one-half are of the ruling race of Amharas and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed 10,000 ft. The lower country and valley gorges are very hot; the higher plateaux are well watered, with a genial climate. On the high plateau there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is

the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

The Amharas, who inhabit the provinces of Tigre, Begemdir, Gojjam, parts of Shoa, and many of the Gallas, are Christian (a branch of the Coptic Church). The head of the Coptic Church is the Coptic Patriarch at Alexandria. Since 1950 Bishops have, however, been appointed by the local Metropolitan Bishop, without direct recourse to Alexandria. Moslems predominate in some areas, notably Harar and Jimma and Arussi, the Moslem centre being at Harar. The province of Gamu Gofa and parts of Sidamo and Arussi have considerable pagan elements.

Government.—On the basis of the 1955 Constitution, elections were held in 1957 and the Chamber of Deputies met for the first time at the end of that year. The Chamber enjoys greater fiscal control than the past Assembly and there is a limited degree of ministerial responsibility to Parliament. The Senate continues to be nominated by the Emperor.

Production and Industry.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish: in the middle zone maize, wheat, barley, coffee, wild oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided 52·4 per cent. of the country's total exports by value in 1955–56. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people

Communications.—A railway links Addis Ababa, the capital, *viâ* Dire-Dawa, with Jibuti, 486 miles away. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara in Eritrea, with a branch from Dessie to Assab on the Red Sea Coast. Ethiopia has access to the Red Sea at Massawa and Assab, ports being a federal responsibility. Gondar is linked to Asmara by a road through Axum and Adua. Others run from Addis Ababa west to Lekemti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the East from Dire Dawa to Harar and British Somaliland. In September, 1950, Ethiopia was granted a loan of U.S. $5,000,000 by the International Bank for Reconstruction and Development for the extension and repair of the highway system. A further loan of $Eth. 15,000,000 was granted in 1957. The Ethiopian Air Lines maintain regular services from Addis Ababa to Jimma, Gore and Gambela; Dabra Markos, Gondar and Asmara; Dire-Dawa; and certain other provincial towns. External services are operated to Jibouti, Aden, Port Sudan, Cairo, Khartoum, Nairobi, Athens and Frankfurt.

Defence.—A Ministry of Defence has been instituted. The armed forces comprise the Imperial Army which includes the Imperial Bodyguard, the Imperial Air Force and the Imperial Navy. The Army consists of infantry, artillery, engineers, signals, ordnance, and supply services, and has an armoured squadron of light tanks and armoured cars. The Imperial Bodyguard consists of infantry, with some artillery and armoured cars. An American Military Mission trains the Army, and Swedish officers are employed in the Ministry of Defence. There is now a military academy at Harar. The Imperial Air Force comprises three attack squadrons and a flying training school. The aircraft are of British and Swedish manufacture and the training staff is Swedish.

The Imperial Navy, which has been started with the formation of a Naval School at Massawa with Norwegian instructors, has one patrol craft presented by the United States.

Education.—Elementary education is provided without religious discrimination, by Government schools in the main centres of population; there are also Mission schools. In or near the capital are several secondary schools, a university college, a technical school, an agricultural school, a theological college, commercial school, and a teacher-training college; also cadet-schools for the Army, Imperial Guard, Air Force, and Police. Schools of higher grade than elementary are also to be found in some of the provincial capitals. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa.

FINANCE

	1954–55	1955–56
Revenue	£17,130,000	£16,430,000
Expenditure	16,814,000	18,630,000

Currency.—A new Ethiopian currency was issued by the State Bank of Ethiopia in July, 1945, at an exchange rate of Ethiopian $10=£1, backed almost entirely by sterling securities. The East African shilling remained legal tender temporarily but not the Maria Theresa dollar, although it continued to be widely used in the Provinces. In November, 1946, a Proclamation was issued by which the use and possession of Maria Theresa dollars were forbidden, and all coins had to be surrendered to the Ethiopian authorities at a rate of two Maria Theresa dollars to three Ethiopian dollars. Ethiopia did not devalue her currency in line with sterling in September, 1949, and a rate of E$7=£1 has been maintained since that date.

TRADE

	1956
Total Imports	£22,436,000
Total Exports	21,622,000
Imports from U.K., 1957	2,255,651
Exports to U.K., 1957	1,041,530

The chief imports by value are cottons, petroleum products, machinery, motor vehicles and parts; the principal exports by value being coffee, oilseeds, hides and skins, cereals and pulses.

CAPITAL, Addis Ababa (estimated population 400,000), also capital of the province of Shoa; other provincial capitals are Makale (Tigré), Gondar (Begemdir), Dessie (Wallo), Debra Markos (Gojjam), Lekemti (Wallega), Goré (Ilubbabor), Jimma (Kaffa), Chencha (Gamu-Gofa), Yirgalem (Sidamo), Aselle (Arusi), and Harar (Harar). Besides these, Dire-Dawa, Gambela, and Aduwa are towns of some importance. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIOPIAN FLAG: Three horizontal bands; green, yellow, red.

ERITREA

A former colony of Italy, Eritrea extends from Ras Kasar, 18° 2′ N., to Ras Demoira, 12° 42′ N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Ethiopia, and on S.E. by French Somaliland. It consists of a high, mountainous hogsback interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The mountains range up to 10,000 ft. and Asmara, the capital (pop. 123,000, 11,000 Italians), stands at 7,800 ft. above mean sea level. Total area, 48,350 square miles, with a population of about 1,000,000, of whom about 20,000 are Europeans. Of the population about half are Coptic Christians and the remaining half are Moslems.

Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown. A new Constitution for Eritrea, drawn up by the U.N. Commissioner, and approved by the Eritrean Constituent Assembly, was ratified by the Emperor Haile Selassié on August 11, 1952. The Government of Eritrea has legislative, executive and judicial powers in domestic affairs, and its jurisdiction extends to all matters not vested in the Federal Government, including health, education, welfare, law and order, the levying of taxes and adoption of a budget. Defence, currency, foreign affairs, finance, foreign trade and communications (including ports) are within the jurisdiction of the Federal Government. The Federation of Eritrea with Ethiopia was ratified by the Emperor Haile Selassié on September 11, 1952, and came into effect with the final handing over of authority by the British Administration at midnight on September 15, 1952.

Full executive power is, subject to certain safeguards, in the hands of a Chief Executive elected by the Assembly to hold office during its own term, but not responsible to the Assembly. The single chamber Assembly is elected by all adult males of federal nationality. There is also in Eritrea a representative of the Emperor who has certain formal rights and prerogatives not affecting Eritrea's autonomy. English was adopted as the official language of the Eritrean Assembly.

Chief Executive of Eritrea, Dejasmach Asfeha Welde Mikael, *appointed* 1955.

Ψ Massowa (pop. 27,000) is the chief port, where there is a good harbour, other centres being Keren (10,000), Decamere (9,000), Adi Ugri, Agordat and Tessenei. A railway from Massowa runs to Asmara and thence inland to Keren and Agordat, with projected extensions towards the S.E. boundary.

FINNISH EMBASSY IN LONDON

66 Chester Square, S.W.1

[Sloane: 0771]

Ambassador in London, His Excellency Leo Tuominen (1957).

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,127 square miles, of which 70 per cent. is forest, 9 per cent. cultivated, 9 per cent. lakes and 12 per cent. waste and other land, population (Dec. 31, 1957) 4,356,000. In 1957 the birth rate was 19·9 per 1,000, death rate 9·4 per 1,000. The infant mortality rate is 28·1 per 1,000 live births. 96 per cent. of the people are Lutherans, 1·7 per cent. Greek Orthodox and 2·3 per cent. belong to other religious bodies. The loss of Karelia meant resettling about 480,000 refugees mainly on some 46,000 new farms provided by the Government, partly from holdings exceeding 62 acres and partly by purchase.

The Aland Archipelago (Ahvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (1954) of 21,486 (97 per cent. Swedish-speaking). The islands have a semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (*Eduskunta*) for which women are eligible, now composed of 200 members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

The last general election was in July, 1958. The present state of the Parties is as follows: Communists 50, Social Democrats 48, Agrarian 48, Conservatives 29, Swedish People's Party 14, Finnish People's Party 8, Independent Socialists 3.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the army is limited to a force not exceeding 34,000. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8–11 months. None of the defence forces has the full complement permitted.

Education.—Primary education is compulsory and free for all children from 7 to 15 years, and in 1951–52 there were 492,000 in attendance at primary schools, with 101,000 in secondary schools and 31,000 in colleges for vocational training. There are 11 Higher Schools with 4,400 students, and in addition to the State University of Helsinki (about 9,000 students) there is a Finnish-speaking University (450 students) and a Swedish-speaking University (550 students) at Turku.

Language and Literature.—Most Finns are bilingual. 91·2 per cent. speak Finnish as their first language, 8·6 Swedish and the remaining 0·2 per cent. other languages (mainly Lapps living a nomadic life in the North). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1919 Finnish has slowly been displacing Swedish. In literature also, until the close of the eighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 65 daily newspapers in Finland.

Production and Industry.—Agriculture and forestry are the principal occupations of the people. The cultivated area is small (about 6,400,000 acres in 1957, including 2,900,000 acres under hay). The main crops are hay, oats, wheat, rye, barley and

potatoes. The *Live Stock* (1957) included 263,011 horses, 1,766,902 cattle, 277,681 sheep, 564,154 swine and 5,198,581 poultry. The productive forest area covers 53,500,000 acres and is a great source of wealth, exceeding that of every European country except Russia. The growing stock comprises 48,384,000,000 cu. ft., including bark, of which 45·5 per cent. is pitch pine, 32·2 per cent. spruce, and the rest largely birch. Saw mills, and the manufacture of wood pulp, cellulose, paper, plywood and prefabricated houses provide employment for about 62,000 factory workers. There is no coal, and mineral resources, with the exception of copper and iron ore, are limited.

Communications.—There are 3,700 miles of railroad and a well-developed telegraph and telephone system. There is railway connection with Sweden and U.S.S.R., passenger boat connection with most of the countries of Western Europe, and telephone communication with most countries of the world. External civil air services are maintained by BEAC (as far as Stockholm), Aero Oy (Finnish Airlines), Scandinavian Airlines System and Pan American Airways. Aero Oy and Aero Flot (the Soviet State Airlines) between them maintain a daily service with Moscow. Aero Oy maintains an extensive internal air service. Aero Flot maintains a service twice a week with Leningrad and Czech State Airlines twice a week with Prague. The merchant fleet (April, 1958) consists of 264 steamships (390,000 tons gross), 179 motor vessels (372,000 tons gross), and 108 sailing ships with auxiliary engine (11,000 tons gross).

Finance	1958
Revenue (*Budget*).....	*Marks* 307,544,406,000
Expenditure (*do.*).....	311,810,461 000
Debt (March 1958).....	149,900,000,000

Finnish Mark 898 (approx.) = £1 (*see also* p. 84).

Trade	1957
Total Imports.....	*Marks* 227,392,802,000
Total Exports.....	211,502,389,000

	1956	1957
Imports from U.K.	£46,187,809	£37,207,573
Exports to U.K...	66,571,316	72,989,381

The principal imports are raw materials, foodstuffs, machinery and manufactured goods. The exports are principally the output of the timber mills (timber, cellulose and paper).

CAPITAL, Ψ Helsinki (Helsingfors). Population (1954) 403,000; other towns are Ψ Turku (Abo), 108,000; Tampere (Tammerfors), 108,000; Lahti, 48,000; Pori (Björneborg), 46,500; Oulu (Uleåborg), 44,500; Ψ Vaasa (Vasa), 38,500; and Kuopio 36,500.

FLAG: White with blue cross.

NATIONAL DAY: December 6.

(*a*), (*b*), (*c*). These Departments correspond with the districts of Alsace and Lorraine.

AREA AND POPULATION.—The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N. lat., and from 7° 45′ E. to 4° 45′ W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 90 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfort* (May 10, 1871) amounted to 5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the 1939 area of France (exclusive of Algéria) 212,895 square miles, with a population (census of May, 1954) of 42,731,445, of whom 1,451,752 were foreigners. The population of Metropolitan France on Jan. 1, 1957, was estimated at 43,853,700 by the French National Institute of Statistics. During 1956 there were 804,000 live births, 542,000 deaths and 294,000 marriages.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789–1793), and the *First Republic* endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20–June 29, 1815), until the *Second Republic* of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the *Third Republic* was set up. The constitution of the Third Republic vested the legislative power in a Chamber of Deputies (numbering 618 in 1940) elected for 4 years, and a Senate (numbering 314 in 1940) elected for 9 years, one-third retiring every 3 years. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress. The President of the Republic selected a President of the Council of Ministers from among the leaders of the various political groups and confirmed his choice of colleagues.

On Sept. 1, 1939, Germany invaded Poland, thus precipitating war with France and Great Britain, who had (March 31, 1939) given an open pledge to support Poland against aggression.

On June 17, 1940, the late Maréchal Pétain sought terms of surrender from the Germans. A number of French troops had reached British ports after the evacuation of the British Expeditionary Force from Dunkirk and St. Valéry, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General de Gaulle announced the formation of a Provisional National Committee "to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader."

On June 3, 1943, after prolonged negotiation, there was set up a *French Committee of National Liberation*, which was recognized by the United Nations on August 26, 1943.

Paris was liberated on August 25, 1944, and on October 23, 1944, the de Gaulle administration was recognized by the United Nations as the government of France.

Under the de Gaulle administration there was a single chamber legislature (The National Consultative Assembly) which met at Algiers until France was liberated. The enlarged Consultative Assembly met in the Luxembourg Palace (Paris), formerly the Senate House, on Nov. 7, 1944.

Following the Referendum of Oct. 21, 1945, a Constituent Assembly was elected with the task of drafting a new constitution.

Under the new Constitution, adopted by a majority of 1,132,011 in a National Referendum on Oct. 13, 1946, the Legislature consists of the National Assembly and the Council of the Republic. Both Chambers are elected on a territorial basis, the National Assembly by universal direct suffrage and the Council of the Republic by the communal and departmental Councils through universal indirect suffrage. The Constitution was revised in November, 1954 and now provides that legislation (except financial bills, which must be introduced in the National Assembly) can be initiated by either

house. Before a bill can become law it must be adopted in the same form by both houses. In the event of failure to agree after a limited period of time the text adopted by the National Assembly prevails.

In January, 1956, a General Election was held, and the resulting composition of the National Assembly was:—

Party	Seats
Communists	150
Socialists	94
Radicals	70
M.R.P.	72
Moderates	96
Gaullists	22
Poujadists	52
Others	38
Total	594

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The harvest in 1956 (a bad year for wheat) was:—

	(Quintals)
Wheat	56,826,500
Oats	46,041,700
Barley	64,130,200
Rye	4,711,400
Maize	17,376,900

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production of wine in 1956 (excluding Algeria) was 50,452,000 hectolitres. Cider-making is also an important industry. The live stock (1956) included 17,692,700 cattle, 8,402,500 sheep and lambs, 7,759,200 pigs, 2,064,400 horses and 1,269,900 goats. The mineral resources include coal, pig iron, bauxite, copper, lead, silver, antimony and salt. 57,381,000 tons of coal were mined in 1956 (excluding the Saar production). The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

LANGUAGE AND LITERATURE.—French is the universal language of France and of a large proportion of the people of Belgium, Luxemburg, Switzerland, Italy, Egypt, Tunisia, Algeria, Mauritius, Haiti, the Province of Quebec, Canada, and of the State of Louisiana, U.S.A., to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 8 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937), Roger M. du. Gard (1937), André Gide (1947) and François Mauriac (1952).

DEFENCE.—The *personnel* of the Defence Forces in mid-1956, was—*Army* 860,000 (including *Gendarmerie* of 63,000); *Navy* 73,000; *Air Force* 147,000. The French Navy included 2 battleships, 3 aircraft carriers, 4 cruisers, 32 destroyers and 16 submarines.

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (*a*) Ministry of National Education with Secretariats of State for Technical Education, Youth and Sports, and for Fine Arts; (*b*) Superior Educational Council, charged with the actual administration; (*c*) Consultative Committee (advisory); (*d*) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (*a*) Territorial Academies, with inspecting staffs for all grades; and (*b*) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. (i.) *Primary* education is secular, compulsory and free, the school age being 6 to 14. Schools are for boys, for girls, or mixed. (ii.) *Secondary*: State lycées, communal colleges, and many private establishments, 7-yrs. course, either (*a*) purely classical; (*b*) purely modern: (*c*) Latin and sciences; or (*d*) Latin and modern languages. Sèvres school and the Sorbonne (University of Paris) are among the well known establishments. (iii.) *Special Schools* are numerous. (iv.) There are 17 *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Alger, Besançon (1485), Bordeaux (1441), Caen (1432) Clermont (1808), Dijon (1722), Grenoble (1339), Lille (1530), Lyon (1808), Montpellier (1125), Nancy (1572), Paris (1150), Poitiers (1431), Rennes (1735) Strasbourg (1567), and Toulouse (1230).

ARCHÆOLOGY, ETC.—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Cæsar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgae from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIth century châteaux survived the French Revolution.

COMMUNICATIONS.—The length of the *Routes Nationales* is about 50,000 miles, and of other roads 382,000 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways in general use having a length of 8,000 km. The Rhône is navigable for 1,200-ton vessels from the sea to Switzerland.

The system of railroads in France is very extensive. The length of lines of general interest, inclusive of local lines, open for traffic on Jan. 1, 1957 was 43,086 km., of which 5,520 km. were electrified. The lines left open in Sept. 1944 totalled only 11,125 miles, but the work of reconstruction then begun has restored the pre-war figure. Traffic in 1956 totalled 30,800,000,000 passenger-kilometres and 50,200,000,000 ton-kilometres.

Civil Aviation.—In 1956 passenger/kilometres flown by aircraft of French airlines totalled 3,796,897, of which 2,804,631 were by *Air France*.

Shipping.—The French mercantile marine on Jan. 1, 1957, consisted of 725 ships of 3,766,900 tons gross, of which 73 were passenger vessels

(728,700 tons) 132 tankers (1,276,300 tons) and 520 cargo vessels (1,761,900 tons).

FINANCE

	1956
Total revenue (*Budget*).....	*Frs.* 3,877·8 milliard
Ordinary expenditure (*do.*).	4,642·8 milliard

The *Public Debt*, on December 31, 1956, amounted to *Frs.* 6,494·8 milliard, of which the external debt accounted for *Frs.* 953·7 milliard.

Currency.—The unit of currency is the *franc* of 100 *centimes*. On August 11, 1957, a system of exchange rates was introduced which amounted to a devaluation of the franc by 20 per cent. in certain sectors. This devaluation was made general on October 26, 1957. The franc is now officially quoted at *Frs.* 420 = $1 U.S. (*Frs.* 1,176 = £1).

COMMERCE

The principal imports are wool, cotton, chemicals, coke, crude oil, oleaginous fruits and seeds, machinery, raw skins, timber, rubber, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine and other agricultural products, soaps and perfumes, and glass.

FRENCH FOREIGN TRADE

	1957
	Francs
Imports.....	2,265·5 milliard
Export.....	1,889·3 milliard
	1956 1957

Exports to U.K.....	112,206,799 110,513,399

ALGERIA

Algeria.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. Since 1881 the three northern departments of Algeria—Algiers, Oran, and Constantine—have formed an integral part of France, under a Governor-General, assisted by a Consultative Council of 15 official members and a Superior Council of 60 members. Algeria sends 14 Senators and 30 Deputies to Paris. Algeria lies between 8° 45′ W. to 12° E. longitude, 37° 6′ N. to an undetermined S. limit about 19° N., covering an area estimated at 855,900 square miles, with a population (estimated 1957) of 10,010,000, including 1,250,000 Europeans, mostly French. The total value of imports in 1957 was *frs.* 395·8 milliard and of the exports *frs.* 171·8 milliard. The bulk of trade is with France. Trade with the United Kingdom in 1957 was valued at: imports, £2,674,511; Exports to U.K., £12,300,696. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, corkwood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1954 there were 2,774 miles of railroad open for traffic; and in 1956 the number of ships engaged in foreign trade entering Algerian ports was 5,257. 22,965 commercial aircraft arrived at or departed from Algerian airports in 1956. The principal town is ΨAlgiers, the capital (municipal population, Census, 1954, 361,300), a most important coaling station and much frequented as a health resort; other large towns are ΨOran (299,000), Constantine (148,700), ΨBone (114,100), Sidi bel Abbès (80,600), Tizi Ouzou (27,897), ΨPhilippeville (70,400), Mascara (57,500), Tlemcen (73,400), ΨBougie (52,283), and ΨMostaganem (60,200).

Southern Algeria, consisting of the Territories of Ain Sefra, Ghardaia, Touggourt and the Saharan Oases, was formed into a separate colony on Dec. 24, 1902. The population of Southern Algeria was approximately 1,000,000 in 1954 (included in the figure given above).

Minister Resident and Governor-General, M. Robert Lacoste.

CAPITAL OF FRANCE. Paris, on the Seine.

Population (1954), (*Paris ville*) 2,850,189. The population of Greater Paris (within 15-mile radius) is approximately 6,600,000. Twenty-three other cities exceeded 100,000 at the Census of 1954—ΨMarseilles (661,492), ΨLyons (553,039), Toulouse (268,863), ΨBordeaux (257,946), ΨNice (244,360), ΨNantes (222,790), Strasbourg (200,921), Lille (194,616), St. Etienne (181,730), ΨToulon (141,117), ΨLe Havre (139,810), Nancy (124,797), Rennes (124,122), Reims (121,145), ΨRouen (116,540), Grenoble (116,440), Clermont Ferrand (113,391), Dijon (112 844), Le Mans (111,891), ΨBrest (110,713), Roubaix (110,067), Limôges (105,990) and Angers (102,142).

The chief towns of Corsica are ΨAjaccio 32,997 and ΨBastia 42,729.

Paris is distant from London 267 miles; transit by air, 1 *hr.* 10 *mins.*

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

ROYAL CAMBODIAN EMBASSY IN LONDON

24, Phillimore Gardens, W.8.

[Western: 4354.]

Ambassador in London, His Excellency Sam Sary.
1st Secretary, Dr. Khong Roeum Wongsanith.
3rd Secretary, Lim Say.
Attachés, Kim Xuen; Mlle. Nhem Somaly.

AREA AND POPULATION.—A kingdom with an area of some 70,000 square miles and a population of 4,500,000 (estimated), Cambodia is situated between Thailand to the west and South Vietnam to the east. It is bordered on the north and south respectively by Laos and the Gulf of Siam.

HISTORY.—Once a powerful kingdom, which as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated a constitution providing for parliamentary government. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Vietminh forces from the country, and the process was completed when, in January, 1955, Cambodia became financially and economically independent not only from France but also from Laos and Vietnam. The present Government is drawn from the Popular Socialist Community, a movement formed by Prince Norodom Sihanouk who abdicated from the throne in March 1955 in favour of his parents, King Norodom Suramarit and Queen Kossamak. The Community holds all 61 seats in the National Assembly as a result of the last general elections which were held in March 1958.

GEOGRAPHY, ECONOMY AND COMMUNICATIONS.—Cambodia is largely underdeveloped and underpopulated with an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber are the main exports. Seventy-five per cent. of the total land area is virgin forest abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country has some 4,000 kilometres of roads, of which about a third are hard-surfaced and passable in the rainy season. There is one railway which runs from Phnom-Penh to the Thai border, where it connects with the Thai railway system. Phnom-Penh is a river port capable of receiving ships of up to 2,500 tons all the year round. A deep water port is under construction at Kompong Som on the Gulf of Siam and this will be linked by road to Phnom-Penh. There is as yet no large-scale industry. A Two Year Plan for economic development was published in January, 1955, and the country is receiving substantial aid from various foreign countries.

The Cambodian airline, Royal Air Cambodge, operates services with Air Vietnam and Thai Airways between Phnom-Penh and Saigon and Bangkok, and with Cathay Pacific Airways between Phnom-Penh and Hong Kong. There are flights also to Siemreap where the famous ruins of Angkor Wat are situated. Cargo boats from Singapore and Hong Kong visit Phnom-Penh regularly.

CULTURE AND EDUCATION.—Cambodian culture is predominantly Indo-Siamese and is distinct from Annamite culture which is largely derived from China. The state religion is Buddhism of the "Little Vehicle". There are fairly large Chinese (300,000) and Vietnamese (400,000) minorities. The national language is Cambodian, although French is widely spoken and is still largely the official language of government and commerce. Considerable efforts are now being devoted to the development of education and new schools, colleges and technical institutes have been established. A Buddhist University was recently inaugurated in Phnom-Penh, where there are also Faculties of Medicine and Law. A residential teachers' training college is now in operation.

The official rate of exchange in 1957–58 averaged 98 *riels* = £1.

Trade with U.K.—Total imports from U.K. in 1957 were valued at £235,900; exports to U.K., £41,470.

CAPITAL, Phnom-Penh. Population (estimated, 1958), 550,000.

BRITISH EMBASSY

Laos

EMBASSY IN LONDON

5 Palace Green, W.8

Ambassador Extraordinary and Plenipotentiary, H.R.H. Prince Tiao Khampan (1955).

Laos includes the former Kingdoms of Luang Prabang and Vientiane and the Principality of the Champassac, now united under King Sisavang Vong (born 1885) of the House of Luang Prabang. The country has an estimated area of 90,000 square miles. In 1948, the population was given as 1,500,000: it is now probably slightly over 2,000,000. The administrative capital is Vientiane (estimated population, 30,000–40,000). The independence of the kingdom within the French Union was recognized by France in July 1949. This relationship has been amplified and completed by the Treaty of October, 1953. Laos was invaded by the Communist Viet Minh in the spring of 1953. Under the terms of the Geneva Armistice Agreements of July, 1954, the Viet Minh troops were to

evacuate Laos by November of that year. The two Northern Provinces of Sam Neua and Phong Saly remained however under the effective control of the rebel *Pathet Lao* forces until November 1957.

BRITISH EMBASSY

Vientiane

Ambassador Extraordinary and Plenipotentiary, His Excellency Anthony Handley Lincoln, C.V.O. (1958).

Vietnam

President of Southern Vietnam, Ngo dinh Diem.

VIETNAM EMBASSY IN LONDON

12 Victoria Road, W.8

[Western: 3765]

Ambassador Extraordinary and Plenipotentiary, Ngo Dinh Luyen (1956).

1st Secretaries, Phan Van Thinh; Le Van Ky (*Consular*).

2nd Secretaries, Nguyen Trieu Dan; Pham Huy Ty; Dao Huu Tuong (*Press*); Le Van Loi (*Economic*).

3rd Secretary, Tranh Manh Phuc (*Cultural*).

Attaché, Le Dinh Phuoc (*Administration*).

Since the Geneva Conference of July 1954 Vietnam has been divided into two zones.

The Southern Zone has an area of 66,000 sq. miles. Its population was estimated in 1956 at 12,500,000. The capital is ΨSaigon (1957 population of Saigon-Cholon: 1,779,400). Other principal towns are Hué (1956 population: 100,000) and ΨTourane (1956 population: 57,400). Saigon and Tourane are the main ports. Rice and rubber are the chief products. Total trade in 1957 was: Imports £101,000,000; Exports £28,000,000. Trade with the United Kingdom in 1957 was valued at: Imports from U.K., £2,173,432; Exports to U.K., £305,181.

On October 23, 1955, a referendum showed a large majority in favour of the deposition of the former Chief of State, Bao Dai, and the election of Ngo dinh Diem to his place. The latter was accordingly proclaimed Chief of State on October 26, and his first act was to declare Vietnam a Republic of which he became the President. An elected constituent assembly, after two months' deliberation, set up a democratic Constitution which was promulgated on October 26, 1956. This constituent assembly, on the date of the promulgation of the Constitution became the First Legislative Assembly of the Republic of Vietnam. The Government of the Republic of Vietnam in Saigon is recognized by the United Kingdom, the United States, France and other members of the United Nations as the legal government of Vietnam.

BRITISH EMBASSY

Saigon

Ambassador Extraordinary and Plenipotentiary, His Excellency Roderick Wallis Parkes, C.M.G., O.B.E. (1957) £3,400

The Northern Zone has an area of approximately 63,000 sq. miles. Its population was estimated in 1957 at about 13,500,000. The capital is Hanoi (1957 population: 445,000) and the chief port is ΨHaiphong (est. population: 180,000). Coal and cement are the chief products, apart from rice in which the territory is almost self-sufficient. The title by which the Northern authorities style themselves is the Government of the Democratic Republic of Vietnam. The President of the Republic is Ho chi Minh. The effective power is the Lao Dong (or Workers') Party which manipulates the Fatherland Front, successor to the Viet Minh. The Party is avowedly Communist and the authorities in the Northern Zone are recognized by the U.S.S.R., China, and most of the satellite states as the government of Vietnam.

There is a British Consulate General at *Hanoi* and a Vice-Consulate at *Haiphong*.

FEDERATION OF FRENCH WEST AFRICA

The Federation of French West Africa extends from Mauritania to Dahomey, and has a total area of 1,799,159 square miles and a population (estimated 1957) of 18,930,000 (French and foreign stock, 88,200). The capital of the Federation is ΨDakar (Senegal), which had a population (1955) of about 234,500. The trade of the Federation of French West Africa in 1956 (excluding Togoland) was valued at *Fr.* 133,460,000,000 for imports and *Fr.* 120,042,000,000 for exports, the principal exports being ground-nuts (almost entirely from Senegal), palm kernels, palm oil, cocoa, cabinet woods, bananas, gold and cattle. Trade with U.K. in 1957 totalled: Imports £5,205,771; Exports, £5,597,967. French West Africa consists of:—

	Area sq. miles	Population (1957)	Capital
Senegal	77,814	2,269,000	St. Louis
Mauritania .	32,244	624,000	(39,100)
Fr. Guinea .	96,865	2,492,000	Conakry (53,000)
Ivory Coast.	189,029	2,483,000	Abidjan (125,700)
Dahomey ..	47,144	1,713,000	Porto Novo (30,800)
Fr. Sudan ..	582,437	3,708,000	Bamako (68,600)
Niger		2,415,000	Niamey(18,100)
Upper Volta	100,000	3,226,000	Ouagadougou (32,100)

Populations of territories above are official estimates for Jan. 1, 1957 and for capitals, estimates for 1955.

High Commissioner for French West Africa, M. P. Messmer.

Trustee Territories.—Between Dahomey and the Gold Coast Colony lies the French sphere of the former German colony of *Togoland* (20,404 sq. miles, pop. 1,085,200); capital, Lomé (39,200); and between (British) Nigeria and the French Congo the French sphere of the former German colony of *Kamerun* (143,415 sq. miles with a population of 3,187,000). Capital, Yaoundé (32,000); Douala (119,100). *High Commissioner of French Cameroon*, M. Xavier Torre.

FRENCH EQUATORIAL AFRICA

French Equatorial Africa (capital, Brazzaville), consists of the *Gaboon* (101,400 sq. miles, pop. 404,000), capital, ΨLibreville (pop. 16,700); *Middle Congo* (129,960 sq. miles, pop. 759,000), capital, Brazzaville (pop. 105,200); connected by railway with ΨPointe Noire (29,000); *Ubanghi Shari* (234,460 sq. miles, pop. 1,135,000), capital, Bangui (pop. 82,300) and *Chad* (487,920 sq. miles, pop. 2,581,000), capital, Fort Lamy (pop. 45,600).

High Commissioner for French Equatorial Africa, M. Y. Bourges.

FRENCH EAST AFRICA

French East Africa consists of *French Somaliland* (9,000 sq. miles, pop. 67,000, including 4,400 of French and foreign stock). Capital, ΨJibuti (pop. 17,000). French Somaliland is separated from the Aden Protectorate by the Straits of Bab el Mandeb and occupies the coast of N.E. Africa round the Gulf of Tajura, extending about 80 miles inland (Ethiopia).

A railway from Jibuti crosses the S. boundary and runs *viâ* Diredawa to Addis Ababa, the capital of Ethiopia.

MADAGASCAR

Area, 228,000 square miles, pop. (1956) 4,913,000, Madagascar is 240 miles distant from the S.E. coast of Africa, and is the fifth largest island in the world. It became a French Protectorate in 1890. In 1896 the Hova dynasty was suppressed, the administration being entrusted to a Governor-General. Important constitutional reforms were implemented in 1957 giving the island internal autonomy within the framework of the French Union. A Council of Government composed of eight elected Ministers is responsible for the administration of the island and its dependencies under the chairmanship of the French High Commissioner, the Vice-President of the Council being elected.

Agriculture and cattle raising are the principal industries; the minerals include gold, graphite and mica. Trade of Madagascar in the year 1957, in millions of *francs CFA*, was:—

Imports		Exports	
Cotton textiles	1,575	Coffee	6,891
Vehicles, etc.	2,910	Tobacco	1,998
Machinery	1,749	Cloves	1,460
Chemical products	2,186	Vanilla	1,047
Metal goods	2,864	Rice	956
Iron bars, etc.	1,365	Clove essence	194
Wines and spirits	1,311	Raphia	436
Petroleum products	1,031	Sisal	355
Made-up textiles	1,762	Graphite	354
Electrical goods	895	Canned meat	384
Cement	846	Butter beans	433
Wheat flour	459	Ground nuts	447

The capital Tananarive (*formerly* Antananarivo), has a population of 193,476; other towns are ΨMajunga 48,274, ΨTamatave (the chief port) 46,272, ΨDiégo Suarez, 38,305, Fianarantsoa, 22,651, and ΨTuléar, 25,307. The trade of Madagascar (1957) —Imports, *Fr. CFA* 26,157,400,000; Exports, *Fr. CFA* 16,235,100,000. Trade with the United Kingdom (1957).—Imports, £682,525; Exports to U.K., £1,191,175. *Fr. High Commissioner*, M. Soucadaux (1954).

The *Comoro Archipelago* (capital, Dzaoudzi), consists of the islands of Great Comoro, Anjouan, Mayotte and Mohilla and of certain islets, the total area being about 800 sq. miles, with a population (1957) of 177,000. The Comores Islands are administered as a separate entity independent of Madagascar, with which they are only linked for defence purposes. Dependencies of Madagascar in the Mozambique Channel are Juan de Nova, Europe Island and Bassas da India, the last being uninhabited. *La Réunion* (formerly Ile de Bourbon), about 420 miles E. of Madagascar, has been in occupation since 1643, and has had the status of an overseas department. Area about 1,000 sq. miles, population (1957), 301,000; capital, St. Denis (41,863). Assigned to the administration of Réunion are the distant islands of *St. Paul* (3 sq. miles), *New Amsterdam* (27 sq. miles) and *Kerguelen* containing whaling and fishing stations (1,100 sq. miles). The *Crozet Islands* (200 sq. miles) and *Adélie Land* (*see* p. 722), in the Antarctic Continent are also dependencies of Réunion.

In AMERICA.—Off the south coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon, population (estimated 1957), 4,900. In the West Indies is Martinique, population (est. 1957), 255,600, (capital ΨFort de France, pop. 60,600, with ΨTrinité, 39,173 and ΨMarin 31,369) and Guadeloupe (capital, ΨPointe à Pitre, 26,200, ΨBasse Terre, pop. 13,638), with Marie Galante (ΨGrand Bourg, 12,827), Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin. In South America, is French Guiana, population (est. 1957), 29,000 (capital ΨCayenne, 13,300). Included in French Guiana is a group of islands (St. Joseph, Ile Royal, and Ile du Diable) known as Iles du Salut. On *Devil's Isle*, Captain Dreyfus was imprisoned from 1894–1899. The total area of French possessions in North and South America is 35,320 square miles, with a population of 588,000.

Martinique, Guadeloupe, Réunion and French Guiana were raised to the status of *Départements* of France, as from Jan. 1, 1947.

In OCEANIA.—New Caledonia (7,200 sq. miles, population, census 1956, 68,000, capital, ΨNoumea) is a large island in the Western Pacific, 700 miles E. of Queensland, with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Mahé, Lifou, Uvéa, &c.), the Huon Islands and Futuna and Alofis. New Caledonia was discovered in 1774 and annexed by France eighty years later; from 1871 to 1896 it was a convict settlement.

French Polynesia has a total area of about 2,500 sq. miles and a total population (estimated 1956) of 77,000. It consists of the following groups of islands: the Society Islands (Tahiti, Moorea, Makatea, &c. Capital, Papeete), an archipelago in the South Pacific, have an area of about 650 sq. miles, and a population of about 63,000; the Marquesas (Nukahiva, Hiva-oa, &c.), 500 sq. miles, pop. 3,000; Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Tubuai, Rurutu, Raivivae, Rimatara and Rapa Island; and Maiao Island). The largest population is that of Tahiti—30,466 at the 1951 census.

GERMANY

★ Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863–1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914–1918, Germany was a Confederate League bearing the name German Empire (Deutsches Reich) under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

★ Nazi historians referred to the National Socialist régime as *Dritte Reich*. The *First* was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The *Second* was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The *Third* was established by Adolf Hitler in 1933.

GERMANY BETWEEN THE TWO WARS.—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). The Assembly met at Weimar (Feb. 6, 1919), and elected Friedrich Ebert President of the Republic, a position he occupied until his death (Feb. 28, 1925) when Field Marshal Paul von Hindenburg was elected in his stead. Von Hindenburg was re-elected April 10, 1932, the rival candidate being Adolf Hitler, who was born at Braunau, Austria (April 20, 1889) and had migrated as a young man to Bavaria. A General Election of 1933 provided Hitler's party, the *Nationalsozialistische Deutsche Arbeiter Partei* (National Socialist German Workers' Party, or *Nazis*) with an absolute majority in the legislature (*Reichstag*) and Hitler became Prime Minister (Chancellor), a position which became fused with that of President at the death of von Hindenburg (Aug. 2, 1934), and Adolf Hitler exercised supreme and uncontrolled authority in the Reich.

THE WAR OF 1939–1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression.

Germany invaded and occupied Denmark (April, 1940), Norway, Belgium, the Netherlands and Luxemburg (May, 1940); France was then attacked and sued for peace in mid-June. The lightning war against Britain began on August 11, 1940, but the *Luftwaffe* attack, which was to prepare the way for invasion, was defeated. In April, 1941, Yugoslavia was invaded and Germany joined Italy in attacking Greece and Crete. On June 22, 1941, the U.S.S.R. was invaded. In 1942 the Nazi empire reached its height. The boundaries of Greater Germany included Alsace-Lorraine, Luxemburg, Eupen-Malmédy, large areas of Poland, Memelland and Slovenia; Germany and her satellites controlled all European countries except the British Isles, Spain, Portugal, Switzerland, Sweden and parts of European Russia, as well as large tracts of North Africa. The turning point came in November, 1942, with the Soviet victory at Stalingrad and the British at El Alamein. In 1943 a Soviet offensive threw the invader back almost to the Polish frontier, and the Western Allies, after defeating the Axis in North Africa, landed in Italy. In June, 1944, the Second Front opened on the Normandy beaches and by September, 1944, Germany itself was the battlefield. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but retained political autonomy. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a dead letter when the Russians withdrew from the Control Council in 1948.

Federal Republic of Germany

President, Dr. Theodor Heuss, elected for five years, Sept. 12, 1949, re-elected for second term of five years, July 17, 1954.

CABINET

Federal Chancellor, Dr. Konrad Adenauer (C.D.U.).
Vice-Chancellor and Minister for Economic Affairs, Prof. Ludwig Erhard (C.D.U.).
Foreign Minister, Dr. Heinrich von Brentano (C.D.U.).
Interior, Dr. Gerhard Schroeder (C.D.U.).
Justice, Fritz Schäffer.
Finance, Franz Etzel (C.D.U.).
Defence, Dr. Franz-Josef Strauss (C.S.U.).
Labour, Anton Storch (C.D.U.).
Affairs of the Federal Council and Länder, Dr. Hans-Joachim von Merkatz.
Housing, Paul Lücke (C.D.U.).
Agriculture, Dr. Heinrich Lübke (C.D.U.).
All-German Affairs, Ernst Lemmer (C.D.U.).
Refugees, Prof. Theodor Oberländer (C.D.U.).
Transport, Dr. Hans-Christoph Seebohm (D.P.).
Posts and Telegraphs, Richard Stücklen (C.S.U.).
Family and Youth Questions, Dr. Josef Würmeling (C.D.U.).
Economic Property of the Federal Republic, Dr. Hermann Lindrath.
Atomic Matters, Prof. Siegfried Balke (C.S.U.).

C.D.U. = Christian Democratic Union; C.S.U. = Christian Social Union; D.P. = German Party.

EMBASSY IN LONDON

21 Belgrave Square, S.W.1

[Belgravia: 5033]

Ambassador Extraordinary and Plenipotentiary, His Excellency Hans von Herwarth (1955).

Minister, Dr. Joachim Friedrich Ritter.
Counsellors, Dr. Gerhard Mottmann; Dr. Fritz Caspari.

Area and Population.—The area of the Federal Republic (including the Saarland, incorporated

Jan. 1, 1957) is approximately 95,725 sq. miles. The population (excluding the Saarland) estimated (1956) 50,594,500, compared with 39,338,000 in Sept., 1939. The increase is largely due to the influx of refugees. Distribution of the population among the *Länder* in June, 1956 was:—

Schleswig-Holstein	2,271,000
Hamburg	1,793,000
Lower Saxony	6,541,000
North Rhine Westphalia	14,990,000
Bremen	649,000
Hessen	4,603,000
Bavaria	9,192,000
Baden-Württemberg	7,232,000
Rhineland Palatinate	3,325,000
The estimated population of the Saarland is	1,000,500

Western Berlin with a population of 2,204,400 (June, 1956) is represented in the Federal Parliament and is treated as a *Land* for the purposes of finance, but has no voting rights.

Population of the principal cities and towns in the Federal Republic (June, 1956):—

Hamburg	1,786,775	Karlsruhe	228,157
Munich	1,001,825	Augsburg	202,519
Cologne	739,660	Krefeld	201,469
Essen	715,367	Kassel	196,060
Düsseldorf	676,013	Hagen	184,363
Frankfurt	639,288	Bielefeld	174,312
Dortmund	625,205	Mülheim (Ruhr)	175,703
Stuttgart	614,763	Solingen	164,372
Hanover	554,935	Münster	164,228
Bremen	529,479	Aachen	157,474
Duisburg	491,328	Ludwigshafen	153,169
Nürnberg	434,398	M. Gladbach	149,494
Gelsenkirchen	385,328	Bonn	138,361
Bochum	355,384	Bremerhaven	134,619
Mannheim	294,238	Freiburg	132,918
Kiel	260,868	Heidelberg	125,361
Wiesbaden	249,856	Osnabrück	131,688
Brunswick	243,165	Regensburg	120,891
Oberhausen	250,991	Saarbrücken	126,615
Lübeck	230,061	Recklinghausen	127,000

Vital Statistics.—There were 15·7 live births per 1,000 inhabitants in the Federal Republic in 1955, compared with 19·8 per 1,000 for the same area in 1938. There was excess of live births over deaths in 1955 of 4·9 per 1,000 and in 1938 of 8·4.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948–49 a Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 24, 1949. It provides for a President, elected for a five-year term, and for two houses, with a four-year-term of office, the lower elected by direct universal suffrage and the upper composed of delegates of the *Länder*. The results of the election for the lower house (*Bundestag*) held on Sept. 6, 1953, were as follows:—

Party	*Numbers*
Christian Democratic and Christian Social Unions	243
Social Democrats	151
Free Democrats	48
Refugee Party	27
German Party	15
Independents	3
Total	487

In July 1955, 7 Refugee Party members seceded and subsequently joined the Christian Democrats. In April, 1956, 14 Free Democrats seceded to form a new party, the Free Peoples' Party. In January, 1957, 10 new Saar members joined the Bundestag. The D.P. and F.V.P. have now formed a joint party. The figures after the election of Sept. 15, 1957, were:

Party	*Numbers*
Christian Democratic and Christian Social Unions	270
Social Democrats	169
Free Democrats	41
German Party (German Party/Free People's Party)	17
Total	497

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of *Länder* governments in September, 1958, were:—

Ministers-President

Baden-Württemberg.—Dr. Gebhard Müller.
Bavaria.—Dr. Hanns Seidel.
Berlin.—Willy Brandt (*Lord Mayor*).
Bremen.—Wilhelm Kaisen.
Hamburg.—Max Brauer.
Hessen.—Dr. Georg-August Heissen.
North Rhine-Westphalia.—Fritz Steinhoff.
Rhineland-Palatinate.—Dr. Peter Altmeier.
Saarland.—Hans Egon Reinert.
Lower Saxony.—Heinrich Hellwege.
Schleswig-Holstein.—Kai Uwe von Hassel.

Economic Position.—The division of the country gave rise to serious economic problems. The main areas of surplus food production were transferred to Poland and some of the principal centres of light industry (Berlin, Thuringia and Saxony) were lost to the Soviet zone. As the lost food could not be replaced from West German sources the Republic is therefore more dependent on food imports than was the pre-war *Reich*, but most of the light industries have been rebuilt in the west. With United States and British help, economic recovery became unexpectedly rapid after the currency reform of 1948. The Gross National Product at current prices in 1957 is estimated at *DM.* 209·6 milliard, an increase of *DM.* 26·2 milliard or 8·4 per cent. over 1956.

Agriculture.—The total agricultural area (end of 1956) amounted to 14,285,900 hectares, of which 8,091,100 hectares were under plough. The forest area is about 7,000,000 hectares. The 1957 harvest yielded 7,838,000 metric tons of bread grains, 5,646,000 metric tons of feeding and industrial grains and 26,289,000 metric tons of potatoes. The livestock population at the end of 1956 included 11,814,600 cattle, 1,024,900 horses, 1,145,500 sheep and 14,407,500 pigs.

Industry.—The highly developed and diversified secondary industries are based on the great coal and steel industries of the Ruhr. The monthly average index of industrial production has developed as follows (1936 = 100):

	1956	1957
Mining	146·8	150·4
Manufacturing industry	213·9	225·6
(i) Basic materials	192·3	202·3
(ii) Capital goods	271·3	281·2
(iii) Consumer goods	197·4	208·5
(iv) Foodstuffs	189·8	207·4
Power	343·4	366·4
Total industry (including building)	211·2	222·0

Hard coal production fell from 134·4 million tons in 1956 to 133·2 million tons in 1957; brown coal rose from 95·2 million tons to 96·8 million tons; pig iron from 17·6 million tons to 18·4 million tons; crude steel from 23·2 million tons to 24·5 million tons and rolled steel products from 15·6 million tons to 16·4 million tons. An average of 79,914 passenger vehicles a month were produced in 1957 (1956 = 70,652), 13,840 commercial vehicles (1956 = 13,291), 185,000 tons of sulphuric acid (1956 = 172,000), 43,353 tons of chlorine (1956 = 38,462), 34,820 tons of cotton yarn (1956 = 33,019) and 10,330 tons of woollen yarn (1956 = 9,822). 512,356 new dwellings were completed in 1957.

Labour.—Of the average of 18,611,000 employed in 1957, 12,326,000 were men. The average number of unemployed was 667,500, of whom 396,000 were men. In 1957, an average of 7,221,000 were employed in industry; coal mining absorbed 584,991; metallurgy, 259,000; mechanical engineering and vehicle production, 1,142,300; chemicals, 403,200; and textiles and clothing, 966,486. Productivity of labour in the manufacturing industries in 1957 reached 204 per cent. of the 1950 level.

Finance.—Under the Federal constitution the yields of indirect taxes, other than the beer tax, accrue to the Federal Government, while direct taxes accrue to the *Länder*, who are obliged to transfer part of them to the central authorities.

The pattern of budgetary expenditure in 1958–59 was expected to be as follows:

Social expenditure (including housing and welfare), *DM.* 15·5 milliard (about 40 per cent.); Defence (including the amount spent on foreign troops in the Federal Republic), *DM.* 10·7 milliard (about 27 per cent.); Agriculture and food, *DM.* 2·4 milliard (about 6 per cent.); Transport, *DM.* 2·5 milliard (about 6 per cent.).

In 1952 an agreement was reached for the settlement of German pre-war and post-war foreign debts. An agreement was also signed whereby the Federal Republic will pay to Israel and Jewish organizations over a period of years reparations amounting to *DM*3·5 milliard.

Foreign Trade.—In 1957, imports (including Western sector of Berlin) were valued at *DM.* 31,697,000,000; and exports at *DM.* 35,968,000,000. 31·5 per cent. of imports consisted of foodstuffs and 29·6 per cent. of raw materials; 28·5 per cent. came from the dollar area and 57·6 per cent. from the European Payments Union countries. The dollar area took 14·3 per cent. of all exports and the E.P.U. area 70·2 per cent. Value of imports from the U.K. amounted to £1,105,055,780 in 1957 and exports to U.K. to £1,124,404,575.

Communications.—The railways of the Federal Republic measure 18,950 miles and the classified roads 47,038 miles. In 1955 the railways handled 288,509,000 tons of goods and the inland waterways 124,612,000 tons. Railway rolling stock included, in 1956, 9,511 steam locomotives, 525 electric locomotives, 22,318 passenger coaches and 244,679 goods waggons. On Jan. 1, 1958 there were 2,600,000 passenger cars and 620,000 lorries. Ocean-going shipping under the German flag in Dec., 1955, amounted to 2,898,000 tons gross.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of the third and subsequent children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a minimum standard of living.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646–1716) to Kant (1724–1804), Fichte (1762–1814), Schelling (1775–1854) and Hegel (1770–1831); the drama from Goethe (1749–1832) and Schiller (1759–1805) to Gerhart Hauptmann (1862–1946); and in poetry, Heine (1800–1856). German authors have received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929). There are now over 1,200 daily papers.

Education.—School attendance is compulsory for all children between the ages of 6 and 14. For the school year 1954–55 there were 29,702 elementary schools, with 132,000 teachers and 5,850,000 pupils in the Federal Republic. In addition there were 720 intermediate schools with 292,700 pupils and 9,125 teachers, 1,804 secondary schools with 715,290 pupils and 32,801 teachers, 890 *Einheitsschulen* (combined elementary and secondary schools in Hamburg, Bremen and West Berlin) with 549,685 pupils and 17,030 teachers, and 909 special schools for backward children. In the summer term of 1957 the 18 universities, 8 technical universities, and 28 other institutions of university status in the Federal Republic registered a total of 145,778 students. The largest universities are in Munich, Berlin, Cologne, Hamburg, Münster, Bonn, Frankfurt, Heidelberg and Göttingen.

Religion.—According to the 1950 census there were 24,400,000 Protestants in the Republic, 21,600,000 Roman Catholics and 1,500,000 others.

CAPITAL, Bonn, in North Rhine Westphalia, on the left bank of the Rhine, 15 miles distant from Cologne. Population, 138,361. Bonn is a cathedral and university town.

AIR TRANSIT FROM U.K.—London to Berlin, 3 *hrs.* 20 *mins.*; Cologne, 1 *hr.* 50 *mins.*; Düsseldorf, 1 *hr.* 25 *mins.*; Frankfurt, 1 *hr.* 50 *mins.*; Hamburg, 2 *hrs.*; Hanover, 3 *hrs.* 20 *mins.*; Munich, 2 *hrs.* 20 *mins.*

BRITISH EMBASSY

Friedrich-Ebert Allee, 77, Bonn

Ambassador Extraordinary and Plenipotentiary. His Excellency Sir Christopher Eden Steel, K.C.M.G., M.V.O. (1957) £6,000

Minister, M. S. Williams, C.M.G.

Counsellor (Head of Chancery), P. A. Wilkinson, D.S.O., O.B.E.

1st Secretaries, F. W. Marten, M.C.; G. G. Arthur; H. A. H. Cortazzi; L. M. Sinclair; J. E. Jack-

son; A. C. Buxton; R. F. Stretton; P. N. Lunn.
2nd Secretaries, C. R. E. Brooke; J. K. Hanna.
Minister (Economic), J. A. M. Marjoribanks, C.M.G.
1st Secretaries (Commercial), N. Statham; R. A. Farquharson; G. R. Denman; A. G. Elgar.

Eastern Germany

Administration.—When the Federal Republic was formed, the People's Council of the Soviet zone, appointed in 1948, was converted into a Provisional People's Chamber. On Oct. 7, 1949, this Chamber enacted a constitution of the "German Democratic Republic," and a provisional *Land* Chamber was established consisting of fifty deputies appointed by the Diets of the *Länder*. The German Democratic Republic is not recognized by the governments of western countries. A number of governmental reforms have been introduced since the original constitution was drafted, including the abolition, in July, 1952, of the five *Land* governments and diets. In July, 1954, the main Government posts were held as follows:—

President, Wilhelm Pieck, *born* 1874, *elected* Oct. 11, 1949, *re-elected* Oct. 7, 1953.
Minister-President, Otto Grotewohl.
Deputy Minister-Presidents, W. Ulbricht; H. Rau; H. Loch; L. Bolz; P. Scholz.
Chairman, State Planning Commission, B. Leuschner.
Chairman, State Control Commission, F. Lange.

It was not until the summer of 1953 that the Soviet Commander-in-Chief was replaced in the civilian sphere by a High Commissioner. In September, 1953, the post of High Commissioner was combined with that of Ambassador.

Area and Population.—The area of Eastern Germany is 41,380 sq. miles and its population in October, 1946, was 17,300,000:—

Saxony-Anhalt	4,200,000	Saxony	5,600,000
Brandenburg	2,500,000	Thuringia	2,900,000
Mecklenburg	2,100,000		

Principal cities and towns: Dresden (467,966); Leipzig (607,655); Magdeburg (236,326); Halle (222,505); Erfurt (174,633); Rostock (114,869); Zwickau (122,862), and Karlmarxstadt (Chemnitz) (250,188). Eastern Berlin, an integral part of the zone and its capital city, has a population of approximately 1,200,000.

In July, 1952, in the interests of "democratization" and the further centralization of power, the old *Länder* were abolished and replaced by 14 *Bezirke* (regions) as follows:

Land	*Bezirke*
Mecklenburg	Rostock; Schwerin; Neubrandenburg.
Brandenburg	Potsdam; Cottbus; Frankfurt.
Saxony	Karlmarxstadt; Dresden; Leipzig.
Saxony-Anhalt	Halle; Magdeburg.
Thuringia	Erfurt; Gera; Guhl.

Each region has its own *Bezirkstag* (assembly) and *Bezirksrat* (council) to deal with purely regional affairs.

Economic Position.—From the economic point of view the Eastern zone is a more unbalanced area than the Federal Republic. It is more nearly self-sufficient in food, but has few industrial raw materials apart from brown coal and copper ore. Before the war its highly developed secondary industries were dependent on Ruhr coal and steel.

The Soviets claimed reparations from Germany to a value of $(1938)10 milliard. Between 1945 and March, 1948, they removed considerable quantities of capital equipment to the U.S.S.R. and took over a number of important plants as Soviet State Concerns (S.A.G.). S.A.G.'s now account for perhaps one-eighth of all industrial production in Eastern Germany. Their products are sold partly in Germany and partly to the U.S.S.R. and other foreign countries. In addition the zone pays reparations from current production to the U.S.S.R. and, although the amounts have been reduced, the obligation continues until 1965. Economic control has been centralized, industry subjected to rigid central planning, state ownership and trading greatly expanded at the expense of private interests and the basic industries given priority over secondary industries. Large new steel plants have been erected at Fürstenberg/Oder and at Calbe, and crude steel production is now greater than before the war. Ties with the other satellites have been strengthened; over 80 per cent. of the zone's foreign trade is now with the East, and in 1950 the zone became a member of the Council for Mutual Economic Assistance (C.M.E.A.).

TRADE WITH U.K.

	1956	1957
Imports from U.K.	£994,142	£1,426,122
Exports to U.K.	2,408,883	2,771,725

Religions.—At the census of 1946, Eastern Germany had 14,132,174 Protestants, 2,110,507 Roman Catholics and 75,578 others.

GREECE

(Hellas)

King of the Hellenes, Paul I, *born* Dec. 14, 1901; *acceded* (on the death of his brother King George II), April 1, 1947; *married* Jan. 9, 1938, Princess Frederika, daughter of the Duke of Brunswick (*born* April 18, 1917), and has issue:—

(i) Crown Prince (*Diadoch*) H.R.H. Prince Constantine, Duke of Sparta, *born* June 2, 1940.
(ii) H.R.H. Princess Sophia *born* Nov. 2, 1938
(iii) H.R.H. Princess Irene, *born* May 11, 1942

CABINET

(June, 1956)

Prime Minister, Constantine Karamanlis.
Minister of Co-ordination, A. Protopapadakis.

Foreign Minister, E. Averoff-Tositsas.
Minister to the Prime Minister, C. Tsatos.
Justice, C. Kallias.
Interior, D. Makris.
Education and Cults, G. Voyadjis.
Finance, C. Papaconstantinou.
Commerce, L. Dertilis.
Industry, N. Martis.
Communications and Public Works, General Solon Ghikas.
Agriculture, C. Adamopoulos.
Minister of Social Welfare, A. Stratos.
Merchant Shipping, G. Andrianopoulos.
Labour, A. Dimitratos.
Minister for Northern Greece, A. Theologitis.

3rd Secretary, D. Frantzeskakis.
Naval, Military and Air Attaché, Captain H. Dedes.
Commercial Counsellor, N. Pierracos.
Hon. Cultural Counsellor, P. Argenti.
Hon. Attaché, S. X. Constantinidi.

Consulate General and Department of Information, 34 Hyde Park Square, W.2.

There are Honorary Consulates at *Birmingham*, *Bradford*, *Bristol*, *Dover*, *Falmouth*, *Hull*, *Immingham*, *Liverpool*, *Middlesbrough*, *Milford Haven*, *Newcastle*, *Plymouth*, *Portsmouth*, *Sheffield*, *Southampton* and *Yarmouth*, *Swansea*, *Glasgow*, *Dundee* and *Leith*, and at *Belfast*.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Libyan and Ionian seas, and on the E. by Turkey, with an estimated area of 51,180 sq. miles. A census was held throughout the country on April 7, 1951, which estimated the population at approximately 7,600,000, including the population of the Dodecanese (126,000).

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: *Macedonia* (which includes Mt. Athos), *Thrace*, *Epirus*, *Thessaly*, *Continental Greece* (which includes the island of *Euboea* and the *Sporades*, or "scattered islands," of which the largest is *Skyros*), the *Peloponnese* (or *Morea*), the *Dodecanese* or *Southern Sporades* (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Simi, Khalki and Kastellorizo, the *Cyclades* (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the *Ionian Islands* (Cephallonia, Corfu, Lefkas, Ithaki, and Zante), the *Aegean Islands* (Chios, Lesbos and Samos). In *Crete* there was for over 1,000 years (3000 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afford evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194–1184 B.C.).

Government.—The Independence of Greece dates from March 25, 1821, and was ratified by the *Treaty of Adrianople* (Sept. 12, 1829) and the *Convention of London* (Feb. 3, 1830), after a successful insurrection against the Ottoman Empire, to which the country had been subjected since the 15th century. After a succession of rulers of the Wittelsbach (Bavarian) and Glucksburg (Danish) dynasties the Kingdom was declared a Republic by the Constituent Assembly on March 25, 1924. On Oct. 11, 1935, it was again declared a Kingdom, and a plebiscite held on Sunday, Nov. 3, 1935, caused the return to the Throne of King George II. On October 28, 1940, Italy declared war on Greece and invaded the country from Albania, but within a month Greek troops, assisted at sea and in the air by Great Britain, expelled the invader and advanced in triumph into Albania. On April 6, 1941, Germany invaded Yugoslavia and Greece and came to the aid of the defeated Italian forces. British and Commonwealth ground forces were sent to the assistance of Greece, but the fresh onslaught led to her occupation by German, Italian and Bulgarian troops. By her own exertions and by Allied help Greece was freed in October, 1944.

There followed in December–January, 1944–5 a short period of civil war in which the Communists attempted to seize power by force. After a plebiscite held on Sept. 1, 1946, King George II was recalled. In 1947, Communist guerilla disturbances assumed the proportions of civil war, which continued with increasing damage and destruction to the country until the summer of 1949 when the Greek Army's victories overwhelmed the guerillas. Normal conditions were sufficiently restored throughout the country to enable a general election to be held on March 5, 1950. Since then, with the help of the Foreign Operations Administration (formerly E.C.A.), Greece has been tackling the formidable task of rehabilitation and reconstruction after ten troubled years. Greece acceded to the North Atlantic Treaty in Feb. 1952. In the economic field the country has made steady, if slow, progress, despite political instability, and the diversion of public attention away from Greece's more urgent problems by the fomenting of the Cyprus issue, which has led to a sharp deterioration in relations with the United Kingdom. The interim Government of M. Karamanlis was confirmed in office by the General Election of February 1956. At a general election held on May 11, 1958 under a new electoral system, the National Radical Union Party of M. Karamanlis slightly increased its majority in the Chamber, obtaining 172 seats, though this party secured a smaller proportion of the votes, and a new Government was formed by M. Karamanlis on May 17. At this election the extreme Left Wing party, E.D.A., emerged as the leading Opposition party with 79 seats in the Chamber.

Defence.—The Navy has 80 ships, about half of which are on loan from Britain. The strength of the Army is 109,000. The Air Force consists of 18,000 men, ten offensive squadrons, two transport squadrons and a training organisation. In April, 1952, the British Military Mission and R.A.F. delegation left after seven years' service in Greece. The British Naval Mission left in December, 1955.

Production.—Agriculture is the principal industry and employs more than half the population, the most important product being tobacco, which accounts for nearly half the value of total exports of Greece. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. Currants were originally grown round Corinth and were known as *raisins de Corauntz*, anglicized as currants. In the past seven years the production of cotton, rice and wheat has been greatly increased, mainly

in an attempt to replace tobacco. The principal minerals mined are iron ore, iron pyrites, manganese, magnesite, chrome, bauxite, lead, zinc and emery. The chief manufactures are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, footwear and carpets. There are also metallurgical and ship-repairing industries. Various important projects are being carried out with the aid of the American I.C.A. Mission. These include development of the electric power system, irrigation and land reclamation, the establishment of new industries and the development of lignite mining and its use for fuel and industrial purposes. An oil refinery, the first in Greece, was completed early in 1958.

Communications.—The 2,650 kilometres of Greek railways were all restored by the end of 1950, in spite of delays due to the activities of guerilla bands. All are now owned by the Greek State, with the exception of the Athens-Piraeus Electric Railway. The railway from Athens into the Peloponnese is metre gauge. Athens is linked with Istanbul, Paris (*vid* Belgrade, Trieste, and Lausanne), Ostend (*viâ* Belgrade, Salzburg, Cologne and Brussels) and Vienna by direct sleeping-car services. Greek roads total 30,150 km., of which somewhat over half are classified as national highways, while 3,584 km. are asphalt and 13,615 km. oil-coated, macadam or gravel. In January 1957, Greek ships of more than 500 tons totalled 346 (1,444,904 tons) and Greek owned ships under foreign flags totalled 1,425 (10,425,813 tons). The Greek national airline, Olympic Airways, flies various internal and external services, and it and other airlines connect Athens directly with most countries in Europe and the Middle East.

Religion.—Over 96 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Greek church recognizes the spiritual primacy of the Œcumenical Patriarch at Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece.

Education is free and compulsory from the age of 6 to 12 and is maintained by State grants. There are two Universities, Athens and Salonica, that of Athens being of wide repute.

Language and Literature.—The *spoken* language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Official and technical matter is mostly composed in *Katharevusa*, a conservative literary dialect evolved by Adamantios Corais (Diamant Coray), who lived and died in Paris (1748–1833), but novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854–1929). The poets Solomos, Palamas and Cavafis have won a European reputation.

CURRENCY

The Greek *drachma* has an official exchange rate of 84 = £1 sterling and 30 = U.S. $1.

GUATEMALA

(República de Guatemala)

PRESIDENT

Gen. Miguel Ydígoras Fuentes, *assumed office* March 1, 1958.

LEGATION IN LONDON

30 Collingham Gardens, S.W.5

[Fremantle: 7463]

Envoy Extraordinary and Minister Plenipotentiary in London (vacant).

There is a Consulate-General at *Liverpool* and Consuls at *Glasgow* and *Belfast*.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45′ to 17° 49′, and in W. long. from 88° 12′ 49″ to 92° 13′ 43″, and comprises an area of 42,042 square miles, and a population (at the census of 1950) of 2,788,122. There is a single chamber legislative assembly of 68 members and a cabinet of 11 of whom 10 are Ministers of State. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and malarious near the coast, temperate in the higher regions. The rainfall in the

capital is 57 in. per annum. The chief Ψ seaports are San José de Guatemala and Champerico on the Pacific and Livingston, Santo Tomás and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University in the capital education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

FINANCE

HAITI

(République d'Haiti)

President, Dr. François Duvalier, *installed* Oct. 22, 1957.

EMBASSY IN LONDON
22 Hans Road, S.W.3.

Ambassador, His Excellency Dr. Jean Lafontant.

The Republic of Haiti occupies the western third of the island of Santo Domingo, formerly known as Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic is estimated at 10,500 sq. miles with a population (1950 census) of 3,111,973, negroes being in the great majority. There are, however, many mulattoes and others with varying admixture of white blood, especially in the towns. About 1,000 British subjects, chiefly of British West Indian origin, reside in Haiti.

A French colony under the name of Saint-Domingue from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1804. Resistance was continued by Jean Jacques Dessalines, also a former black slave, who, on January 1, 1803, declared the former French colony to be an independent state. It was at this time that the name of Haiti was adopted. It is an aboriginal Indian word meaning mountainous. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

The 1950 constitution provided for a Senate of 21 members and a Chamber of Deputies of 37 members. The President is elected by popular franchise for a term of six years, and is not immediately re-eligible. Women were granted full political rights in Jan. 1957. A new constitution approved in 1957 provides for the abolition of the Senate and the establishment of a one-chamber legislative assembly with 67 deputies. This will not take place, however, until 1963.

The six-year term of General Magloire having ended in December 1956, he attempted to stay in power for a further period but was forced to resign and go into exile. A period of acute political upheaval followed and for many months there was no effective government. A military junta took over in June, 1957, and elections were held in September, following which Dr. Duvalier was installed as the new President of the Republic.

Production, Industry, etc.—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of the productiveness of the country. The main project now approaching completion is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley for which the Import-Export Bank has approved a loan of $27,000,000. Work on the final stages of the main barrage at Peligne is not yet completed and no forecast of its completion date can be given owing to the economic situation and political instability. The principal products are coffee, bananas, log-wood, cocoa, cotton, sisal, sugar and molasses and essential oils. Coffee accounts for about two-thirds of total exports and is the mainstay of the country's economy. Exports of bauxite began in 1957 and copper mines in the Terre Neuve area will be brought into production in the near future. Lignite is known to exist in commercial quantities and a contract has been signed with a Haitian/Canadian company for its exploitation. Exploration is going on in the country for the above-mentioned minerals and also for manganese, oil and iron. Gold, silver and tin exist, but not in significant quantities. Manufactures have increased during the last five years. The tourist trade is expanding rapidly and is now an important source of income, but has fallen off considerably since Dec. 1956, owing to political upheavals.

Communications.—There are very few asphalted roads and internal communications are very bad. A loan of $2,600,000 has been obtained from the International Bank for Reconstruction and Development to finance an improved road maintenance and repair organization, but political confusion and lack of funds have continued to delay effective progress. Railway communications are negligible, the only passenger route being from Port-au-Prince to Verrettes *viâ* St. Marc. Air services between the capital and the principal provincial towns are maintained by the Aviation Corps of the Haitian Army, which operates a civil incorporated company. The principal towns and villages are connected by tele-

phone and/or telegraph. The complete telephone, telegraph and internal radio communications system is now being renewed by a United Kingdom firm; the work has been stopped temporarily owing to the economic crisis.

Air services by Pan-American World Airways and other airlines are regular and frequent, and there are fortnightly sailings for passengers and freight for New York and Panama by the Panama Line. Freight sailings are frequent for the U.S.A., Canada and Europe. Sailings between Haiti and Jamaica are infrequent. External telegraph, telephone and postal services are normal. (Air mail transit U.K./Port-au-Prince 3–4 days.)

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March–Oct.) and the winter (Nov.–Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

Language and Literature.—French is the official language of the country, but most of the people speak a debased dialect known as Creole French. Education is free but estimates of illiteracy are as high as 95 per cent. In 1954 there were 6 principal French daily newspapers published at Port-au-Prince and 1 English weekly.

	1955–56 *Gourdes*	1956–57 *Gourdes*
Revenue	208,600,000	172,900,000
Expenditure	260,000,000	171,100,000
Total Debt (Sept.)	255,500,000	256,500,000

5 *Gourdes* = $1 (U.S.). (*See also* p. 84.)

	1955–56 *Gourdes*	1956–57 *Gourdes*
Total Imports	231,517,924	195,500,000
Total Exports	232,638,483	162,800,000
	1956	1957
Imports from U.K.	£1,014,288	£661,308
Exports to U.K.	119,175	451,893

The principal exports are listed above; the principal imports are cottons, foodstuffs, machinery, mineral oil and soap.

CAPITAL, ΨPort-au-Prince, Population (1950 census), 195,672. Other centres are: ΨCap Haitien (24,957); ΨLes Cayes (11,835); ΨGonaives (13,534); ΨJacmel (8,545); ΨSt. Marc (10,485); ΨPort de Paix (6,309); Jérémie (11,138).

FLAG: Two horizontal bands, blue, red; in the centre, the coat-of-arms on a white square.

HONDUREAN EMBASSY IN LONDON

22 Mount Street, W.1.

[Park: 3737]

Ambassador, His Excellency Dr. Antonio Bermúdez (1958).

Consulate-General in London, 15 Union Court, E.C.2.

Vice-Consul (in charge), Herbert C. Cock.

There are Consulates General in *Liverpool* and *Manchester*, and Consular Offices at *Birmingham*, *Newcastle* and *Glasgow*.

Honduras, one of the five Republican States of Central America, lies between lat. 13° and 16° 30′ N. and long. 83° and 89° 41′ west, with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador. The Republic contains a total area of approximately 43,278 square miles and a population of 1,750,000 (estimate of Dec. 31, 1957) of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras, but possesses well watered fertile valleys and wooded tablelands. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century, Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under the Constitution of Dec. 21, 1957, the Legislature consists of a single Congress of 58 members elected by popular vote in the ratio of approximately one per 30,000 inhabitants. The executive authority is vested in the President who is assisted by a Cabinet of nine Ministers. The Republic is divided into 18 departments, the largest and newest of which, Gracias a Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, coconuts, tobacco, beans, maize, rice and tropical fruits. Cattle raising is becoming an increasingly important industry, a large number of cattle being exported to the neighbouring countries every year. Honduras is also a timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, but only a small portion is at present exploited owing to transport difficulties.

1,008 miles of railway were in operation in the year 1957, chiefly to serve the banana plantations and the Caribbean ports. The total road mileage is approximately 1,800, the greater part of which is in poor condition, but improvements are now being made and new roads built. There are 15 airports in use in Honduras, exclusive of numerous small landing and emergency fields. There are three international air services (TACA Internacional, PAA and TAN) and two domestic air services (SAHSA and ANHSA). There are 2,979 miles of telephone lines 4,981 miles of telegraph lines and 369 post-offices.

ΨThe chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side.

Language and Literature.—The language of the country is Spanish. Primary and secondary education is free and compulsory and, although there is still a great deal of illiteracy, it is gradually diminishing. There is no recognized native literature.

FINANCE	1958
Revenue	*Lempiras* 75,490,000
Expenditure	„ 92,390,000

LEGATION IN LONDON

(35 Eaton Place, S.W.1)

[Sloane: 4048]

Minister in London, Pal Földes (1957).
Consulate, 46 Eaton Place, S.W.1 (Sloane: 4462).

Area and Population.—The area of Hungary may be stated at approximately 36,000 sq. miles with a population (April, 1958) of 9,845,000.

Government.—Hungary was reconstituted a kingdom in 1920 after having been declared a republic on Nov. 17, 1918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939–45 War on the side of Germany. On Jan. 20, 1945, a Hungarian provisional government of liberation, which had been set up during the preceding December, signed an armistice with the United Nations under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

For the first four years after the liberation, Hungary was governed by a coalition of the Smallholder, National Peasant, Social Democrat and Communist parties. During this time land reform was carried out, the great landowners being dispossessed and their estates partitioned among peasants; mines, heavy industry, banks and schools were nationalised. By 1949 the Communists, under the leadership of Mr. Rákosi, having compelled the Social Democrat Party to merge with them, and having disrupted the peasant parties, had succeeded in gaining a monopoly of power. Elections in that year, in which candidates for the National Assembly were drawn from a single list, resulted in 95·6 per cent. of the votes cast being obtained by the Communist-dominated People's Front. A campaign was opened to collectivise agriculture and by 1952 practically the entire economy had been "socialised."

In mid-1953 Mr. Imre Nagy replaced Mr. Rákosi as Prime Minister, though the latter continued to hold his post as First Secretary of the Party. Mr. Nagy introduced a more moderate policy based largely on the development of agriculture rather than heavy industry; but in April, 1955 Mr. Rákosi succeeded in turning the tables on his rival who was removed from his position as Prime Minister and subsequently expelled from the Party. But after the 20th Congress of the Soviet Communist Party, opposition to Mr. Rákosi within the Hungarian Communist Party mounted and on July 18, 1956, he was removed from his post as First Secretary and succeeded by Mr. Gerö, who had been one of his closest associates. The period from July to the outbreak of the national revolution on Oct. 23, 1956, was marked by growing ferment in intellectual circles and increased discord within the Party. The immediate signal for the revolt was a series of students' demonstrations, first in Szeged on Oct. 22 and in Budapest a day later. The chief demands put forward by students and other demonstrators were for the return of Mr. Nagy as Prime Minister, for the withdrawal of Soviet troops from the country and for free elections. Fighting broke out on the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 Mr. Nagy formed an all-party coalition government. This government was overthrown and the revolution suppressed as the result of a renewed attack by Soviet forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of a new Hungarian Revolutionary Worker Peasant Government under the leadership of Mr. Kádár, Mr. Gerö's successor as First Secretary of the Party, was announced. This Government has been in power ever since, backed by the presence of Soviet troops. It has branded the revolution as a "counter-revolution" and has suppressed all attempts at resistance. The trial and execution of Imre Nagy and three of his associates was announced on June 17, 1958.

Production, Industry, etc.—Though industrialization has made considerable progress in the last

decade, agriculture still occupies a predominant position in the Hungarian economy and more than half the area of Hungary is arable land, much of it very fertile. In March, 1958, 14·5 per cent. of this arable land was owned by state farms and 12 per cent. by co-operative farms. The following are official estimates of production of the more important crops in 1957 (a year of bad harvest): wheat 1,058,800 tons; rye 487,000 tons; barley 968,700 tons; oats 262,900 tons; maize 3,283,700 tons; sugar-beet 1,948,200 tons; potatoes 2,055,000 tons; cattle-turnip 3,118,100 tons; lucerne, 744,900 tons; red clover 571,000 tons; rice 85,000 tons.

Industry is mainly based on imported raw materials, but Hungary has her own coal (mostly brown), bauxite, some iron ore and petroleum. Output figures in 1956 were: Coal 21,195,000 tons; bauxite 155,000 tons; cement 989,000 tons; pig-iron 855,000 tons; steel 1,375,000 tons; coke 202,000 tons; crude oil 674,000 tons.

The output of raw materials and general industrial production were sharply reduced by the revolution of Oct. 1956 and its aftermath, and regained normal levels only in the second half of 1957, total industrial production for that year being 2 per cent. higher than in 1955.

Religion and Education.—About two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—infant schools 3–6, general schools 6–14 (compulsory), vocational schools (15–18), secondary schools (15–18), universities and adult training schools (over 18). It is estimated that there were over 40,000 university students in the academic year 1956–57. The teaching of Russian is compulsory in schools for children aged 9 to 18 years. A recent decision of the National Conference of the Hungarian Socialist Workers Party (the Hungarian Communist Party) will again make the study of Marxism-Leninism compulsory in all universities and colleges.

Language and Literature.—Magyar, or Hungarian, is one of the Finno-Ugrian languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteeth and twentieth centuries are Mihály Vörösmarty (1800–1855), Sándor Petöfi (1823–1849), János Arany (1817–1882), Endre Ady (1877–1918), Attila József (1905–1937), Mihály Babits (1883–1941) and Dezsö Kosztolányi (1885–1936).

FINANCE	1958

Prime Minister (July 24, 1956), Hermann Jonasson.

Foreign Affairs, Gudmundur I. Gudmundsson.

EMBASSY IN LONDON

17 Buckingham Gate, S.W.1

[Victoria: 5337]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Kristinn Gudmundsson (1956).

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23′ to 66° 33′ N. lat., and from 13° 22′ to 24° 35′ W. long., with an estimated area of 40,500 square miles, or greater than that of Ireland. The population was 166,831 in 1957.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but a deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to a decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home-rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

The Icelandic Cabinet normally consists of six Ministers, responsible to the *Althing*, a Parliamentary assembly of 52 members. The present government is a coalition of the Progressive, Social Democrat and Communist parties, with the Conservatives, the largest single party, forming the Opposition.

Iceland is a member of NATO and a NATO base, manned by the U.S. Defence Services, is established at Keflavik, some 25 miles from Reykjavik.

Iceland lives very largely by her catching and export of fish, and this is held to justify an extension of exclusive fishery limits round her coast to a greater extent than that hitherto sanctioned by international law. In 1952, the Icelandic limits were extended from three to four miles, and at the same time a new method of establishing base-lines across bays and estuaries was introduced. This led to a dispute with the U.K., and the British trawler industry succeeded in imposing a ban on the landing of fish by Icelandic trawlers in England. This dispute was settled in October, 1956, by which time a considerable proportion of the Icelandic fish trade had been diverted to Russia. The failure of the Geneva Conference of April, 1958, on the Law of the Sea, to settle the question of territorial limits led to further difficulties (*see* "Events of the Year").

The principal products of the island are fish, fish oils, whales, mutton, wool and ponies. The principal exports are fish, fish meals and oils, whale oil and meat, and sheepskins; the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, coal, oil and petrol, cotton goods, tobacco, spirits, hardware and timber.

The mercantile marine in 1957 consisted of 26 cargo and passenger ships (37,054 tons); 42 trawlers (27,533 tons); 50 fishing vessels of 100 tons or over (7,658 tons); 599 fishing vessels under 100 tons (20,412 tons); 6 life-saving and inspection ships (1,712 tons); 4 oil carriers (13,878 tons); 2 tugboats and 1 dredger; a total of 108,861 tons. There is a regular shipping service between Reykjavik, Leith and Copenhagen, fortnightly in summer and every three weeks in winter. Frequent but irregular services run between Reykjavik and Hull, and the Continent.

A regular twice-weekly air service is maintained between Renfrew and London and Reykjavik (about five-hour journey). There are also air services from the island to Scandinavia, U.S.A. and Germany. Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres are well surfaced. The State highways and side roads are non-metalled (gravel and lava dust). The climate and terrain make first-class surfaces for highways out of the question.

Language and Literature.—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

Finance		1956
Revenue	*Krónur*	752,526,000
Expenditure	,,	653,553,000
External Debt	,,	200,919,000
Internal Debt	,,	182,371,000

Trade		1957
Imports	*Krónur*	1,361,947,000
Exports	,,	986,618,000
Imports from U.K.		£3,598,150
Exports to U.K.		1,462,262

In Sept., 1949, the Icelandic *Króna* was fixed at *Krónur* 936·5=$100 U.S., following the devaluation of the £1. On March 19, 1950, a further devaluation took place, the rates being fixed at *Krónur* 1,628·57=$100 U.S.; *Krónur* 45·55=£1. When, on May 29, 1958, changes were made in the system of export and import subsidies and taxes, a tourist exchange rate, 55 per cent. more favourable than the standard rate, was introduced. For sterling it is *Krónur* 70=£1.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of *Java* and *Madura*, the island of *Sumatra*, the *Riouw-Lingga Archipelago* (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), the islands of *Bangka* and *Billiton*, part of the island of *Borneo*, *Celebes Island*, the *Molucca Islands* (Ternate, Halmahera, Buru, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of *Timor Island*, and the islands of *Bali* and *Lombok*, with a total area of 735,000 miles, and a population estimated at 80,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War, 1939–45, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands took place on December 27, 1949. The provisional federal constitution then adopted was on August 15, 1950, changed to a unitary Republic of Indonesia in which the separate provinces were guaranteed broad regional autonomy and on February 13, 1956, the agreement of 1949 with the Netherlands was unilaterally abrogated. As a result of the failure of the parliamentary parties to provide political and

economic stability, President Sukarno as Commander-in-Chief of the Armed Forces proclaimed martial law on March 14, 1957, and appointed a temporary cabinet under a non-party Prime Minister. At the end of the year the Government, in response to popular feeling, took over control of most of the Dutch commercial concerns. The great majority of Dutch citizens left the country during the next few months. On February 15, 1958, regional discontent came to a head with the proclamation of a rival Indonesian Government in West Sumatra and North Celebes under Dr. Sjaffruddin. The Central Government resorted to military action and organized resistance had ceased in Sumatra by May, 1958.

Finance.—The budgetary system in Indonesia has been in deficit for some years now. The note circulation increased from *rupiahs* 8·6 billion to *Rp.* 13·8 billion during 1957 and to *Rp.*15·25 billion by June, 1958. Gold and foreign currency cover for the currency declined from 21·9 per cent. (Jan., 1957) to 8·5 per cent. (June, 1958).

In February, 1953, the value of the Indonesian *rupiah* was fixed at Rp. 31·74 = £1, but in June, 1957, a new system of moving and half-free rates was introduced. The *rupiah* has been by this means progressively reduced in value, until in June, 1958, it stood for trading purposes at approximately *Rp.* 83 = £1.

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg and cinnamon are produced mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estate companies. Rubber, tea, coffee and tobacco are also produced in quantity. Rice is a traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits.

Trade.—Commodities valued at £10,054,000 were sold to the United Kingdom in 1957, the principal items being rubber, tea, petrolcum and sugar. The value of imports from the United Kingdom in 1957, mainly of machinery, electrical equipment, aircraft, cars, cycles, and other vehicles, chemical and pharmaceutical goods, woven and piece goods and sewing thread, was £13,311,541.

Transport.—In Java a main line connects Djakarta with Surabaya in the East of Java and there are several branches, including an inland line from Semarang on the North coast to Djogjakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems. A number of new diesel tractor engines and some rolling stock have been bought recently from Germany and U.S.A. and have improved services.

Sea communications in the archipelago were maintained for many years by a Dutch shipping line but in December, 1956, this ceased to operate and the resulting dislocation of shipping services among the islands is only gradually being mitigated by the endeavours of the Government Shipping Board to acquire ships for various national shipping companies. Transport by small craft on the rivers of the larger islands plays an important part in the export trade. Air services in Indonesia are operated by Garuda Indonesian Airways and the country is served by various international services, including those of B.O.A.C. There are approximately 46,500 miles of roads in Indonesia.

CAPITAL: Batavia (Java) was renamed Djakarta (estimated population, 260,000) and is the capital of the Republic of Indonesia. Other important centres are: (Java) Surabaya, Semarang, Bandung, Tjeribon, Surakarta and Djogjakarta; (Madura) Pamekesan (15,000); (Sumatra) Palembang (50,000), Medan (80,000) and Padang; (Celebes) Macassar (20,000) and Menado; (Borneo) Banjermasin, Balikpapan and Pontianak; (Moluccas) Ternate (9,000); (Bali) Singaradja (9,500); (W. Timor) Kupang (10,000).

FLAG: Red and white. LANGUAGE: The official language of Indonesia is the Indonesian Language (*Bahasa Indonesia*). NATIONAL ANTHEM: *Indonesia Raya.* August 17 is celebrated as INDEPENDENCE DAY in Indonesia.

IRAQ

Council of Sovereignty (exercising presidential powers), General Najim Rubai (*Chairman*); Mohammed Mahdi Kubba; Khalid Nakhshabandi (*assumed office,* July, 1958).

CABINET
(July 15, 1958)

Prime Minister, Minister of the Interior and Minister of Defence, Brigadier Abdul Karim Kasseur.
Deputy Prime Minister, Col. Abdul Salam Aref.
Minister of Foreign Affairs, Dr. Abdel Jumar.
Finance, Mohammed Hadid.
Justice, Dr. Mustafa Ali.
Economics, Dr. Ibrahim Kubba.
Education, Dr. Jabir Omar.
Works and Communications, Baba Ali.
Social Affairs, Brigadier Naguib Taleb.
Agriculture and Health, Rashid Mahmoud.
Development, Fuad Rikabi.
Information and Press, Siddiq Shansal.

IRAQ EMBASSY IN LONDON
21–22 Queen's Gate, S.W.7
[Knightsbridge: 7141]

Ambassador in London (vacant).
Chargé d'Affaires, A. M. al-Zaibak.
3rd Secretaries, A. M. El-Khatib; F. A. Al-Qaisi; S. A. Majid.
Special Attaché, Nadhim Al-Zahawi.
Special Attaché (Information), Abdul Aziz Al-Mudhaffer, O.B.E.
Financial Attaché, Khalid Hamdi.
Military Attaché, Col. Sadiq Haj Ali, C.V.O.
Senior Asst. Military Attaché, Col. A. K. Faik.
Asst. Military Attaché, Maj. Hussein Abdul Jabbar.
Air Attaché, Lt.-Col. Mahmour Shakir.
Cultural Attaché, Dr. Mohammed Badi Sharif.
Asst. Cultural Attaché, Alauddin Hammoudi.

Area, etc.—Lying between the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Persian Gulf on the S. and

S.E., and from Iran on E. to Syria and the Arabian Desert on W., the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat.

The total area of Iraq is about 172,000 sq. miles, the distance from Basrah in the south to Mosul in the north being approximately 500 miles.

Population (1957 census):—

	Males	*Females*	*Totals*
Baghdad	670,161	636,443	1,306,604
Hillah	177,543	176,071	353,614
Diyalah	166,506	163,307	329,813
Diwaniyah	246,467	261,081	507,548
Dulaim	119,306	114,956	234,262
Karbalah	105,347	111,668	217,015
Kut	137,432	152,638	290,070
Basra	252,382	250,502	502,884
Amarah	162,188	167,459	329,647
Muntafik	210,654	244,990	455,644
Mosul	363,331	354,169	717,500
Arbil	137,602	134,924	272,526
Kirkuk	196,548	192,364	388,912
Sulaimaniyah	156,165	143,813	299,978
Deserts	37,059	31,503	68,562
Iraqi communities abroad	30,750	11,714	42,464
Delayed registrations	124,632	96,434	221,066
	3,294,073	3,244,036	6,538,109

The *Liwa* is the present Iraqi unit of administration, the *Vilayet* being the former Ottoman unit.

Of the total population there were in 1947: Moslems 4,226,974 (five-thirteenths being Sunni and eight-thirteenths Shiite), Christians 141,664, Jews 116,836, and other religions, 38,862 (Mandaeans Yazidis, Bahais, &c.). Almost the entire Jewish population has now emigrated to Israel.

The *Euphrates* (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (375 miles); the other arm rises in the north-west of Erzerum in the Dumlu Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq.

In 1939 King Faisal II, grandson of Feisal I, acceded to the throne at the age of 3 on the death of his father, King Ghazi, and until 1953, when Feisal II ascended the throne, Iraq was ruled by Prince Abdulilah as Regent. Faisal II, together with Prince Abdulilah, other members of the Royal family and the then Prime Minister, Gen. Nuri es-Said, was assassinated in Baghdad in July, 1958, during a *coup d'état* resulting in the formation of a republican form of government. (*See* Events of the Year.) The monarchy was succeeded by a three-man Council of Sovereignty exercising presidential powers and a republican cabinet formed by Brigadier Kassem.

Production and Industry.—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 464 lb. per acre, barley 612 lb., and rice over 370 lb. Cotton growing is successful in some years. Tobacco from the northern *liwas* is sufficient for the needs of the country. The Iraq Petroleum Company's crude oil production for 1951–56 was:—

	Long Tons		Long Tons
1951	8,114,000	1954	29,606,747
1952	18,061,000	1955	32,716,660
1953	27,220,000	1956	30,603,078

Few industries are yet established on any scale but an increasing industrialization is taking place under both private enterprise and Government action. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel furniture, tanning and textiles.

Communications and Trade.—The country is being rapidly opened up and communications improved and secured, particularly in the hitherto inaccessible northern districts. The expenditure of 70 per cent. of all oil royalties received (a minimum of £25,000,000 oil royalties per annum is guaranteed, but the Iraq Government is at present receiving about £70,000,000 per annum) is directed by a Development Board set up in 1950, with six Iraqi members, one British and one American. The first five year development programme of public works has been completed and the second one is under way, including flood control, dams and irrigation, roads and bridges, housing, schools and hospitals and the establishment of local industries. The port of Basrah is well equipped and able to handle expeditiously all sea-borne trade. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. A new channel across the Fao Bar has recently been dredged. The desert route between Baghdad and the Mediterranean carries an increasing amount of traffic, though most goods reaching Iraq are still sent *viâ* Basrah. Exceptional floods in the spring of 1954 caused serious damage in Central Iraq and interruptions to communications, but effective flood control works have since been completed, and prevented severe flooding in 1957.

Airports for the use of international air traffic have been provided at Baghdad and Basrah (Maqil). The latter serves as a terminus for air traffic originating in the oil fields of the Persian Gulf, and is used as a staging post by the main international airlines operating between Europe and the Far East. In addition to twice weekly services through Basrah, BOAC provides a daily service between London and Baghdad, which is also served by Iraqi Airways and airlines of Egypt, Iran, the Lebanon, Jordan, France, the Netherlands, Scandinavia, Italy, West Germany, Switzerland and Pakistan. Iraqi Airways, run as a department of Iraqi State Railways with BOAC technical advice, operates a daily service to Basra and services from Baghdad to Mosul, Kirkuk, the Persian Gulf, Amman, Beirut, Cairo, Damascus, Teheran, Athens, Istanbul, Rome, Vienna, Frankfurt, London, Karachi and Bombay.

Iraqi State Railways provide a regular passenger and goods service between Baghdad and Basrah by the metre gauge line completed in 1920, which also extends northwards to Khanaqin, Kirkuk and Erbil. The railway line from Baghdad to Mosul, linking up through Syria and Turkey with the Mediterranean and the Bosphorus, is standard gauge.

Language, Literature and Archæology.—The language is mainly Arabic (*see* Arabia) and English is widely used in commerce, science and the arts.

There is evidence that an advanced civilization had been reached in the alluvial valley of the Euphrates while Europe was in a state of barbarism. Astronomy, geometry, engineering and land surveying were cultivated by the Sumerians of Mesopotamia, and various arts reached a point of perfection by 3000 B.C., as investigations at Ur of the Chaldees have shown. Sumerian culture spread from Mesopotamia to Crete and Egypt and to Greece. In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C.

Excavations in 1948 at Tel Abu Shahran, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world.

Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel).

Mosul *Liwa* covers a great part of the ancient kingdom of *Assyria*, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul. A British archaeological expedition has been excavating at Nimrud in the same area since 1950.

Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the *Garden of Eden*. The "*Tree of Knowledge*," which had stood there "from time immemorial," withered and died in December, 1946.

FINANCE

	1955–56	1956–57*
Total revenue.....	ID61,640,000	ID68,404,750
Total expenditure..	74,509,655	70,566,000

TRADE
(Excluding oil)

	1954	1955
Total imports.....	ID74,137,000	ID97,158,961
Total exports.....	17,975,853	25,971,437

Imports from U.K., 1957, £34,412,161. Exports to U.K., £12,237,726.

The principal imports are iron and steel, mechanical and electrical machinery, motor cars, cotton and rayon piecegoods, sugar and tea; and the chief exports are crude petroleum, cereals, dates, raw wool, hides, live animals and raw cotton.

CAPITAL.—The chief city is Baghdad, the former capital of the Abbassid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has a population of 552,047; of the other towns Mosul has a population of 340,541 and Ψ Basrah, 206,302.

NOTE:—*Mapai*=Labour Party.

EMBASSY IN LONDON
2 Palace Green, Kensington, W.8

Ambassador in London, His Excellency Eliahu Elath (1952).
Consulate, 2A Palace Green, W. 8.

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30′–33° 15′ N. and long. 34° 15′–35° 40′ E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South.

The area is estimated at 8,050 square miles out of the 10,429 square miles comprised in the whole of Palestine (the remainder being occupied by Jordan and Egypt). The population was estimated (Dec., 1957) at 1,976,000, of whom 1,763,000 were Jews, the remainder mostly Arabs. These figures result from the gradual process of Jewish immigration during the 30 years preceding Israel's independence (in 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048). During the upheavals of 1948–49 some 600,000 Arabs left the country as refugees and settled in neighbouring countries.

Hebrew is the official language of Israel. Arabic is also used extensively in Government publications and on coins and stamps. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (*a*) the hill country of Galilee and Judæa and Samaria, rising in places to heights of 2,460 to

3,940 ft.; (*b*) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (*c*) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheba, to an apex at the head of the Gulf of 'Aqaba; and (*d*) parts of the Jordan valley, including Lakes Hula, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from a main source near Banyas at a height of 1,140 feet above sea-level and enters Lake Hula (Waters of Merom) 220 feet above sea-level. Between Lakes Hula and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Qishon. The largest lake is the *Dead Sea* (shared between Israel and Jordan); area 405 sq. miles, 1,286 feet below sea-level, 51·5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. The water, therefore, contains an extraordinary high concentration of mineral substances. The highest mountain peak is Mount Atzmon, 3,962a feet above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but is made comfortable in most parts by daily refreshing westerly winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are the principal historic sites in Israel: Jerusalem: the Church of the Dormition and the Cænaculum on Mount Zion (the principal Christian and Moslem Holy Places of the Jerusalem area are in Jordan territory). Ein Kerem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Cæsarea, Athlit Megiddo and Hazor.

History.—The early history of Palestine, from the time when Moses led the children of Israel from Egyptian bondage towards the *Promised Land* to the time of the *Diaspora* (Dispersion) in the second century of the Christian Era, can be found in the Books of the Old Testament and in the Works of Josephus. Before the dispersion it had become the cradle of Christianity and the *Holy Land* of the Christian World, but after the break up of the Roman Empire, into which it had been brought by Pompey in 65 B.C., it was conquered by Islamic Arabs (A.D. 634), remaining under the Crescent as part of the Ottoman Empire (except for a break from 1098 to 1187 under the Crusaders) until Allenby's victory over the Germano-Turkish forces in the plain of Armageddon (Megiddo) on September 19, 1917.

On November 2, 1917, a statement, afterwards known as The *Balfour Declaration*, was made by the British government that Britain viewed with favour the establishment in Palestine of a home for the Jewish people. This principle was incorporated in the mandate to Britain, which came officially into force on Sept. 29, 1923. For 25 years Great Britain administered Palestine and laid the foundations of modern self-government.

The British mandate ended at midnight on May 14, 1948, when the Jewish National Council proclaimed a Jewish State of Israel, with David Ben Gurion as Prime Minister. On the following day Palestine was invaded by Syrian and Lebanese troops in the north, by the Transjordan Arab Legion and the Iraqis in the east and by the Egyptians in the south. On June 30 the last British troops left Haifa, which was taken over by Israel.

Hostilities ceased in January, 1949. The four armistice agreements signed under United Nations auspices in 1949 left Israel in occupation of various areas originally allotted to the Arab State. The situation as at present governed by the terms of the armistices has not yet been stabilized by peace treaties between Israel and any of its neighbours. The Arab parts of Palestine occupied by Jordan were formally incorporated with the latter in April, 1950. Egyptian forces occupy the "Gaza strip," a small coastal area with an Arab population.

Government.—There is a Cabinet and a single-chamber Parliament (*Knesset Israel*) of 120 members. The present Cabinet is based on a coalition between *Mapai* (Labour), the largest party, and various parties to the left and right excluding the extreme of both and the General Zionists, and has a two-thirds majority in the Knesset: *Mapai* has 40 seats; *Herut* (outgrowth of Irgun Zvai Leumi), 15; General Zionists, 13; National Religious, 11; *Achdut Ha'avoda*, 10; *Mapam* (Left Socialist), 9; Communist, 6; *Poalei Agudat Israel*, 6; Progressives, 5; Arab pro-*Mapai* parties, 5. The National Religious Party is included in the coalition.

Immigration.—The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. Since the establishment of the State 898,687 immigrants had entered Israel from 50 different countries by Dec. 31, 1957.

Education.—Elementary education for all children from 6 to 13 years is compulsory. In the 1956–57 school year the number of pupils was 341,971 in 1,231 elementary and secondary schools, of which about 121 were Arab schools attended by 25,634 pupils. There are about 300 schools of other types. The Hebrew Technical College at Haifa provides courses in engineering, architecture, aeronautics and other technical subjects. The Hebrew University, at Jerusalem, has about 600 professors, lecturers and assistants, with 3,398 students. Tel Aviv University, opened in 1955, provides courses in law, economics, political sciences and auditing. The Weizmann Institute of Sciences at Rehovot is engaged in pure and applied research.

Finance.—Government expenditure for the fiscal year 1956–57 totalled I£770,132,091 while revenue during the same period was I£766,247,282.

The unit of account is the Israel pound of 1,000 *prutot*. The effective rate of exchange is I£5·04 = £1 sterling.

COMMUNICATIONS

Railways and Roads.—Israel State Railways started operating in August, 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lydda, Naharia, Beersheba, and intermediate stations. In June, 1957, the total railway network amounted to 614 kms. There were approximately 2,793 km. of paved roads. In December, 1957, there were approximately 50,000 licensed vehicles.

Shipping.—Israel's merchant marine in 1957 included 34 vessels with a total displacement of

233,000 tons. In 1956, 1,358 ships with a net tonnage of 2,610,852 entered Israel ports. Cargo unloaded during the year amounted to 1,473,120 tons and cargo loaded to 717,153 tons.

The chief ports are ΨHaifa, a modern harbour, with a depth of 30 ft. alongside the main quay; ΨJaffa and ΨTel Aviv, where there are small craft harbours, and large vessels anchor at open roadstead. ΨAcre has an anchorage for small vessels. A port is under construction at Elath, where one or two ships of up to 4,000 tons d.w. may at present berth alongside.

Civil Aviation.—B.E.A. operates five *Viscount* services per week between Lydda and London, two of them *viâ* Nicosia in conjunction with Cyprus Airways. Israel National Airlines (El Al) operate three *Britannia* services per week between Lydda and New York and other services to Istanbul, Paris, Rome and Amsterdam. During 1956 1,592 aircraft arrived at Lydda and Haifa airports, carrying 42,045 passengers and 723,809 kilograms of freight. 44,751 passengers and 515,158 kilograms of freight left through the two airports.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to subtropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1957–58 season was approximately 393,000 tons. Of this total, 298,000 tons were exported, of which about 128,000 tons went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in the autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 19,856 tons in 1956. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production, but the number of new deep wells is being extended and a plan to bring water to the Negev from the Yarkon river is nearly completed. A large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—Among the more important industries are citrus and by-products, manufactured food products, pharmaceuticals, textiles and wearing apparel, artincial teeth, polished diamonds, plywood, cement, plastics, light engineering and the assembly of motor cars and trucks.

TRADE	1957
Imports	I£431,000,000
Exports	139,000,000
Imports from U.K., 1956	£13,396,190
Exports to U.K., 1956	11,231,500

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, artificial teeth, finished and semi-finished textiles and pharmaceutical drugs.

CAPITAL, Jerusalem, population (Dec. 31, 1956), 149 440. Other principal towns are ΨTel Aviv-Jaffa (370,000); ΨHaifa and district (160,000); Ramat Gan (65,150).

FLAG: White, with two horizontal blue stripes, the Shield of David in the centre.

JERUSALEM

Jerusalem and District is at present divided between Israel and Jordan under the terms of the armistice arranged at the end of hostilities. The Old City, which contains 34 of the 36 recognized Holy Places, is under the control of Jordan; the New City, with 2 Holy Places, is under Jewish administration. A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950.

Commercial Attaché, Signor Giuseppe Lo Faro.
Assistant Commercial Attaché (vacant).
Naval Attaché, Rear Adm. Silvano Brengola.
Assistant Naval Attaché, Comdr. Mario Zampini.
Military Attaché, Lt.-Col. Giovanni Gemme.
Air Attaché, Col. Giuseppe Pelosi.
Assistant Air Attaché, Capt. Francesco Carosio.
Financial Counsellor, Signor Antonino Zecchi.
Cultural Attaché, Signor Umberto Morra di Lavriano.
Press Counsellor (vacant).
Italian Consulate General, 38 Eaton Place, S.W.1. (Sloane: 9284).
Consul General, Signor Giangiacomo Di Thiene.

AREA AND POPULATION.—Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies hereinafter noted). Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, etc., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area may be estimated at 324,000 sq. kilometres, about 131,000 sq. miles, with a population (estimated April 30, 1958) of 50,023,745.

Births in 1957 (*Jan.–Oct.*) numbered 743,794, deaths 391,788, and marriages 313,657.

Physiography.—The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (220 miles), which flows through Piedmont, Lombardy and the Veneto and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Cæsar did in 49 B.C., thus "invading" Italy in arms) is a step definitely indicating an aggressive course of action.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 to 1870, in which the great patriots Mazzini (*born* 1805; *died* 1872), Garibaldi (*born* 1807; *died* 1882) and Cavour (*born* 1810; *died* 1861) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader), was born July 29, 1883, and was continuously in office as Prime Minister from June 30, 1925, until July 25, 1943, when the Fascist *régime* was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Victor Emmanuel III under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum resulted in 12,717,923 votes for a Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

As a result of the General Election of April 18, 1948, in which the Christian Democrats were returned as the leading party with a majority in the Chamber, Signor de Gasperi formed a Coalition Government of Christian Democrats, Liberals, Republicans and those Right Wing Socialists who had left Nenni. The elections of July, 1953, resulted in a position of deadlock, and after Signor de Gasperi had formed a short-lived minority Government, he was succeeded as Prime Minister by Signor Pella. In February, 1954, a coalition of Christian Democrats, Social Democrats and Liberals was formed by Signor Scelba, with the support of the Republican Party. Signor Scelba's Government resigned in June, 1955, and was succeeded in July by a similar coalition headed by Signor Segni. In May, 1957, after the withdrawal from the coalition of the Social Democrats, Signor Segni's Government fell and was replaced in June by a single-party Christian Democrat Government under Signor Zoli. After the general election of May, 1958, a coalition of Christian Democrats and Social Democrats took office under Signor Fanfani.

THE NEW CONSTITUTION.—On Dec. 22, 1947, the Constituent Assembly approved the new Constitution laying the foundation of the Italian Republic, Article I of which states "Italy is a Democratic Republic founded on work. Sovereignty belongs to the people who exercise it in the forms and within the limits of the Constitution."

PRODUCTION.—Agriculture (including the growing of grapes, olives, chestnuts and rice) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are produced over a large area, notably in Liguria, Tuscany and Apulia; while fruit abounds and is largely exported; wheat production was greatly stimulated under the Fascist *régime*, and has made further progress since the War. The cultivation of the silkworm forms an important industry. Fishing is carried on extensively, mainly for domestic consumption, though some tunny is exported. Italy is generally poor in mineral resources, but the discovery and rapid exploitation since the war of large quantities of natural methane gas in North Italy is likely considerably to reduce the costs of industrial production and the requirements of imported coal. The production of sulphur is important and among other minerals produced are iron pyrites, mercury, lead, zinc, aluminium, potassic salts and iron ores. There are promising deposits of oil in Sicily. Marble is quarried in considerable quantities. Salt and tobacco are Government monopolies.

The chief manufactures are woollens, cotton, silk, rayon, hemp, and linen yarns and tissues, iron and steel and their products, shipbuilding, gloves, motor vehicles, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, coral, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The *Army* has been reorganized. It consists of about 230,000 men. The *Navy* consists of 3 cruisers, 6 destroyers, 46 escorts, 6 submarines and also minesweepers, coastal craft and fleet

auxiliaries. The *Air Force* consists of about 1,000 aircraft, of which about half are operational; approximate strength: officers, 4,500; men, 50,000.

LANGUAGE AND LITERATURE.—Italian is a Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265–1321; Petrarch, 1304–1374; and Boccaccio, 1313–1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474–1533; Machiavelli, 1469–1527; Tasso, 1544–1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785–1873), Carducci (1835–1907) and Gabriele d'Annunzio (1864–1938). The Nobel Prize for Literature has been awarded to Italian authors on three occasions—G. Carducci (1906), Signora G. Deledda (1926), and Luigi Pirandello (1934). In 1958, there were 95 daily newspapers published in Italy, of which 17 were published in Rome and 11 in Milan.

EDUCATION.—Primary education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the 26 Universities are of very ancient foundation, Bologna, Genoa, Macerata, Naples, Padua and Perugia in thirteenth century; Siena, Rome, Pisa, Pavia and Ferrara in fourteenth century; Catania and Turin in fifteenth century; Parma, Messina and Urbino in sixteenth century.

COMMUNICATIONS.—Serious damage was done to the Italian railway system by the war, but by the end of 1948 the work of restoring the tracks was almost completed. A large programme for rebuilding stations, replacing and increasing rolling stock, and for repairing and building new roads has been carried out, special attention being given to a large-scale development programme for Southern Italy. The Italian Mercantile Marine has been restored to 4,504,330 tons compared with 3,500,000 tons before the war.

CURRENCY

In July, 1958, the Italian *Lira* was quoted at approx. 1,750=£1. (*See also* p. 84.)

TRADE	1957
Imports	*Lire* 2,267,000,000,000
Exports	„ 1,588,000,000,000

	1956	1957
Imports from U.K. ..	£59,575,834	£71,156,047
Exports to U.K.	57,431,557	62,813,021

Imports consist chiefly of iron and steel, coal, cotton, wool, machinery, coffee, timber, wheat, chemicals and crude oil.

The principal exports are citrus and other fresh fruit, fresh vegetables, tinned fruit and vegetables, motor vehicles, machinery, artificial fibres and yarns, chemical fertilizers, pneumatic tyres, rice and oil.

The principal imports from the U.K. in 1957 were machinery, wool, toilet preparations and soaps, metal goods, chemical and scientific instruments; the principal exports to the U.K. in 1957 were fresh and dried fruit and vegetables, woven fabrics, synthetic fibre yarns, chemicals, clothing, machinery and road vehicles.

CAPITAL, Rome, founded according to legend by Romulus in the year now known as 753 B.C., is situated on the Tiber, 15 miles from its mouth. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the kingdom was established in 1871. Population (1957), 1,853,135. Other towns are Milan (1,370,252), ΨNaples (1,105,230), Turin (869,480) ΨGenoa (731,659), Florence (408,046), Bologna (394,269), ΨVenice (334,603), ΨTrieste (284,492), ΨBari (301,998), Verona (195,909), ΨLivorno or Leghorn (151,483), ΨTaranto (186,371), Brescia (152,794), Ferrara (143,708), ΨReggio di Calabria (148,085), ΨSpezia (116,902), ΨAncona (93,875), ΨRavenna (100,567), ΨSalerno (100,647), ΨSavona (69,703), ΨBrindisi (65,618); in *Sicily*, ΨPalermo (564,225), ΨCatania (340,694), ΨMessina (239,505), ΨTrapani (76,646), ΨSyracuse (77,635), and in *Sardinia* ΨCagliari (157,233).

TRIESTE.—From June 12, 1945, the area of Trieste was administered by Allied Military Government; Zone A, including Duino and the city and harbour of Trieste, by Anglo-U.S. forces and Zone B, including the towns of Capodistria, Pirano and Cittanuova by Yugoslavia. Provision for setting up a Free Territory of Trieste, included in the Italian Peace Treaty signed in Paris on Feb. 10, 1947, proved to be unworkable and military occupation of the two Zones continued until 1954, when an agreement was concluded in London on Oct. 5 between Italy, Yugoslavia, the United Kingdom and the United States, partitioning this territory between Italy and Yugoslavia along the line of demarcation of the two Zones, with a minor frontier rectification in favour of Yugoslavia. Zone A, an area of about 90 square miles with a population of 296,229, was formally handed over to Italian administration on October 26, 1954.

ITALY'S FORMER COLONIES, &c.

The future of the former Italian colonies was determined by the General Assembly in a resolution of November 21, 1949, and subsequent subsidiary resolutions.

For LIBYA *see* separate article.

In Somalia authority was transferred on April 1, 1950, by the United Kingdom to Italy. Somalia is to become an independent and sovereign state on December 2, 1960.

Under a United Nations resolution of December 2, 1950, Eritrea constitutes an autonomous unit federated with Ethiopia under the sovereignty of the Ethiopian crown. *See* ETHIOPIA.

Somalia comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 11° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of ΨKismayu), transferred from Kenya by Great Britain in 1925, is about 220,000 sq. miles, and the population is estimated at 1,263,584. The capital is ΨMogadishu, on the Indian Ocean, estimated population (1956), 74,056.

Pantelleria Island (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,000.

The *Pelagian Islands* (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 3,000.

FLAG.—Vertical stripes of green, white and red.

BRITISH EMBASSY

Villa Wolkonsky, Via Conte Rosso, Rome.

British Ambassador, His Excellency Sir (Henry) Ashley Clarke, K.C.M.G. (1953)..... £6,000

Minister, H. A. F. Hohler, C.M.G.
Minister (Commercial), K. Unwin, C.M.G., O.B.E.
Counsellor, G. G. Hannaford, C.M.G., O.B.E.
1st Secretaries, C. M. Le Quesne; K. C. Christofas, M.B.E.; F. G. Burrett; C. F. G. Ransome, C.M.G., O.B.E.; C. T. Isolani, M.B.E. (*Information Officer*); F. C. S. Bayliss, M.B.E., T.D.; J. K. F. Bamford; F. Smitherman, M.B.E. (*Head of Consular Section*).
2nd Secretaries, D. M. Day; T. A. E. Shute; H. M. Shone; R. J. Le Sueur; J. D. Blakeway; A. J. Walker.
Naval Attaché, Capt. J. E. Scotland, D.S.C., R.N.
Asst. Naval Attaché, Cdr. (E.) J. B. Rae, R.N.
Military Attaché, Col. R. G. Fullerton.
Asst. Military Attaché, Maj. G. K. Alexander.
Air Attaché, Group-Capt. C. L. Barker, C.B.E., D.F.C.
Labour Attaché, D. Taylor.
Chaplain, Rev. D. Wanstall.

BRITISH CONSULAR OFFICES

There are British Consular Offices at *Rome*, *Naples*, *Milan*, *Genoa*, *Florence*, *Palermo*, *Turin*, *Venice*, *Trieste* and *Messina*.

THE BRITISH COUNCIL

Representative, C. F. S. de Winton, O.B.E., Palazzo del Drago, Via Quattro Fontane 20, Rome.

There are *British Council Institutes* at Milan and Naples, and a *Centre* at Bologna. There is also a British Institute at Florence.

JAPAN

(Nippon Koku—Land of the Rising Sun)

Emperor of Japan (*Nippon Koku Tenno*), His Majesty Hirohito, *born* April 29, 1901; *succeeded* Dec. 25, 1926; *married* (1924) Princess Nagako (*born* March 6, 1903), daughter of the late Prince Kuniyoshi Kuni (*died* Jan. 27, 1929), and has issue two sons and four daughters.
Heir-Apparent, His Imperial Highness Prince Akihito Tsugu-No-Miya, *born* Dec. 23, 1933.

CABINET

Prime Minister, Nobosuke Kishi.
Minister for Foreign Affairs, Aiichiro Fujiyama.
Justice, Kiichi Aichi.
Finance, Eisaku Sato.
Education, Hirokichi Nadao.
Welfare, Ryugo Hashimoto.
Agriculture and Forestry, Kunio Miura.
International Trade and Industry, Tatsunosuke Takasaki.
Transportation, Mamoru Nagano.
Postal Services, Yutaka Terao.
Labour, Tadao Kuraishi.
Construction, Saburo Endo.
Chairman, Autonomy Board, and Chairman of the National Public Safety Commission, Masashi Aoki.
Director, Defence Agency, Gisen Sato.
Chairman, Economic Planning Board, Director of the Science and Technology Agency and Chairman, Atomic Energy Board, Takeo Miki.
Director, Hokkaido Development Agency and the Administrative Management Agency, Kikuichiro Yamaguchi.
Minister of State, Hayato Ikeda.
Chief Cabinet Secretary, Munenori Akagi.

JAPANESE EMBASSY IN LONDON
32 Belgrave Square, S.W.1
[Sloane: 0776]

Ambassador, Katsumi Ohno.
Minister Plenipotentiary, Toru Nakagawa.
Counsellors, Kikiuchiro Yamamoto (*Financial*); Keiichi Matsumura (*Commercial*); Michiyuki Isurugi (*Financial*).
1st Secretaries, Hideki Masaka (*Press*); Kiyohiko Tsurumi (*General Affairs*); Shunichi Ohkuchi (*Agriculture*); Teiji Hosono (*Labour*); Yoichi Hayashi (*Transportation*); Hideho Tanaka (*Commercial*); Mizuo Kuroda (*General Affairs*); Hiroshi Murata (*Scientific*).
2nd Secretaries, Seiya Nishida; Toshio Yamasaki; Shiro Miyamoto (*Commercial*); Moriyuki Motono (*Commercial*); Tamio Amau (*Protocol*); Kiichi Watanabe (*Financial*).
Attachés, Takeo Iguchi (*Press*); Naohiro Kumagi (*Visa*); Takayoshi Otaki; Tarao Hashimoto; Naoichi Saito.
Consul-General, Kiyohiko Tsurumi.

Area and Population.—The Japanese Empire consists of 4 large and many small islands situated in the North Pacific Ocean between longitude 156° 30′ East and 119° 18′ West, and between latitude 20° 25′ and 50° 55′ North, with a total area of 368,480 square kilometres (142,270 square miles) and a population (Jan. 1958) of 91,250,000.

Japan Proper consists of *Honshū* (or Mainland), 230,532 sq. k. (89,011 sq. m.), *Shikoku*, 18,773 sq. k. (7,248 sq. m.), *Kyūshū*, 42,079 sq. k. (16,247 sq. m.), *Hokkaido*, 77,096 sq. k. (29,764 sq. m.). Formosa and the Kwantung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1939–45.

After the unconditional surrender to the Allied Nations (Aug. 15, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945), and the status of parts of the former Japanese Empire has yet to be determined. A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Since that date Japan has restored relations with a number of nations, including the U.S.S.R., Poland and Czechoslovakia.

British participation in the occupation of Japan was virtually over by May, 1950, at which date the British Commonwealth Occupation Force was reduced to 3,000 Australians. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure, and the Japan element of the British Commonwealth Forces in Korea at its peak amounted to approximately 6,000 troops. On July 1, 1956, the base was moved to Inchon, Korea, and all Commonweath troops had left Japan by the middle of 1957.

Under the terms of the United States–Japan Security Treaty of Sept. 8, 1951, United States forces remained to defend Japan after the coming into effect of the Peace Treaty. As Japan's own forces are built up, it is expected that the United States forces will be gradually withdrawn.

Vital Statistics.—In January, 1958, Japan proper contained 91,250,000 inhabitants. The average annual increase between 1950 and 1956 was 1,155,219. The birth rate in 1957 was 17·2 per 1,000 and the death rate 8·3 per 1,000. The *Ainu*, remnant of the indigenous inhabitants, are still found in the island of Hokkaido.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso

in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical to sub-arctic zones. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 660. Under the Constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "*Meiji Constitution*" of 1889 and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France. Among the most important innovations are the abandonment of the doctrine of Imperial Divinity, the renunciation of war, and the establishment of a Supreme Court.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

The Japanese peace treaty came into force on April 28, 1952, after ratification by Argentina, Australia, Canada, Ceylon, Mexico, New Zealand, Pakistan, the U.K., the U.S.A. and Japan herself. Japan thereupon resumed her status as a sovereign and independent power.

A general election was held on May 22, 1958, in which the Liberal Democratic Party was once more returned to power. The strength of the parties at June 9, 1958, was as follows:— Lower House: Liberal Democratic Party, 298; Socialist Party, 167; Communist Party, 1; Independent, 1. Upper House: Liberal Democratic Party, 127: Socialist Party, 78; Green Breeze Society, 27; Independents, 12; Communist Party, 2; vacancies, 4.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in 1954 over 24,500,000 hectares of forest, which include the Cryptomeria japonica, Pinus massoniana, Zelkowa keaki, and Pawlownia imperialis in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In 1954 there were 5,042,608 hectares under cereals (rice 3,051,176 hectares—60 per cent.). The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 9,500,000 metric tons being produced annually. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown. Mulberry trees are now cultivated on only 173,995 hectares (about a quarter of the pre-war area) and silk is playing a reduced part in Japanese exports.

Minerals.—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum and salt, but iron ore and coal are among the principal post-war imports to supply deficiencies at home.

Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in 1957 averaged 43,170,000, about 18,800,000 being paid workers; of the remainder, some 10,940,000 were classed as proprietors, and another 13,420,000 were family workers. Of the total labour force, some 16,330,000 were engaged in agriculture, only 630,000 being paid employees. About 36·2 per cent. of paid industrial workers were organized into trade unions.

Communications.—There were 27,612 kilometres of Government and private railroad (steam and electric) in March, 1956. The Japanese mercantile marine reached 6,000,000 gross tons in 1941, but more than three-quarters of it was sunk during the war. By the end of December, 1957, it had been rebuilt to 5,102,000 gross tons of steel vessels (100 tons or over), and it is intended under a new long-range plan covering the period from April 1, 1958, to March 31, 1963, to continue the expansion of the fleet. The target for dry cargo vessels is 5,880,000 deadweight tons and for tankers 2,303,000 deadweight tons compared with 3,324,000 and 911,000 deadweight tons respectively in 1956, the base year for the plan.

Armed Forces.—After the unconditional surrender of August, 1945, the land forces were disarmed and disbanded and all aircraft were confiscated by the occupying forces. Although the present Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being at the end of 1950. In October 1951, this Force was renamed the National Safety Force and together with a Coastal Safety Force was placed under a National Safety Agency. By January 1953, the National Safety Force had reached its authorized strength of 110,000. In March 1954 a Mutual Defence Agreement for the supply of equipment and materials was concluded with the United States. In June, the mission of the forces was extended to include the defence of Japan against direct and indirect aggression, the Agency was renamed the Defence Agency, the forces under it the Ground Self Defence Force and the Maritime Self Defence Force respectively and a new arm, the Air Self Defence Force, was created. During 1956, the strength of these forces was increased to 160,000, 22,700 and 10,350 respectively. By April, 1958, the M.S.D.F. consisted of 407 ships, including miscellaneous harbour craft, of 96,337 tons, and a Naval Air Arm of 107 planes of which 72 were for A/S and patrol duties. A further 20 ships of 10,588 tons were under construction or projected. The Japan Air Self Defence Force (J.A.S.D.F.) at the end of 1957 had 140 piston-engined primary trainers, 180 piston-engined advanced trainers, 180 jet-engined advanced trainers, 110 day fighter/ground attack aircraft and 30 troop-carrying aircraft, mostly of U.S. design. Thd authorized strength of the Ground Self Defence Force in April, 1958, was 170,000. Broadly the Force is organized in six light divisions and three combined brigades with a fourth forming. It is equipped with weapons of U.S. manufacture.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has an archbishop and three suffragan bishops. The Nippon Seikokai (Holy Catholic Church of

Japan) has 8 Japanese bishops and is an autonomous branch of the Anglican communion. There is also an United Protestant Church.

Education.—According to the laws passed in 1947, education on elementary level (6-year course) and lower secondary level (3-year course) is free, compulsory and co-educational. Upper secondary schools (3-year course) are mainly established and maintained by prefectures, and are co-educational. They have several courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. There are 2- or 3-year junior colleges and 4-year universities. Some of the 4-year universities have graduate schools. In May, 1957, the total number of these junior colleges and universities was 503, 93 of which were established and maintained by the State, while 69 were established and maintained by prefectures and cities, and 341 were private institutions. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaidō (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

Language and Literature.—Japanese is said to be one of the Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when the Chinese characters came into use. Most Japanese who have received school education can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is compulsory in almost all middle and high schools. In January, 1958, there were 759 libraries open to the public (34 National Diet libraries, 674 state and 51 private) with 20,448,533 volumes. In addition, there are 528 University libraries with 23,545,819 volumes. In 1956 there were 250 daily newspapers in Japan, of which 15 were published at Tokyo, 11 at Osaka and 13 in the Nagoya region. Japan's present total newspaper circulation is estimated at 36,373,000 copies and 2·45 per household.

Finance

The Budget for the 1958–59 financial year, ending on March 31, is estimated to balance at *Yen* 1,312,131,000,000 for revenue and expenditure on the general account.

The official rate of exchange of *yen* 360=1 U.S.$ was established on April 25, 1949, and (after Japan's accession to the International Monetary Fund) was confirmed by the Fund on May 11, 1953. In December, 1957, the spot sterling/*yen* exchange rate, which had been based previously on the middle sterling/dollar rate, was freed, and now reflects more closely the demand and supply position in Japan.

Foreign Trade

	1956
Total Imports	U.S. $4,283,590,028
Total Visible Exports	„ 2,858,068,044
Imports from U.K.	£27,944,875
Exports to U.K.	£24,208,362

There was an adverse balance of U.S. $297,000,000 for the fiscal year ending March 31, 1958.

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports consist of raw materials (cotton, wool, mineral oils, rubber, iron ore, coking coal, salt, wood pulp, hides), foodstuffs (rice, wheat, barley, soya beans, sugar), petroleum, chemicals and specialized machinery. Principal exports consist of cotton and rayon textiles, machinery, ships, metals and products, canned fish, chemicals and a wide variety of manufactured goods, including chinaware, toys, bicycles, sewing machines and cameras.

Capital of the Japanese Empire, Tokyo, formerly called Yedo, population Oct. 1, 1940, 6,778,804. Its population in June, 1958, was 8,774,683. The other chief cities had the following populations in early 1957.

Ψ Osaka, Honshū	2,632,000
Kyoto, Honshū, ancient capital	1,210,107
Ψ Nagoya, Honshū	1,387,019
Ψ Yokohama, Honshū	1,182,209
Ψ Kobé, Honshū	1,012,192

Flag: White, charged with rising sun (red).

JORDAN

(The Hashemite Kingdom of The Jordan)

King of the Jordan, Hussein, G.C.V.O., *born* November 14, 1935, *succeeded* on the deposition of his father, King Talal, Aug. 11, 1952, *assumed constitutional powers*, May 2, 1953, on coming of age.
Prime Minister and Minister for Foreign Affairs, Samir Rifa'i.

Jordanian Embassy in London

7 Palace Green, W.8
[Western: 3685]

Ambassador (vacant).
Counsellor, Assayed Zuhayr Mufti.
Military and Air Attaché, Lt.-Col. Rashid Arekat.
and Secretary and Consul, Dr. Ahmed Attiyate.

Area and Population.—The Hashemite Kingdom of the Jordan is made up of two areas: Western Jordan, which includes the districts of Hebron, Jerusalem and Nablus, and Eastern Jordan, which includes the districts of Ma'an, Kerak, Belqa and Ajlun. The union of East and West Jordan was effected by a decision taken unanimously by both houses of the Legislature on April 24, 1950. The union was recognized a few days later by the British Government subject to certain reservations on the subject of Jerusalem. The Kingdom is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. The majority of the population are Sunni Moslems and Islam is the religion of the state. The estimated population is 1,400,000 persons, of whom about 500,000 are displaced Palestinians.

Government.—The Executive consists of a Council of Ministers and the legislature of a Senate (25 persons nominated by the King) and a House of Representatives, consisting of 50 elected members.

Production and Industry.—West Jordan is fertile, but severely eroded. East Jordan (the old Amirate of Transjordan), consists of a fertile mountainous area and the eastern half of the Jordan valley which are productive; the rest of the country is arid steppe. Jordan's only industrial product of note is raw phosphate, of which about 160,000 tons were exported in 1955.

Communications.—The Hejaz Railway runs (with the exception of the first few miles) through Jordan territory from Deraa to Ma'an. During the Second World War, 24 miles of line were laid from Ma'an to Ras Naqb; there are good roads to all the chief towns in the country.

Finance	1958–58 (Estimates)
Expenditure	£JD32,511,829
Revenue	19,430,000
Deficit	13,081,829

Trade with U.K.	1956	1957
Imports from U.K.,	£6,270,229	£4,854.933
Exports to U.K.,	21,479	69,376

Capital, Amman. Estimated population, 250,000.

Commercial Secretary and Vice-Consul, J. T. Hyslop.
Information Secretary, A. R. Sinclair.

British Council

Representative, R. A. Simcox, M.B.E., Abou Qora Building, Wadi Seer Street, Amman.

KOREA

(Hankuk.)

Korea is situated between 124° 11″ and 130° 57″ E. long., and between 33° 7″ and 43° 1″ N. lat. It has an area of 85,256 sq. miles with an estimated population of about 28,000,000, of whom about 21,500,000 live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Chejudo (Quelpart). The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice, barley, and other cereals, beans, cotton, tobacco and hemp. Fruit-growing and seri-culture are also practised. Ginseng, a medicinal root much affected by the Chinese, is largely grown at Kaesong (now in North Korean hands) but also in parts of South Korea. It forms a rich source of revenue. Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country, but are more abundant in the north. In pre-war days the south was mainly agricultural and most of the limited industries were in the north. Political necessity in recent years has led to some industrialization south of the demarcation line, but the southern portion of the peninsula remains predominantly agricultural.

History.—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R.; the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

The Korean War.—The country remained effectively divided into two along the line of the 38th parallel, until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted calling for immediate cessation of hostilities, and the withdrawal of the North Korean armed forces to the 38th parallel. The Communist forces ignored this demand and continued their advance. In response to a Security Council recommendation that United Nations members should furnish assistance to repel the attack, 16 nations, including the United States of America and the United Kingdom, came to the aid of the Republic of Korea. A unified command under the leadership of the United States was established on July 8. Shortly afterwards U.S. troops were landed in Korea but were at first unable to stem the Communists' onslaught. Finally the United Nations and South Korea forces were able to stabilize a front around the Pusan perimeter. On September 15, U.S. Marines made a successful surprise landing at Inchon which was quickly followed by a breakout from the Pusan perimeter and a general advance to the north. The Communist forces had been pushed back almost to the Manchurian frontier, when, at the beginning of November, hordes of Chinese "Volunteers" began to pour over the Yalu River and by sheer weight of numbers forced the U.N. troops to withdraw once again south of Seoul. However, the latter quickly regrouped and threw the Communist forces back to approximately the old dividing line.

The fighting was ended by an armistice agreement signed by the U.N. Commander-in-Chief and the commanders of the North Korean army and the Chinese People's "Volunteers" on July 27, 1953. By this agreement (which was not accepted by the government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea from April 26 to June 15, 1954, but failed to agree on measures for reunifying the country.

Republic of Korea

President, Dr. Syngman Rhee, *re-elected for 4 years*, May 15, 1956 (*third term*).
Vice-President, Dr. Chang Myon.

KOREAN EMBASSY IN LONDON
36 Cadogan Square, S.W.1.
[Kensington : 8025]

Ambassador Extraordinary and Plenipotentiary, Mr. Kim Yoo Taik (1958).
Counsellor, Mr. Soo Young Lee.
1st Secretary and Consul, Mr. Ilwoo Lee.
3rd Secretary, Mr. Suck Tai Limb.
Naval, Military and Air Attaché, Capt. Kyunam Chae.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of 96,930 sq. km. (37,426 sq. miles) and a population (Census, 1955) of 21,526,374.

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected Dr. Syngman Rhee as the first President of the Republic of Korea for four years. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end. All U.S. troops were withdrawn by the end of June, 1949. In the fourth general elections for the National Assembly held on May 2, 1958, the Liberal Party retained its majority, but the Democratic Party improved its position, winning one-third of the seats.

The Republic of Korea has an army of about 700,000 men, organized in 20 divisions and 10 reserve divisions, a small navy mainly for coast protection duties and a small air force.

Finance.—The Budget for the year ending December 31, 1958, provides for total expenditure of *Hwan* 323,000,000,000 and revenue of *Hwan* 307,300,000,000; the apparent deficit of *Hwan* 15,700,000,000 being covered by inter-account transfers which require no cash expenditure. Expenditure on National Defence is estimated at *Hwan* 124,200,000,000.

The rate of exchange is fixed by bilateral agreement with the U.S.A. at *Hwan* 500 = $1 (1,400 = £1), subject to review.

Trade.—The Republic of Korea's main exports are non-ferrous metals, iron ore, silk, fish and fish products, agar-agar, kolinsky furs, bristles, and gingseng. Since 1945 imports have greatly exceeded exports; in 1957 imports totalled U.S. $440,699,000 of which U.S. $383,522,000 was financed with foreign aid funds, while exports totalled only U.S. $22,202,000. Trade with the United Kingdom in 1957 was valued at: imports, £3,151,468; exports to U.K. £439,705.

CAPITAL.—Seoul, population (1955), 1,574,868. Other main centres are ΨPusan (pop. 1,045,183), Taegu (pop. 487,252) and ΨInchon (pop. 317,967). Pusan on the south-east coast, and Inchon on the west coast, only 28 miles from Seoul, are the main ports but the development of Inchon is hampered by a tide variation of 28–30 feet.

BRITISH EMBASSY
Seoul

Ambassador, His Excellency Hubert John Evans, C.M.G. (1957) £2,700
1st Secretary, J. K. Blackwell.
Military Attaché, Col. A. E. E. Mercer, M.C.
Air Attaché, Group-Capt. H. T. Bennett (*resident in Tokyo*).
2nd Secretary (Commercial), S. Stephenson.
3rd Secretary (Information), M. E. Pike.
Vice-Consul, N. A. Smith.

Democratic Peoples' Republic of Korea.—Meanwhile in the Russian-occupied zone north of the 38th parallel the Democratic People's Republic had been set up with its capital at Pyongyang; a Supreme Peoples' Soviet was elected in September 1948, and a Soviet-style Constitution adopted. Recognition had been given by the U.S.S.R. and its satellites, in January, 1949, the Soviet Government announced that all Russian troops had been withdrawn from Korea by the end of December, 1948.

LEBANON

President of the Republic of Lebanon, General Fuad Chehab, *elected* July 31, 1958.

CABINET
(Sept. 24, 1958)

Prime Minister and Minister of Defence and of Interior, Rashid Karami.
Foreign Affairs, Philippe Takla.
Public Works, Communications and Planning, Farid Brad.
Education and Health, Hamad Safieddin.
Finance, Rasik Naja.
Labour and Justice, Yussef Soda.
Economy and Information, Charles Helou.
Agriculture and Posts and Telegraphs, Fuad Najjar.

LEBANESE EMBASSY IN LONDON
(21 Kensington Palace Gardens, W.8)
[Bayswater : 7265]

Ambassador, Ibrahim el-Ahdab (1955).
Counsellor, Albert Nassif.
Attaché, Iwahim Kharma.

The republic of the Lebanon is in the Levant, covering a portion of the former Ottoman Empire taken from the Turks by British forces (with a small French detachment and some Arab forces under the Emir Faisal and Colonel Lawrence) in 1918, but following the Anglo-French Convention of September, 1919, Great Britain withdrew in favour of France, to whom a Mandate was granted by the Supreme Council of Allied Powers in 1920. The French authorities granted a Constitution and the first President of the Republic (under the Mandate) was elected in 1926.

In 1941 hostilities broke out between the French troops in Syria and Lebanon and the Allied Forces in the Middle East, the latter having been directed to prevent further Nazi penetration into French Mandated Territory. Hostilities ceased on July 11, 1941, and the French High Command agreed to remove the garrison.

In accordance with the undertaking given by the British and Free French Forces, Syria and Lebanon were declared to be independent and separate States. In 1943 the amended Constitution came into force and the first President of the independent Lebanon Republic was elected.

Under an agreement signed by General Catroux (on behalf of the French Committee of National Liberation) and by representatives of Syria and Lebanon "all powers and capacities exercised hitherto by the French under mandate" were transferred to the Syrian and Lebanese governments as from Jan. 1, 1944.

Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Palestine frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains

have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses.

Area and Population.—The total area of Lebanon is about 4,300 sq. miles, the population being estimated at 1,430,000 in 1956.

Production.—Fruits are the most important products and include olives, citrus fruit and apples. Tobacco, silk, cotton, cement, textiles, wines and other alcoholic drinks are also produced. There is little remaining of the famous cedars of Lebanon.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Nakoura on the Palestine border, through Beirut to Tripoli, but the Beirut-Nakoura sector is not in use at present.

Roads.—All the principal towns in the country are connected by roads, for the most part good.

Civil Aviation.—Beirut International Airport is one of the most important traffic centres in the Middle East. Numerous international air services to all parts of the world pass through it, and local services connect with all Middle Eastern capitals except Tel Aviv. There are 3 national airline companies in the Lebanon serving international as well as local routes. One of these companies enjoys the financial support of B.O.A.C. and operates a *Viscount* service.

Rivers.—The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch; the Litani flows southwards from Lebanon, turns westwards round the southern extremity of the range and flows into the Mediterranean.

Archæology, etc.—Lebanon has some important historical remains. Baalbek (Heliopolis), contains the ruins of I–III century Roman temples (the Circular Temple, the Great Temple, and the Temple of Bacchus) and nearby is the largest cut stone in the world (60 by 17 by 14 ft.), weighing 1,500 tons.

Language and Literature.—Arabic is the principal language (*see* Arabia), and French is also widely used. The use of English is increasing. About 150 newspapers and periodicals are registered in Beirut, but only 40 of these appear regularly, of which 30 are printed in Arabic, 5 in French, 4 in Armenian and 1 in English.

Education.—There are three universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University which is a recent foundation and in the early stages of development. There are several institutions for vocational training and there is a good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

CHIEF TOWNS.—ΨBeirut (population about 450,000) is the capital of the Lebanon. ΨTripoli (200,000), Zahlé (40,000), ΨSidon (25,000), ΨTyre (12,000) are other towns of importance.

FINANCE

Receipts and Expenditure, 1958 (Estimated) £L194,165,000.

Currency. The monetary unit is the Lebanese £(L); official rate £1 = £L6·19. There is also an officially recognized free market in foreign currencies, which is used for nearly all commercial transactions. The free market rate for sterling is variable, but averages about £L8·83 = £1.

TRADE

Principal imports: Gold and precious metals, cereals, cotton and woollen textiles, artificial and cotton yarns, iron and steel goods, petrol, oils, wood, pharmaceuticals, raw hides, sugar, motor-vehicles, live-stock, wheat, flour, machinery and paper.

Principal exports: Gold and precious metals, citrus fruits, wool, onions, cotton, textiles, apples and pears, scrap metal, vegetables, hides and skins, soap, butter, cereals, oil-seed, tobacco and wines.

Trade with U.K., 1957.—Imports, £12,437,607; Exports to U.K., £3,193,963.

There is also a considerable transit trade through Beirut, mainly in gold and crude oil. Lebanon is the terminal for two oil pipe lines, one, belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans-Arabian Pipeline Company, at Sidon. There are refineries at each end of the pipeline which can, to all intents and purposes, fulfil Lebanon's needs.

LEBANESE FLAG.—Red, white and red with a green cedar of Lebanon in the centre of the white band.

AIR TRANSIT FROM U.K.—London–Beirut (2,367 miles), 11 *hrs.* 30 *mins.*

LIBERIAN EMBASSY IN LONDON
21 Prince's Gate, S.W.7
[Kensington: 9405]

Ambassador Extraordinary and Plenipotentiary, His Excellency Clarence L. Simpson (1956).
Consul-General, G. Flama Sherman, 13 New Burlington Street, W.1.

An independent Negro Republic of Western Africa, occupying that part of the coast between

Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50′, a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognized since 1847 as an independent State. The population is estimated at 1,600,000.

The executive power is vested in a President elected for 8 years, assisted by a ministry; there are two houses of Legislature, the Senate, with 10 members elected for six years, and the House of Representatives with 35 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 2,000 men. The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports.

Liberia is receiving assistance from the U.S. International Co-operation Administration and technicians have been sent from U.S.A. to carry out various projects. A loan of $15,000,000 has been negotiated with the Import-Export Bank to finance road construction. UNESCO, WHO and FAO have missions in the country providing technical assistance.

FINANCE

	1957*
Revenue	$15,800,000
Expenditure	15,800,000

$=U.S. Dollar. *Estimated.

TRADE

	1956	1957
Imports	$26,799,309	$38,255,576
Exports	44,537,771	40,362,175
Imports from U.K.	£15,655,084	£16,222,983
Exports to U.K.	2,308,602	2,473,087

The principal exports are crude rubber, iron ore, raw gold, piassava, palm kernels, palm oil and small quantities of cocoa and coffee. Iron ore deposits have recently been discovered and its export is being rapidly developed. Statistics published show a total export of 757,138 carats of uncut diamonds for the year 1957. The chief imports are metals, machinery, rice, tobacco, Manchester goods, provisions, salt, hardware, glass and earthenware, building materials, vehicles and petroleum products.

The language of the Republic is English. British Weights and Measures (but American dollars) are used.

CAPITAL. ΨMonrovia. Est. Pop. 41,000. ΨMarshall (5,000) is the chief port for rubber shipments. ΨHarper (Cape Palmas), pop. 2,000, is one of the smaller ports of entry.

FLAG: alternate horizontal stripes (5 White, 6 Red), with 5-pointed white star on blue field in upper corner next to flagstaff.

LIBYAN EMBASSY IN LONDON

58 Princes Gate, S.W.7.

Ambassador, His Excellency Ali Sahli (1957).
Counsellor, Fathi Abidia.
2nd Secretaries, Ali Sunni Muntasser; Giuma Turkey.
3rd Secretary, Taher Burshan.
Attaché, Zubeir Lenghi.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Anglo-Egyptian Sudan, on the South by French Equatorial and French West Africa, and on the West by Algeria and Tunisia. It consists of the three provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population estimated (1954) at 1,091,000. The people of Libya are principally Arab with some Berbers in the West and African negroes in the Fezzan, and there is a considerable Italian minority in Tripolitania. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Gadames, Jofra, Sebha, Gat, Jalo, Bir Hakim and the Kufra group in the South-East. Exports from Libya include wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are interesting to archæologists, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli.

Communications in Libya are good in the coastal area, where a motor road runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. Elsewhere roads are poor and the transport inland is confined to caravan and occasional motor bus routes. Small railway systems exist in the Tripoli and Benghazi areas. There are airports near Tripoli (Idris el Awal) and Benghazi (Benina) regularly used by commercial airlines, and military airfields at El Adem (near Tobruk, R.A.F.), and Wheelus Field, Mellaha (near Tripoli, U.S.A.A.F.).

Government.—Libya was occupied by Italy in 1911–12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna)

were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations.

Libya has a federal form of government and an hereditary monarchy. Government is by a two-chamber parliament. The Senate of 24 members, equally divided between the three Provinces, is nominated half by the King and half by the three Provincial Legislative Councils. The first Senate was wholly nominated by the King, but in future half the members are to be nominated every four years. The House of Representatives is an elected body at present consisting of 55 members, 34 from Tripolitania, 15 from Cyrenaica and 6 from the Fezzan. Members are elected on a basis of one for every 20,000 inhabitants provided that the number of members in any one of the three provinces shall not be less than 5, and elections of all members are to be held every four years. Legislation may be initiated by the King, the Senate or the House of Representatives, except laws concerning the Budget or taxation, which may not be introduced by the Senate.

The three Provinces of Tripolitania, Cyrenaica and the Fezzan are each administered by a Governor assisted by an Executive and a Legislative Council.

Currency.—Libya entered the Sterling Area on January 3, 1952, and a new currency was introduced on March 24, 1952. The £ Libyan is equal to the £ Sterling and is divided into 100 piastres and 1,000 millièmes. There are seven denominations of notes (£10, 5, 1, ½, and ¼, 10 piastres and 5 piastres) and five denominations of coins (1 and 2 piastres, 5, 2 and 1 millièmes).

Grants have been made by the United Kingdom, France, Italy and the United States to foster Libya's economic development and technical assistance is being provided by the United Nations and the United States.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 29, 1953. The United Kingdom will provide financial aid to Libya for 20 years. During the first five years £1,000,000 was paid annually for economic development, while from 1953–55 £2,750,000, in 1956 £3,000,000 and 1957 £3,250,000 was paid to the Libyan Budget. The figure for the second five-year period has been fixed at £3,250,000 for the Budget: the development aid from this source has ceased. Libya will make military facilities available to British troops (including the R.A.F.) which will be stationed in Libya under certain conditions. The United States Government is permitted under the terms of the United States–Libyan Base Rights Agreement of Oct. 30, 1954, to maintain armed forces and installations in Libya. A separate exchange of notes governs the financial assistance which the United States Government will provide for Libya's economic development during the period of this Agreement which runs until Dec. 24, 1970.

Trade with U.K., 1957.—Imports, £5,869,785; Exports, £1,351,460.

CAPITAL. Tripoli and Benghazi are the joint capitals of Libya. A new Federal capital is under construction at Beida in Cyrenaica.

The principal towns with the latest available estimates of populations are Tripoli (142,000); Misurata (63,000); Benghazi (60,000); Homs-Cussabat (56,000); Derna (16,000); Barce (10,000); Tobruk (3,000); Sebha (1,000).

FLAG. The Libyan National flag is a tricolour of red, black and green horizontal stripes, bearing a white crescent and star in the centre.

BRITISH EMBASSY IN LIBYA

Ambassador Extraordinary and Plenipotentiary, His Excellency Walter Gerald Cloete Graham, C.B.E. (1954) £3,400

Counsellor and Consul-General (*Benghazi*), F. C. Ogden, C.B.E.

1st Secretary (*Tripoli*), C. Gandy.

1st Secretary (*Oriental*), J. F. S. Phillips.

There are British Consular Offices at Benghazi and Tripoli.

British Council Representative, M. F. Jerrom, 16 Zaviet el Dahmani, Tripoli.

LIECHTENSTEIN

(Fürstentum Liechtenstein)

Prince, Franz Josef II., *b.* Aug. 16, 1906; *succ.* Aug. 25, 1938; *married* March 7, 1943, Countess Gina von Wilczek.

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland, with an area of 59·61 square miles and a population (estimated, Dec. 31, 1957) of 15,051. The main industries are machines and tools, cotton spinning and weaving, calculating machines, pottery, artificial teeth, sausage casings, textiles, various apparatus, foodstuffs, and leatherware. The chief products are cotton yarn, cotton material, screws, needles, pottery, artificial teeth, sausage casings, precision instruments (*e.g.*—measuring instruments), vacuum pumps, coating of lenses, shoes, leather gloves, calculating machines, cameras, feathers for bedding, transport belting, kitchen stoves, tinned goods, damask cloth, socks and stockings. Revenue (1957), *Swiss francs* 10,054,488; Expenditure (1957), *Swiss francs* 10,026,623.

Trade with U.K., 1957.—Imports, £53,898; Exports to U.K., £263,281.

The language of the Principality is German.

FLAG: Blue and Red (blue at the top, red at the bottom, with a gold crown in the blue part).

CAPITAL, Vaduz. Pop. (1957) 3,200.

British Consul-General, J. Robinson, C.B.E. (1957) (resides at Zürich, Switzerland).

LUXEMBOURG

(Grand-Duché de Luxembourg)

Grand Duchess, H.R.H. Charlotte, G.C.V.O., *born* Jan. 23, 1896. *succeeded* (on the abdication of her sister) Jan. 9, 1919; *married*, Nov. 6, 1919, Prince Felix of Bourbon-Parma (H.R.H. the Prince of Luxembourg, K.B.E.). *Heir Apparent*, The Hereditary Grand Duke (Prince Jean), *born* Jan. 5, 1921, *married*, April 9, 1953, Princess Joséphine-Charlotte of Belgium, and has issue, Princess Marie Astrid, *born* Feb. 17 1954; Prince Henri, *born* April 15, 1955; Prince Jean and Princess Margaretha (twin son and daughter), *born* May 15, 1957.

Prime Minister, Minister of Education and of the Interior, M. Pierre Frieden.

Minister of Foreign Affairs, Foreign Trade and Viticulture, M. Joseph Bech.

Finance and Defence, M. Pierre Werner.

Justice, Public Works, Transport and Electricity, M. Victor Bodson.

Economic Affairs, M. Paul Wilwertz.

Secretary of State for Economic Affairs, M. Henry Cravatte.
Labour and Social Security, M. Nicolas Biever.
Public Health and Agriculture, M. Emile Colling.

EMBASSY IN LONDON
27 Wilton Crescent, S.W.1.
[Sloane: 6231]

Ambassador Extraordinary and Plenipotentiary and Consul-General, Monsieur André J. Clasen (1955).

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815–66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the *Treaty of Versailles*, 1919, Germany renounced her former agreements with Luxembourg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (Belgolux). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned.—Luxembourg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Coal and Steel Community, the High Authority and Court of which have their seat in Luxembourg; of the European Economic Community and of "Euratom". Besides Belgolux, Luxembourg is also a member of the Belgium-Netherlands-Luxembourg Customs Union (Benelux).

The area is 1,000 square miles; the population (estimated, 1956) 313,600, nearly all Roman Catholics. There is a Chamber of 52 Deputies, elected by universal adult suffrage (as from the General Election in 1959) for 5 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity of over 3,000,000 tons. The revenue for 1958 was estimated at *Francs* 4,997,709,000, expenditure *Francs* 5,080,902,000. The Luxembourg *franc* has at present the same value as the Belgian *franc* and the latter is legal tender in the Grand Duchy. Exchange Rate, 140 *Francs* = £1. There are approximately 260 miles of railway. Exports to the United Kingdom in 1957 totalled £1,403,162; imports from United Kingdom, £305,514. The capital, Luxembourg, pop. (1957), 67,500, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language; all speak German and many English.

MEXICAN EMBASSY IN LONDON
48 Belgrave Square, S.W.1
[Sloane: 4037]

Ambassador, Dr. Pablo Campos Ortiz.
Minister-Counsellor and Acting Consul-General, Señor Don Gustavo Luders de Negri.
2nd Secretary, Señor Don Carlos González Parrodi.
3rd Secretary, Señor Don Roberto de Rosenzweig-Díaz.

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 14° 33′ to 32° 43′ N. lat. and 86° 46′ to 117° 08′ W. long., and comprising one of the most varied zones in the world. It contains 29 states, 2 territories, and the federal district of Mexico, making in all 32 political divisions, covering an area of 758,000 square miles, with a population (1956 estimate) of 30,538,050.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl ("El Pico de Orizaba") on the east. In February, 1943, a new volcano (*El Paricutin*) was in eruption about 250 miles from Mexico City and 20 miles from the town of Uruapan, but is no longer active. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, the *Rio Balsas* and *Rio Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

Government.—The *Toltec* invaders of Mexico gave place in the 13th century to the *Aztecs*, who

were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*, whose remains have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico City), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810–1821. In 1810 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. From 1837–1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the execution of the Emperor gave rise to the new Republic, which has endured to the present day. Presidents are elected for six years only. There is no re-election.

Under the Constitution of Feb. 5, 1917 (subsequently amended in detail) Congress consists of a Senate of 59 members, elected for 6 years, and of a Chamber of Deputies at present numbering 161 elected for 3 years.

Archæological Remains.—Mexico is rich in archæological remains, and work is proceeding in every district to remove the earth covering which for many centuries has kept them from view. Near the City of Mexico at Teotihuacán are a number of pyramids forming part of the great ceremonial centre of a pre-Aztec culture believed to date from *c.* 100–500 A.D. The *Pyramid of the Sun* is 761 feet from N. to S., and 725 feet from E. to W., and rises to a height of 216 feet. The *Pyramid of the Moon* is 426 feet by 511 feet, and rises to 180 feet. Other places of interest are Monte Alban and Mitla near Oaxaca, Palenque and Bonampak (Chiapas), Chichén-Itzá and Uxmal (Yucatan), El Tajín (Veracruz) and Tula (Hidalgo).

Communications.—Veracruz, Tampico, Progreso, and Coatzacoalcos (Puerto Mexico) are the chief ports on the Atlantic, and Mazatlán, Guaymas, Acapulco, Manzanillo and Salina Cruz on the Pacific. Registered merchant marine amounted at the end of 1955 to 231,187 gross tons, with 753 ships. There were 23,369 kilometres of railway track open in Mexico in 1955. Work is proceeding on the reorganization, rehabilitation and re-equipment of the systems, and on extensions in the East and South-East of the Republic. Various loans from the United States and from the International Bank for Reconstruction and Development have recently enabled the railways to buy certain quantities of rails, diesel locomotives, shop equipment and spare parts. The South-Eastern Railway, providing the first land communication between the peninsula of Yucatan and the rest of Mexico, was opened in 1950. Early in 1952 the Government bought the U.S.-owned Southern Pacific Railway of Mexico, which is being extensively rehabilitated.

The total length of road under federal maintenance at the end of 1956 was 28,616 kms. The Pan-American Highway, providing through communication from the U.S. border at Ciudad Juarez to the Guatemalan border, was opened in May, 1950. Other main routes which it is planned to complete during the term of office of the present Government are Mexico–El Ocatal (to be continued to Guatemala City), Chetumal–Escarcega–Campeche–Mérida–Puerto Juarez, and Durango–Mazatlan. Main routes Ciudad Juarez–Mexico, Guadalajara–Nogales, Guadalajara–Manzanillo, Veracruz–Puerto México, Salina Cruz–Puerto México and Tampico–Tuxpan were completed by the present Government.

The National telegraph system's lines were 187,451 kms. in length in 1955. International telegraph services to the U.S. border are provided by the nationalized Mexican Telegraph Company, and thence through the U.S. to Canada and Europe. Telephone communications with Canada and Europe are similarly effected through the United States. There is an extensive internal network of air services, its routes measuring 195,256 kms. Registered civil aircraft numbered 2,565 at the end of 1956, of which 673 were commercial and 1,892 private. The principal international air services are Mexico–New York direct; Mexico–Vancouver, Mexico–Windsor (Ontario) and Mexico–Lima direct; Mexico–Montreal *viá* Tampa (Florida); Mexico–Los Angeles; Mexico–Chicago *viá* Monterrey, San Antonio and Dallas; Mexico–Havana *viá* Merida and Mexico–Miami; and Mexico–Guatemala City and other Central American capitals.

Production.—The total acreage of arable land is estimated at 60,000,000 acres, though only some 25,000,000 acres are considered arable without artificial irrigation. Approximately 13,000,000 acres are under cultivation. Grazing land is estimated at 80,000,000 acres and about 50,000,000 acres are under forest. The principal agricultural crops are maize, beans, wheat, chile-pepper, sugar cane, coffee, cotton, tobacco, tomatoes, chick peas, rice, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). About half the world's supply of henequen comes from the province of Yucatan. The forests abound in mahogany, rosewood, ebony, and caoutchouc trees.

The livestock numbered 14,797,000 cattle, 4,838,000 sheep and 7,201,000 goats, 2,968,000 horses, 1,085,000 mules, 3,002,000 donkeys, 5,523,000 swine and 38,555,000 poultry.

The principal industry (apart from agriculture) is mining, but during recent years there has been very considerable expansion of light industries, 65 per cent. of all consumer goods being made in Mexico. The steel industry has now expanded greatly and produced over 1,000,000 tons in 1957. The mineral wealth is very great; silver and gold, copper, lead, zinc, and quick-silver, iron and petroleum are the leading products.

PRINCIPAL MINERALS

	1956	1957
	(*troy oz.*)	(*troy oz.*)
Gold	350,409	357,369
Silver	43,110,000	46,030,000
		(*metric tons*)
Copper	54,864	60,597
Lead	199,610	204,876
Zinc	248,887	242,985
Sulphur	502,000	1,008,000

Crude petroleum production amounted to 93,907,000 U.S. Barrels in 1956 and 92,207,000 U.S. Barrels in 1957.

In 1938, the Government expropriated the properties of the principal foreign oil companies operating in Mexico. The oil industry is now being operated by a Government organization called *Petroleos Mexicanos*, the board of which consists of five representatives of the Government and four of the petroleum workers.

On April 18, 1942, Mexico agreed with U.S. Government as to the amount of indemnity to be paid for U.S. oil companies which had not already reached agreement with the Mexican Government, and payment of this indemnity was completed in 1946. On Sept. 1, 1947, it was announced that the Mexican Government would pay $81,250,000 in compensation to the shareholders, predominantly British, of the Mexican Eagle Oil Co., Ltd., with 3 per cent. interest from Mar. 18, 1938, to Sept. 18, 1948. Annual indemnification payments of $8,600,000 have been made regularly since 1948.

Woollen and cotton spinning and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties.

Defence.—The Army has a strength of one Infantry brigade, the Presidential Guard and 52 regular infantry battalions, 21 regiments of cavalry and a small number of artillery and engineers. The Navy has some 36 ships of all kinds, and the Air Force some 160 aircraft.

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 90 per cent. of the population. About 2,500,000 inhabitants speak Indian languages, but half of these speak Spanish as well. Of those speaking indigenous languages only about 30 per cent. speak Nahuatl, 9 per cent. Maya, 8 per cent. Zapotec, 7 per cent. Otomi and 10 per cent. Mixtec, the remainder speaking other varieties of the minor linguistic families. The National Library at the capital contains about 500,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Education is divided into primary, secondary and university. Primary education is free, secular and nominally compulsory. In 1952 there were 25,613 primary schools with 3,298,738 pupils, 464 secondary schools with 73,104 pupils, and 547 technical and commercial secondary schools with 79,245 pupils. The National University of Mexico was founded in 1533 and re-organized in 1910. There are 9 other Universities, including one exclusively for women. The prevailing religion is Roman Catholic. In 1950, 42·5 per cent. of the population above 6 years old were illiterate; while progress in reducing illiteracy has been steady over the last few years, it has barely kept pace with the rapidly increasing population.

FINANCE	1958
Estimated revenue (*Budget*)...	*Pesos* 8,405,000,000
„ expenditure (*do.*)..	„ 8,402,600,000
	1957
Bonded Internal Debt	„ 6,259,400,000
Debts of Mexican States.....	„ 110,300,000

CONSULATE-GENERAL IN LONDON
4 Gray's Inn Square, W.C.1
[Chancery: 5323]

Consul-General, R. Le Mesurier.

Vice-Consul, A. J. Hucker.

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 2 miles long and half-a-mile

broad (area approx. 360 acres), with (1956) 20,422 inhabitants (Monégasque nationals, 2,696), and a yearly average of over 650,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are many public and private gardens. Monaco has a small harbour (20 ft. alongside quay), and the import duties are the same as in France. There is an Assembly of 18 elected members and a Council of Government composed of the Minister of State and three State Counsellors. There is a local police force of 160 men.

CAPITAL, Monaco.

FLAG: Red and white.

BRITISH CONSULAR OFFICE

Monaco—Consul-General, L. Pott, C.B.E.

MONGOLIA

(Mongolian People's Republic)

Prime Minister, Tse Den-bal (May, 1952).

Area and Population.—Mongolia is an almost entirely unsurveyed tract in Asia, bounded by the Siberian provinces of U.S.S.R. in the north, the Chinese province of Sinkiang and the Great Wall of China in the south, by Manchuria on the east and by the Tarbagatai Mountains and the Turkestan provinces of U.S.S.R. on the west.

The total area is estimated at 1,750,000 to 2,000,000 square miles with a total population (not yet enumerated) of 3,000,000 to 5,000,000, of whom the greater number are traditionally adherents of Lamaism, a form of Buddhism.

North-West Mongolia consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtish and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides, skins, and gold.

The principal town of North-Western Mongolia is Ulan Bator (Ulan-Bator-Khoto, "Town of the Red Knight") which has an estimated population of 80,000 to 100,000; other centres are Uliassutai, and Kobdo, of importance as trading posts on the main caravan routes. Part of North-Western Mongolia has been incorporated in the Soviet Union as the *Tannu Tuva* autonomous Province which lies between the Sayan and Tannu Ola ranges, the capital being Kyzyl.

South-East and South Mongolia include the *Gobi* ("Desert"), or *Sha-mo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwangho river. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi. Of recent years this trade has been organized and financed by Soviet Russia. The principal centres are: Kalgan, Kukukhoto, Kuku-erghi, Dolon-Nor and Birukhoto. In the north-east, Keru-lun (on the river of that name), is a junction of the southern routes from the Chinese province of Perchili and the western routes from Urga, in N.W. Mongolia.

Government.—In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognized as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledged the suzerainty of China over Outer Mongolia, but by the Russo-Chinese Treaty of Aug. 25, 1945, China recognized the complete independence of Outer Mongolia.

MOROCCO

(Kingdom of Morocco)

King, H.I.M. Mohammed ben Youssef (Mohammed V.) *born* August 10, 1910.
Crown Prince, H.I.H. Prince Moulay Hassan.

Ambassador, Prince Moulay Hassan Ben El Mehdi.
Minister Plenipotentiary, Abderrahman B. Abdelali.
Secretaries, Mohammed Mesfiwi; Muhammed Saadani; Abdellatif Zenati-Serghini.
Chancellor, Mohammed Bekkali.

Area and Population.—Morocco is situated in the north-western corner of the African continent between latitude 28°–36° N. and longitude 2°–12° W. with an area estimated at approximately 180,000 sq. miles, and a population (estimated, 1955) of 10,000,000. It is traversed in the north by the Riff mountains and in a general S.W. to N.E. direction by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Ceuta which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the Pillars of Hercules, the western gateway of the Mediterranean.

Climate.—The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 82° F. and 45° F.; for Marrakesh 102° F. and 40° F. respectively.

Administration.—The Treaty of Fez of 1912 provided for the establishment of a French Protectorate over Morocco, and France became responsible for the foreign relations of the Sultan and for the defence and administration of the country. The subsequent Franco-Spanish Treaty of 1912 provided for the establishment of a Spanish "sphere of influence" extending over northern Morocco

with the exception of the Zone of Tangier. Ceuta and Melilla (*see* under Spain) are Spanish "State Territories." Ceuta, situated opposite Gibraltar, has been a Spanish possession since the close of the sixteenth century and Melilla, further east on a rocky promontory of the Riff coast, has been a Spanish possession since 1492. The Penon (Rock) of Alhumas, Penon de Velez and the Zaffarin Islands are Spanish possessions. The pacification of the French Zone of Morocco was completed in 1934.

Tangier, though in Moroccan territory, has always enjoyed a special régime. Before the war of 1914–1918, negotiations between the British, French and Spanish Governments took place but the outbreak of the war prevented the proposed international régime for Tangier from being put into operation. A new Convention providing by the Tangier Statute for the international administration of the Tangier Zone was, however, signed by the three Governments at Paris on December 18, 1923. It was brought into force on June 1, 1925, and modified by a Protocol of July 25, 1928, by which Italy adhered to it. Under the Convention only native affairs were reserved to the Shereefian authority. In March 1941 Spain suppressed the international administration, deposed the Sultan's representative in Tangier and substituted for him the Sultan's Khalifa in the Spanish Zone. In 1956 negotiations between the Moroccan Government and the Statutory Powers culminated in the Tangier Conference which sat in Tangier in October. The international régime was abrogated and a Protocol adopted. This was followed by the grant of a Royal Charter on August 26, 1957, ensuring the continuation of a free monetary system and free trade in Tangier.

On August 20, 1953, Sidi Mohammed ben Youssef, Sultan of Morocco for 25 years, was dethroned, and exiled together with his family. Sidi ben Moulay Arafa was proclaimed Sultan in his stead but although a series of reforms was instituted as a progressive handing over of government to the Moroccans, the Nationalist movement increased rapidly and civil disturbances became serious. The insistent Moroccan desire for the return of their former Sultan led to the withdrawal in September, 1955 of Sultan Moulay Arafa. Mohammed ben Youssef was reinstated as Sultan and he returned to Morocco on November 16, 1955. The formation of a Moroccan Government quickly followed; negotiations with France which opened in February 1956 culminated in a joint Franco-Moroccan declaration of March 2, 1956, which recognized Morocco's independence and sovereignty. Negotiations with the same end in view were then engaged with Spain, resulting in a similar joint declaration of April 7, 1956.

Defence.—In the protectorate era, the protecting powers were responsible for defence. Arrangements were completed during 1951 with France for the use of air bases in the Southern (former French) Zone by the U.S. Air Force. Bases have been constructed at Nouaceur, Sidi Slimane and Benguerir. A Moroccan army with a strength of 20,000 was formed in 1956.

Production and Trade.—Morocco's main sources of wealth are agricultural and mineral. The construction of dams for irrigation and for electric power is an important factor in the country's development. Its industries are in the main extractive and such as rely on local raw materials. Importance is also attached to the tourist trade.

Among agricultural, forest and animal products in sufficient quantity for export are barley, wheat, citrus fruits, early and canned vegetables, leguminous plants, esparto, vegetable fibre, cork, skins and hides, casings, raw wool, fish (preserved and canned). There were an estimated 27,150,000 head of livestock in 1955, sheep predominating.

Morocco's leading mineral exports are phosphates, manganese, iron ore, lead and zinc. Other minerals produced include coal, petroleum, cobalt, graphite, copper, molybdenum, tin, antimony, ochre and gypsum. Production of phosphates reached 5,329,000 tons in 1955 and almost as much was exported. There is an oil refinery at Petitjean; 102,000 tons of crude petroleum were extracted in 1955, sufficient to cover one-seventh of the country's needs.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, householdware, sugar, green tea and other foodstuffs.

The trade of Morocco is chiefly with France and the *franc* area, the U.S.A., Germany, Cuba, China, Great Britain, Spain, Italy, Holland and Belgium.

VALUE OF TRADE

	Southern Zone	*Northern Zone*
	1957	1956
Imports..	*Francs.* 149 milliard	*Pesetas* 1,060,000,000
Exports..	118 milliard	1,036,000,000
	1956	1957

Imports .	*Frs.* 12,410,605,000	..
Exports .	3,719,577,000	..
Imports from U.K.	£799,167	£775,691
Exports to U.K.	71,650	43,403

There are British Chambers of Commerce at Casablanca (101 Boulevard 4ème Zouave) and at Tangier.

Finance and Currency.—The unit of currency is the Moroccan *franc* (linked to the French *franc*), Morocco being a member of the *franc* monetary area.

The 1957 budget for the Southern Zone amounted to 111,000,000,000 *francs* for the Ordinary Budget and 38,000,000,000 *francs* for the Development Budget; the latter has largely to be financed from abroad. The estimated revenue of the Northern Zone for 1957 was 406,750,000 *pesetas*, with an estimated deficit of 400,000,000 *pesetas* to be met by a loan from the Spanish Treasury.

Communications: Railways.—The railway runs south from Tangier to Petitjean. From this junction, one line runs eastwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due South from Oujda skirts the Morocco-Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterrancan-Niger project. Moroccan railroads cover 1,092 miles and traction is electric or by diesel locomotives.

Roads.—In the Southern Zone the road network is extensive (9,000 miles of road suitable for yearround traffic and some 20,000 miles of dry-season tracks). In the Northern Zone an asphalt road links Tangier with Tetuan, branches north to Ceuta, and continues eastward through Villa San Jurjo to Mellila, and on to Oujda through Berkane.

Tangier is distant from London about 1,200 miles or 1 day by air, 4 days by sea. There are air services between Tangier and Gibraltar connecting with B.E.A. services to London. Air-

France and Air-Maroc operate internal services and many between Morocco and towns in France and Spain. There are also regular services to other European countries and to Algeria, French West Africa, French Equatorial Africa and the Belgian Congo.

Languages.—Arabic is the official language. Berber is the vernacular mainly in the Riff, Middle High and Anti-Atlas country and in regions south of the Atlas Mountains. French and Spanish are also spoken, mainly in the towns, the European population in Morocco being about 500,000 with a tendency to decrease. Five French, two Spanish and four Arabic daily newspapers are published.

Education.—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants.

CAPITAL, Rabat (population 156,200). The other chief towns are: Casablanca (682,390); Marrakesh (215,310); Tangier (183,730); Fez (179,370); Meknes (140,380); Tetuan (82,500); Oujda (80,590); Safi (56,750); Port-Lyautey (55,900). The towns of Fez, Marrakesh and Meknes were capitals at various times in Morocco's past history.

FLAG. Red, with green pentagram (the Seal of Solomon).

NEPAL

Sovereign, King Mahendra Bir Bikram Shah; *succeeded*, March 13, 1955.

NEPALESE EMBASSY IN LONDON
12A, Kensington Palace Gardens, W.8
[Bayswater: 1594]

Ambassador, His Excellency Rama Prasad Manandhar, C.B.E. (1955).
1st Secretary, J. N. Singha.
Military Attaché, Col. Rabi Shamsher Jang Bahadur Rana.

Nepal (area about 54,000 sq. miles; pop. (1955), 8,337,537) lies between India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,002 ft.). Amid the mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. The chief trade route is that between Katmandu and the Bihar frontier, to link which an 80-mile road has been constructed by India. Nepal exports rice and other grains, hides, oilseeds, *ghi*, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, &c. The revenue realized chiefly from land rent, forests, customs, &c., is approximately £2,750,000. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. The inhabitants are of mixed stock with Mongolian characteristics prevailing in the north and Indian in the south, and their religions are Buddhism and Hinduism. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in about 1769. During the 1914–18 and the 1939–45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government in men, money and material.

From the middle of the nineteenth century, Nepal was ruled by the Rana family which provided the hereditary prime ministers of the country. After the Second World War, a revolutionary movement in 1950 and 1951 achieved the aim of restoring to the monarchy the powers which it had lost 104 years before and of breaking the hereditary power of the Ranas. Various parties have since tried their hand at government, but no elections to a legislative assembly have yet been held. The last Prime Minister, Dr. K. I. Singh, resigned on November 14, 1957, since when His Majesty King Mahendra has exercised direct rule, as he has done on previous occasions between Ministries. On February 1, 1958, the King issued a Proclamation announcing that a commission would be appointed to draft a constitution with the assistance of foreign experts, that an Advisory Assembly would be nominated and that an Executive Council under the presidency of the King or his nominee would administer the government of the country pending the holding of general elections, now promised, after much delay, for February 1959.

CAPITAL, Katmandu (pop. 106,579).

Consul-General, N. Brat.
Vice-Consul, J. H. Delgorge.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situate on the North Sea, in lat. 50° 46′–53° 34′ N. and long. 3° 22′–7° 14′ E., consisting of 11 provinces plus the North-East Polder (reclaimed part of the Zuider Zee) and containing a total area of 34,830 sq. kms. The population on Jan. 1, 1958, was 11,094,736. The live birth-rate in 1957 was 21·2 per 1,000 of the population, and the death-rate 7·5.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief agricultural products are potatoes, sugar beet, cattle, horses, swine, butter, wheat, rye, barley, oats, beans, peas, flax-seed, cheese, poultry, eggs, vegetables, fruit and flower bulbs and there is an important fishing industry. Among the principal industries are engineering, motors, shipbuilding, iron and steel, incandescent lamps, radio, electrical and telecommunications equipment, cotton, woollen, linen and rayon spinning and weaving, earthenware, glass, leather goods, boots and shoes, chemical and pharmaceutical products, oils, paper and board, cigars, sugar, "genever" liqueurs, beer, clothing, bicycles, tyres and rubber products. Coal production (1957) was 11,375,831 metric tons. Diamond-cutting, though still an important industry, has declined considerably in importance, now employing about 1,100 hands, compared with about 3,500 before the war.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I., a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 75 members, elected for 6 years by the Provincial Diets: and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 23 years and upwards. Members of the Tweede Kamer are paid.

General elections were held on June 13, 1956, for a new Second Chamber of the States-General. Party representation (after the increase in the Chamber's membership of Nov. 6, 1956) now stands at Labour Party 50; Catholic People's Party 49; Anti-Revolutionary Party (*Protestant*) 15; Party of Freedom and Democracy (*Liberal*) 13; Christian Historical Union (*Protestant*) 13; Communist 7; Political Reformed Party (*Protestant*) 3. The present Cabinet was formed on Oct. 12, 1956 after an interregnum of four months.

The Upper House of the States General was elected by the Provincial Councils after the General Elections. Representation (after the increase in the Chamber's membership of Nov. 6, 1956) is: Catholic People's Party, 25; Labour Party, 22; Anti-Revolutionary Party, 8; Christian Historical Union, 8; Party of Freedom and Democracy, 7; Communist, 4; Political Reformed Party, 1.

Defence.—The post-war army is being formed as a component of the North Atlantic Treaty Organization. The Royal Netherlands Navy is being built up to a modern force of one aircraft carrier, 2 heavy cruisers, 12 modern destroyers and 6 submarines, supported by an escort force of 24 frigates and a considerable number of ancillary vessels. The Air Force, which since 1953 has been independent of the Army with the title "Royal Netherlands Air Force," has been reconstituted since the war, and now forms an integral part of the air defences of the N.A.T.O. countries. After a period of reorganization and expansion it has now attained a considerable strength consisting mainly of jet-fighters which are divided between an air defence and a tactical air command. Part of the latter is integrated into a N.A.T.O. tactical air force.

Language and Literature.—Dutch, a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used by many people in the Netherlands West Indies. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are eleven national papers, four of which are morning papers, and there are several regional daily papers.

Education.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools for working classes are numerous, well equipped and well attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (*R.C.*), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (economics), Wageningen (agriculture), Tilburg (*R.C.*) (commercial) and Eindhoven (polytechnic) (opened in Sept. 1957).

Communications.—The total extent of navigable rivers is 4,232 miles (large rivers comprising 696 miles) and of main roads 1,881 miles. On May 31, 1958, the total length of the railway system amounted to 1,932 miles, of which 975 miles were electrified. The mercantile marine on Jan. 1,

1958, consisted of 1,591 ships of total 4,297,956 gross registered tons, including vessels registered in the Netherlands Antilles and Surinam, but excluding tugs and contractors' equipment.

TRADE

In 1957 Dutch imports amounted to *fls.* 15,596,991,000 and exports to *fls.* 11,770,016,000, so that imports were covered by exports to the extent of 76 per cent. The Netherlands have removed quantitative restrictions on the great majority of imports in accordance with the agreement between O.E.E.C. countries. A Common Benelux liberalization list came into force in June, 1955. The extent of liberalization on October 1, 1957 was 95·6 per cent. Imports from U.S.A. had been liberalized to the extent of 86 per cent by October 1, 1957. Quota lists for United Kingdom-Netherlands trade each way in non-liberalized items are established each year by negotiation. During 1957 further progress was made towards the establishment of a common trade policy in the three countries (the Netherlands, Belgium and Luxembourg), which already form part of the Benelux customs union.

The rate of overall industrial production rose from 123 in 1956 to 126 in 1957, and that of production per worker from 113 to 115 (1953 = 100).

OVERSEAS TERRITORIES

I. *Netherlands New Guinea:*—

The territory of Netherlands New Guinea (estimated population 1956, 730,000), comprises the western half of the island of New Guinea. Mount Wilhelmina is the highest point in Oceania.

It was decided at the Round Table Conference between Holland and Indonesia that the future status of New Guinea would be decided by negotiation between the two parties within a year of the transfer of sovereignty to Indonesia on December 27, 1949. A joint Dutch-Indonesian Commission was formed to investigate the facts of the case, and reported back to the two Governments in 1950. As a result of the failure of the two sides of the Commission to agree, the position of New Guinea remains unchanged under Dutch sovereignty. *Governor of Netherlands New Guinea*, Dr. J. van Baal.

II. *Netherlands West Indies:*—

"Nederlandsch West-Indie" comprise *Surinam* (Dutch Guiana) in South America, and certain islands in the West Indies known as the Netherlands Antilles (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Surinam is about 54,000 sq. miles, with a population in 1952 of about 237,930; area of Netherlands Antilles, 394·1 sq. miles, with a population of 186,597 at January 1, 1957. Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs, as parts of the Netherlands Realm under the Crown. Agreement on their new status was reached after prolonged negotiations between the Netherlands Government and representatives of the territories concerned. Bauxite is an important export of Surinam. The United Kingdom has a considerable trade with the Netherlands Antilles, U.K. Imports in 1957 being £30,773,526; Exports to Netherlands Antilles, £15,498,342. The administrative capital of Surinam is Paramaribo (population, 1952, 86,400); the capital of Curaçao is Ψ Willemstad (pop. 45,000); of Aruba, Ψ Oranjestad; of Bonaire, Ψ Kralendijk; of St. Martin, Philipsburg; of Statius (St. Eustatius), Oranjestad; and of Saba, Bottom. *Governor of Netherlands Antilles*, Dr. A. B. Speckenbrink. *Governor of Surinam*, J. van Tilburg.

NICARAGUA

(República de Nicaragua)

President, Col. Luis Somoza, *re-elected* Feb. 2, 1957. *Foreign Affairs*, Dr. Alejandro Montiel Argüello.

NICARAGUAN EMBASSY IN LONDON

Ambassador and Consul-General, (vacant).

CONSULATE-GENERAL, 18 Mount Street, W.1 [Grosvenor 6844].

Area and Population.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45′–15° N. lat. and 83° 40′–87° 38′ W. long., containing an area of 57,145 English square miles and a population (1954 estimate) of 1,224,450, of whom about three-quarters are mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent, and the remaining 10 per cent. are Indians, negroes or mulattoes. The latter group includes the Mosquitos, who live on the Atlantic Coast and were formerly under British protection.

Government.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution took effect on May 1, 1951. The President is elected by direct suffrage for six years. Congress comprises a Senate of 15 members (together with ex-Presidents of the Republic) and a Chamber of Deputies of 55 members.

Agriculture and Industry.—The country is mainly agricultural. The major crops are coffee, cotton, sesame, sugar, rice and maize. Bananas, beans, cocoa and ipecacuanha are also important. Livestock and timber production, already considerable, are capable of unlimited expansion. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications.—There are 270 miles of railway, all on the Pacific side, 3,159 miles of telegraph and 3,216 miles of telephone, and there are several powerful wireless stations at Managua. An automatic telephone system has been installed in the capital. Transportation, except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway, running laterally to Rama, whence there is a natural waterway to Bluefields on the Atlantic, is progressing and admits of a through passage in dry weather.

Until the advent of aircraft, the Atlantic littoral was practically isolated from the rest of the Republic and the chief centres of population, but LANICA Airways now have a daily service between Managua and the Atlantic littoral.

Language and Literature.—The official language of the country is Spanish. In 1956 there were 5 daily newspapers published at Managua, and 4 in the provinces. Education is backward, at least 60 per cent. of the population being illiterate. There is a university at León.

FINANCE

	1953–54 *Cordobas*	1954–55† *Cordobas*
Revenue.....	178,486,000	209,836,000
Expenditure.....	170,078,000	232,652,000

	1956	1957
Imports from U.K.	£794,609	£941,643
Exports to U.K.	902,980	1,992,420

* Provisional

Considerable quantities of foodstuffs are imported as well as cotton goods, jute, iron and steel, machinery and petroleum products. Some 65 per cent. of imports are from U.S.A.; the chief exports are coffee, gold, cotton, sesame and lumber.

CAPITAL, Managua, population (1954) 141,465; León, 38,183; Granada, 25,142; Masaya, 22,825; Chinandega, 16,171; Matagalpa, 11,755; ΨBluefields, 9,205; ΨCorinto, 5,635. Corinto, on the Pacific, is the chief port, handling about 70 per cent. of the total trade; Bluefields and Puerto Cabezas on the E. coast are mainly concerned in the banana and timber trade to New Orleans, U.S.A.

FLAG: Three horizontal bands, blue, white, blue (the arms of the Republic on the white band, displaying five volcanoes surmounted by a cap of liberty under a rainbow).

BRITISH EMBASSY AND CONSULATE, MANAGUA.

Consulate-General, 42 Lancaster Gate, W.2.
Consul-General, Jörgen Galbe.
Consul, A. A. Bouston.
Vice-Consul, Anton Smith-Meyer.

Area and Population.—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,555 km. (Sweden 1,643 km., Finland 716 km. and U.S.S.R. 196 km.). It is divided into 20 counties (*fylker*) and comprises an area of 323,917 sq. km. with a population (1957) of 3,511,000. In 1956 there were 64,171 births (18·5 per 1,000 inhabitants), 29,981 deaths (8·7 per 1,000) and 25,163 marriages (7·3 per 1,000); the infant mortality rate in 1956 was 21·2 per 1,000 live births.

The Norwegian coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia. A similar phenomenon occurs in the Antarctic and is known as *Aurora Australis*.

Production.—The cultivated area is about one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are agriculture and forestry, mining, manufactures, fisheries, whaling and shipping. The most recent figures showed that 34 per cent. of the population lived on industry, 22 per cent. on agriculture and forestry, 9 per cent. on trading, 9 per cent. on transport and communications and 6 per cent. on fishery and whaling. Manufactures are aided by great resources of water power, estimated at 12,500,000 kw. at 75 per cent. efficiency, of which over 2,700,000 kw. are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country. In 1957 the total catch amounted to 1,557,000 metric tons. Whale oil production, chiefly from pelagic whaling in the Antarctic, was, in 1956, 1,859,000 barrels.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8–9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the late King Haakon was able to return from Great Britain to Oslo.

Defence.—Norway is a member of the North Atlantic Treaty Organisation, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. Extensive reorganization of the Norwegian armed forces is in progress. Compulsory national service lasts 18 months in the navy and air force and 16 months in the Army.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo (opened in 1811) was attended by 3,202 students and the University of Bergen (opened in 1948) by 548 students in 1957. The Norwegian Technical High School in Trondheim possesses University status and awards degrees in engineering and architecture. In 1957 it was attended by 1,242 students.

Language and Literature.—Norwegian is a branch of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludwig Holberg (1684–1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Wergeland (1805–1845). Some of the famous names are Henrik Ibsen (1828–1906) the dramatist, Björnstjerne Björnson (1832–1910) journalist, dramatist and novelist and Nobel Prize-winner in 1903, Jonas Lie (1833–1908) novelist, Knut Hamsun (1859–1952) novelist and Nobel Prizewinner in 1920, and Sigrid Undset (1882–1949), champion of Norwegian womanhood and herself a Nobel Prizewinner in 1928. In 1956 there were 84 daily newspapers in the country with a total circulation of 1,300,000, and 96 newspapers publishing on two or three days a week with a total circulation of 345,000.

Communications.—The total length of railways open in 1957 was 4,507 km., of which 80 were private lines. The length of telegraph and telephone lines in 1957 was 81,261 km. (State, 75,382) with 3,131,434 km. of wire (State, 2,939,131). At the end of 1957 a total of 362,630 road motor vehicles were registered, of which 153,023 were passenger cars (including taxis) and 105,115 were motor cycles.

Civil Aviation.—On scheduled airlines operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartselskap (DNL) by Braathens South American and Far East Airtransport (SAFE), and by Vestlandske Lufttfartselskap A.S. and Wideröes Flyveselskap and Polarfly A.S. in 1957:—kilometres flown, 18,584,000; passengers carried, 477,800.

Mercantile Marine.—The Mercantile Marine, Jan. 1, 1958, consisted of 2,074 vessels of 8,563,000 gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks third among the merchant navies of the world.

FINANCE

	1958–59
Revenue (*Budget*)	*Kr.*5,711,400,000
Expenditure (*do.*)	5,773,400,000

SVALBARD

(*Spitzbergen and Bear Island*)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitzbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantlement of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. In 1956 the production of coal, the chief mineral of the archipelago, was 390,000 tons.

The Svalbard Archipelago lies between 74°–81° N. lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Forcland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similiar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harbour 2½ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49′—71° 9′ N. lat. and 7° 53′ 9° 5′ W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctic

BOUVET ISLAND (54° 26′ S. lat. and 3° 24′ E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 50′ S. lat. and 90° 35′ W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNHILD LAND (from 70° 30′ to 68° 40′ S. lat. and 24° 15′ to 33° 30′ E. long.) has been claimed as Norwegian since Feb. 17, 1931.

On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

[Royal: 6956]

Ambassador in London, His Excellency Carlos F. Alfaro.
Counsellor and Consul-General (London), Dr. Carlos M. Jurado.
Attaché, Miguel A. Martin.
Consul-General (Liverpool), Señor Don José Antonio Grimaldo.

There are Consular Offices of the Republic at *Newcastle, Glasgow, Birmingham* and *Belfast*.

Panama on the isthmus of that name which connects N. and S. America, was formerly one of the nine Departments of Colombia. After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature elected every four years and now consisting of 53 elected members. The

area of the Republic is 31,890 sq. m., the population (1950) was 805,285, including 48,654 tribal Indians. In 1957 it was estimated at 959,800. The birth rate in 1957 was 40·4 and the death rate 9·4 per thousand. The soil is extremely fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee and cereals. The shrimping industry plays an important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years. In 1957 there were 1,074 official primary schools and 85 private primary schools; 20 official secondary and 91 private secondary schools. Primary students numbered 142,676 in 1957; secondary students, 30,710. 3,500 students were enrolled at Panama University in 1958.

Language and Literature.—The official language is Spanish. There are 6 daily newspapers published in the capital, 2 of which print editions in English. There are also 2 English weekly newspapers.

FINANCE		1957
Budget Revenue	*Balboas*	50,863,122

THE PAPAL STATE
(Stato della Città del Vaticano)

Sovereign Pontiff (1951), His Holiness Pope Pius XII. (Eugenio Pacelli), *born* in Rome, March 2, 1876, *elected* Pope (in succession to Pius XI.) March 2, 1939.

The office of the ecclesiastical head of the Roman Catholic Church (*Santa Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX. (1846–1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of Unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 *lire* in cash and the income at 5 per cent. on 1,000,000,000 *lire* State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City at the census in March, 1947, was 940.

Minister without Portfolio, Arg. Tomás Romero Pereira.
President of Central Bank, Ing. Gustavo Storm.

PARAGUAYAN EMBASSY IN LONDON
51B Cornwall Gardens, S.W.7
[Western 1253]

Ambassador in London, Rear Admiral Don J. Wenceslao Benítes.
Consul-General, Dr. Victor Manuel Jara.

Area and Population.—Paraguay is an inland subtropical State of South America, situate between Argentina, Bolivia and Brazil. The area is computed at 157,000 square miles, with a population (1950 Census) of 1,408,000.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draught. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asunción; but is liable to shrink

unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or "endless," is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is practically a dead level, though a slight and uniform rise westward is now known to exist; it suffers much from floods and still more from drought.

Government.—Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain.

The Senate was abolished under the constitution adopted in 1940 and replaced by a Council of State nominated by the government. The Chamber of Representatives comprises 40 members. In 1954 women were accorded civil rights.

Production.—About three-quarters of the population are engaged in agricultural and pastoral pursuits, cattle breeding being the principal industry. In addition to canned meat, timber, quebracho extract, cotton, hides, *yerba maté*, tobacco, and *petit grain* essence (which are the principal exports), mandioca, sugar, maize, rice, citrus fruits and edible oils are also produced for home consumption. Grape fruit is now exported. The production of rice, wheat and ground nuts is being encouraged by the government. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). A direct shipping service between Hamburg, Antwerp, Rotterdam and Asunción was inaugurated in Jan. 1954; it operates fortnightly, and once per month a call is also made at London. A shipping service from New York was started early in 1955. Five airlines operate services from Asunción. *Aerolineas Argentinas* operates a service with Sunderland flying-boats six times weekly between Asunción and Buenos Aires, stopping at Corrientes. Twice a week this service also calls at the river ports of Rosario and Formosa, and once a week at Posadas. *Braniff* (American) has a bi-weekly service through Asunción between Buenos Aires and the United States (calling also at Lima and La Paz). *Panair do Brasil*, a Brazilian company affiliated to Pan American Airways, operates a weekly service between Rio de Janeiro and Santiago through Asunción, and a weekly service between Rio de Janeiro and Buenos Aires, stopping at São Paulo and Asunción. *Pluna* (Uruguayan) carries on a thrice-weekly service between Montevideo and Asunción, while *Real*, another Brazilian airline, operates a service four times a week between Montevideo, Buenos Aires and Asunción, and a daily service between Rio de Janeiro and Asunción, calling at São Paulo and Foz do Ignazú. There are about 100 miles of asphalted roads in Paraguay, and about 200 miles of earth roads in fairly good condition.

Defence.—There is a permanent military force of about 8,000 all ranks. Two gunboats and a number of torpedo boats patrol inland waters.

Language and Literature.—The language of the country is Guaraní (the idiom of the most advanced tribe of Indian inhabitants with whom the Spanish explorers formed an alliance) but Spanish is spoken in the larger towns. Three daily newspapers are published in Asunción.

Education.—Primary education is free and compulsory. There are a few secondary and special schools and a national university with close on 1,000 students.

FINANCE		1957
Estimated Revenue.....	*Guaranies*	2,308,420,562
Estimated Expenditure....	„	1,827,050,001
External Debt (Dec. 1956).	„	692,698
Internal Debt (Dec. 1956)..	„	327,196

Paraguay continues to pay interest on the External Sterling Debt (3% Loans of 1886–96, and 1915).

Currency.—A free exchange system was introduced in August, 1957. The rate of exchange has been fairly constant at *Gs.* 306 = £1 since December, 1957.

Trade.—The imports are chiefly articles of food and drink, textiles, vehicles, and machinery. The chief articles of export are timber, tannin, cotton, hides and meat products. Trade with the United Kingdom in 1957 was valued at: Imports, £1,139,082; Exports to U.K. £2,414,746.

CAPITAL, Ψ Asunción, about 1,000 miles up the River Paraguay from Buenos Aires, Pop. (1950) 206,634; other centres being Ψ Encarnación 33,664, Concepción 28,357 and Villarica 26,000.

FLAG: Three horizontal bands, red, white, blue (with the Arms of the Republic on white band).

BRITISH EMBASSY

(25 de Mayo 39, Asunción)

British Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency John William Wall, C.M.G. (1957).
2nd Secretary and Vice-Consul, H. Gilmartin.
Naval, Military and Air Attaché, Capt. D. Vincent-Jones, D.S.C., R.N.
Labour Attaché, W. M. Wylie.
2nd Secretary (Commercial), J. W. Pethybridge.

Asunción is approximately 4,000 miles distant from London by air. Transit by sea 25 days. By air 3 days.

*PERSIA

(Keshvar-e-Shahanshahi-ye-Iran)

Shahanshah of Persia, H.I.M. Mohammed Reza Pahlevi, *born* Oct. 26, 1919; *acceded* Sept. 16, 1941 (on abdication of his father Reza Shah Pahlevi); *married* (March 15, 1939), Princess Fawzieh, sister of ex-King Farouk of Egypt (marriage dissolved Nov. 17, 1948), and has issue a daughter *born* 1940. The Shah *married* (Feb. 12, 1951) Suraya Esfandiari Bakhtiari (marriage dissolved, April 6, 1958).

CABINET

Prime Minister, Dr. Manuchehr Eqbal.
Foreign Affairs, Dr. Ali Quli Ardalan.
Health, Dr. Abdul Husain Raji.
Roads and Communications, General Vali Ansari.

* On Oct. 26, 1949, it was announced that foreigners might henceforth use the name Persia.

Education, Dr. Mahmoud Mehran.
Justice, Muhammad Mailesi.
Agriculture, Gen. Hassan Akhari.
Labour, Agha Khan Bakhtiar.

Asst. Military Attaché, Col. Eskandar Azmoodeh.
Cultural Counsellor, Mas'uud Farzaad.
Assistant Cultural Counsellor, Parviz Marzeban.

Area and Population.—Persia comprises an area of 628,000 sq. miles, with a population estimated at 18,900,000 in the 1956 census. It is mostly an arid table-land, encircled, except on the east, by mountains, the highest in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert.

The Persians are mostly Shi'ah Moslems but amongst them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian Christians. There is also a substantial Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

Government.—Persia was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914–18, the subsequent troubles and the signature of the Soviet-Persian Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlevi.

Owing to Nazi German penetration before and during the early part of the war of 1939–45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. in 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 16, 1941, Shah Reza abdicated and left the country, nominating the Crown Prince as his successor. The Prince ascended the throne under the title of Mohammad Reza Shah Pahlevi.

Under the Anglo-Soviet-Persian Treaty of Alliance of January 29, 1942, the independence and territorial integrity of the country were guaranteed by the United Kingdom and the U.S.S.R. Evacuation by the forces of both powers was to take effect within six months of the signature of the armistice with Germany and her associates. On September 9, 1942, Persia declared war on the Axis powers and on February 28, 1945, on Japan. During the remainder of the war with Germany, Persia became one of the principal routes of aid to the Soviet Union. United States Forces, which had joined British and Soviet troops in Persia to participate in the delivery of aid to Russia, were withdrawn from the country at the end of 1945. British troops evacuated Persia, in accordance with the Anglo-Soviet-Persian agreement, by March 2, 1946, six months after the conclusion of hostilities with Japan. Soviet troops, nevertheless, remained: and when Communist disturbances took place in the north-west part of Persia known as Azerbaijan, they refused to allow Persian forces to enter the area, with the result that an autonomous government was established at Tabriz. Soviet forces, however, eventually left the country in the month of May. This belated evacuation took place in accordance with an agreement which included provision for the formation of a Perso-Soviet Oil Company to operate in the north of Persia, subsequently rejected by the Majlis, and an understanding that the question of Azerbaijan should be peaceably settled. In December, 1946, Persian Government forces entered the province, virtually unopposed by the partisans of the autonomous Government, which itself collapsed upon the flight of the revolutionary leaders into the Soviet Union.

In March, 1949, the Shah issued an Imperial Firman convoking a Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On March 17, 1951, the Majlis adopted a Bill for the nationalization of the Persian oil industry, and on March 20, the Bill was approved by the Senate. On April 28, the Majlis agreed to a resolution, which was passed on April 30 by the Senate, recommending the immediate taking over of all installations, including those of "the late Anglo-Iranian Oil Company." On April 29 the Shah appointed Dr. Mussadiq Prime Minister. The oil company sought arbitration, but this was rejected by the Persian government, and on May 26 the British government applied to the International Court of Justice at The Hague for a declaration that this refusal to submit to arbitration was illegal. The application was not approved.

In August, 1953 after the Shah had appointed Gen. Zahedi as Prime Minister, fighting broke out between his followers and those of Dr. Mussadiq. The Shah temporarily left the country, but Gen. Zahedi's forces were successful, and Dr. Mussadiq was arrested together with a number of the members of his former Cabinet. In December, 1953, diplomatic relations with Great Britain, which Persia had broken off in October, 1952, were re-established, and in August, 1954, the oil dispute was settled by an agreement, ratified on October 29, which provided for compensation to the A.I.O.C. and for the production, refining and sale of Persian oil by a Consortium in which the A.I.O.C. have a 40 per cent. share (*Production and Industry*, below).

For the purposes of local government the country is divided into 10 Provinces (*Ustans*) comprising 76 Sub-Provinces (*Shahristans*), under Governors-General and Governors, respectively.

Defence.—The present strength of the Persian Army, mainly conscript, is approximately 130,000, including 10,000 officers and 40,000 N.C.O.'s. The N.C.O. cadre is up to establishment but officers are still under strength. The army, to which is attached a U.S. Advisory Mission, is well-equipped by 1939 standards. The present strength of the Air Force is approximately 5,000. It is equipped with about 200 American aircraft, of which 60 are jet ground attack types.

The gendarmerie, to which is also attached a United States Mission, has been reorganized. The Persian Navy consists of a small fleet of gunboats and motorboats in the Persian Gulf and a few motor-boats in the Caspian Sea.

Education.—Since 1943 primary education has been compulsory and free. There are over 7,000 schools, just over 1,000,000 pupils, and also a few foreign schools in Tehran; there are Universities in Tehran and Tabriz, and University Colleges at Isfahan, Meshed and Shiraz.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansúr, or Firdausi (A.D. 939–1020), Omar Khayyám, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa-di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389). The Persian Press consists of a large number of Tehran and provincial newspapers and periodicals. Two Tehran dailies and three weeklies have circulations exceeding 20,000 copies. Circulations in the provinces are very small. English and French dailies are published in Tehran.

FINANCE	1958–59
Estimated Revenue.....	*Rials* 57,700,000,000
Estimated Expenditure....	58,980,000,000

The commercial rate of exchange was stabilised in 1955 as follows: Bank Melli buying rate: *Rials* 210=£1. Selling rate *Rials* 214·2=£1. The official rate of Exchange is *Rials* 75·75=£1.

Production and Industry.—While petroleum is the principal product and by far the greatest export, Persia, except for its desert areas, is essentially an agricultural country and 80 per cent. of the inhabitants depend for their living on the land. Sheep and goats are numerous and good wool is produced. There are extensive forests in the north and west, the conservation of which is an urgent problem. The cultivation of opium is prohibited. A certain amount of progress has been made in the development of industry. Apart from petroleum, the principal industries are carpet weaving, cotton ginning, spinning and weaving (Isfahan, Tehran and Shahi areas), wool spinning and weaving, jute sacks, silk goods (Chalus), sugar, tea, fruit, caviar (Caspian Fisheries Company), meat canning, distilling and brewing, tobacco and cigarettes. The oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. 31, 1946, and subsequent figures (in metric tons) were 1946, 19,858,471; 1947, 21,737,949; 1948, 24,871,000; 1949, 26,807,000; 1950, 35,000,000; 1951 (to Oct.) 17,000,000. Oil shipments were resumed on Oct. 30, 1954, and recent production figures have been (long tons): 1955, 15,772,000; 1956, 25,934,000; 1957, 37,800,000.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Persia were taken over for an initial period of 25 years by a consortium of 8 oil companies (including A.I.O.C., one French, one Dutch and five U.S.). A.I.O.C. receiving from Persia £25,000,000 cash in the 10 years from Jan. 1, 1957, in compensation for its oil assets in Northern Persia and in settlement of losses since 1951; and from the other members of the consortium for their shares, about £214,000,000 payable over 20–25 years. The consortium is responsible for the production, refining and sale of Persian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Communications.—The principal roads are from the frontier of Iraq at Khusruvi to Tehran; from Tehran *viâ* Arak to Ahwaz and Khorramshahr; from Tehran *viâ* Qum, Isfahan and Shiraz to Bushire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with branch roads into Turkey and Northern Iraq; from Tehran to Meshed; three roads through the Elburz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, *viâ* Yezd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. Generally speaking, Persian roads are not asphalted but gravel-surfaced. Railways have been constructed since 1927. The *Trans-Iranian Railway*, from Bandar Shah, on the Caspian Sea, to Bandar Shahpur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The branch lines from Tehran to Meshed and to Tabriz have now been completed. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and branch lines from Ahwaz to Khorramshahr and from Khorramshahr to Tanuma in Iraq (on the Shatt el Arab, opposite Basra) were opened during the war. An extension from Qum to Kashan is now in operation.

Civil Aviation.—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class international Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. *Iranian Airways* (non-government owned) formed in May, 1946, runs services to some Middle Eastern countries as well as internal services. *Persian Air Services* (independently owned) formed in late 1954, runs non-scheduled passenger and freight services to adjoining countries and also to Europe. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A., Lufthansa, B.O.A.C., Alitalia and Aryana Airways operate services to Tehran.

TRADE

	1955–56	1956–57
Imports .	*Rials* 21,460,000,000	*Rials* 26,201,000,000
Exports .	„ 8,034,000,000	„ 7,931,000,000

These figures are calculated at the commercial rate of exchange and exclude oil exports.

	1956	1957
Imports from U.K.....	£25,904,534	£35,689,152
Exports to U.K.....	34,066,991	35,672,897

The leading imports into Persia are cotton and woollen fabrics, tea, sugar, motor vehicles, railway material, industrial machinery, chemicals and pharmaceuticals, electrical goods, hardware, chinaware and cement; the principal exports are heavy oils, petrol, carpets, gum, fruits, hides and skins, animal casings, cotton, wood staves and rice.

The principal countries trading with Persia are the U.K., U.S.A., Germany, Japan, India and the U.S.S.R.

CAPITAL: Tehran, population (1956) 1,500,000. Other large towns are Tabriz (290,000), Isfahan (254,000), Meshed (242,000), Shiraz (169,000), Resht (109,000), Kerman (62,000), Hamadan (100,000), Yezd (66,000), Kermanshah (125,000), Abadan (226,000), Ahwaz (120,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Vice-Consuls, Señor Daniel Caballero; Señor Augusto Valdivia.
Consul-General, Glasgow (122 Wellington Street), Señor Don Luis R. Mendez.

There are Consulates at *Cardiff, Hull, Birmingham, Newcastle upon Tyne* and *Belfast*.

Area and Population.—Peru is a maritime Republic of South America, situated between 0° 00′ 48″ and 18° 21′ 00″ S. latitude and between 68° 39′ 27″ and 81° 20′ 13″ W. longitude. The area of the Republic, including 4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilometres of the coastal islands, is about 531,000 square miles. The total population at the beginning of 1958 was estimated at 10,213,000. In 1955 there were 313,437 births, 98,438 deaths and 39,230 marriages.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being *Huascaran* (22,211 feet), *Huandoy* (20,855 feet), *Ausangate* 20,235 feet), *Arequipa* (or Misti) volcano (18,364 feet), *Hualcan* (20,000 feet), *Chachani* (19,037 feet), *Antajasha* (18,020 feet), *Pichupichu* (17,724 feet), and *Mount Meiggs* (17,583 feet).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montana*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and the great bulk of the white population. In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quichua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, both Houses being elected for six years. Voting is compulsory for all Peruvian men and women between the ages of 21 and 60, for married men and women between 18 and 60 and for single men and women between the ages of 18 and 21 who are legally released from parental tutelage.

Production.—Agriculture and mining are the principal industries, employing over 70 per cent. of the inhabitants. The chief crops in order of value are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat barley, grapes and coffee. At the end of 1955 the gainfully employed population numbered 3,360,083, of whom 2,100,018 were absorbed in agricultural and pastoral activities. About 4,297,000 acres were under cultivation at the end of 1955 and steps are being taken to increase this area, which was probably larger in Inca times, by more intensive irrigation. Minerals produced in 1955 were valued at *soles* 4,079,506,542 and included lead, zinc, copper, iron ore, petroleum, silver, gold tungsten, bismuth, antimony and

vanadium. The islands off the Pacific coast provided guano amounting to 286,733 metric tons in 1955.

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, *viâ* Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, one of the largest tributaries of the Amazon and accessible all the year round to vessels of 3,000 tons, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera.

The first railway was opened in 1850 and of the 2,344 miles of railways now operating, Government lines account for 586 miles, the Peruvian Corporation 1,067 miles and private enterprises about 691 miles. There is also steam navigation on the eastern rivers such as the Ucayali (*see* Andean Highway, above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and a number of international services call at Lima.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 30,000 of all ranks; the Navy includes 2 cruisers built at Barrow, 4 destroyers and 4 submarines, 3 frigates equipped with radar, 2 corvettes and 6 submarine-chasers. There are military aerodromes at Talara, Chiclayo and Las Palmas (near Lima), an air transport squadron at Lima and a seaplane base at Iquitos. The air force is equipped with P.47's, Catalinas, D.C. 3's, Beavers, A.T.6's, F.86's, T.33's, Hunters and Canberras.

Education.—Elementary education is compulsory and free for both sexes between the ages of 6 and 14. In 1956 there were 1,127,321 pupils undergoing primary education and 92,098 attending secondary schools. There were 20,880 state primary schools with 24,912 teachers and 108 state secondary schools with 2,901 teachers, providing 5 year courses from 12 to 17. In addition there were 1,683 private schools providing primary and secondary education with 8,277 teachers and 317 schools conducted by religious orders. The State provides rural agricultural schools for Indians, mining schools and polytechnics in the more populated centres. The University of San Marcos at Lima, founded in 1551, had 7,425 students in 1955, and there are smaller universities at Cuzco, Arequipa and Trujillo, a Catholic university at Lima, and a national engineering university.

Language and Literature.—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but more than half the nation is composed of Indians, whose principal languages (Quichua and Aymara) are widely spoken. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879–1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1955 there were 5 main national daily papers, and 45 provincial ones with a small and purely local circulation. A chair of English was established in 1938 at the Universidad Mayor de San Marcos in Lima.

FINANCE	1956
Public revenue	*Soles* 3,010,458,947
Public expenditure	3,553,123,481

PHILIPPINE EMBASSY IN LONDON
9 Palace Green, W.8
[Western: 3646]

Ambassador in London, His Excellency Leon Ma. Guerrero (1954).

Area and Population.—The Philippines are situated between 21° 20′–4° 30′ N. lat. and 116° 55′–126° 36′ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,834 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having a combined area of 7,920 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon	40,422	Mindoro	3,759
Mindanao	36,538	Leyte	2,786
Samar	5,050	Cebu	1,703
Negros	4,906	Bohol	1,492
Palawan	4,550	Masbate	1,262
Panay	4,446		

Other groups in the Republic are the Sulu Islands (Capital, Jolo), Babuyanes and Batanes; the Catanduane; and Culion Islands.

The population of the Philippines at the 1953 census was 21,039,200.

The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Mohammedan Moros in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000, and other much smaller foreign communities, notably Spanish and American.

Government.—The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan who was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by American troops with the help of Filipinos, on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining a desultory rebellion until it was quelled in 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946. The Constitution provides for a President elected for a term of four years, and a bi-cameral Congress, consisting of a Senate composed of 24 senators and a House of Representatives of not more than 120 members. No person may serve as President for more than eight consecutive years. The term of office of Senators is six years and of Representatives four years.

Language and Literature.—The official languages are English, Spanish and the National language (of Malay origin) Tagalog. About one-third of the people read or understand English. The literacy rate is nearly 60 per cent. There is a National library in the capital with branches in other urban centres, and a flourishing English press. Education accounts for about a quarter of local expenditure in the national budget. Secondary and higher education is extensive. There are 20 universities recognized by the Government, including the Dominican University of Santo Tomas (founded in 1611), the first in the Far East and 25 years older than Harvard; the State-supported University of the Philippines at Manila (1908) and two women's universities, also at Manila. At Dumaguete there is Silliman University (Presbyterian).

Roads and Railways.—Communications suffered serious damage during the War of 1941–45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system of approximately 17,000 miles of roads and streets is undergoing rehabilitation and extension. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 625 miles were in operation in 1956. Rolling stock losses were also heavy, but have been largely made up, and the Manila railway, on Luzon island, is being converted to diesel traction.

Shipping.—The ports of entry are Manila, Cebu, Iloilo, Zamboanga, Davao, Jolo, Legaspi, Aparri, Jose Panganiban, San Fernando La Union and Tacloban. There are nearly 2,000 vessels of various types, totalling over 130,000 tons, engaged in coastwise and river traffic.

Civil Aviation.—Air transport plays an important rôle in inter-island travel and in communications overseas. Philippine Air Lines (54 per cent. Government-owned) operate six weekly services to Hong-Kong; foreign airlines serve the Hong-Kong and other international routes.

FINANCE	1958–59

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), fruits, tobacco and lumber.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, embroideries and tobacco.

Towns.—Capital, ΨManila, in the island of Luzon; population (1948), including the adjoining areas of Quezon City and Rizal City, 1,180,611. The next largest cities are ΨCebu (167,503), Davao (111,263), Basilan (110,297), ΨIloilo (110,122), ΨZamboanga (103,317) and Bacolod (101,432).

Cultural Attachée, Mme. Z. Zawidska.
Consulate-General in London, 19 Weymouth Street, W.1.

Area and Population.—At the Census of Dec. 3, 1950, the population was 24,977,000 (estimated Jan. 1, 1956, 27,500,000), in a Census area of 121,000 sq. miles. Some changes in the frontiers of Poland have taken place, as foreshadowed at the Tehran Conference (Nov. 28–Dec. 1, 1943). In compensation for territories occupied by U.S.S.R. east of the *Curzon Line*, about 69,500 sq. miles, Poland received 40,400 sq. miles of Eastern Germany. The southern boundary is not affected, except that part formerly dividing Poland from Ruthenia (Czechoslovakia); the northern boundary is the Baltic Sea, from west of Königsberg (former capital of East Prussia) to west of Stettin in Pomerania; the western boundary is formed by the Rivers Oder and Neisse.

Government.—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznania and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914–18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and England implemented their guarantee. On Sept. 17, 1939, Russian forces invaded Eastern Poland and on Sept. 21, 1939, Poland was declared by Germany and Russia to have ceased to exist and a line of demarcation was established between the German and Russian armies. This line passed along the River Pissa up to its confluence with the River Narew, then along this river, the Bug, the Vistula and the San. Shortly afterwards the demarcation line was moved further east. In 1939 the area of the Polish Republic was 150,572 sq. miles with a population of about 35,000,000 of whom 30 per cent. were National minorities (in-

cluding 3,000,000 Jews). The predominant religion was Roman Catholic. Official reports show a rate of 29·1 per 1,000 live births and 10·4 per 1,000 deaths in 1954. The infant mortality rate was 83 per 1,000.

In Dec., 1948, the Polish Workers' Party and Polish Socialist Party fused in the new United Workers' Party (Communist). This party now closely controls every branch of State activity.

In January, 1952, a draft for a new Polish Constitution was published and thrown open to public discussion. The draft, which is modelled upon the Soviet Constitution of 1936, changes the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It makes no provision for the Presidency of the Republic. Private ownership of land is recognized in the draft and freedom of religion is supported. Church and State are to be separate. The draft was adopted on July 22, 1952. Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszinski. In Oct., 1956, M. Wladyslaw Gomulka, who had been expelled from the Communist Party in 1949, was reinstated and elected First Secretary of the Party. In Jan. 1957 elections to the *Sejm* were held and in Feb. 1957 a reconstructed Government, still led by M. Cyrankiewicz, took office.

Education.—Elementary education is compulsory and free. In 1949 there were over 3,000,000 pupils in elementary schools, and about 200,000 students in secondary, professional and trade colleges and schools. In addition to the Universities of Warsaw, Cracow, Poznan and Lodz there are 27 other seats of higher study.

Language and Literature.—Polish is a western Slavonic tongue (*see* U.S.S.R.), the Latin alphabet being in use, as in Czechoslovakia. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846–1916), Nobel Prize-winner for Literature in 1905, Boleslaw Prus (1847–1912), and Stanislaw Reymont (1868–1925), Nobel Prize-winner in 1924. In 1939 there were 70 daily newspapers published in Poland 21 of them at Warsaw.

Production and Industry.—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 99 per cent. of Polish industry is stated to be "socialized", but nearly 80 per cent. of agricultural land is privately farmed.

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula,

bounded on north and east by Spain, and on south and west by the Atlantic ocean; it contains an area of 34,500 square miles, with an estimated population (including the Azores and Madeira) of 8,654,436 (1953). It lies between 36° 58′-42° 9′ 12″ N. lat. and 6° 11′ 48″-9° 29′ 45″ W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The Azores and Madeira Islands in North Atlantic are politically an integral part of the Republic.

In 1957 there were 189,452 live births, 93,730 deaths and 66,327 marriages in Continental Portugal.

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manoel II. and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government. Under the Constitution of 1933 the President is elected for seven years by direct vote of the electors. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 120 members elected by direct vote of the electors. There is also a "Corporative Chamber" consisting of representatives of local authorities and industrial, commercial, cultural and religious interests, to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decree-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

Production.—The chief agricultural products of Portugal are cork, wheat, maize, rye, rice, oats, barley, potatoes, beans, chickpeas, onions, olives, oranges, lemons, figs, almonds, resinous products, timber and wine (including the rich red "port" shipped from Oporto). Sardine fisheries are important.

There are extensive forests of pine, oak, cork, eucalyptus and chestnut, covering about 20 per cent. of the total area of the country, and lumbering is the second largest industry.

The principal mineral products are wolfram, lead, tin, antimony, pyrites, iron ore, coal, manganese, kaolin and slate. The principal manufactures are textiles, pottery and chemical products (fertilizers, etc.), paper and glassware.

The Second Six-Year Development Plan (1959–64) provides *inter alia* for irrigation, agricultural resettlement and afforestation, for the development of electricity generation, mainly by hydroelectric means, of the steel and chemical industries, for extensive port works including a new shipyard at Lisbon, railway electrification, a bridge over the River Tagus at Lisbon and the expansion of the fishing and merchant fleets.

Defence.—Military service is compulsory for all men who are physically fit, less than 25 per cent. being exempted each year. The peace strength of the army is: officers 2,821 (active list), and about 2,000 (reserve); other ranks—permanent cadre of 34,000 with a yearly class of 31,000. A considerable amount of modern equipment has been received from the U.S.A. The navy consists of 860 officers and 6,375 ratings, manning a total of over 50 destroyers, frigates, sloops, submarines, mine-sweepers, patrol vessels and other small craft. All the larger ships are of pre-war or wartime construction, though some are being modernized. Four new ocean and 8 new coastal minesweepers were received from the U.S.A. during 1954–55, and a further 4 coastal minesweepers and 12 patrol vessels have recently been completed. The establishment of the Air Force is 500 officers and 1,984 men with 332 aircraft of all types.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil. Portuguese language and literature reached the culminating point of their development in the *Lusiadas* (dealing with the voyage of Vasco da Gama) and other works of Camoens (Camões), born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are more than twenty daily newspapers, of which 9 are published in Lisbon.

Education is free and compulsory for three years from the age of 7. In 1952 a series of new measures was decreed to ensure school attendance and to reduce illiteracy, which was 30 per cent. at the time of the 1950 Census. Secondary education is mainly conducted in State lyceums, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1911) and Oporto (1911).

Communications.—On Jan. 1, 1957 there were 2,230 miles of railway open for traffic, of which 475 miles were narrow gauge. Electric traction on the Lisbon–Sintra (25 km.) and Lisbon–Carregado (40 km.) lines began in April 1957 and work on the electrification of the Carregado–Entroncamento line (70 km.) is proceeding. The mercantile marine consisted (Dec. 31, 1956) of 266 vessels over 100 tons, with a total tonnage of 515,162. In 1956, 32,042,493 gross tons of shipping entered ports in Continental Portugal and adjacent islands, including 6,485,609 gross tons under the British flag.

Civil Aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for some international services. There is a civil airline, an inter-island service, services in Portuguese Africa and a separate airline running services within Portuguese India and to Karachi. British European Airways operate two-way London–Lisbon services, three, and in summer four times, a week. Aquila Airways operate Southampton–Lisbon–Madeira twice a week. There are altogether 19 airlines operating a total of about 400 services a month through Lisbon airport.

FINANCE	1958
Revenue (*Budget*).....*Escudos*	8,590,900,000
Expenditure (*do.*).....	8,577,400,000
Internal Debt (Dec. 1956)...	12,228,134,000
External Debt (Dec. 1956)..	2,003,010,000
of which: 1902 Conversion	591,631,000
Marshall Plan	1,411,379,000

The Second Six-Year Development Plan (1959–64) contemplates an expenditure of about 21,000,000,000 *Escudos* in metropolitan Portugal, and about 9,000,000,000 *Escudos* in the Overseas Provinces.

Escudo (of 100 *Centavos*) = 3*d*.

Conto (of 1,000 *escudos*) = £12 10*s*.

Exchange Rate (stable) about 80 *escudos* = £1.

(*See also* p. 84.)

TRADE

	1956	1957
	Escudos	*Escudos*
Imports.....	12,678,327,000	14,388,665,000
Exports.....	8,589,955,000	8,252,621,000
Imports from U.K.	£20,617,135	£22,343,954
Exports to U.K...	16,967,350	16,520,890

The principal exports in 1957 were unmanufactured cork, canned fish, cork manufactures, cotton piece goods, port wine, boxboards, pit props, other red wines, colophony resin. 26·1 per cent. (by value) of exports went to the Portuguese Overseas Provinces, 14·1 per cent. to the United Kingdom and 8·5 per cent. to the United States.

Principal imports in 1957 were iron and steel, raw cotton, motor vehicles, crude oil, oilseeds, sugar, industrial machinery, wheat, coal and copper. 11·7 per cent. (by value) of imports came from the Portuguese Overseas Provinces, 13·3 per cent. from the United Kingdom and 16·7 per cent. from Western Germany.

CAPITAL, ΨLisbon. Population (estimated, 1950), 784,000. ΨOporto 280,000; ΨSetubal 44,000.

FLAG: Green and red, with arms in centre.

Naval, Military and Air Attaché, Comdr. T. A. Beet, R.N.

1st Secretary and Head of Chancery, J. A. McAdam Clark, M.C.

1st Secretary and Consul, L. W. Blackwell.

2nd Secretary (Commercial), A. C. Goodison.

2nd Secretary, A. Brooke Turner.

Attachés, W. Watson; T. H. Froebelius, M.B.E.

Chaplain, Rev. Canon H. Farrie.

BRITISH CONSULAR OFFICES

There are British Consular Offices at *Lisbon*, *Oporto*, *Setubal* and *Vila Real de Santo Antonio* (Portugal), *Ponta Delgada* (*Azores*), *St. Vincent* (*Cape Verde Islands*), *Funchal* (*Madeira*), *Lourenço Marques* and *Beira* (*Portuguese East Africa*), *Luanda* (*Portuguese West Africa*) and *Macão*.

BRITISH COUNCIL

Representative, M. W. Blake, The British Institute, Rua de Luis Fernandes 3, Lisbon.

There is a British Institute at *Coimbra* (Rua Alexandre Hercuano 34) and an Anglo-Portuguese Association at *Oporto* (Rua de Breyner, 79).

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at Madorninha Senhora de Hora, *Oporto*, and 13*a* Rua 5 de Junho, *Funchal*, *Madeira*).

Lisbon, distance 1,110 miles; transit, 50 hours; by air, 4 hours.

MADEIRA AND THE AZORES

Madeira and The Azores are administratively parts of metropolitan Portugal.

The Madeiras are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles, with a population of 269,769. ΨFunchal in Madeira, the largest island (270 square miles), is the capital, with a population of 37,035; Machico (4,734).

The Azores are a group of 9 islands (Flores, Corvo, Terceira, Sao Jorge, Pico, Fayal, Graciosa, Sao Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 328,558. Ψ Ponta Delgada the capital of the group, has a population of 22,448. Other ports are ΨAngra, in Terceira, (10,296) and ΨHorta (8,564).

PORTUGUESE OVERSEAS PROVINCES

CAPE VERDE ISLANDS, off the west coast of Africa, consist of two groups of islands, Windward (Santo Antao, Sao Vicente, Santa Luzia, Sao Nicolao, Bona Vista and Sal, the last-named having a South Atlantic air base, opened in 1949) and Leeward (Maio, Sao Thiago, Fogo and Brava) with a total area of 1,516 square miles and a population (Census of 1950) of 148,331. Revenue (1956) *Escudos* 80,893,000; imports (1957) *Escudos* 378,361,000; exports *Escudos* 346,820,000, shipping entries (1956) 7,102,000 gross tons. Capital, ΨPraia (6,000). Vessels take coal and oil at ΨMendello, Sao Vicente (pop. 20,000).

SÃO THOMÉ and PRINCIPÉ ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1950), 60,159). Revenue (1956) *Escudos* 61,768,000; imports (1955) *Escudos* 125,222,000; exports, *Escudos* 161,703,000; shipping entries (1953) 948,012 gross tons. Capital, ΨSão Thomé (3,187). The fort of St. John Baptist on the Slave Coast is a dependency of the Province of São Thomé.

ANGOLA has an area of 488,000 sq. miles, pop. 4,145,266, with present capital ΨSt. Paul de Luanda (pop. 40,000), and capital designate Nova Lisboa, and includes also Kabinda and Portuguese Zaire (N. of Congo). Angola was restored to Portugal by the Netherlands in 1648. Estimated revenue and expenditure (1956) *Contos* 1,856,929; imports (1957), *Contos* 3,565,578; exports, *Contos* 3,327,927. Shipping entries (1957) 8,991,000 gross tons.

PORTUGUESE GUINEA, area 14,000 sq. miles, pop. (1950) 510,777 (capital ΨBissau, population 6,000). Revenue (1955) *Escudos* 125,826,000; imports (1953) *Escudos* 171,534,000; exports, *Escudos* 187,982,000; shipping entries (1953), 186,783 gross tons.

A transcontinental railway from *Benguella* (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Bulawayo and eastwards to Beira, is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

PORTUGUESE EAST AFRICA, OR MOZAMBIQUE, Lourenço Marques, Inhambane, Quilimane, Tete, Mozambique, Cape Delgado and Nyasa, together with the territory of Manica and Sofala, has a total area of 297,657 square miles, with a population (1950) of 5,732,317. Capital ΨLourenço Marques (48,000). Revenue (1956) *Escudos* 3,237,237,000; imports (1956), *Escudos* 2,736,322,000; exports, *Escudos* 1,515,400,000; shipping entries (1956), 18,463,714 gross tons.

ΨMACAU, in China, on the Canton River, has an area of 5 square miles and a population (1950) of 187,772. Revenue (1956), *Escudos* 122,701,000.

PORTUGUESE INDIA. Portuguese Possessions in India cover about 1,500 sq. miles and consist of the

colony of *Goa* with the islands of Angediva, Sao Jorge and Morcegos on the Arabian (Malabar) sea coast; *Damon* (Damao) with the territories of Dedra and Nagar-avely on the Gujerat coast at the entrance to the Gulf of Cambay, together with the tiny island of *Diu* with coastal tracts of Gogola and Simbor. (Dedra and Nagar-avely came under the *de facto* control of the Indian Government in July, 1954). The total area of these territories is 1,540 sq. miles, with a population in 1950 of 637,591. Estimated revenue and expenditure (1955) *Escudos* 225,400,000; imports (1952) *Escudos* 560,810,000; exports *Escudos* 257,095,000; shipping entries (1955), 1,703,693 gross tons.

PORTUGUESE TIMOR (the eastern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population (1950) of 442,378. Revenue (1956) *Escudos* 70,862,000; imports (1956), *Escudos* 56,698,000; exports *Escudos* 38,687,000; shipping entries (1956), 110,648 gross tons. Capital, ΨDili, pop. 7,000.

ROUMANIA

(Republica Populara Romina)

President of the Præsidium of the Roumanian Peoples' Republic, Ion Ghcorghe Maurer, *elected President of the Præsidium by the Grand National Assembly*, January 11, 1958.

Vice Presidents, Mihail Sadoveanu; Anton Moisescu; Mihail Ralea.

COUNCIL OF MINISTERS

(March 19, 1957)

President of the Council, Chivu Stoica.

Vice Presidents of the Council, Emil Bodnaras; Petre Borilă; Alexandru Moghioros; Stefan Voitec; Alexandru Birladeanu; Gherasin Popa; Atanase Joja.

President of State Planning Committee, Gaston Marin.

ROUMANIAN LEGATION IN LONDON

4 Palace Green, W.8

[Western: 9666]

Envoy Extraordinary and Minister Plenipotentiary, His Excellency Petre Balceeanu (1957).

Area and Population.—Roumania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The area in October, 1945, was estimated at 91,600 sq. miles, with a population (Census, 1956) of 17,489,794.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the *Treaty of Berlin* (July 13, 1878) the Principality was recognized as an independent State, and part of the *Dobrudja* (which had been occupied by the Roumanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914–18 added Bessarabia, the Bukovina, Transylvania, The Banat and Crisana–Mamurash, these additions of territory being confirmed in the Treaty of St. Germain, 1919, and the Treaty of Petit Trianon, 1920.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Roumania ceded to Bulgaria the portion of Southern Dobrudja (about 3,700 sq. miles) taken from Bulgaria in 1919.

During 1947 the historical parties, the National Peasant Party and the National Liberal Party, were liquidated and the trials and condemnations of their leaders took place. On Dec. 30, 1947, King Michael was forced to abdicate and the establishment of the Roumanian Peoples' Republic was proclaimed. On February 23, 1948, the Social Democrats were swallowed up by the Communist Party when the two fused to form the Roumanian Workers' Party, since when the Social Democrat element has been steadily liquidated. On March 28, elections were held for the Grand National Assembly. The People's Democratic Front, composed and dominated by the Roumanian Workers' Party, with its puppets the Ploughmen's Front, the National Popular Party and the Popular Hungarian Union, allocated itself 405 out of 414 seats; the new Constitution was passed and the Præsidium and Council of Ministers appointed. Thereafter the progress of the new People's Democracy towards socialism was hastened by the nationalization law of June 11, which brought under State control all industrial enterprises, mining, banking, transport and insurance. In October the Uniate Church was forcibly suppressed. At the turn of the year the dictatorship of the proletariat was officially established. The landowners were dispossessed, disfranchised and exiled on March 2, 1949. In 1950 the creation of collective farms was intensified. The liquidation of the middle classes continued, and on April 20 most buildings owned by former members of the "bourgeoisie" were nationalized without compensation.

The currency reform of January, 1952, effectively wiped out the savings of the peasants. In May, 1952, several ministers were attacked for opposing the currency reform, following a deviationist policy of economic opportunism, and sabotaging the economic development of Roumania. They were replaced by other ministers, and the changes were made the occasion for a tightening of the Workers' Party organization and the elimination of the remaining Social Democrats from the Government and Workers' Party.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front. Further elections on similar lines were held in March, 1956.

Agriculture.—The soil of Wallachia and Moldavia is among the richest in Europe, producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The total arable land under cultivation in 1956 was about 9,680,400 hectares.

Natural Resources and Industry.—Petroleum is the backbone of Roumanian industry and of the country's general economy. Production in 1936 (the peak pre-war year) amounted to 8,700,000 tons. In the immediate post-war period, production declined to less than half this figure, but it is now claimed that, with the discovery of new oilfields, production has recovered and was expected to reach a new peak of over 11,000,000 tons in 1956. The country is also rich in other minerals, and produces in limited quantities coal, lignite, iron, gold, silver, mica and uranium. At the end of the first Five-Year Plan, 1951–55, the Government claimed to have exceeded their intention of increasing industrial production by 244 per cent. compared with 1950. A new Five-Year Plan was begun at the beginning of 1956 and it is planned to increase annual production by 60 per cent. compared with 1955 by the end of 1960. Production of crude oil is planned to reach over 13,000,000 tons per annum by 1960.

Other 1956 production figures, with 1960 targets in brackets are:

Coal..... 6,472,000 metric tons (11–11·5,000,000)
Steel..... 779,000 metric tons (1,600,000)
Pig Iron..... 583,000 metric tons (1,150,000)
Natural Gas..... 4,374,000 cu. metres (10,000,000)
Electric Energy.. 4,930,000,000 kWH (8,000,000,000)

Language and Literature.—Roumanian is a romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. A spelling reform, which tended to stress the Slav aspects of the language, came into effect in 1954. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the *Editura de Stat*, which comes under the jurisdiction of the Council of Ministers. In 1948 there were 40 daily newspapers, of which 17 were published in Bucharest. The dominating religion is that of the Roumanian Orthodox Church.

Education is free and nominally compulsory with 2,400,000 in attendance, including over 400,000 at secondary schools and 80,000 in higher education. There are four Universities, at Bucharest, Iaşi, Cluj and Timisoara. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are four polytechnics at Bucharest, Timisioara, Craiova and Iaşi, two commercial academies at Bucharest and Brasov, and one agricultural college at Bucharest.

Communications.—In 1939 there were about 7,000 miles of railway open for traffic, of which about 1,000 miles were in Bessarabia and Northern Bukovina, now ceded to the Soviet Union. The mercantile marine, as a result of war losses, seizure and reparations, has been reduced to a few moderate-sized sea-going steamers and a number of coastal and river craft. The principal ports are Constantza (on the Black Sea), Giurgiu, Braila, and Turnu-Severin (on the Danube), and Sulina (on the Danube Estuary). Work on a canal linking the Danube and the Black Sea just north of Constantza was abandoned in 1953 and no more was heard of the project to build a canal linking Bucharest with Danube Estuary.

FINANCE

	1957 *Lei*	1958* *Lei*
Estimated revenue.	45,000,000,000	47,967,000,000
Estimated expenditure.....	43,700,000,000	47,167,000,000

*Provisional

Debt (March 31, 1947):—

Internal.....	79,734,196,285
External.....	45,226,229,184

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Roumanian *Leu* (of 100 *Bani*) was revalued for the third time since the war on Feb. 1, 1954, foreign exchange rates being fixed at £1=16·80 *lei* and 1 U.S. $=6·00 *lei*. On July 1, 1957, the Roumanian State Bank announced the payment of 100 per cent. premium on all "capitalist" currencies for non-commercial transactions. This premium brings the tourist exchange rate to £1=33·60 *lei* and 1 U.S. $=12 *lei*.

TRADE

	1947
Imports.....	U.S. $61,300,000
Exports.....	34,300,000

No complete figures for foreign trade have been published since the start of the Communist régime. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber and cattle. Trade with U.K., and particularly exports to Roumania, increased considerably after the War, but has been relatively small recently. In 1957 the value of U.K. exports was £1,462,634; that of Roumanian exports to U.K. £999,613. By far the greater part of Roumania's foreign trade is now with the Soviet Union and the other countries of Eastern Europe. Roumania is a member of the Soviet-sponsored "Council for Mutual Economic Assistance."

CAPITAL, Bucharest, on the Dimbovitza, population (1956) 1,236,905. Other towns with a population of over 100,000 in 1956 are: Cluj (154,752); Timişoara (142,251); Stalin (123,882); Ploeşti (114,560); Iaşi (112,989); Arad (106,457); and Braila (102,491).

FLAG: Three vertical bands, blue, yellow, red, with the emblem of the Republic (mountains, fir trees, and an oil derrick, with a rising sun in the background, the whole surrounded by ears of wheat, at the top a five-cornered star, and at the bottom a ribbon with the letters "R.P.R.") in the centre band.

BRITISH LEGATION

24 Strada Jules Michelet, Bucharest 3

British Minister. His Excellency Alan Alves Dudley, C.M.G. (1956)..... £3,400

1st Secretary, A. J. Wilton.

Military Attaché, Colonel L. Curtis, M.C.
Air Attaché, Group Captain J. W. Appleton.
2nd Secretary and Vice-Consul, Miss E. D. Price, M.B.E.
2nd Secretary (*Commercial*), E. E. D. Newman.
3rd Secretary, G. L. Bullard.

SALVADOR

(República de El Salvador)

President, Lt.-Colonel José Lemus, *took office* Sept. 1956.

EMBASSY IN LONDON

6 Roland Gardens, S.W.7
[Fremantle: 2455]

Ambassador, Dr. Antonio Melendez (1958).
Secretary and Consul-General, Dr. Rolando Deneke.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an estimated area of 8,058 square miles, with a population estimated (1958) at about 2,400,000. El Salvador is therefore one of the most densely populated countries of the new world. It is divided into 14 Departments.

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vincente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 6, 1952, when the towns of Jucuapa and Chinameca were destroyed.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

Government.—Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. In 1839 the Republic broke away from the federation of Central American States. A new Constitution was adopted in 1950. The President is elected for six years and the Legislature for two.

Production and Industry.—The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as cotton, maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags.

Education.—A high degree of illiteracy still prevails. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 5 daily newspapers published at the capital, and 3 in the provinces.

Communications.—A British railway (the Salvador Railway Co.), nearly 100 miles in length, connects Acajutla with the capital and with the important coffee centre of Santa Ana. The International Railways of Central America have a line from the port of La Union (on the Gulf of Fonseca) to the capital and another one in the opposite direction which taps the richest coffee growing region in the country and proceeds to Zacapa (in Guatemala) thereby affording continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The re-draining and re-paving of most of the capital has been completed, as has also the macadamizing or paving of several hundred miles of rural roads, many of which are now passable all the year round. There is a good motor road between the port of La Libertad and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The highway is now completed through the country. Pan-American Airways and TACA connect El Salvador with the U.S., Mexico and Central American countries and KLM with Europe.

There are post and telegraph offices throughout the country. There are many broadcasting stations and a television station.

Imports	261,751,934
Exports	281,827,074
Imports from U.K., 1957	£1,400,533
Exports to U.K., 1957	1,735,675

Par of Exchange 2·50 *Colones* = $1(U.S.), 7·00 *Colones* = £1. (*See also* p. 84.)

Coffee accounts for 85 per cent. of the exports. The others are sisal (in the form of the bags used for exporting coffee, sugar, etc.), gold, sugar, indigo, sesame, balsam, hides and skins and cotton. The chief imports are cotton textiles, iron and steel goods, motor cars, manures, chemical products and petrol.

CAPITAL, San Salvador. Pop. (1954), 187,000. Other towns are Santa Ana (54,265), San Miguel (27,685), San Vicente (11,278), Santa Tecla (19,170), Ahuachapan (10,771), Sonsonate (18,533), ΨLa Union (8,394), ΨLa Libertad (3,013), ΨAcajutla (2,130), Zacatecoluca (9,597), Cojutepeque (10,531).

FLAG: Three horizontal bands light blue, white, light blue.

BRITISH EMBASSY

13A Avenida Norte (Continuación), Colonia Dueñas, San Salvador

British Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Frederick Charles Everson, C.M.G. (1956).
2nd Secretary and Vice-Consul, W. H. J. Chippendale.

San Salvador is 5,700 miles from London.

SAN MARINO

(Republica di San Marino)

Regents, Two "Capitani Reggenti".

CONSULATE GENERAL IN LONDON

37–39 High Holborn, W.C.1

[Holborn: 9861]

Consul General, G. T. MacEwan.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious stonecutter of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity was respected by Italy, with which country it concluded (June 28, 1897) a treaty *di amicizia e buon vicinato*; a new treaty on similar lines was signed on April 29, 1953. The Republic is governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. A Council of Twelve forms a Supreme Court of Justice. The area is 38 square miles, the population 14,000. There is an army of 180. The city of San Marino, on the slope of Monte Titano, has three castles, a fine church and Government palace, a theatre and a museum. The principal industries are wine, cereals, cheese, olive oil, cattle and ceramics, in addition to the utilization and export of worked stone from Monte Titano and production of white and hydrated lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 16, 1899.

The revenue and expenditure (1957) balanced at 853,000,000 *lire*; there is no debt. The capital, San Marino, has a population of 2,000.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

Area and Population.—A National State in the south-west of Europe, between 36°–43° 45′ N. lat. and 4° 25′ E.–9° 20′ W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 190,700 square miles, with an estimated population (Dec., 1955) of 29,089,142. Provisional returns for 1955 gave 592,106 births, 268,996 deaths and 235,839 marriages. Infantile mortality was estimated at 45·85 per 1,000 births.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Government.—Phoenician traders visited the peninsula more than a thousand years before the Christian era, but they were traders rather than settlers, although Cadiz has preserved its identity and claims to be "the oldest city in the world." The Roman occupation of Spain was completed after the close of the Second Punic War (201 B.C.) and *Hispania* was divided into two provinces. After the decline of the Roman Empire the Italian elements, which had partly displaced the Celts and Iberians, were in turn disturbed by settlers of Germanic origin. After the union of Aragon and Castile in the 15th century Spain was ruled by sovereigns of the Aragon, Habsburg and Bourbon lines (with the intervention of a Republic 1873–74), Alfonso XIII. succeeding at birth in 1886.

On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country, and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. Each Province had an Assembly (*Diputacion Provincial*), and, with the approval of the *Cortes*, Provinces might combine to form an Autonomous Region within the Republic.

On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands, from which office he was dismissed by the Azaña Government. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the *Nationalists* (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo* (*Leader*) *of the Empire and Chief of the State*. In the Civil War of 1936–39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the reinstitution of the *Cortes de España*, which was composed (May, 1955) of 515 members: *ex officio members*—16 ministers, 101 National Councillors of Falange, the President of the Council of State, the President of the Supreme Court of Justice, the President of the Supreme Court of Military Justice, 12 rectors of universities, 3 presidents of Royal Academies, and 52 mayors of the provincial capitals including Ceuta and Melilla. *Elected Members*—159 representatives of national syndicates, 101 representatives of municipalities, 4 representatives of Royal Academies, and 15 representatives of professions. *Nominated Members*—50 persons of high ecclesiastical, military, administrative or social rank.

On April 1, 1947, a draft law was submitted to the Cortes by which Spain was again to become a monarchy, but for the present without a King. A Council of the Realm was, however, to assist General Franco, and to select a successor after his death or incapacity. On July 6, 1947, a referendum asking approval of this law was announced (July 27) to have received 14,145,163 affirmative votes out of a recorded total of 15,219,563. Under this law a Regency Council was to be set up in the event of the death or incapacitation of the Head of the State.

Defence.—Army—Spain is divided into 9 Military Regions. Seven of these regions have a Corps headquarters with 2 infantry Divisions (with the exception of the 8th region, which has one Division). The 9th region has no Corps headquarters, and only one Division. There are independent commands in the Balearics and Canaries. There are also one armoured and one motorized cavalry Division. The Spanish Army in Morocco is being reorganized as a consequence of Moroccan independence.

The *Navy* consists of 5 cruisers, 14 destroyers, 7 frigates, 2 corvettes, 6 mine-layers, 1 gunboat, 17 minesweepers and 6 submarines, with many auxiliary craft.

The *Air Force* is divided into 5 Air Regions and 3 Oversea Commands. There are 3 Fighter Wings, 2 Light Bomber Wings, 2 Reconnaissance Wings, 2 Transport Wings, and 2 Air Sea Rescue Squadrons. An Air Defence Command was set up in April, 1956.

Education.—Primary education is free, but compulsory attendance cannot be enforced because of the inadequate number of schools. Official figures of illiteracy in 1950 give a total number of illiterates, excluding children under 10, of 3,983,890, or 14·24 per cent. of the population (men, 9·86 per cent., women, 18·30 per cent.). There are 11 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragossa (1474), Santiago (1501), Seville (1502), Granada (1526), Madrid, Murcia (1915).

Language and Literature.—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is a dialect in Provençal Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547–1616), Lope Felix de Vega Carpio (1562–1635) and Pedro Calderón de la Barca (1600–1681). The Nobel Prize for Literature has three times been awarded to Spanish authors—J. Echegaray (1904), J. Benavente (1922) and Juan Ramón Jimenez (1956).

FINANCE	1957
Revenue.....	*Pesetas* 44,143,000,000
Expenditure.....	43,046,000,000

Public Debt (December, 1956) excluding parastatal entities and State-guaranteed issues: *Pesetas* 93,125,766,000.

The current rate of exchange for the *peseta* was (at June 30, 1958) 117·60 *pesetas* = £1 sterling (*see also* p. 84).

Production and Industry.—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, apricots and grapes. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The 1955–56 orange crop was over 1,500,000 tons, of which the greater part was exported, chiefly to Germany and the United Kingdom, but in 1956–57 unseasonable frosts reduced output to only 500,000 tons. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. Exports of agricultural produce represent about 60 per cent. of Spain's foreign currency earnings, but this was reduced to 55 per cent. in 1957.

The livestock census in 1953 showed 3,310,100 cattle, 607,500 horses, 746,700 asses, 1,780,800 mules, 16,000,000 sheep, 4,221,700 goats and 2,960,900 swine.

Spain's mineral resources of coal, iron, tungsten, copper, lead and other ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1957 the coal mines produced 16,430,000 tons of coal. The production of Spanish and Rif iron ore amounted to 5,760,000 tons and pyrites to 2,320,000 tons in 1956. The iron and steel industries produced 963,200 tons of pig iron and 80,600 tons of special steel in 1957. Other production figures (in tons) included: raw steel, 1,347,000, lead, 62,500, zinc, 20,725, aluminium 14,925 and copper 8,700. Production of electric power was 14,600,000 kwh.

The fishing industry, mainly sardines, tunny and cod, is of importance.

The principal manufactures are textile goods of all kinds, boots and shoes and other leather goods, ceramics, sewing machines, bicycles, chemicals and light engineering products.

Communications.—In 1956 there were 13,128 kilometres of broad gauge and 4,838 of narrow gauge railway open. The sea-going mercantile marine in 1956 consisted of 1,572 vessels of 1,380,235 gross tons; in 1956, 13,206 ocean-going vessels entered Spanish ports. Civil aviation is under the control of the Minister of Air; there are several inland and international services in operation.

TRADE

	1956	1957
	*Gold Pesetas	*Gold Pesetas
Imports	2,346,930,432	2,639,296,224

Madrid, 1,150 miles; transit, 45 to 50 hours.

The BALEARIC ISLES are an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Iviza and Formentera), and seven smaller (Aire, Aucanada, Botafoch, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population of 433,444. The archipelago forms a province of Spain, the capital being ΨPalma in Majorca, pop. 138,071; ΨMahon (Minorca), pop. 20,000.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 696,982. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at ΨLas Palmas (pop. 1048, 150,010) in Gran Canaria, where U.S. oil companies have installed tanks for re-fuelling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma, Gomera and Hierro), with seat of administration at ΨSanta Cruz in Tenerife, pop. 106,798.

ISLA DE LOS FAISANES OR ILE DE LA CONFÉRENCE is a Franco-Spanish condominium, under the Treaty of Bayonne Dec. 2, 1856, and March 27, 1901. It lies at the mouth of the Bidassoa in La Higuera bay. It is uninhabited.

ΨCEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population of 67,790.

ΨMELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. The population is 94,319. Ceuta and Melilla are parts of Metropolitan Spain.

Spanish Colonies

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population estimated in 1935 at 951,000.

SPANISH GUINEA, consisting of the islands of Fernando Póo and Annobon, the Corisco Islands and Rio Muni (mainland). *Fernando Póo* lies in

the Bight of Biafra in 3° 12′ N. lat. and 8° 48′ E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 34,200. The capital of Spanish Guinea is ΨSanta Isabel (pop. 9,000) on the island of Fernando Póo. The total area, mainland and islands, is about 10,000 sq. miles, with an estimated population of 204,495, of whom about 4,124 are whites.

Annobon Island (*Anno Bom*), in the Gulf of Guinea, in 1° 24′ S. lat. and 5° 38. long.; population 1,410.

Corisco Islands, consisting of Corisco, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Rio Muni is a coastal settlement between Cameroon and French Congo (1° N.—2° 10′ N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at ΨBata (the principal town) on the coast.

WESTERN SAHARA—Spanish possessions in the Western Sahara extend from N. of Cape Blanco to S. of Cape Ifni, exclusive of Wadi Draa (Treaty with France, Nov. 27, 1912) but including the Ifni enclave. The Colony includes Rio de Oro, La Aguera and Ifni, and lies approximately between 21° 20′–26° N. lat., extending eastwards to about 13° W. long. Total area about 100,000 sq. miles (including part of the waterless Sahara, with a sparse population of wandering Moslem Arabs), total population about 32,000. Capital, ΨVilla Cisneros, pop. about 250.

SPANISH MOROCCO.—In addition to Ceuta and Melilla, Spain exercised until 1956 a protectorate over a part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (*see*. " Morocco "). Remaining Spanish settlements on the Moroccan seaboard are :—

Alhucemas, the bay of that name, includes six islands : population 366.

Penon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay ; population 450.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua ; population 610.

SUDANESE EMBASSY IN LONDON
3 Cleveland Row, W.1.
[Trafalgar : 8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sayed Awad Satti (1956).
Counsellor, Sayed Mohamed Mirghani.
1st Secretary, Sayed Hassan Mohamed Hassan.
2nd Secretary, Sayed Hamid Mohamed El Amin.
Cultural Attaché (vacant).
Asst. Cultural Attaché, Sayed Mutwakil Ahmed Amin.
Press Attaché, Sayed Hassan Mohamed el Amin.
3rd Secretary, Sayed Mohamed Osman Shendi.

Area and Population.—The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36′ N. lat., and reaches from French Equatorial Africa about 21° 49′ E. (at 12° 45′ N.) to the north-west boundary of Eritrea in 38° 35′ E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Ethiopia; on the south lie Kenya Colony, the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa and Libya.

The *Nile* enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,716 miles, and from its sources to the confluence its length may be reckoned at 1,810 miles, giving a total waterway of 3,526 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*.

The estimated area is about 976,750 sq. miles, with a population of 10,262,536 (census, 1956), partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs and Nubians are all Moslems. The Negroes are generally pagans, but some have been converted to Christianity. Population of provinces at the census of 1956 was: Bahr-el-Ghazal 991,022; Blue Nile 2,069,646; Darfur 1,328,765; Equatoria 903,503; Kassala 941,039; Khartoum 504,923; Kordofan 1,761,968; Northern 873,059; Upper Nile 888,611.

Government.—By virtue of the Condominium Agreement of 1899 between H.M. Government and the Egyptian Government, and Article 11 of the Anglo-Egyptian Treaty of 1936, the Sudan was administered by a Governor-General on the joint behalf of Great Britain and of Egypt.

On February 12, 1953, an Anglo-Egyptian Agreement guaranteed to the Sudanese the right to determine their own future and reserved the sovereignty of the Sudan until the day of self-determination for the Sudanese. The first Sudanese General Election was held at the end of 1953.

The Sudan House of Representatives on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state, and on Jan. 1, 1956, the Republic was proclaimed and was recognised by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. Sudan has an all-elected House of Representatives with 97 seats; and a Senate of 30 elected members and 20 members nominated by the Council of State.

Education.—Arabic has been adopted as the national language, and the Government is taking an increasing part in education in the southern provinces, which has hitherto been largely in the hands of various Christian Missions. The University of Khartoum (formerly Gordon Memorial College) was raised to university status on July 24, 1956. There are 38 boys' and 2 girls' secondary schools with 13,320 boys and 440 girls; 598 boys' and 252 girls' elementary schools with 117,050 boys and 35,710 girls; 125 boys' and 15 girls' intermediate schools with 25,760 boys and 3,264 girls; 4 elementary teachers' training centres with 460 boys; 1 intermediate teachers' training centre with 100 boys; 4 girls' training centres with 240 girls; 11 technical intermediate schools with 1,760 boys; 1 secondary technical school with 225 boys; Khartoum Technical Institute with 300 boys; 1,110 sub-grade schools with 70,000 boys. Non-Government schools and missionary schools were handed over to the Government in 1957.

Production.—The principal grain crop is *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food and export crops. Egyptian and American-type cottons are grown, the total value of the crop in 1952–53 being £E27,000,000. The *Sudan Gezira Scheme*, irrigated from the Sennar Dam on the Blue Nile, provides most of the high-quality long staple cotton.

Livestock are the mainstay of the nomadic Arab tribes of the plains and the negro tribes of the river and swamp country in the south.

Communications.—The railway system (3 ft. 6 in. gauge) has a route length of 2,138 miles (including 41 miles of a new extension south of Sennar), linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani Sennar, El Obeid, Kassala and Gedaref. Regular rail and the Nile Steamer Services connect with the Egyptian State Railways to the North, and with the East African Railways and Steamers System to the South. ΨPort Sudan is a well-equipped modern seaport. Sudan Airways run regular services from Khartoum to many parts of the Sudan.

FINANCE

	1957–58*
Revenue	£S45,585,415
Expenditure	40,380,044

* Estimated.

Attaché, H. Andén.

Area and Population.—Sweden occupies the eastern half of the Scandinavian peninsula in N.W. Europe and comprises 25 local government districts, "Län," with an area of 173,436 sq. miles, and a population, Jan. 1, 1957, of 7,341,122. Of the 56,100 foreigners (non-Scandinavians) with permission to reside in Sweden, about 8,200 are Baltic refugees and 22,000 Germans. In 1956 there were 108,054 births (14·8 per 1,000 inhabitants), 70,242 deaths (9·1 per 1,000) and 51,650 marriages (7·1 per 1,000). In 1956 the infantile mortality rate was 17·0 per 1,000.

Government.—Under the Constitution of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte, Prince of Ponte Corvo, a Marshal of France, who was invited to accept the title of Crown Prince, with succession to the throne. The Marshal landed at Helsingborg on Oct. 20, 1810, and succeeded Charles XIII. in 1818. There is a Diet (*Riksdag*) of two Chambers, *Första Kammaren* of 150 members, elected for 8 years; and *Andra Kammaren* of 230 members, elected for 4 years. The Council of Ministers (*Statsråd*) is responsible to the Riksdag.

Production and Industry.—About 25 per cent. of the working population is devoted to agriculture, forestry and fisheries, about 300,000 being owners and 60,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining, industrial agricultural and forest; the southern, agricultural and industrial. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots, olliferous plants and grasses. Dairy produce, however, accounts for over half the value of Swedish agricultural production. Sweden contains the great lakes of Vänern, Vättern, Mälaren and Hjälmaren. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, spruce and birch; these are of great importance, supplying timber, pitch, fuel and tar, in addition to sulphite, sulphate and mechanical wood pulp for the paper-making and rayon industries. The mineral resources are extremely rich; iron ore of excellent quality; lead, zinc, sulphur, manganese, arsenic, gold, granite and marble. There are also considerable deposits of low grade uranium ore. There is a railroad opening up the rich iron-ore districts of Lapland and mineral trains run from Gällivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scania (Skåne).

In 1954 there were 17,726 industrial establishments (including mines and quarries) employing 670,637 operatives, and 159,215 in administrative and executive posts. The fishing industry landed catches valued at *Kr.*135,483,000 in 1956.

Communications.—Railroads totalling 10,180 miles in length (of which 9,375 are the property of the State) were open on June 1, 1955. At the beginning of 1957 there were 120 main telephone exchanges in operation, of which 79 were fully automatic; 3,500 of the 6,970 sub-stations were fully automatic. There were 315 telephones for every 1,000 of the population, 330 per 1,000 had obtained wireless licences and at the beginning of 1958 the number of television licences issued totalled about 92,000. The number of private cars in use on the same date was estimated at 850,000 or 1 to every 8 of the population. The Mercantile Marine (Jan. 1957), consisted of a total of 1,608 ships of 2,958,845 gross tons. Civil aviation is under the control of the Ministry of Communications, under whose supervision all matters concerning civil aviation are handled by the Department of Civil Aviation. Regular domestic air traffic is maintained by the Scandinavian Airlines system (on behalf of the Swedish Airlines) and by A. B. Linjeflyg. Regular European and inter-continental air traffic is maintained within the framework of the Scandinavian Airlines System in Copenhagen by the Swedish Airlines in collaboration with the Danish and Norwegian Airlines.

Defence.—Service in the Defence Forces is universal and compulsory, between 35,000 and 40,000 being trained annually; strength of the *Army* during the war of 1939–45 was about 500,000, equipped on modern lines and principally mechanized. The *Navy* consists of 3 cruisers, 14 destroyers, 13 frigates, 28 motor torpedo boats, 24 submarines and a large number of minor craft and auxiliaries. The naval stations are Stockholm, Karlskrona and Göteborg. The *Air Force* consists of 20 wings, chiefly fighters.

Religion.—The State religion is Lutheran Protestant, to which over 95 per cent. of the people adhere.

Language and Literature.—Swedish is one of the Teutonic languages spoken by the people of Scandinavia and is closely allied to Icelandic, Danish and Norse. Swedish national literature may be dated from the foundation of the University of Uppsala in 1477 and reached its golden age under Gustavus III. (1771–1792), who founded the Swedish Academy in 1786. Among modern Swedish authors who have achieved world-wide reputations are August Strindberg (1849–1912), dramatist and novelist; Selma Lagerlöf (1858–1940), who was awarded the Nobel Prize for Literature in 1909 on account of her pre-eminence as a novelist; Verner von Heidenstam (1859–1940), poet and Nobel Prize-winner (1916); Erik A. Karlfeldt (1864–1931), Nobel Prize-winner in 1931 after his death, and Par Lagerkvist, Nobel Prize-winner, 1951. In 1958 there were 200 daily newspapers in the country, 9 major papers being published at Stockholm, 5 at Göteborg and 4 at Malmö.

Education.—(i.) *Primary:* Compulsory and free. Illiteracy rare. Maintained by the State and by local taxation. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce and navigation. (iv.) *Universities:* State Universities at Uppsala (founded 1477) and Lund (founded 1668) and private but grant-aided Universities in Stockholm and Göteborg.

Area and Population—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50′–47° 48′ N. lat. and 5° 58′–10° 3′ E. long. It is composed of 22 Cantons, 3 subdivided, making 25 in all, of very dissimilar size, united under a Constitution dated May 29, 1874, and comprises a total area of 15,950 square miles, with an estimated population (Dec. 31, 1957) of 5,160.000. In 1956 there were 87,912 live births, 51.573 deaths and 40,448 marriages. The infant mortality rate was 26 per 1,000 live births. In 1950, out of a total of 47,000,000, 56 per cent. of the population was Protestant, 41 per cent. Roman Catholic and 0·4 per cent. Jewish.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The *Alps* are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy, and Monte Rosa (15,217 feet) is partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803), Breithorn (13,685), and Matterhorn (14,780 feet) in the Pennine Alps.

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz.

Production and Industry.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and other metallurgical industries, clothing, watchmaking, woodworking, foodstuffs, chemicals, cotton, silk and rayon, embroidery and footwear.

* The President is elected in December and remains in office from Jan. 1 to Dec. 31; he is *generally* succeeded by the Vice-President.

Government.—The legislative power is vested in a Parliament consisting of two Chambers, a National Council (*Nationalrat*) of 196 members, and a Council of States (*Ständerat*) of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

Defence.—Army. Elite (ages 20 to 36), 16 yrs.; initial training, 118 days. Subsequently 8 training periods of 21 days; then Landwehr (36 to 48) and Landsturm (48 to 60). *Air Force.* Ground personnel: as Army. Flying personnel: age 20 to 36. Initial training 1 year. 6 weeks with squadron each year and completion of 70 hours' flying. After 36 revert to ground duties with Air Force or Army.

Communications.—In 1956 there were 3,515 miles of railway (including tramways, rack railways, etc.) in operation. At Dec. 31, 1957, there were 35,782 miles of telegraph and telephone lines, 909,021 telephone subscribers and 4,052 post offices. There were 1,308,341 licensed radio receivers and 31,374 television receivers. At September 30, 1957, the total length of first-class roads was 10,650 miles, the number of motor vehicles being 668,238 (346,650 private cars, 252,758 motor cycles and motor scooters and 68,830 commercial vehicles). A merchant navy, established in 1940, consisted in 1957 of 22 vessels with a total displacement of 150,000 tons.

In addition, there were 384 vessels with a total tonnage of 302,893 engaged in Rhine shipping. In 1957 goods handled in Rhine traffic at Basle amounted to 5,396,360 tons; 122 lake vessels transported 8,740,000 passengers and 447,611 tons of freight in 1956. In 1957 Swissair flew 29,133,419 kilometres and carried 992,911 passengers.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy practically unknown. (i.). *Primary:* Free and compulsory. School age varies, generally 7 to 14. (ii.) *Secondary:* Age 12–15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

Language and Literature.—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of Grison. Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845–1924) and Hermann Hesse (1877–) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1947.

FINANCE	1957

Area and Population.—The Kingdom of Thailand, or Muang Thai, formerly known as Siam, has an area of 198,247 sq. miles with a population (estimated 1956) of 22,811,701. Thailand is in South-Eastern Asia. It has a common boundary with the Federation of Malaya in the south, and is bounded on the west and north-west by the Union of Burma and in the north-east and east by the Kingdoms of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is only separated from the Thai northern border by a narrow stretch of Burmese and Lao territory. The country slopes southwards from the north-west and from the great mountains of Tibet. The principal rivers are the Salween (which forms a boundary with Burma for 200 miles), the Menam Chao Phya with its tributary the Meping (which are Thai throughout) and the Mekong and its tributaries, which water the eastern plateau.

Government.—Thailand is a sovereign independent State. The Constitution of 1952 provides that the King shall exercise legislative power by, and with the advice and consent of, the Assembly of the People's Representatives, executive power through the Council of Ministers and judicial power through Courts established by law. He is advised by a Privy Council appointed by him. At the general elections in Feb. and Dec., 1957, 160 members were elected to the Assembly of the People's Representatives by a system of proportional representation. There were also at that time 123 nominated members. The Constitution provides for the progressive replacement of nominated by elected members, which should be complete by 1962.

Language, Religion and Education.—Thai is basically a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family. The principal religion is Buddhism, its followers numbering over 16 millions in 1953, with 627,435 Moslems and some 70,000 Christians. The 2,500th anniversary of the Buddhist Era was celebrated in Bangkok from May 12–15, 1957, with religious and public ceremonies. Primary education is compulsory and free and secondary education in Government Schools is free. In 1956 there were nearly 23,500 schools of all kinds, with about 3,500,000 pupils and 105,000 teachers. There are 5 Universities attended by about 27,000 students, 35 Training Colleges and 354 Vocational Schools (all types).

Production and Industry.—The chief products of the country are rice, rubber, tin and teak. There are few manufacturing industries.

Forests are extensive and with a few exceptions are now State-controlled. Local industries are relatively under-developed. They include the production of salt, cement, iron and steel, sugar, tobacco and cigarettes, leather, glassware, porcelain, soap, paper, gunny bags, cotton and silk cloth, matches and fishmeal. There are cottage industries producing pottery and cotton and silk cloth. The local niello-ware (engraved silver with interstices filled with black metallic compound) is very popular with visitors. Livestock, in 1956, included 5,637,309 cattle, 5,742,900 buffaloes, 12,467 elephants, 198,097 horses, mules and donkeys, 3,031,285 pigs, 65,000,000 chickens and ducks.

In addition to tin and wolfram, the only minerals produced in important quantities are iron, lead, antimony, lignite and salt. In 1956 the output of tin ore was 17,614 metric tons; wolfram ore, 1,181 tons; iron ore, 5,775 tons; lead, 9,434 tons and antimony 62 tons. In 1957, about 18,452 metric tons of tin and 225,000 metric tons of salt were produced. About half the output of tin ore comes from U.K. and Australian-owned mines.

Communications.—About 2,200 miles of State-owned railways were open for traffic in 1957. Railways from Bangkok run to Ubol Raj Thani (357 miles N.E.), Chiengmai (411 miles N.), Aran Pradet (159 miles E.) and Padang Besar (615 miles S.); there are branch lines to Swankalok, Kantang, Kanchanaburi, Nakorn Srithamaraj, Songkhla, Suggei Golok and via Udon Thani on the Mekong opposite the Laotian capital of Vientiane, totalling about 490 miles. The Burma railway, built with allied prisoner-of-war labour by the Japanese during the war, has been purchased from its starting point at Ban Pong to the Burmese border by the Thai Government and is now part of the Royal State Railways. It is open to general traffic as far as Kanchanaburi (33 miles). There is through railway connection between Ban Pong and Penang and Singapore. In 1957 about 5,100 miles of State highways were open to traffic. The total length of major roads to be completed is approximately 3,000 miles and the length of provincial roads to be built is 5,120 miles. Bangkok is an international airport of importance, and services connect it with Europe, America, India, Pakistan, South-East Asia and Japan. There are internal air services to Bangkok, Nakorn Sawan, Phitsanuloke, Phree, Lampang, Chiengmai, Mae Hongsorn, Chiengrai, Mae Sarieng, Khun Yuam, Pai, Tak, Mae Sod, Korat, Ubol, Udorn, Loey, Phuket, Songkhla. There are about 14,474 miles of telegraph lines. The harbour at Bangkok can now take vessels of up to 14,000 tons.

FINANCE	1956	1957
Budget Estimates	Millions of *Baht*	
Total Revenue	4,752	5,120
Total Expenditure	5,912	6,344
Deficit	1,160	1,224

In 1953 Thailand received an International Bank loan of the equivalent of U.S. $25,400,000 for irrigation, railway development and the development of the port of Bangkok, in 1955 a further loan of U.S. $12,000,000 for rehabilitation and development of the State railways, in 1956 a further loan of U.S. $3,400,000 for development of the port of Bangkok and in 1957, U.S. $66,000,000 to meet the foreign exchange costs of the first phase of the Bhamiphol (Yan Hee) dam project.

The value of non-military aid given to Thailand by the International Cooperation Administration of the United States between 1951 and June, 1957 amounted to U.S. $112,580,000. In addition a military aid programme is being administered by the United States Department of Defence. During the fiscal year ended June 30, 1957 a total assistance of U.S. $88,280,000 was allocated to Thailand by the I.C.A. The Export Import Bank has loaned $1,000,000 for the purchase of cargo vessels.

The *official* rates of exchange for the *Tical* or

Baht (of 100 Satangs) since September, 1949, have been 35 *Ticals*=£1 and 12·5 *Ticals*=U.S. $1.

The reserves of foreign exchange obtained from earlier export premia are virtually exhausted, and imports now have to be paid for at the open market rate of exchange which in June 1958 was fluctuating around *Baht* 58=£1.

TRADE*	1957 Millions of *Baht*	£
Imports	8,020	141,000,000
Exports	5,364	94,100,000
Imports from U.K.	711	12,480,404
Exports to U.K.	160	2,812,303

* Port of Bangkok only.

Rice accounted in 1957 for about 40 per cent. of the value of all Thailand's exports, rubber accounted for about 19 per cent., tin about 7 per cent. and teak about 3 per cent. The other exports, totalling about 22 per cent., consisted mainly of the following: salted fish, live cattle, maize, tapioca, salt, sticklac, hides, wolfram, chillies, fresh fruit, beans, yang wood and other timber, seedlack, ground nuts, castor seeds, silverware and ramie. Chief imports are textiles, metal manufactures, machinery, vehicles and transport equipment, chemicals and petroleum products.

CAPITAL, ΨBangkok (with Dhonburi), pop. 1956—1,773,318; in the delta of the Menam Chao Phya. Other centres are Chiengmai, Nakorn Sawan and Korat, but no other town approaches Bangkok in size or importance.

FLAG: Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others).

[Western: 0876]

Ambassador, His Excellency Taieb Slim.
Secretaries, Moncef Skhiri; Moncef Guen.

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 45,000 sq. miles. A census held in connection with the preparation of electoral registers showed (Feb., 1956) a total population of 3,800,000 of whom 3,430,000 were Tunisians.

Government.—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army. Tunisia remains in the *franc* zone and in customs-union with France. Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May 20, 1956. Negotiations on the interdependence of Tunisia and France have continued. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected Mr. Bourguiba first President of the Republic. A few days later the Government was reconstructed on the "presidential" model, the Ministers becoming Secretaries of State.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 14 regions each ruled by a Governor assisted by a Secretary-General.

Production and Trade.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The chief exports are cereals, olive oil, phosphates, iron-ore, lead and derivatives, wines, etc., dates, etc.; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1955 the imports were valued at 63,276,000,000 *Fr.* and the exports at 37,309,367,000 *Fr.* Imports from U.K. in 1957, £708,524; Exports to U.K., £6,698,142.

CAPITAL, ΨTunis, connected by canal with La Goulette on the coast, had a population (Municipal Council area) of 680,000 at the Census of 1956. The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are ΨSfax (65,635), ΨSousse (48,172), Kairouan (33,968).

Area and Population.—The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remained in power until the War of 1914–18.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, part of Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Ægean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

Turkey now extends from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq. The sixth general census of population was held in October 1955. The results of the last four counts are:—

Year	Population
Oct., 1940	17,820,950
Oct., 1945	18,790,174
Oct., 1950	20,936,524
Oct., 1955	24,111 773

Turkey in Europe (9,256 sq. miles, population 2,262,023 in 1955) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Istanbul and by the *Dardanelles* (Hellespont)—about 40 miles in length with a width varying from 1, to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (285,246 sq. miles, population 21,849,755 in 1955), comprises the whole of Asia Minor or *Anatolia* ("Land of the Rising Sun" or Orient), and extends from the Ægean Sea to the western boundaries of Georgia, Soviet Armenia and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. The former Turkish Sanjak of Alexandretta (latterly known as the Republic of Hatay), was ceded by France on July 23, 1939, having formed part of Mandated Syria since 1922.

Government.—For two centuries before the War of 1914–18, disintegration had reduced the power and extent of the Turkish Empire, and after that War its boundaries were still further restricted, Iraq, Syria and Arabia passing into other hands. Sultan Mehmed VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Atatürk) President. The Grand National Assembly (*Büyük Millet Meclisi* or *Kamutay*) is a single-chamber legislature of 610 members, elected for four years by universal adult suffrage, and delegates its executive power to ministers acting in its name and responsible to it for their actions. In October, 1957 the Democrat Party was returned to power for the third time, but with a reduced majority. It now holds some 420 seats out of 610. Turkey is divided for administrative purposes into 67 *vilayet*, with sub-divisions into *kaza* and *nahiye*. Vilayet have each a governor (*vali*) and elective council.

Religion and Education.—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1955 there were over 17,800 primary schools, with about 1,877,000 pupils. There are two universities at Istanbul (one being a Technical University), one at Ankara and one at Izmir. A fifth university is being built in Eastern Turkey, and the Middle East Technical University was recently founded in Ankara. The expenditure allocated to education in the 1958 budget was £T476,554,258.

* TURKISH NATIONAL HOLIDAY.—Oct. 29 is observed throughout the Republic as a National Holiday.

Language and Literature.—Osmanli or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the percentage of Turks who can read and write is rising steadily. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Ankara and Istanbul, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek and English and numerous magazines and weeklies on various subjects.

Production and Industry.—Although it is estimated that 16 per cent. of the country is entirely unproductive and only 16 per cent. fully arable, agriculture provides a livelihood for 75 per cent. of the population and the economy is based extensively on the export of agriculture products. Agriculture is still largely primitive, but is being modernized at an accelerated pace. The principal crops are cereals, cotton, tobacco, sultanas and figs, pulses, oilseeds, valonea, hazel-nuts, opium, sugar beet, and many varieties of fruit. With the important exception of wheat, which is grown mostly on the arid Central Anatolian Plateau, the bulk of these is grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred at Izmir (Smyrna), where substantial quantities of cotton are also grown. The main cotton area is the Cukurova Plain around Adana. In 1956 it was estimated that there were more than 65,300,000 head of livestock, including camels, horses, donkeys and mules. Animal by-products include wool, hides and skins, and mohair. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

Turkey's second most important industry is based on her considerable mineral wealth, which is however as yet largely unexploited. The most important developments are in coal, lignite, iron ore and chrome mining and fair quantities of copper, manganese, lead and sulphur are also produced together with other minerals in only small quantities. Working through the State-owned Eti (mining) and Sumer (industry) Banks, great strides have been made during recent years in industrializing the country. Developments include the erection of an iron and steel works at Karabuk and other factories and plants for the production of textiles, paper, pulp, cement, artificial silk, sugar, leather goods, glassware, heavy chemicals, artificial fertilizers, canned goods, wines and spirits, vegetable oils, soap and refined sulphur. Legislation has been passed to encourage the investment of foreign capital in Turkey and to permit the exploitation of Turkey's petroleum resources by foreign companies. At the end of 1957 several companies were prospecting for oil in Turkey. Production of oil by the Turkish Petroleum Administration, from the Raman-Garzan field in Eastern Turkey, amounted to 305,500 tons in 1957.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in 1948. The total length in operation is about 7,805 km. Construction, started in 1937 and at present in progress, includes the line to the Persian border (Elazig-Kotur) the Iraq frontier line (Diyarbakir-Cizre), the conversion of the Erzerum-Sarikamis line from narrow gauge to normal, and various branch lines in the Gaziantep and Zonguldak areas. The total length of these additions is to be 1,176 km., of which about 350 km. have been completed at a cost of over £T125,000,000. A 15-year plan for the addition of a further 2,310 km. of railway at a cost of £T800,000,000, which was produced in 1947, has now been shelved—possibly because of the prior claims of the 9-year programme for the construction and improvement of roads and highways. Efforts are however being made to increase rolling stock and locomotives. During 1956 the railways carried 68,000,000 passengers, 14,000,000 tons of freight and 2,900,000 head of livestock.

Roads.—In September, 1948, a 9-year road construction programme was started, involving the construction, reconstruction, improvement and maintenance of a national highway system totalling 24,300 kilometres of all-weather standard roads. The work is being greatly facilitated by the mechanized road building equipment supplied by the American Mission for Aid to Turkey. At the end of 1955 there were 18,858 kilometres of national all-weather roads and 10,551 kilometres of all-weather provincial roads.

Posts.—In 1952 there were 46,109 km. of telegraph lines, 2,097 post and telegraph offices, 121,603 telephones were in use in Turkey in 1956.

Shipping.—The strength of the Turkish Merchant Navy at the beginning of 1956 was 1,510 vessels totalling about 752,000 tons, of which just under half is owned by the State Shipping Administration.

Civil Aviation.—The State Airlines operate all internal services and have services to Athens, Beirut and Nicosia, while most of the leading foreign airlines, including British European Airways, operate services to Istanbul and some also to Ankara. The State Airlines fleet is composed of Dakotas and D.H. Herons. In 1957 an agreement was made with B.O.A.C., involving a loan with which 5 Vickers *Viscounts* are being acquired by Turkish Airlines. The airports at Istanbul, Ankara and Adana have been improved to P.I.A.C.O. (Class B) standard and a sum of £T45,000,000 is being spent on ten other new airfields in Turkey. In addition, nine military airfields, costing £T160,000,000 are being constructed by N.A.T.O.

FINANCE	1958–59
Revenue (Budget)	£T4,475,552,400
Expenditure (Budget)	4,475,552,400

Expenditure includes £T955,000,000 for capital investment.

Debt (Dec. 31, 1957):—

Internal funded	£T837,111,700
Internal floating	388,249,231
External funded	693,412,372
External floating	86,179,754

The *Public Debt of the former Ottoman Empire* was apportioned amongst the various Successor States, including Turkey, according to the provisions of the Treaty of Lausanne of 1923. The

same Treaty provided that the Debtor States were to pay the annuities incumbent upon them by reason of such apportionment to the Ottoman Debt Council.

Since that date, several of the Successor States have settled their shares in various ways and Turkey has acquitted herself of her obligation by the purchase of the existing Turkish Bonds, 1933. This terminates the relations of Turkey with the Debt Council, which body, however, retains all its rights and attributions *vis-à-vis* those States which have not yet settled their shares. The Ottoman Debt Council's Offices are in Paris.

The Turkish *Lira*, or £T. (of 100 *Kurus*, each of 40 *Paras*) has a nominal value of *2s. 7d.* (*see also* p. 84).

TRADE

	1956	1957
Total imports	£T1,140,600,000	£T1,118,000,000
Total exports	854,000,000	966,700,000
Imports from U.K.	£9,112,280	£9,932,250
Exports to U.K.	8,092,480	11,858,136

The imports include iron and steel, machinery and spares, petroleum products, cotton textiles, wool and woollen yarns, agricultural machinery, locomotives, motor vehicles and pharmaceuticals: the exports include tobacco, cotton, dried fruit, livestock, chrome oilseeds, opium and valonea.

The principal imports from United Kingdom are iron and steel goods, machinery, tractors, motor lorries and chemicals; the principal exports to United Kingdom are tobacco, mohair, nuts, figs and raisins.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (1955 census), of 353,170. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum* (*Marmor*) *Ancyranum*, inscribed with a record of the reign of Augustus Cæsar. A new city has been laid out on modern lines, with parks, statues and avenues. ΨISTANBUL (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire in A.D. 364; population (1955) 1,032,341. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 a museum of Byzantine and Turkish art. Other cities are ΨIzmir (Smyrna) 246,619; Adana 172,465; Bursa (Brusa) 131,336; Eskischir 122,755; Gaziantep 97,144; Konya 93,125; Kayseri (Cæsarea) 81,[illegible] and Erzerum 69,499.

FLAG: Red, with white crescent and star.

UNITED ARAB REPUBLIC

Egypt and Syria

President, Lt.-Col. Gamal Abdel Nasser (*elected* Feb. 21, 1958).

Vice Presidents

Abdel Latif el-Baghdadi (*E*); Field Marshal Abdel Hakim Amer (*E*); Sabry Assali (*S*); Akram Hourani (*S*).

Cabinet.

Joint Ministries

Foreign Affairs, Dr. Mahmoud Fawzi.
War, Field Marshal Abdel Hakim Amer.
Industry, Aziz Sidky.
Education, Kamaleddin Hussein.
National Guidance, Fathi Radwan.
Religious Affairs, Ahmed Hassan Bakoury.
Presidential Affairs, Wing Cdr. Ali Sabry.
Arab Affairs (*Minister of State*), Salah Bitar.

Dual Ministries

Finance, Hassan Abbas Zaki (*E*); Fakher el-Kayali (*S*).
Interior, Zakaria Mohieddin (*E*); Col. Abdel Hamid Sarraj (*S*).
Health, Nureddin Tarraf (*E*); Shawkhat Kanawati (*S*).
Justice, Ahmad Husin (*E*); Abdel Wahab Homad (*S*).
Public Works, Abdul Sharbassi (*E*); Nureddin Kuhala (*S*).
Rural and Municipal Affairs, Mohammed Abu Nosseir (*E*); Maj. Ahmed Abdel Karim (*S*).
Trade and Economy, Abdel Moneim el-Kaissouny (*E*); Khalil Kallas (*S*).
Agriculture, Said Marei (*E*); Ahmed Yunis (*S*).
Communications, Dr. Mustafa Khalil (*E*); Col. Amin Nafouri (*S*).
Planning, Hussein Shafei (*and Social Affairs*, *E*); Hassan Jubarrah (*S*).
Social Affairs (*Syria*), Maj. Mustafa Hamdun.

Constitution.—The United Arab Republic came into being on Feb. 1, 1958, and the union of Egypt and Syria was confirmed by a plebiscite held simultaneously in Egypt and Syria. A provisional constitution, based on 17 principles was announced on Feb. 5, under which legislative authority in the Republic was to be vested in a National Assembly chosen by the President, with the condition that half its members would be selected from the existing Egyptian and Syrian Chambers. Executive power is vested in the President, assisted by Ministers appointed by himself. The President will select heads of Regional Councils. The provisional constitution included statements that the Republic would be a "Presidential democracy" with a

common flag, common people and a common army; it provided that all laws in Egypt and Syria would remain valid within the districts prescribed for them at the time of issue, though subject to later modification or annulment; private property would be safeguarded and not subject to confiscation without due compensation; existing public services and administration would remain as they are until re-organized by Presidential decree; the independence of the judiciary would be guaranteed and all international treaties concluded by Egypt and Syria would remain valid. The 17 provisions were expanded on March 5, when a list of 75 articles was proclaimed, including a new provision that the President could dismiss one or more vice-presidents and that the National Assembly would have the right to pass a vote of no confidence in a Minister. Four Vice-Presidents were nominated on March 6, together with the new Cabinet.

CAPITAL OF THE UNITED ARAB REPUBLIC.—Cairo (pop. 2,100,486).

FLAG.—Three horizontal stripes of black, white and red with two green stars in the white stripe.

United Arab States.—On March 8, 1958, a federal agreement between the United Arab Republic and the Kingdom of the Yemen was signed in Cairo. The Yemen joined the United Arab Republic in a federation to be known as the United Arab States and intended to include other Arab countries. Each state would preserve its own system of government; defence and foreign policy would be unified and economic policies co-ordinated; a customs union and a common currency would be established; common councils would be set up for various purposes. The Federal Council, a permanent body, consisting of six representatives of each member state, would have its seat at Hodeida and would also meet on occasion in Cairo or Damascus.

EGYPT
(Misr)

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (386,110 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population enumerated in June, 1954, as 22,651,000 (including nomads).

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as *Fellahin* (*fellâh*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century, but there are about 1,000,000 Coptic and Greek Orthodox Christians in Egypt. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa, of mixed Arab and negro blood. The Bedouin and Nubians are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (*a*) the valley and delta of the Nile, (*b*) the Libyan or Western Desert, and (*c*) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is coterminous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollûm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at 'Uweinat Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15′ E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddâns* (12,431 square miles) and the area of lakes at 641,000 *feddâns* (1,039 square miles), a total of 8,308,000 *feddâns* (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The *Nile* has a total length of 4,160 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 23 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*, an arid region, containing some depressions, whose sprin s irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

Religions.—At the Census of 1947 there were 19,037,984 Moslems, 1,[illegible]73,271 Coptic and Greek Orthodox Christians, 5[illegible] Roman Catholics, 103,256 other Christians (Protestant and Reformed Churches), and 65,639 Jews. The chief Moslem religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti el Di-yor el Masriya*.

Government.—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arâbi *Pasha*),

assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (*see* below).

During the War of 1914–18 a British Protectorate over Egypt was declared (Dec. 18, 1914) and Khedive Abbas Hilmi was deposed. He was succeeded by Hussein Kamel, with the title of Sultan, who died Oct. 9, 1917, being succeeded by his brother, Ahmed Fuad. The British Protectorate terminated on Feb. 28, 1922, and Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo.

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.–Nov. 1942) drove the enemy out of the country. In July, 1952, following a military *coup d'etat*, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate. Following the establishment of the United Arab Republic (*see* above), Col. Nasser was elected its first President on Feb. 21, 1958.

Language and Literature.—Arabic is the official language of Egypt and since the last quarter of the 19th century an Arabic daily press has modernized the spoken idiom. The rich literature of Arabia is an inheritance from Islam and in the past half century indigenous poetry and drama have given abundant evidence of vitality. French and English are secondary languages in urban areas.

Agriculture.—The principal crops grown during *Saifi* (summer) are cotton, rice, sugar cane, and sorgho (maize). *Nili* (flood) part of *Saifi*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally begins in July; the principal crops are maize and rice. *Chitwi* (winter) begins in November and ends in June; the principal crops are cereals, bersim (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollûm, thus joining Tripoli to Egypt. The gauge is standard (4 ft. 8½ in.). There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 883 miles of light railways exploited by public companies.

Roads and Caravan Routes.—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollûm and thence to connect with the coast road in Libya. The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—Ψ Apart from the three great seaports of Alexandria, Port Said and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga, Qoseir and Halaib on the Red Sea.

Currency.—£E (Egyptian *pound* of 100 *piastres*) = £1 *os.* 6½*d.* sterling. Rate of Exchange—(*Buying*) *Piastres* 97·40 = £1; (*Selling*) *Piastres* 97·60 = £1. (*See also* p. 84.)

TRADE

	1955
Total Imports....	£E182,266,000
Domestic Exports.	136,995,000
	1956 — 1957
Imports from U.K.	£22,664,516 — £2,295,050
Exports to U.K...	7,291,219 — 733,470

The principal imports are textiles, metals, and manufactures thereof, coal and coke, chemicals, machinery, vehicles, foodstuffs, timber and wood and paper. The exports are principally raw cotton, rice, mineral products and onions.

CAIRO, the capital (population 1947, 2,100,486) stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century.

Ψ ALEXANDRIA (pop. 1947, 928,237), founded 332 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Other towns are: Tanta (139,965), Ψ Port Said (178,432), Mansura (102,709), Asyût (90,378), Faiyûm (74,314), Zagazig (82,912), Mahalla el Kubra (115,509), Damanhur (84,983), Minya (69,667), Ψ Suez (108,250), Beni Suef (57,464), Ψ Damietta (68,520), Giza (53,620).

FLAG: Green, with white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

CAIRO is 2,520 miles from London: transit *via* Trieste, 5 days; *vid* Marseilles, 6 days.

SYRIA

Area and Population.—The Republic of Syria is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 70,800 sq. miles and a population (1954) of 3,655,904, Arabic speaking and mainly Moslems. Syria includes the districts of Damascus, Aleppo,

Homs, Hama, Lattakieh, Deir-ez-zor, Hassetché, Soueida (Jebel Druze) and Deraa. It is bounded on the north by Turkey, on the east by Iraq, on the south by Jordan and Israel, and on the west by the Lebanon and thence northwards by the Mediterranean to the Turkish frontier. The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaeology, etc.—Syria is rich in historical remains. Damascus (*Dimishq ash-Sham*) is the most ancient city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayyed Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix, 11), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phoenician town of Marath, where the *tell* has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knight Templars in the XII–XIII century is being restored as a museum.

Hittite cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Terablus and Kadesh and also on the Orontes at Atchara, near Antioch.

Government.—Syria, which had been under French mandate since the 1914–18 war, became an independent Republic during the 1939–45 war. The first independently elected Parliament met on August 17 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic (*see* above).

Production and Industry.—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebieh district of Lattakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil and copper and brass utensils are locally produced. Mineral wealth is small and oil prospecting has not proved successful, but some revenue is derived from the Kirkuk–Banias oil pipeline and the pipeline from the oilfields of Saudi-Arabia to Sidon in Lebanon (Tapline).

Language and Literature.—Arabic is the principal language (*see* Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 25 daily newspapers and 30 periodicals in Arabic published in Damascus and 17 daily newspapers and 25 periodicals in the provinces.

Education.—Education in Syria is under State control and, although many of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. The Syrian University, founded in 1924, has faculties of law, medicine, engineering, science, arts and a Higher Teachers' Training College. Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—A narrow-gauge railway runs from Beirut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. From Damascus the Hejaz railway runs southwards to Jordan. All the principal towns in the country are connected by roads of varying quality. The trans-desert route from Damascus to Baghdad is covered by the Nairn Bus Service in fourteen hours. A small internal air service operates between Damascus and Aleppo, and between Aleppo and Qamichliyé, and Aleppo, Lattakia and Damascus.

Currency.—The monetary unit is the Syrian paper pound (£*Syr.*). In February 1955, the Syrian gold pound was returned to circulation at an official rate of £*Syr.* 26·75. The official rates of exchange are £*Syr.* 6·13 = £1 sterling, buying, and £*Syr.* 6·19 = £1 sterling, selling. The free market rate is used for all ordinary commercial transactions. In May, 1956, it was approximately £*Syr.* 9·8 = £1 sterling. (*See also* p. 84.)

Trade

Principal Imports.—Gold, textiles, petroleum products, vehicles, agricultural equipment, machinery of all kinds and electrical material, base metals and wares thereof, chemicals and pharmaceuticals, wood and its manufactures, live animals and animal products, vegetable products, rubber products.

Principal Exports.—Textile materials and manufactures (including raw cotton and wool), cereals and vegetable products, live animals and animal products, raw hides and skins, prepared foods, gold.

The value of Syria's foreign trade at the free rate of exchange, was:—

	1955
Imports	£*Syr.*676,887,000
Exports	430,528,000
	1956 1957
Imports from U.K.	£7,960,319 £4,895,871
Exports to U.K.	2,051,709 1,788,085

Chief Towns.—Damascus (population 372,708) is the capital of Syria, other important towns being Aleppo (population 380,919), Homs (261,904) and Hama (155,671), and the principal port of the Syrian Republic is Ψ Lattakia (105,363). The principal town of Jebel Druze is Soueida (Black), built in mid-19th century by refugees from Lebanon from stones of the ruined Nabatean city of Soada and of blocks of local black basalt.

Syrian Flag: Green over white, over black horizontal bands, with three red stars on central white band.

URUGUAY

(República Oriental del Uruguay)

National Council of State

Sr. Carlos A. Fisher (*President*, 1958–March 1959); Sr. Luis Batlle Berres; Sr. Arturo Lezama; Sr. Justino Zavala Muniz; Sr. Zeilo Chelle; Dr. Alberto Zubiría; Dr. Luis Alberto de Herrera, G.B.E.; Sr. Ramón Viña; Sr. Daniel Fernández Crespo.

Minister of Interior, Sr. Glauco Segovia.
Foreign Affairs, Prof. Oscar Secco Ellauri.
National Defence, Dr. Raul Gaudin.
Finance, Sr. Amilcar Vasconcellos.
Public Works, Sr. Florentino Guimaraens.
Public Health, Dr. Vicente Basagoiti.
Public Instruction and Social Welfare, Prof. Clemente I. Ruggia.

Industries and Labour, Sr. Hector Grauert.
Livestock and Agriculture, Sr. Joaquín Aparicio.

EMBASSY IN LONDON

48 Lennox Gardens, S.W.1
[Kensington: 8835]

Ambassador in London, His Excellency Señor Dr. Don José Antonio Quadros (1954).
Minister-Counsellor and Consul-General, Señor Don Marcos Brondi.
Counsellor, Señor Don Gustavo Magariños.
1st Secretary, Señor Don L. H. Close-Pozzo.
2nd Secretary, Señor Don M. Eduardo Capurro.
Secretary, Señor Don Guy P. Nery.
Secretary and Consul, Señor Don Carlos A. Ghiringhelli.

Area and Population.—The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25′—57° 42′ W., with an area of 72,180 square miles, and an estimated population of 3,000,000, almost entirely white and predominantly of Spanish and Italian descent. Most Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features.—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the *Rio Uruguay*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Queguay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merin. The climate is reasonably healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the Uruguay River was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

A new Constitution was approved and brought into force on March 1, 1952, whereby the executive power is discharged by a National Council of State composed of nine members, elected every four years and assisted by nine ministers. The next elections for the Council of State are due in 1958. The members of the National Council of State are eligible for re-election after four years have elapsed since the date on which their mandate ceased. The Legislature consists of a Chamber of 99 deputies and of a Senate of 30 members, elected for four years by all adult male and female citizens who can read and write.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The 1951 livestock census showed figures of 8,154,109 cattle, 23,408,642 sheep, 667,251 horses, 258,980 hogs, 5,568,451 poultry and 511,547 milch cows. In addition to the meat packing industry, textiles and wine and beer are of importance. The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, edible oils and the refining of petroleum and petroleum products. There are no mineral deposits of importance.

Communications.—There are about 5,000 miles of national highways, and about 7,508 miles of telegraph, with 48,375 miles of telephones.

In 1955 there were about 1,828 miles of standard gauge railway in use in Uruguay. A national Corporation was formed to administer the railway systems purchased by the Government from four British companies in 1948.

Civil aviation is developing rapidly. An internal airline, PLUNA, which is now owned by the State, runs a daily passenger and limited freight service to the principal capitals of the interior, and has recently extended its services to Southern Brazil, Paraguay, Bolivia and Argentina. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 200,000 pupils in 2,600 state schools and technical and trade schools, and evening courses for adult education. In 1950 there were 26,650 pupils in secondary schools, including 9,700 in the 11 State *liceos* of the capital. The University at Montevideo (founded in 1849) had, in 1950, 8,540 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Over one-third of the nation lives in the capital and all the main daily newspapers are published there.

FINANCE

The Budget Estimate for 1958 was *Pesos* 731,000,000.

	Pesos
Internal Debt (Feb. 28, 1958)	1,269,354,732
External Debt (Feb. 28, 1958)	91,425,739

The monetary unit is the *peso*, which by law is nominally 0·585 grammes fine gold, or the equivalent of U.S. $1,519. The circulating medium is, however, the paper peso, at present linked with the U.S. dollar and the £ sterling at multiple rates giving the peso an average value of around 3s. There is a free financial market for dealings in

dollars and other currencies. The rate for the £ in Dec. 1957 was about *pesos* 12·66 (buying) and for the U.S. dollar *pesos* 4·55 (buying).

TRADE

	1956	1957
Total imports....	$U.S.226,442,100	..
Total exports.....	128,247,700	..
Imports from U.K....	£5,043,144	£7,828,030
Exports to U.K.....	11,867,054	10,720,245

The exports are principally animal and agricultural products, and include frozen and canned meat, wool, hides, wheat, hair, tallow, poultry, sunflower-seed oil and linseed oil; the imports are principally machinery, motor vehicles, fuels and lubricants, raw materials, construction materials, timber, foodstuffs and beverages. Textile imports are declining with the growth of local industry. The principal imports from the U.K. are machinery, motor vehicles, hardware, yarns and chemicals.

CAPITAL, Montevideo. Pop. (Dec. 1954), 900,000. Other centres are Ψ Salto (60,000), Ψ Paysandu (60,000), Ψ Mercedes (23,000), Ψ Colonia (12,000), Ψ Fray Bentos (10,000), and Ψ Maldonado (7,000).

FLAG: Four blue and five white horizontal stripes (surcharged with rising sun on a white ground in the top corner, next flagstaff).

Time of transit from London to Montevideo, by air, 36 hours.

GOVERNMENT OF THE U.S.S.R.

(August, 1958)

The Presidium of the Supreme Soviet (=Council) of the U.S.S.R.

President, Marshal Kliment Yefremovich Voroshilov.
Secretary, M. P. Georgadze.

The Council of Ministers of the U.S.S.R.

Chairman, Nikita Sergeyevich Khrushchev, *appointed* March 27, 1958.
First Vice-Chairmen, F. R. Kozlov; A. I. Mikoyan.
Vice-Chairmen, A. N. Kosygin; I. I. Kuzmin; D. F. Ustinov; A. F. Zasyadko.

MINISTERS

Agriculture, V. V. Matskevich.
Communications, N. D. Psurtsev.
Culture, N. A. Mikhailov.
Defence, Marshal R. Ya. Malinovsky.
Finance, A. G. Zverev.
Foreign Affairs, A. A. Gromyko.
Geological Prospecting and Mineral Wealth Protection, P. Ya. Antropov.
Grain Products, L. R. Korniets.
Higher Education, Professor V. P. Yelyutin.
Internal Affairs (*M.V.D.*), N. P. Dudorov.
Medium Engineering (*Atomic Energy*), Ye. P. Slavsky.
Merchant Marine, V. G. Bakayev.
Power Stations, A. S. Pavlenko.
Public Health, Mrs. M. D. Kovrigina.
Railways, B. P. Beshchev.
Trade (*External*), N. Patolichev.
Trade (*Internal*), D. V. Pavlov.
Transport Construction, Ye. F. Kozhevnikov.

Gosplan (=*State Planning Committee*) *officials of ministerial rank:*

A. A. Ishkov; G. S. Khlamov; M. V. Khrunichev; M. A. Lesechko; Ye. S. Novoselov; G. V. Perov; N. I. Strokin; V. P. Zotov.

Chairmen of State Committees and Boards forming part of the Council of Ministers:

State Planning, I. I. Kuzmin.
Soviet (=*Civil Service*) *Control*, G. V. Yenyutin.
Labour and Wages, A. P. Volkov.
Science and Technology, Yu. Ye. Maksarev.
Aircraft Industry, P. V. Dementyev.
Defence Equipment, K. N. Rudnev.
Radio and Electronics, V. D. Kalmykov.
Shipbuilding, B. Ye. Butoma.
Chemistry, S. M. Tikhomirov.
Building, V. A. Kucherenko.
External Economic Relations, S. A. Skachkov.
State Security (*K.G.B.*), Army Gen. I. A. Serov.
State Bank Board, N. A. Bulganin.
Central Statistical Board, V. N. Starovsky.

The Prime Ministers of the 15 constituent Republics belong *ex officio* to the Council of Ministers of the U.S.S.R. (*see* their names under the individual Republics, *below*).

THE COMMUNIST PARTY OF THE SOVIET UNION

(K.P.S.S.=Kommunisticheskaya Partiya Sovetskogo Soyuza)

Presidium of the Central Committee, A. B. Aristov; N. I. Belyayev; L. I. Brezhnev; Mrs. Ye. A. Furtseva; N. G. Ignatov; N. S. Khrushchev; A. I. Kirichenko; F. R. Kozlov; O. W. Kuusinen; A. I. Mikoyan; N. A. Mukhitdinov; N. M. Shvernik; M. A. Suslov; K. Ye. Voroshilov (*full members*).
J. E. Kalnberzins; A. P. Kirilenko; D. S. Korotchenko; A. N. Kosygin; K. T. Mazurov; V. P. Mzhavanadze; M. G. Pervukhin; N. V. Podgorny; D. S. Polyansky; P. N. Pospelov (*candidates for membership*).
Secretaries of the Central Committee, N. S. Khrushchev (*1st*); A. B. Aristov; N. I. Belyayev; L. I. Brezhnev; Mrs. Ye. A. Furtseva; N. G. Ignatov; A. I. Kirichenko; O. W. Kuusinen; P. N. Pospelov; M. A. Suslov.
Party Control Committee, N. M. Shvernik (*Chairman*); I. P. Boitsov; P. T. Komarov (*Vice-Chairmen*).

EMBASSY OF THE U.S.S.R. IN LONDON
13 Kensington Palace Gardens, W.8.

Ambassador Extraordinary and Plenipotentiary, His Excellency Jacob Alexandrovich Malik (1953).
Minister-Counsellor, A. A. Roshchin.
Counsellors, N. B. Korovin, V. S. Bogatyrev, A. I. Petrusevich, L. A. Korbut, V. P. Gloushkov.
1st Secretaries, D. F. Safonov, A. G. Vislykh, Y. I. Modin, A. V. Krasov, A. A. Kudinov, G. Z. Ioanisyan, V. M. Vasev.
2nd Secretaries, M. N. Zarezov, I. V. Milovidov, S. I. Beglov, Y. B. Teplov, A. I. Vizir, V. P. Gusarov, A. I. Starikov, O. K. Sapunov, N. B. Litvinov.
Military Air Attaché, Col. A. M. Constantinov.
Military Attaché, Lt.-Gen. A. S. Rogov.
Naval Attaché, Capt. 1st Rank N. P. Eliseenko.
Trade Representative, V. A. Kamenskij.
Deputy Trade Representatives, V. I. Smirnov, A. G. Tikhonov.

AREA AND POPULATION

The U.S.S.R. is now composed of 15 Union-Republics (*see* below). Before the outbreak of the war of 1939–45 the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmenian, Uzbek, Tadjik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R. which became the 12th constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Roumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of Bessarabia including the Danube estuary port of Izmail and *Northern Bukovina*, also ceded by Roumania, became part of the Ukraine. The new Soviet-Roumanian frontier was confirmed by the 1947 Peace Treaty with Roumania.

In August, 1940, the three independent Baltic States, *Estonia*, *Latvia* and *Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R under the name of *Transcarpathia*. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of *Memel* (Klaipeda) was incorporated into the Lithuanian S.S.R. By the 1947 Peace Treaty with Finland, the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the war of 1939–45 a nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of *Tuva* within the R.S.F.S.R.

In July, 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (*Karelian*) Republic within the R.S.F.S.R.

No census has been taken since 1939, but in the spring of 1956 the total population of the U.S.S.R. was officially stated to number 200,200,000—an indication of severe manpower losses suffered by the nation during and after the war, both through direct casualties and through the fall of the birth-rate. The total manpower deficit is estimated at well over 30,000,000. The next census is scheduled for January 15, 1959.

Area (1946) and estimated population (1956) of the constituent Republics* of the U.S.S.R.:—

	Republic	Sq. miles	Population*
I.	R.S.F.S.R. (Moscow)	6,617,830	113,200,000
II.	Ukraine (Kiev)	234,000	40,600,000
III.	Belorussia (Minsk)	80,500	8,000,000
IV.	Uzbekistan (Tashkent)	157,250	7,300,000
V.	Kazakhstan (Alma-Ata)	1,067,400	8,500,000
VI.	Georgia (Tbilisi)	30,000	4,000,000
VII.	Azerbaidjan (Baku)	33,200	3,400,000
VIII.	Lithuania (Vilnius)	26,270	2,700,000
IX.	Moldavia (Kishinev)	13,140	2,700,000
X.	Latvia (Riga)	25,000	2,000,000
XI.	Kirghizia (Frunze)	77,020	1,900,000
XII.	Tadjikistan (Stalinabad)	55,040	1,800,000
XIII.	Armenia (Erevan)	11,550	1,600,000
XIV.	Turkmenistan (Ashkhabad)	187,900	1,400,000
XV.	Estonia (Tallinn)	17,480	1,100,000
	Total	8,632,580	200,200,000

The rural population forms about 60 per cent. of the whole.

Racial Composition of the Population (1939).†

Nationality	Number	Percentage of total
Russians	99,019,900	58·41
Ukrainians	28,070,400	16·56
Belorussians	5,267,400	3·11
Uzbeks	4,844,000	2·86
Tartars	4,300,300	2·54
Kazakhs	3,098,300	1·83
Jews	3,020,100	1·78
Azerbaidjani	2,274 800	1·34
Georgians	2,248,600	1·33
Armenians	2,151,900	1·27
Mordovians	1,451,400	0·86
Chuvashians	1,367,900	0·81
Tadjiks	1,229,000	0·72
Kirghiz	884,300	0·52
Daghestan tribes	857,400	0·50
Bashkirs	842,900	0·50
Turkmens	811,800	0·48
Poles	626,900	0·37
Udmurts	605,700	0·36
Mari (Cheremiss)	481,300	0·28
Komi (Zyrians)	408,700	0·24
Others	5,705,600	3·33

*During the Second World War, the Kalmuks, a Mongolian people, were scattered to remote areas in a deportation programme. The Supreme Soviet restored their territory as an autonomous region in 1957 and on July 30, 1958 ordered the restoration of Kalmuk as an autonomous Republic.

† Excluding the population of the Far North.

Constitution

Under the 1936 ("Stalin") Constitution, the *Union of Soviet Socialist Republics* is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people as represented by the Soviets [Councils] of Working People's Deputies"(§ 3), while its economy is based on "the socialist ownership of the instruments and means of production" (§ 4). "The land, its mineral wealth, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises, as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations . . . constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles . . . as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan § 11).

The U.S.S.R. is a federal state, "formed on the basis of a voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the *Soviet of the Union* (elected on the basis of one deputy for every 300,000 of the population) and the *Soviet of Nationalities* (elected at the ratio of 25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory) (§§ 33–35). The *Supreme Soviet* which, as a rule, meets 4 to 5 times a year for about a week, delegates most of its power to its *Presidium* which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the Supreme Soviet (§ 70) and is accountable to it, or, in the intervals between the sessions, to its Presidium (§ 65).

The Supreme Court of the U.S.S.R. and the Special Courts of the U.S.S.R. are elected by the Supreme Soviet for a term of five years (§ 104). Similarly, the Procurator-General, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 113), is appointed by the Supreme Soviet for a term of seven years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118–121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125).

Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that the citizens of the U.S.S.R. "are guaranteed the right to unite in public organizations, trade-unions, co-operative societies, youth organizations, sport and defence organizations, cultural, technical and scientific societies," and that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations of the working people, both public and state."

Local Government.—The State power in regions, provinces, autonomous provinces, territories, districts, towns and rural localities is vested in the *Soviets of Working People's Deputies* (§94), elected by the working people of the respective administrative units for a term of two years (§95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§99). The Union Republics and the Autonomous Republics have Supreme Soviets and Councils of Ministers of their own (§§ 57–63 and 79–88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February, 1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only important activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

The Union Republics possess Ministries of their own for internal affairs, certain branches of heavy and light industry, agriculture, public health, trade, finance and the like. The work of these Ministries is co-ordinated by respective federal Ministries. The Union Republics possess exclusive jurisdiction over such matters as motor transport, housing, social security, municipal affairs, local industry, education and, since 1956, inland water transport and justice. The general trend lately has been toward progressive administrative decentralization or, rather, "deconcentration," particularly in industrial matters.

Religion.—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939–1945. Two administrative bodies, the Council for the Affairs of the Russian Orthodox Church and the Council for the Affairs of Religious Cults, were set up in October, 1943, to provide liaison between the Council of Ministers and the religious bodies. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by the present holder of the See, Patriarch Alexius. A number of seminaries for training of priests, many churches, mosques and synagogues and

several big monasteries have been reopened. Several religious periodicals are now published in the U.S.S.R., but religious propaganda is still banned.

Education.—Under the Constitution, citizens of the U.S.S.R. have the right to education. Since 1956 the entire educational course, including higher education at universities, technical colleges, etc., has been free. In view of an acute shortage of young man-power caused by the abrupt fall of the birth-rate in the years 1942–1946, the government has been discouraging secondary school graduates from going on immediately to the University. Boys and girls of school-leaving age are enjoined to put in two years of practical work in industry and agriculture, and 80 per cent. of all vacancies in the universities are reserved for young people who have accomplished this spell of practical work.

The state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast and efficient government-controlled pool of scientists.

Chronological System.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 16, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

Language, Literature and Arts

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682–1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799–1837) and Mikhail Lermontov (1814–1841). Realistic fiction is associated with the names of Nikolai Gogol (1809–1852), Ivan Turgenev (1818–1883), Fedor Dostoyevsky (1821–1881) and Leo Tolstoy (1828–1910), and later with Anton Tchehov (1860–1904), Maxim Gorky (1868–1936), and Ivan Bunin (1870–1954). Great names in music include Glinka (1804–1857), Mussorgsky (1839–1881), Rimsky-Korsakov (1844–1908), Rubinstein (1829–1894), Tchaikowsky (1840–1893), Rakhmaninov (1873–1949), Skriabin (1872–1915), Prokofiev (1891–1953), Stravinsky (*b.* 1882) and Shostakovich (*b.* 1906).

Finance

On March 1, 1950, the Soviet Government revalued the Rouble (of 100 Kopecks), with the result that nominally £1 now equals R.11·20. This revaluation has not affected the Soviet Union's trade with countries outside her sphere of influence, which continues to be calculated on the basis of dollars. A special, slightly more favourable rate for foreign tourists, has been introduced in 1957 (£1 = R.27·6).

Defence

Defence.—No returns concerning the services have been made for many years. The Soviet *Army* is the world's largest conscript army; probably it has 3,000,000 men now under arms. Conscripts do 2 years' colour service followed by about 8 years in the reserve. The *Air Force*, with about 20,000 aircraft, which forms part of the Army, has made immense progress since the war. There has been a steady replacement of piston-engined planes by jets.

The *Soviet Navy* is believed to possess 500 submarines, 30 modern cruisers and 150 modern destroyers. The total of naval aircraft is estimated at 4,000.

Minister of Defence, Marshal R. Ya. Malinovsky.
Senior Vice-Minister, Marshal I. S. Konev.
Chief of General Staff, Marshal V. D. Sokolovsky.

On May 14, 1955, a Treaty of Friendship, Co-operation and Mutual Assistance was signed in Warsaw between the Soviet Union and its European satellites (Albania, Bulgaria, Eastern Germany, Hungary, Poland, Roumania and Czecho-Slovakia). A unified military command was set up in Moscow, and the Soviet Vice-Minister of Defence Marshal I. S. Konev appointed *Commander-in-Chief of the United Armed Forces.*

Production and Industry

One of the most remarkable aspects of Soviet economy has been the transformation of what was primarily an agricultural country into one of the foremost industrial nations of the world in the course of the six successive *Five Year Plans*. Nevertheless agriculture and stock raising are still the principal occupations and employ about 60 per cent. of the population. The area under crops increased from 292,121,000 acres in 1913 to 459,250,000 in 1955. At the same time, there was a relative decrease of the proportion under grain and an increase of the proportion under industrial crops such as sugar beet, flax, cotton, etc., as well as of that under vegetables and fodder crops. The yield of the chief crops has been steadily rising owing to more rational and scientific methods of farming. Land under crops east of the Volga and the Caspian has greatly increased. Stock breeding has been less of a success. The *live stock* in 1955 included 67,100,000 cattle (66,800,000 in 1928) including 29,200,000 cows (33,200,000 in 1928), 142,600,000 sheep and goats and 52,200,000 pigs.

Two major reforms in the course of 1958 have given greater scope to the collective farms (*kolkhozy*)—the abolition of the State-owned Machine-and-Tractor Stations and the sale of their equipment to the *kolkhozy*; and the reorganization of the system of compulsory deliveries of produce by the farms to the State.

Forests cover nearly 40 per cent. of the whole area of the Union and form a considerable source of wealth.

Trade with U.K.

	1956	1957
Imports from U.K.	£26,324,135	£37,378,311
Exports to U.K.	55,099,507	70,657,945

Communications

Railways.—Length of railways in use:

Year	Miles	Year	Miles
1913	44,551	1950	72,637
1928	47,772	1955	74,998
1940	65,926		

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands), traversed as it is by trunk lines between Europe and

Asia which enter Siberia *vid* Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Construction of new railways is subordinated to the needs of the Five Year Plans. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektnaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. Lines envisaged under the new Five Year Plan include the Stalinsk-Magnitogorsk trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batum, Taganrog, Rostov, Kerch, Sebastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, icebound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carries about 139,000,000 tons of freight per year. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Stalin Canal*, and the *Moscow-Volga Canal*. The 63-miles long *Volga-Don* Canal, linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May, 1952.

Posts and Telegraphs.—In 1955 the post offices handled about 3,778,000,000 letters and post-cards and 203,000,000 telegrams.

FLAG OF THE U.S.S.R.—Red, with star above hammer and sickle.

NATIONAL DAY OF U.S.S.R.—November 7 (Commemorating the Bolshevik *coup d'état* of 1917).

BRITISH EMBASSY

(Sofiiskaya Naberezhnaya 14, Moscow)

British Ambassador, His Excellency Sir D'Arcy Patrick Reilly, K.C.M.G., O.B.E. (1957). £4,250

Minister, W. H. Young, C.M.G.

1st Secretaries, R. D. C. McAlpine (*Head of Chancery*); P. C. H. Holmer (*Commercial*); E. E. Orchard (*Head of Russian Secretariat*); Dr. J. J. Furlong (*Medical Officer*).

2nd Secretaries, A. B. Urwick; F. R. Love; R. F. Muston (*Vice-Consul*); R. F. D. Hutchings; H. J. Spence; T. H. R. Rigby; R. H. Fowler (*Ministry of Works representative*).

3rd Secretaries, D. M. D. Thomas; J. B. Ure; M. T. S. Blick; N. Flower; G. Hay; K. B. Johnson; C. G. F. James, M.B.E.

Naval Attaché, Captain H. R. B. Newton, D.S.C., R.N.

Assistant Naval Attachés, Lt. Cdr. M. K. McGwire, R.N.; Lt. Cdr. C. H. Seaward, R.N.

Military Attaché, Brig. D. A. D. Young.

Assistant Military Attaché, Major A. M. Hall.

Air Attaché, Air Commodore P. J. Sanders, D.F.C.

Assistant Air Attachés, S/Dr. P. V. Dale; S/Ldr. O. G. Taylor; F/Lt. A. R. Stevens.

There are no British Consulates in the U.S.S.R., apart from the Consular Section attached to the Embassy.

I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

Chairman of the Presidium of the Supreme Soviet, M. P. Tarasov.

Chairman of the Council of Ministers, D. S. Polyansky.

The R.S.F.S.R. has no Communist Party Central Committee of its own; there is, however, a Bureau of the Central Committee of the CPSU for the R.S.F.S.R., with N. S. Khrushchev as its Chairman.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 64 per cent. of the total population. It consists of 15 Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Daghestan, Kabardin-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North-Ostetian, Tartar, Udmurt and Yakut A.S.S.R.'s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces and 4 national territories; 48 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Saratov, Sakhalin, Smolensk, Stalingrad, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Vologda, Voronezh and Yaroslavl), which in their turn include 6 national territories; and 1 autonomous province (Tuva).

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. lies in all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Ob with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are

also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus and in the area between the Volga and the Ural (the so-called "Second Baku"). The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kerch in the Crimea, near Kursk, Tula, Lipetsk, Khoper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. In the eastern part of this zone, between the Volga and the Urals, cericulture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Crimea, Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown in Southern Crimea and on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution, with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leninerad are still the two largest industrial centres in the country. Most of the oil produced in the U.S.S.R. now comes from two areas in the R.S.F.S.R.—the Bashkir and Tartar Autonomous Republics. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Stalinsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Stalingrad, Gorky, Saratov, Grozny, Rostov and Taganrog.

CAPITAL, Moscow. Population (estimated 1958), 4,847,000. Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Ψ Leningrad (before the First World War "St. Petersburg" and from 1914–1921 "Petrograd") has a population (estimated, 1956) of 3,176,000.

Other cities with populations exceeding 500,000 (1956) are:—

Gorky (Nizhny-Novgorod)	876,000
Kuibyshev (Samara)	760,000
Novosibirsk (Novonikolayevsk)	731,000
Sverdlovsk (Yekaterinburg)	707,000
Chelyabinsk	612,000
Kazan	565,000
Ψ Rostov-on-Don	552,000
Perm	538,000
Stalingrad (Tsaritsyn)	525,000
Saratov	518,000
Omsk	505,000

About three-quarters of the population are Russians.

Ψ Seaport.

II.—THE UKRAINE

Chairman of the Presidium of the Supreme Soviet, D. S. Korotchenko.
Chairman of the Council of Ministers, N. T. Kalchenko.
Minister of Foreign Affairs, L. F. Palamarchuk.
First Secretary of the Party Central Committee, N. V. Podgorny.

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 26 provinces—Cherkasy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Drogobych, Khmelnitsky, Kharkov, Kherson, Kiev, Kirovograd, Lugansk, Lvov, Nikolayev, Odessa, Poltava, Rovno, Stalino, Stanislav, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Zaporozhye and Zhitomir.

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1955, the Ukraine provided 37 per cent. of the total Soviet steel, 39 per cent. of metal goods and 32 per cent. of coal. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL (since 1934), Kiev, the oldest city in Russia, founded in the 9th century A.D., was the capital of the Russian State from 865–1240. Population (estimated, 1956), 991,000. Other towns with population (1956) exceeding 500,000 are:—

Kharkov	877,000
Stalino (Yuzovka, *i.e.* Hughes-ovka)	625,000
Ψ Odessa	607,000
Dnepropetrovsk (Yekaterinoslav)	576,000

III.—BELORUSSIA.
(White Russia)

Chairman of the Presidium of the Supreme Soviet, V. I. Kozlov.
Chairman of the Council of Ministers, N. E. Avkhimovich.

Minister of Foreign Affairs, K. V. Kiselev.
First Secretary of the Party Central Committee, K. T. Mazurov.

The Belorussian S.S.R., lying in the western part of the European half of the U.S.S.R., was formed early in 1919. It now consists of seven provinces (Brest, Gomel, Grodno, Minsk, Mogilev, Molodechno and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

CAPITAL, Minsk. Population (1956), 412,000.

In 1939, Belorussians made up four-fifths of the population, with Russians and Jews coming next, but territorial and demographic changes since then must have greatly altered this proportion.

IV.—UZBEKISTAN

Chairman of the Presidium of the Supreme Soviet, Sh. R. Rashidov.
Chairman of the Council of Ministers, M. Z. Mirza-Akhmedov.
First Secretary of the Party Central Committee, S. K. Kamalov.

The Uzbek S.S.R., economically the most important of the Central-Asiatic Republics, was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 9 provinces (Andizhan, Bokhara, Ferghana, Kashka-Darya, Khorezm, Namangan, Samarkand, Surkhan-Darya and Tashkent). It lies between the high Tienshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include oil (in the Ferghana valley and in Khaudag), coal (Angren) and sulphur (Shorsu).

There is a major agricultural machinery plant at Tashkent and a chemical combine at Chirchik. Uzbekistan is the main cotton-growing area of the U.S.S.R. producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL, Tashkent. Population (1956), 778,000, Samarkand (165,000) contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulug-bek, Tamerlane's astronomer-grandson, and a 15th-century observatory, recently restored.

V.—KAZAKHSTAN.

Chairman of the Presidium of Supreme Soviet, Zh. A. Tashenev.
Chairman of the Council of Ministers, D. A. Kunayev.
First Secretary of the Party Central Committee, N. I. Belyayev.

The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of 16 provinces (Akmolinsk, Aktyubinsk, Alma-Ata, Djambul, East-Kazakhstan, Guryev, Karaganda, Kustanay, Kokchetav, Kzyl-Orda, North-Kazakhstan, Pavlodar, Semipalatinsk, South-Kazakhstan, Taldy-Kurgan and West-Kazakhstan).

Kazakhstan is a country of arid steppes and semi-deserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tien-shan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan contains rich deposits of non-ferrous metals: copper in Kounrad, Djezkazgan and Boshchekul, other metals in the Altai, in the Kara-Tau Mounts, and elsewhere. It also contains an important coal-producing area (Karaganda) ranking third in the U.S.S.R. and an oil-bearing area (near Emba). Major centres of metal industry exist now in the Altai Mountains, in Chimkent, North of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the North and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production. During 1954 and 1955 some 45,000,000 acres have been ploughed up.

The Kazakhs make up about three-fifths of the population, the Russians, about one-fifth. There are also many Ukrainian settlers, mainly in the north and some Uzbeks in the south.

CAPITAL, Alma-Ata (formerly Verny). Population (1956) 330,000. Karaganda has an estimated population of 350,000.

VI.—GEORGIA

Chairman of the Presidium of the Supreme Soviet, M. D. Chubinidze.
Chairman of the Council of Ministers, G. D. Djavakhishvili.
First Secretary of the Party Central Committee, V. P. Mzhavanadze.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjaria) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Smaller Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Sura Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rion lowlands are sub-tropical in their climatic character. The most important mineral deposits are manganese (Chiatury), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is leading as regards production of manganese in the U.S.S.R. There are also many oil refineries. Viniculture and tobacco-growing are the two main agricultural industries. The Black Sea coast harbours many famous holiday resorts. Georgians make up about three-fifths of

the population, the remainder being composed of Armenians, Russians, Azerbaidjani and Osetians.

CAPITAL, Tbilisi (Tiflis). Population (1956), 635,000.

VII. AZERBAIDJAN

Chairman of the Presidium of the Supreme Soviet, I.K. Abdullayev.
Chairman of the Council of Ministers, V. Yu. Akhundov.
First Secretary of the Party Central Committee, I. D. Mustafayev.

The Azerbaidjan S.S.R. occupies the eastern part of Transcaucasia, on the shores of the Caspian Sea, and borders on Persia. It was formed in 1920. Between 1922–1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the middle reaches of its tributary Aragva. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaidjan has a continental climate. The land requires artificial irrigation. The Republic is very rich in minerals, particularly in oil. The Baku oilfields form the second-largest oil-producing area in the U.S.S.R. A large power station on the Kura (Mingechaur) was completed in 1954. Azerbaidjan is also important as a cotton growing area. The Azerbaidjani (Turks) make up three-fifths of the population of the Republic, Armenians, about 12 per cent., and Russians, about 10 per cent.

CAPITAL, ΨBaku. Population (1956). 901,00.

VIII.—LITHUANIA

Chairman of the Presidium of the Supreme Soviet, J. I. Paleckis.
Chairman of the Council of Ministers, M. J. Šumauskas.
First Secretary of the Party Central Committee, A. J. Sniečkus.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941, until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 29 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.

In 1923, the Lithuanians made up 84·2 per cent. of the population, Jews, 7·6, Poles, 3·2, and Russians, 2·5 of the population. The majority of Jews were exterminated by the Germans, and large numbers of Lithuanians and Poles deported by the Soviets.

CAPITAL, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after invasion and collapse of Poland in 1939, and recaptured by Soviet forces in July, 1944). Population (1956), 200,000, Kaunas (Kovno) has an estimated population of 195,000.

IX.—MOLDAVIA

Chairman of the Presidium of the Supreme Soviet, I. S. Koditsa.
Chairman of the Council of Ministers, A. F. Diorditsa.
First Secretary of the Party Central Committee, Z. T. Serdyuk.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Roumania with the Pruth forming the frontier. In 1918, Roumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Roumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Roumanians between 1941–1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills, and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. A radical agrarian reform has been carried out under the Soviet régime. Moldavians make up 65 per cent. of the population, with Ukrainians, Russians and Jews next. In the south there are colonies of Bulgarians.

CAPITAL, Kishinev (Chisinau). Population (1956) 190,000.

X.—LATVIA

Chairman of the Presidium of the Supreme Soviet, K. M. Ozoliņš.
Chairman of the Council of Ministers, V. T. Lacis.
First Secretary of the Party Central Committee, J. E. Kalnberzinš.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

In 1940, Latvians made up three-quarters of the population, with Russians and Jews coming next. Most of the Jews were exterminated by the Germans, and many Latvians deported by the Soviets.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940–41 and again after 1944.

CAPITAL, ΨRiga. Population (1956) 565,000.

XI.—KIRGHIZIA

Chairman of the Presidium of the Supreme Soviet, T. Kulatov.
Chairman of the Council of Ministers, K. D. Dikambayev.
First Secretary of the Party Central Committee, I. R. Razzakov.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the

south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936, a Union Republic. It consists now of five provinces (Djalal-Abad, Frunze, Issyk-Kul, Osh and Tien-Shan). The Kirghiz Republic is a mountainous country, the major part being covered by the ridges of the Central Tien-Shan, while mountains of the Pamiro-Alai system occupy its southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Industry is insignificant, but some mining is done. A number of railways have been built under the Five Year Plans. About two-thirds of the population are Kirghiz, followed by Russians and Ukrainians in the north and Uzbeks in Eastern Ferghana.

CAPITAL, Frunze (formerly Pishpek). Population (1956), 190,000.

XII.—TADJIKISTAN

Chairman of the Presidium of the Supreme Soviet, M. Rakhmatov.
Chairman of the Council of Ministers, N. Dodkhudoyev.
First Secretary of the Party Central Committee, T. Uldzhabayev.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It consists of the Gorno-Badakhshan Autonomous Province and of four Provinces (Garm, Kulyab, Kurgan-Tepe and Leninabad).

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., the Stalin Peak (24,590 feet), in the centre the high ridges of the Pamir-Altai system. Plains are formed by wide stretches of the Syr-Darya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. About 60 per cent. of the population are Tadjiks (linguistically and culturally akin to the Persians), about 24 per cent., Uzbeks, the rest, Russians and Kirghiz.

CAPITAL, Stalinabad (formerly Dyushambe). Population (1956), 191,000.

XIII.—ARMENIA

Chairman of the Presidium of the Supreme Council, Sh. M. Arushanyan.
Chairman of the Council of Ministers, A. Ye. Kochinyan.
First Secretary of the Party Central Committee, S. A. Tovmasyan.

The Armenian S.S.R. occupies the south-western part of Transcaucasia; it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is *Mount Ararat* (17,160 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300.

More than four-fifths of the population are Armenians.

CAPITAL, Erevan. Population (1956), 385,000.

XIV.—TURKMENISTAN

Chairman of the Presidium of the Supreme Council, A. Sariev.
Chairman of the Council of Ministers, D. D. Karayev.
First Secretary of the Party Central Committee, S. Babayev.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and Afghanistan. It was formed in 1924 and consists of five Provinces (Ashkhabad, Chardjou, Krasnovodsk, Mary and Tashauz). The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The principal industries are agriculture and stock-raising, cotton, wool, astrakan furs, carpets and horses being the principal products. Minerals include oil and sulphur. Most of the land under plough is artificially irrigated. Silk industry is of an old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up 70 per cent. of the population, with Russians coming second, and Uzbeks, third.

CAPITAL Ashkhabad (formerly Askhabad, Poltoratsk). Population (1956) 142,000.

XV.—ESTONIA

Chairman of the Presidium of the Supreme Council, I. G. Elchfeld.
Chairman of the Council of Ministers, A. A. Mürisepp.
First Secretary of the Party Central Committee, I. G. Käbin.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941–44, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, woodworking, etc.

The population consists of Estonians and Russians.

CAPITAL, Ψ Tallinn (formerly Reval). Population (1956), 257,000.

VENEZUELA

(La Republica de Venezuela)

President of the Provisional Government Junta, Rear-Admiral Wolfgang Larrazábal Ugueto, *assumed office* Jan. 23, 1958.

Ambassador in London, Señor Don Manuel Dagnino (1956).
Counsellor, Señor Luis Alberto Olavarria.
1st Secretary, Américo Rincón.
3rd Secretary, Dr. Carlos Briceño Vasquèz.
Naval Attaché, Commander Tulio Pérez Rojas.
Assistant Naval Attaché, Lt.-Cdr. Alvaro del' Castillo Jantzen.
Air Attaché, Lt.-Col. Leonardo Gómez Muñoz.
Cultural Attachée, Señora Miriam Blanco-Fombona de Hood.

There are Consulates-General at *London* and *Liverpool* and a Consulate at *Birmingham*.

Area and Population.—The most northerly Republic of South America, situated approximately between 1° 40′ S. lat. and 12° 26′ N. lat. and 59° 52′–73° 15′ W. long. It consists of one Federal District, 20 states and 2 territories. The best authorities calculate the actual present area to be approximately 352,051 square miles. The population on Dec. 31, 1956 was 6,038,860.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the State of *Nueva Esparta*. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of *Patos* (170 acres) about 3 miles from the mainland.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parma contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (9,000 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Risquez, claims to have discovered the source of the Orinoco, on Nov. 27, 1951, at 63° 15′ W. long., 2° 18′ N. lat., and about 1,100 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Malpures Cataract, some 200 miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 24 ft. draft, as far as Puerto Ordaz (about 150 miles up-stream). Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October the dry, cooler season from November to March.

Government.—Venezuela was visited by Columbus in 1498, and in 1499 by Alonzo de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Los Taguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47. Venezuela formed part of the Federal Republic of Colombia from 1822–30, since which time it has been independent.

In 1948, power was assumed by a Military Council of which Col. Carlos Delgado Chalbaud was President. Congress was dissolved and the Supreme Court replaced. On Nov. 13, 1950, Col. Delgado Chalbaud was assassinated. A Council (Junta) of Government was formed on Nov. 27, under the Presidency of Dr. German Suarez Flamerich. On Nov. 30, 1952, polling took place to elect a new Constituent Assembly, which published a new Constitution on Nov. 30, 1952, and chose a Senate and Chamber of Deputies. The validity of these elections was subsequently queried, but Col. Marcos Pérez Jiménez declared himself elected as the Provisional President. On April 19, 1953, with the passing of the new Constitution, he was declared Constitutional President for a term of five years. Before the expiry of this term, however, on January 23, 1958, his military dictatorship was overthrown by a popular and military uprising, and a Government Junta, presided over by Rear-Admiral Wolfgang Larrazábal Ugueto, assumed the temporary government of the country with the

announced intention of eventually holding genuinely free elections and steering the country back to constitutional government and democracy.

Production and Industry.—The produce of Venezuelan forest and fields includes the following: (*a*) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (*b*) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, groundnuts, potatoes, tomatoes, other vegetables, sisal, tobacco. There is an extensive beef and dairy farming industry, and although the country does not produce all the grain and other food products it requires, it has now practically achieved self-sufficiency in meat and sugar. Food and drink imports were valued at the equivalent of £52,976,000 in 1957. An autonomous Government department, the Corporacion Venezolana de Fomento, and other Government agencies are endeavouring, by loans, investment and other means, to foster agricultural and industrial development.

The principal industry is that of *Petroleum.* The production of the oilfields is shown below (in barrels of 42 gallons):—

Year	Barrels	Year	Barrels
1942	147,000,000	1950	546,730,000
1943	177,600,000	1951	622,187,000
1944	257,000,000	1952	658,427,000
1945	323,400,000	1953	644,221,000
1946	388,500,000	1954	691,181,000
1947	438,000,000	1955	785,237,000
1948	490,000,000	1956	899,183,000
1949	482,300,000	1957	1,014,929,190

Before the war of 1939–45 over 80 per cent. of the crude oil was exported to Netherlands' West Indies refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Other refineries are being operated at Caripito, San Lorenzo, Puerto La Cruz, Tucupito and El Chaure, and about 25 per cent. of the total output of crude oil was refined in Venezuela in 1957. The Venezuelan Government, under existing agreements, receives over 50 per cent. of the profits from oil. The development of rich deposits of iron ore in South Venezuela will exert a considerable influence on the Venezuelan economy in the future. Production, which began in 1950, has increased to 15,377,941 metric tons in 1957.

Other industries include gold, diamonds and asbestos; cotton, wool and rayon weaving; manufacture of paper, cement, beer, tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly, preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, biscuits and other foods; fishing and fish-canning; pearl fishing. New industries planned include a steelworks, petrochemicals, plate glass, flour milling, and the manufacture of paper from bagasse.

Language and Literature.—Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 23 daily newspapers in Venezuela, of which 8 are published in Caracas, 75 weeklies and 23 fortnightlies. There are also 233 other periodicals, mostly monthlies, but including also some appearing once, twice or three times a week.

Education is free and primary education compulsory from the age of 7 years. There were (1956–57), 6,791 primary schools, with 694,193 pupils and 297 secondary schools, with 52,420 pupils. There are Universities at Caracas, Mérida and Maracaibo.

FINANCE

	1956–57 *Bolivares*	1957–58 *Bolivares*
Revenue	5,521,220,843	4,411,000,000
Expenditure	3,723,182,323	6,121,000,000
Internal Debt (Dec. 31, 1957)		23,000,000

The ordinary budget for 1957–58 totalled *Bs.*2,000,000,000 (not including special credits from the extraordinary public works programme). The 1958–59 budget has been set at *Bs.*5,818,400,000, which includes total expenditure on all programmes, the system of special credits having been terminated.

The market exchange rate of the *Bolivar*, of 100 *Centimos*, at present fluctuates between *Bs.*9·32= £1 (buying) and *Bs.*9·40=£1 (selling). There are special buying rates for petroleum, coffee and cocoa. (*See also* p. 84.)

Communications.—There are about 15,800 miles of all-weather roads. The State has now acquired all but a very few of the railway lines, whose total length is only some 760 miles. A substantial railway reorganization plan has been drawn up which will involve the abandonment of four systems with differing gauges and the construction of new lines of standard gauge. Work has been completed on one of these lines (Puerto Cabello–Barquisimeto). Several British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with New York, Miami, Bermuda, Havana, Lima, Bogotá, the West Indies, Lisbon, Madrid and Rome. The Venezuelan state-owned merchant fleet controls a total tonnage of about 250,000. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled and 62 commercial broadcasting stations. The latter draw their income from commercial broadcasting. There are 3 television stations in operation in Caracas, and 2 in Maracaibo.

TRADE

	1956	1957
Imports	*Bs.* 3,438,443,383	*Bs.* 6,140,317,960
Exports	7,114,193,637	7,928,360,591

The principal imports are machinery, textiles, foodstuffs, steel and iron and chemicals. The principal exports are petroleum (92 per cent. in 1957), iron ore, coffee and cocoa. The first shipments of iron ore were made in 1950, and exports rose to a value of *Bs.*382,954,197 in 1957.

	1956	1957
Imports from U.K.	£33,253,209	£39,654,766
Exports to U.K.	39,217,038	75,450,869

CAPITAL, Caracas (3,000 ft.). Population, December, 1956, 1,102,230; other principal towns are Maracaibo (289,723), Barquisimento (164,908), Valencia (124,376), Maracay (95,137), San Cristobal (77,816), Cumaná (68,756) and Ciudad Bolivar (42,177).

FLAG: Three horizontal bands, yellow, blue, red (with seven white stars on blue band).

Asst. Press Attaché, Ante Ilić.
Asst. Commercial Attaché, Djordje Poznanović.

Area and Population.—Yugoslavia is a Federation comprising the People's Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the autonomous province of the Vojvodina and the autonomous region of Kosovo and Metohija (Kosmet). In July, 1946, Pelagosa and adjacent islands with all territory east of the line known as the *French Line* in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 1945. Zone B, an area of 200 square miles with a population of 73,500, included the towns of Kopar (Capodistria), Piran (Pirano) and Novi Grad (Cittanuova). The area has now been divided between the Republics of Slovenia and Croatia. The area of Yugoslavia in 1948 was estimated at 255,804 square kilometres (98,725 square miles) and the population in 1958 at 18,387,000. As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

Montenegro (*Crna-Gora*) was united to Serbia by a decision of the Montenegrin Parliament in November, 1918, when King Nicholas was deposed.

Government.—Stretching from Central Europe to the Balkans, different parts have been subjected to different historical, religious, cultural and geographical influences. *Serbia* came early under the Orthodox Church and then passed 500 fallow years of subjection to the Turkish Empire. In *Bosnia*, an outpost of the Turkish Empire, large numbers of the population were forcibly converted to Islam. *Croatia* and *Slovenia*, on the other hand, came under the Roman Catholic Church, and in later years were subjected to the civilizing influence of the Austro-Hungarian Empire. Such factors have, despite community of race, hampered the process of fusion into a united nation. In Jan. 1929, King Alexander abrogated the Constitution and instituted an absolute monarchy for two years, when it was superseded by a modified constitution. On King Alexander's assassination in 1934, his brother, Prince Paul governed as Regent, with two others, on behalf of the young King Peter. Faced with the threat of German invasion, the Government came to an accommodation with Hitler on March 25, 1941, but was overthrown two days later by a popular rising, which placed King Peter at the head of the state. The country was invaded by the German and Bulgarian armies on April 6, 1941, and the King and Government went into exile. The invaders parcelled up the country, placing Serbia under a puppet government, Dalmatia under Italian administration and Croatia under the so-called independent régime of Pavelić (Ustashi). Two main resistance movements developed, the Chetniks under Mihajlović, and the Partisans under Marshal Josip Broz commonly known as Marshal Tito. The latter emerged from the turmoil of the war years as the most potent force in the country and the modified constitution was superseded by an agreement signed on November 1, 1944, by the Yugoslav Prime Minister (Dr. Ivan Subasić) and Marshal Tito as leader of the National Liberation Committee, recognizing a provisional parliament. On March 7, 1945, the agreement was confirmed by the Royal Yugoslav government in London, and a provisional government was set up in Belgrade.

On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupshtina and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November, 1953 and March, 1958.

Defence.—The Army, Navy and Air Force on a peace footing consist of 370,000 officers and men, the war strength being about 1,250,000.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. According to the 1948 Census, 49·53 per cent. of the population is Orthodox, 36·7 per cent. Catholic, 1·14 per cent. Protestant and other Christian denominations, 12·52 per cent. Moslem and 0·04 per cent. Jews. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1957 there were 14,116 elementary schools with 43,376 teachers and 1,660,000 pupils, 2,467 secondary schools with 28,596 teachers and 599,000 pupils and 82 training colleges for teachers with 21,020 students. There are five universities, Belgrade, Zagreb, Ljubljana, Sarajevo and Skoplje, including 98 faculties and schools with 71,852 students and 11 art academies with 1,320 students.

Language and Literature.—The languages of the country are Serbo-Croat, Slovenian and Macedonian, all South Slav tongues. Serbo-Croat predominates and is the language of the Federal Government. In Serbia and Macedonia the Cyrillic script is used and in the rest of the country the Latin; Hungarian, Roumanian and Albanian are also used in certain districts. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 3 Serbian daily newspapers in Belgrade, 3 Slovene dailies in Ljubljana (Laibach), 3 Croat dailies in Zagreb, and daily papers at Skoplje, Sarajevo, Novi Sad, Rijeka, Split and Maribor.

Production and Industry.—The principal occupation is agriculture. Over 60 per cent. of the economically active population is so engaged. The main crops are wheat and maize, of which the average yield in the period 1948–57 was 2,190,000 and 3,520,000 tons respectively. The forest areas produced some 7,768,000 cubic metres of timber in 1957. According to Yugoslav official estimates the livestock population in 1957 was approximately as follows: Horses 1,307,000; cattle 4,947,000; sheep 10,622,000; pigs, 3,725,000; poultry, 25,992,000. The Government has been pursuing a policy of industrial expansion and a small amount of capital equipment is now being exported. Minerals are a great source of wealth, particularly in the central regions. Estimated production in 1957 included the following ('000 tons): Hard coal, 1,227; brown coal, 8,525; lignite, 8,255; copper, 64; lead, 79; iron ore, 1,876; pig iron, 714; steel, 1,049; aluminium, 18; zinc, 17 and mercury, 0·4. Antimony, pyrites and manganese ores are also produced.

Finance

Federal Budget (estimated figures).	1957 *Dinars*
Revenue	198,300,000,000
Expenditure	186,200,000,000

The Yugoslav *Dinar* has a nominal value of 2/7 penny, the official exchange rate being 840*D*=£1 (*see also* p. 84).

Communications.—In 1957 there were approximately 7,375 miles of standard and narrow gauge railway. There are also 20,714 miles of telephone lines and 21,560 miles of telegraph lines. Yugoslavia has a long seaboard on the Adriatic coast. The principal Yugoslav Ψports are Rijeka, Sibenik, Split, Zadar, Dubrovnik and Kotor (Carraro) and new ports are under construction at Ploče and Bar. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes. There are many international air services operated by the Yugoslav airline and by foreign airlines.

Trade

	1956	1957
Imports from U.K. .	£8,771,584	£11,635,407
Exports to U.K.....	7,337,146	9,272,100

The principal exports are timber and wood products, box metals (lead, iron and steel), livestock, meat and meat products, fruit, hops and tobacco. The imports are chiefly wheat, textile raw materials and textiles, machinery, coal, petroleum, chemical fertilisers and base metals.

The chief imports from U.K. are machinery, tractors and textile raw materials and yarns.

CAPITAL, Belgrade (*Beograd*=White City), population (1957) 500,000. Other towns are Zagreb (or Agram) (420,000), Ljubljana or Laibach (145,000), Sarajevo (155,000), Skoplje (156,000), Rijeka (Fiume with Susak) (80,000), ΨSplit (82,000), Maribor (86,000) and Novi Sad (93,000).

NATIONAL FLAG: Blue, white, red with a five-point red star superimposed.

NATIONAL DAY: Founding of Yugoslav Federal Republic (November 29).

Price 35*s.* net.

NORTH ATLANTIC TREATY ORGANIZATION

Temporary Headquarters: Palais de Chaillot, Paris

Secretary-General and Chairman of the North Atlantic Council, M. Paul-Henri Spaak (Belgium).

The North Atlantic Treaty was signed on April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952 and the Federal Republic of Germany upon the coming into force of the Paris Agreements in 1955.

The original machinery set up to carry out the provisions of the Treaty has undergone considerable modification during the passage of the North Atlantic Treaty Organization from the planning to the implementing stage. Since April, 1952, the North Atlantic Council, the principal body of the Treaty Organization, has been in continuous session in Paris. Member Governments are represented by permanent representatives, who head national delegations of advisers and experts. Ministerial meetings of the Council are held periodically. Heads of Governments may attend meetings of the Council in person. A meeting of Heads of Governments took place in December, 1957. Otherwise, at ministerial meetings, Governments are represented by their Ministers for Foreign Affairs, or by other ministers, according to the nature of the agenda. Each year a Foreign Minister is President of the Council; the Secretary-General is Chairman.

The Council is now directly responsible for the tasks performed before April, 1952, by the former Council Deputies, Defence Production Board and Financial and Economic Board. Specialized functions, such as those assigned to the Planning Board for Ocean Shipping, to the Petroleum Planning Committee, and to other subsidiary bodies, are directed by the Council.

The Secretary-General is appointed by and is responsible to the Council. He has direct access to all NATO agencies and to member Governments, and is responsible for organizing the work of the International Secretariat.

The Secretary-General is assisted by a Deputy Secretary-General, Baron Adolph Bentinck (*Netherlands*), and by three Assistant Secretaries-General, who are: Signor Alberico Casardi (*Italy*), for Political Affairs; M. François-Didier Gregh (*France*) for Economic and Financial Affairs; M. E. H. Meili (*U.S.A.*) for Production and Logistics.

The senior military authority in NATO is the Military Committee (composed of a Chief-of-Staff of each member country). Its executive agency is the Standing Group which meets in Washington. The Standing Group is composed of one representative each of France, the U.K. and the U.S.A.—currently Lt.-General Jean M. Piatte (*France*), Admiral Sir Michael Denny (*U.K.*) and Admiral Walter F. Boone (*U.S.A.*). It is responsible for higher strategic direction throughout the North Atlantic Treaty area.

Of the five original Regional Planning Groups one remains: the Canada-U.S.A. Regional Planning Group, with headquarters in Washington. The functions of three of the remainder have been taken over by SHAPE (Supreme Headquarters Allied Powers in Europe, under General Lauris Norstad, *U.S.A.*) and its regional commands. The fourth has been absorbed in the Atlantic Command (SACLANT) under Admiral Jerauld Wright (*U.S.A.*). The Allied Command Channel is exercised jointly by Admiral Sir Guy Grantham (*U.K.*) and Air Marshal Sir Bryan Reynolds (*U.K.*).

BUCHAN'S WEATHER PERIODS OR RECURRENCES OF WEATHER

Dr. Alexander Buchan, F.R.S., Secretary of the Scottish Meteorological Society, published in 1867 a paper in the Journal of that Society entitled "Interruptions in the regular rise and fall of temperature in the course of the year." Buchan gave six cold periods and three warm periods, based on his examination of the mean daily temperature as recorded at stations in Scotland covering long periods. The cold periods were February 7–14, April 11–14, May 9–14, June 29–July 4, August 6–11, November 6–13, and the warm periods July 12–15, August 12–15, and December 3–14. This early work aroused considerable interest later. It should be noted, however, that Buchan claimed no more than the existence of tendencies for short spells of relatively cold or warm weather to occur at certain times of the year.

In recent years these smaller fluctuations of weather super-imposed on the normal seasonal changes have been examined from the aspect of tendencies to stormy or anticyclonic spells over the British Isles and have been referred to as "singularities." Stormy periods are relatively warm in winter and cool in summer. The following tendencies have been given:—Jan. 5–17 stormy; Jan. 18–24 anticyclonic; Jan. 24–Feb. 1 stormy; Feb. 8–16 anticyclonic; Feb. 21–25 cold; Feb. 26–Mar. 9 stormy; Mar. 12–19 anticyclonic; Mar. 24–31 stormy; April 10–15 stormy; April 23–26 unsettled; June 1–21 summer monsoon; July 10–24 warm; Aug. 20–30 stormy; September 1–17 anticyclonic; Sept. 17–24 stormy; Sept. 24–Oct. 4 anticyclonic; Oct. 5–12 stormy; Oct. 16–20 anticyclonic; Oct. 24–Nov. 13 stormy; Nov. 15–21 anticyclonic; Nov. 24–Dec. 14 stormy; Dec. 18–24 anticyclonic; Dec. 25–Jan. 1 stormy.

It is interesting to compare these generalized statements with the daily values given for Greenwich. The cold or warm spells rarely cover precisely the periods given for the Buchan Spells, but cold or warm spells can be found fairly near to some of these dates.

WIND FORCE MEASURES

The *Beaufort Scale* of wind force has been accepted internationally and is used in communicating weather conditions. Devised originally by Admiral Sir Francis Beaufort in 1805, it now consists of these numbers 0–17, each representing certain strength or velocity of wind.

Scale No.	*Wind Force*	*M.p.h.*	*Knots*	*Scale No.*	*Wind Force.*	*M.p.h.*	*Knots*
0	Calm	1	1	9	Strong gale	47–54	41–47
1	Light air	1–3	1–3	10	Whole gale	55–63	48–55
2	Slight breeze	4–7	4–6	11	Storm	64–72	56–63
3	Gentle breeze	8–12	7–10	12	Hurricane	73–82	64–71
4	Moderate breeze	13–18	11–16	13	—	83–92	72–80
5	Fresh breeze	19–24	17–21	14	—	93–103	81–89
6	Strong breeze	25–31	22–27	15	—	104–114	90–99
7	High wind	32–38	28–33	16	—	115–125	100–108
8	Gale	39–46	34–40	17	—	126–136	109–118

PASSPORT REGULATIONS

Applications for Foreign Office passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Local Office of the Ministry of Labour and National Service.

London.—Clive House, Petty France, S.W.1. (Hours: 9.30–4.30.) Tel., Abbey: 8010.

Liverpool.—India Buildings, Water Street, Liverpool 2. (Hours: 9.30–4.30.) Tel., Central: 9411.

Glasgow.—1 Princes Square, 48 Buchanan Street, Glasgow, C.1. (Hours, 9.30–4.30.) Tel., Central: 0260.

Ministry of Labour, Local Offices.—(Hours, 9–5.) (Open for urgent cases only, on Saturday mornings.)

The Passport Offices are also open for cases of special emergency only, between 4.30 p.m. and 6 p.m. (Saturdays 12.30–4) and in *London* on Sundays and Public Holidays between 10 a.m. and noon.

To facilitate the issue of passports applicants are recommended to make personal application to any one of the above mentioned offices. If it is not possible to make personal application at one of the Passport Offices or Ministry of Labour Local Offices, completed forms of applications should be sent to one of the three Passport Offices, with photographs, supporting documents and the fee of £1 10s. Remittances sent with postal applications should be in the form of a Postal Order which should be crossed and made payable to the Passport Office. Notes or postage stamps should not be sent in payment.

Foreign Office Passports are granted:—

(i) To citizens of the United Kingdom and Colonies.
(ii) To British subjects without citizenship.
(iii) To British Protected Persons.

Passports are available for *five years* in the first instance, unless otherwise stated. They may be renewed for a further period of 5 years for a fee of 10s. 0d. Where, however, a passport has already been renewed for a shorter period, it may be extended for the remainder of the 5 year period on payment of a fee of 2s. 0d. for each year of renewal. They are not available *beyond ten years from the original date of issue.* Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the *holder's wife* is not available for the wife's use when she is travelling alone. A wife's particulars may *only* be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. When they apply for a Passport the written consent of father or other legal guardian is necessary.

The application must be recommended in Section 9 by a Member of Parliament, Justice of the Peace, Minister of Religion, Medical or Legal Practitioner, Bank Officer, established Civil Servant, Public Official, Police Officer or any person of similar standing personally acquainted with the applicant. The applicant's birth certificate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by the child's father or other legal guardian on form (B) obtainable from a Passport Office or any local office of the Ministry of Labour and National Service.

Unless they are also citizens of the United Kingdom and Colonies, citizens of Commonwealth countries should normally apply to their High Commissioner in London, and citizens of the Irish Republic resident in the United Kingdom should apply to the Irish Embassy.

If the applicant for a Passport be a British subject by naturalization or registration, the Certificate of Naturalization or registration must be produced with the application.

British Passports are generally available for travel *to all countries.* The possession of a Passport does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

A Passport cannot be issued or renewed by the Foreign Office on behalf of *a person already abroad*; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest local Passport issuing authority.

Persons resident in *Northern Ireland* should apply in person to the Foreign Office Passport Agency, 1 May Street, Belfast, or by post to the Branch Passport Office, Liverpool; citizens of the United Kingdom and Colonies resident in the Irish Republic should make application to the Visa Section, British Embassy, 30 Merrion Square, Dublin.

Renewal of Passports

Applications for the renewal of Foreign Office passports must be made on Form D, obtainable at any of the Passport offices (see above) or at any local office of the Ministry of Labour and National Service.

Photographs

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on *thin* paper and must not be glazed on the reverse side. They should measure not more than 2½ in. by 2 in. or less than 2 in. by 1½ in., and should be taken full face without a hat.

WHEAT HARVEST MONTHS OF THE WORLD

January—New Zealand, Chile.
February.—India, Upper Egypt.
March.—India, Upper Egypt.
April.—India, Lower Egypt, Syria, Asia Minor, Persia.
May.—China, Japan, Central Asia, Algeria, Morocco.
June.—U.S.A. (Southern States), Italy, Spain, South France, Turkey.
July.—U.S.A. (Middle States), South Russia, Roumania, Bulgaria, Austria, Hungary, Germany, France.
August.—U.S.A. (Northern States), Canada, Central Russia, Poland, England and Wales.
September.—North Russia, Scotland.
October.—Sweden, Norway.
November.—South Africa, Argentina (Santa Fé).
December.—Australia, Argentina, Ethiopia.

STERLING BALANCES

In the middle of 1939 United Kingdom net external liabilities amounted to rather more than £500 million. During the war years overseas sterling holdings rose extremely fast, reaching nearly £3,600 million at the end of 1945. Of this total a large proportion represented obligations to other countries arising from the exigencies of war rather than their working balances or normal reserves voluntarily held in London. The trends in the sterling holdings of different regions since the war are shown in the following table.

£ million

31st December	1945	1948	1951	1954	1957
United Kingdom Colonies	411	519	919	1,221	1,269
Other sterling area countries	1,986	1,636	1,717	1,703	1,430
Total sterling area countries	2,397	2,155	2,636	2,924	2,699
Dollar area	34	19	38	97	35
Other western hemisphere	163	135	57	8	31
O.E.E.C. countries	351	309	328	244	258
Other non-sterling countries	622	534	518	430	244
Total non-sterling countries	1,170	997	941	779	568
Total—all countries	3,567	3,152	3,577	3,703	3,267
Non-Territorial Organisations	—	398	566	476	645
TOTAL	3,567	3,550	4,143	4,179	3,912

It will be seen that there have been striking changes in the distribution of the balances: the colonial balances being trebled over the twelve years; those of independent sterling countries being reduced by a quarter; and those of non-sterling countries being halved.

Colonial Sterling Holdings.—Distribution of colonial funds at the end of 1945, 1951 and 1957 was as follows:—

£ million

	1945	1951	1957
Currency funds	148	312	441
Special purpose funds, sinking funds, savings bank funds, etc. with Crown Agents	74	112	154
General revenue balances, general purpose reserve funds, etc., with Crown Agents	41	148	321
Miscellaneous official funds (price assistance funds, marketing boards, etc.)	—	131	107
Other funds (with United Kingdom banks)	148	216	246
TOTAL	411	919	1,269

The existence of currency and many other funds in sterling is due to the fact that the colonies do not possess developed local capital markets and therefore hold in London the very large funds which governments require for many and diverse purposes. Colonial currencies are very largely backed by sterling securities. The steadily increasing circulations which have accompanied rising populations, the increased use of money and increasing external incomes have thus produced an almost automatic increase in the Currency Boards' investments in United Kingdom and other government securities. Special funds, particularly those of savings banks, have also risen steadily, as have general government funds for planned development expenditures and for current working balances. The other funds, which are held with United Kingdom banks, represent the general banking assets of commercial banks operating in the colonies and the known liquid funds of companies and individuals resident there, held in London.

The underlying reason for the growth of the total holdings was the expansion of colonial economies at a time of rising prices and, in particular, the unprecedentedly high level of export earnings in the years following the outbreak of the Korean War. More recently, the colonial territories have been in deficit on current account but as there has also been a large capital inflow there has been little change in the general level of sterling holdings.

Independent sterling area holdings.—It is the normal practice of central banks in independent sterling area countries to hold the bulk of their foreign exchange reserves in sterling. Moreover, they are often required by statute to hold certain minimum reserves in foreign exchange (which may include sterling) against local currency issues. A large proportion of these statutory reserves is in practice held in sterling.

Much of the fall in the holdings of independent sterling area countries took place in the first few years after the war and represented the reduction of surplus balances built up during the war years. During the last few years trends in individual countries have been diverse. India's holding has recently been run down further to finance the second five-year development plan, and the holdings of Australia and New Zealand have fluctuated widely, largely under the influence of changes in the prices of their exports of primary products and their import policies. On the other hand, the balances of the middle east sterling area countries have increased considerably.

Non-sterling countries.—After allowance is made for the influence of the European Payments Union mechanism on the sterling funds of central banks and certain other special holdings by the German authorities, the holdings of the O.E.E.C. countries nowadays represent sterling held by residents of these countries for commercial and financial reasons. Their size varies with the scale of the holders' business in sterling and the attractions of London as a financial centre in which to hold funds. The same generalization applies to the small net balances of sterling held by the dollar area countries. The very large fall (over £500 million) in the holdings of other non-sterling countries since the war was due to the fact that several of these countries had accumulated large surpluses of sterling well beyond their normal commercial requirements during the war period. Egypt was an outstanding example, and in this and some other cases the funds were transferred to special or "blocked" accounts and provisions made for regular annual releases. Apart from these special accumulations, which have now been mainly used up, most of the countries in this group (including countries in the far east, middle east, western hemisphere and Soviet bloc) only hold sterling funds for financing foreign trade, particularly with sterling area countries.

Non-territorial organizations.—The two main holders are the International Monetary Fund and the International Bank for Reconstruction and Development. At the end of 1957, the I.M.F. held £583 million and the I.B.R.D. £55 million.

WORLD COMMODITIES

The following table shows world production and main producers of some of the most important foods and raw materials, together with their domestic consumption in the United Kingdom and United States. Figures are given for 1956 and 1957 and for a pre-war year or average according to availability. In the case of rubber, natural production and consumption only are shown. World production of synthetic rubber amounted to 1,262,000 tons in 1957 compared with 1,211,000 tons in 1956; pre-war production was almost negligible. The United States produces 89 per cent. of the world's synthetic rubber and is also the largest consumer, using nearly 926,000 tons in 1957 out of its total rubber consumption of 1,465,000 tons.

Commodity	Average 1934–38	1956	1957

Total	£27,512,000	£25,849,000	$989,290,000	$1,023,190,000

THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domains of (*a*) Physics; (*b*) Chemistry; (*c*) Physiology and Medicine; (*d*) Literature; (*e*) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Science—(*a*) Physics; (*b*) Chemistry; the Royal Caroline Institute, Stockholm—(*c*) Physiology and Medicine; the Swedish Academy—(*d*) Literature; a committee of five persons elected by the Norwegian Storthing—(*e*) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation ("Nobelstiftelsens Styrelse"), Stockholm. The Board consists of four members and two deputy members appointed by the awarding authorities; the Swedish Government appoints a chairman and a vice-chairman.

The nationality of prizewinners is indicated as follows: (a) Great Britain, (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) Russia; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentine; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland. The distribution by nationalities is shown at foot of table.

For prizewinners for the years 1901–1937, *see* earlier editions of WHITAKER'S ALMANACK.

Year	(*a*) PHYSICS	(*b*) CHEMISTRY	(*c*) PHYSIOLOGY AND MEDICINE	(*d*) LITERATURE	(*e*) PEACE
1938	Enrico Fermi (p)	R. Kuhn (g)	C. Heymans (c)	Pearl Buck (b)	The Nansen Office

NATIONAL INSURANCE AND ASSISTANCE

For Combined Contributions, see p. 974.

The three State compulsory *insurance* schemes in force up to July 5, 1948, financed by contributions from insured workpeople, their employers and the Exchequer, provided the following cash benefits:

Unemployment Insurance.....	Unemployment benefit.
National Health Insurance.....	Sickness and disablement benefits; maternity benefit.
Contributory Pensions	Old age and widows' (over 60) pensions; widows' (under 60) pensions; orphans' pensions.

The National Health Insurance scheme also gave medical benefit, and the Health and Pensions schemes made provision for certain classes of voluntary contributors. Other national schemes gave *assistance* out of State funds, subject to a means test, in three forms—unemployment assistance, non-contributory old age and blind persons' pensions, and supplementary pensions to old age pensioners and to widow pensioners under 60 in receipt of allowances for dependent children. Under the Workmen's Compensation Acts, 1925 to 1945, compensation for industrial accidents and prescribed industrial diseases was payable by employers without contribution by workpeople or the Exchequer. The Public Assistance Authorities remained responsible for the administration of poor relief on a local basis.

These services, except for non-contributory old age pensions, were replaced after the Second World War by schemes of National Insurance and Industrial Injuries Insurance, National Assistance and Family Allowances. The two insurance schemes and the family allowances scheme are administered by the Ministry of Pensions and National Insurance, and the national assistance scheme and non-contributory old age pensions by the National Assistance Board.

The Ministry of National Insurance was instituted in November, 1944, under the Ministry of National Insurance Act, 1944. On August 31, 1953, the Ministry of Pensions and the Ministry of National Insurance were merged in a single Ministry of Pensions and National Insurance. Local offices of the Ministry (Pensions and National Insurance Offices) have been established throughout the country.

NATIONAL INSURANCE

The National Insurance Scheme operates under the National Insurance Act, 1946, as amended by the National Insurance Acts of 1949, 1951, 1953, 1954, 1955, 1956 and 1957, the National Insurance (No. 2) Act, 1957, the Family Allowances and National Insurance Acts, 1952 and 1956, and the National Health Service Contributions Acts, 1957 and 1958, and Regulations made under these Acts.

INSURED PERSONS AND CONTRIBUTIONS

Subject to certain statutory exceptions, every person living in Great Britain who is over school leaving age and under pension age becomes insured under the Acts.

There are three classes of insured persons namely:

(*a*) Class 1. Employed persons, i.e. persons who work for an employer under a contract of service or are paid apprentices.

(*b*) Class 2. Self-employed persons, i.e. persons gainfully occupied but not working under the control of an employer.

(*c*) Class 3. Non-employed persons, i.e. persons who are not gainfully occupied.

Regulations made under the Acts give married women and widows, upon certain conditions, the choice whether to pay contributions or not.

The estimated number of persons in respect of whom contributions were payable in 1958 was as follows: employed, 22 million; self-employed, 1·5 million; non-employed, 0·5 million.

National Insurance contributions are payable by insured persons, by employers of employed persons, and out of moneys provided by Parliament.

The normal weekly rates of contribution for the three classes of insured persons and for employers of employed persons are shown on p. 974.

In the case of employed persons over 18 earning 60*s.* or less per week, the employee's contribution is 3*s.* 10½*d.* (man) or 3*s.* 4½*d.* (woman) and the employer's contribution 10*s.* 6½*d.* (man) or 8*s.* 7½*d.* (woman). Men aged 70 and over and women aged 65 and over in classes (*1*) and (*2*) pay no National Insurance contribution. Men aged 65 to 70 and women aged 60 to 65 in these classes, with certain exceptions, are liable to pay contributions if they have not retired from regular employment. Normally no contributions are payable by men over 65 or women over 60 in class (3).

The current rates took effect under the National Insurance (No. 2) Act, 1957, as from Feb. 3, 1958.

Regulations state the cases in which insured persons may be excepted from paying National Insurance contributions, and the conditions upon which contributions are credited to persons who are excepted.

Contributions are paid by means of stamps on a single insurance card; the stamp also covers the National Health Service contribution and, in the case of employed persons, the Industrial Injuries contribution.

The Exchequer contribution comprises (*a*) a supplementary payment (currently ranging from 7*d.* to 3*s.* 3*d.*) in respect of each contribution paid by an insured person or employer, and (*b*) additional sums paid into the National Insurance Fund, viz., for the period of five years beginning with April 1, 1955, sums not exceeding a total of £325 million, and, for later years, such sums as Parliament may determine. No payment was made under (*b*) in the year ended March 31, 1957.

BENEFITS

The Acts give the following benefits:

Unemployment benefit.
Sickness benefit.
Maternity benefits, including maternity grant, home confinement grant and maternity allowance.
Widow's benefits, including widow's allowance, widowed mother's allowance and widow's pension.
Child's special allowance
Guardian's allowance.
Retirement pension.
Death grant.

The benefits available to the various classes of insured persons are as follows:

Employed persons....	All benefits.
Self-employed persons.	All benefits *except* unemployment benefit.

Non-employed persons	All benefits *except* unemployment and sickness benefits and maternity allowance.

There is one system of adjudication on all claims for benefit under the Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Commissioner and Deputy Commissioners.

UNEMPLOYMENT BENEFIT

The *standard weekly rates of benefits* from Feb. 6, 1958, are as follows:

	s.	d.
Man, single woman or widow over 18...	50	0
Married woman over 18: ordinary rate	34	0
If maintaining an invalid husband, or not living with and unable to obtain any financial assistance from her husband..	50	0
Person under 18 (other than a married woman): ordinary rate.....	28	6
If entitled to an increase of benefit in respect of a child or adult dependant.	50	0
Married women under 18: ordinary rate.	28	6
If entitled to an increase of benefit in respect of a child or adult dependant...	34	0
If supporting an invalid husband, or if entitled to an increase of benefit in respect of a child or adult dependant other than her husband and not residing with and unable to obtain any financial assistance from her husband.....	50	0
Increase of benefit for only child or elder or eldest child (where payable).....	15	0
Increase of benefit for each additional child (where payable)	7	0
Increase of benefit for adult dependant (where payable).....	30	0

Normal Contribution Conditions.—The claimant must have paid 26 Class 1 contributions since July 5, 1948, and, to be entitled to benefit at the standard rate during a benefit year, must have paid or had credited 50 Class 1 contributions during the preceding contribution year.

Waiting Period.—Benefit is not payable for the first three days of a spell of unemployment or sickness unless the claimant has twelve days or more of unemployment or sickness within a period of 13 weeks beginning with the first of these days. Odd days of unemployment or sickness count for benefit only where any two or more of them fall within a period of six consecutive days, excluding Sundays, and such spells of two or more days are treated as "linked up" if not separated by more than 13 weeks.

Duration of Benefit.—A claimant can draw in respect of any period of interruption of employment 180 days of unemployment benefit, together with additional days of benefit, assessed on his record of contributions and benefit.

Requalification for Benefit.—A person who has exhausted his standard benefit, including any additional days, requalifies therefor when he has paid 13 Class 1 contributions.

Disqualifications.—As in the former scheme, there are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if a person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment.

Numbers Unemployed.—During the year 1957 the average number of persons registered as unemployed in Great Britain was 312,500. In mid-Dec. 1956, nearly 168,000 persons were receiving unemployment benefit.

SICKNESS BENEFIT

Standard Rates of Benefit.—Same as for unemployment benefit.

Normal Contribution Conditions.—Same as for unemployment benefit, except that Class 2 as well as Class 1 contributions are counted.

Waiting Period.—Same as for unemployment benefit. Days of sickness are "linked up" with days of unemployment falling within the same period of 13 weeks.

Duration of Benefit.—A person who has paid 156 Class 1 or Class 2 contributions receives sickness benefit of unlimited duration. If he has paid less than 156 such contributions, benefit is limited to 312 days (one year); but he will requalify for benefit when he has paid contributions for 13 weeks.

Disqualifications.—Regulations provide for disqualifying a person for receiving sickness benefit for a period not exceeding six weeks if he has become incapable of work through his own misconduct, or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or if he acts in a way which would retard his recovery.

Number of Claims.—During 1956, 7,762,000 new claims for sickness benefit were received. The number of insured persons incapacitated owing to sickness varied during the year from under 800,000 in July and August to 1,231,000 at the end of February.

MATERNITY BENEFITS

The National Insurance Act, 1953, made changes in the structure of maternity benefits provided by the principal Act. Increases in the benefits under the National Insurance (No. 2) Act, 1957, took effect as from Feb. 3, 1958.

Maternity Grant.—A cash grant of £12 10s. is payable on the mother's own insurance or on her husband's. Extra grants are payable, in certain circumstances, if more than one child is born. The normal contribution conditions for this grant are (i) that the mother or her husband has paid not less than 26 contributions of any class since his or her entry into insurance, and (ii) that not less than 26 contributions of any class have been paid by or credited to that person during the previous contribution year, or the mother has satisfied the contribution conditions for a maternity allowance at the standard rate or at a reduced rate.

Home Confinement Grant.—An additional grant of £5 is payable to women who are confined at home or elsewhere at their own expense.

Maternity Allowance.—A woman who is gainfully occupied receives in addition a maternity allowance of 50s. a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. The normal contribution conditions for this benefit are (i) that the claimant has paid or had credited 50 Class 1 or 2 contributions during the 52 weeks ending 13 weeks before the expected week of confinement; and (ii) that in the same 52 weeks at least 26 Class 1 or 2 contributions have been paid.

During the year ended March 31, 1957, maternity grants were paid for about 780,000 births; in addition, the home confinement grant was paid in about 300,000 cases, and about 175,000 women received weekly maternity allowances.

WIDOW'S BENEFITS

This benefit in any of its three forms is payable to the widow of any class of insured person. The normal contribution conditions to be satisfied by

the husband are (*a*) that he had paid not less than 156 contributions of any class since his last entry into insurance (104 if he was married before July 5, 1948, and insured from before September 30, 1946), and (*b*) that the yearly average of the contributions paid by or credited to him since his insurance started was not less than 50. Increases in this benefit under the National Insurance (No. 2) Act, 1957 became payable as from Jan. 27, 1958.

Widow's Allowance.—A woman who at her husband's death is under 60, or, if the husband had not qualified for a retirement pension, is over 60, receives (during the first 13 weeks of widowhood) a cash allowance usually of 70*s.* a week, with an increase of 20*s.* for the first or only child and 12*s.* for each other child.

Widowed Mother's Allowance.—When the 13 weeks of widow's allowance have elapsed, a widow who is left with one or more dependent children receives a cash allowance usually of 70*s.* a week so as long she has a child of qualifying age, and in addition 12*s.* a week for each child other than the first. A widowed mother's personal allowance, usually 50*s.* a week, is payable to widows who have living with them a child under 18 who has left school and is not an apprentice.

Widow's Pension.—A widow who is under pensionable age or, being over pensionable age, has not retired from regular employment, receives a widow's pension usually of 50*s.* a week (i) when widow's allowance ends, if she was over 50 at the time of her husband's death and had been married for not less than three years; or, (ii) when her widowed mother's allowance comes to an end, if she is then over 50 (40 if widowed before February 4, 1957) and not less than three years have elapsed since marriage.

Widow's benefit of any form ceases upon remarriage. A 50*s.* widow's pension is reduced by sixpence for each shilling of any net earnings in excess of 50*s.* and a further sixpence for each shilling of net earnings in excess of 70*s.* A widowed mother's allowance is reduced by sixpence for each shilling of any net earnings in excess of 60*s.* and a further sixpence for each shilling of net earnings in excess of 80*s.*; but it must not be reduced in any week by more than 50*s.*

If a woman, who was married before July 5, 1948, to a man insured under the old scheme immediately before that date does not qualify for widow's benefit under the new scheme, she may qualify for a widow's basic pension, usually of 10*s.* a week.

At the end of March, 1957, about 440,000 widows were receiving widowed mother's allowance, widow's pension or widow's 10*s.* pension, and about 21,000 widow's allowances were current.

CHILD'S SPECIAL ALLOWANCE

The National Insurance Act, 1957, as amended by the National Insurance (No. 2) Act, 1957, provides for a special allowance for a woman whose marriage has been dissolved or annulled, to be payable on the ex-husband's death if the woman has in her family a child to whose maintenance the ex-husband had before his death been contributing at least 5*s.* a week in cash or its equivalent. The amount of the allowance is equal to the amount of the ex-husband's contribution, subject to a maximum of 20*s.* a week for the first or only child *plus* 12*s.* for each other child in addition to Family Allowances. The contribution conditions for the allowance are substantially the same as for widow's benefit. Like widow's benefit, the allowance ceases on remarriage. The increase in this allowance under the National Insurance (No. 2) Act, 1957, took effect as from Jan. 27, 1958.

GUARDIAN'S ALLOWANCE

Where the parents of a child are dead, and one at least of them was an insured person, any person who has the child in his family receives a guardian's allowance of 27*s.* 6*d.* a week while the child is of school age. The increase in this benefit under the National Insurance (No. 2) Act, 1957, took effect as from Jan. 27, 1958. At the end of 1956 about 5,500 allowances were being paid.

RETIREMENT PENSIONS

A retirement pension is payable for life to an insured person who (*a*) is over pension age (65 for a man and 60 for a woman), (*b*) has retired from regular employment, and (*c*) has paid the prescribed number of contributions. Men aged 70 and over and women aged 65 and over are not required to satisfy condition (*b*).

The basic rate of pension as from Jan. 27, 1958 (under the National Insurance (No. 2) Act, 1957) is 50*s.* a week, plus 30*s.* for a dependent wife, plus 15*s.* for the first or only child and 7*s.* for each other child.

Where the insured person postpones retirement beyond pensionable age, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 (65 for women), in respect of contributions paid as an employed or self-employed person during the five years after reaching pensionable age. The increment to pension is 1*s.* for every 25 contributions paid before July 26, 1951, and 1*s.* 6*d.* for every 25 contributions paid after that date. A retirement pensioner between the ages of 65 and 70 (60 and 65 for women) can choose to be treated as not retired and thus earn pension increments by temporarily foregoing his pension and paying contributions during employment or self-employment.

A man aged 65 to 70 (or a woman aged 60 to 65) who has qualified for pension will have it reduced by sixpence for each shilling of net earnings in excess of 50*s.* and a further sixpence for each shilling of net earnings in excess of 70*s.*

The Normal Contribution Conditions for persons who entered insurance before September 30, 1946, are (*a*) that 104 contributions of any class have been paid, and (*b*) that the yearly average of contributions paid or credited is not less than 50.

Special Provisions as to Women.—Subject to certain conditions, a married woman on reaching 60 or a woman on marriage after that age receives by virtue of her husband's insurance a retirement pension of 30*s.* a week. A widow over the age of 60 when her husband dies will usually qualify for a retirement pension of 50*s.* a week from her husband's insurance instead of a widow's pension. A retirement pension payable to a woman by virtue of her husband's insurance is increased by 1*s.* for every 25 contributions paid by the husband as an employed or self-employed person while he is over 65 and under 70 and she is over 60, but if he should die before her, any 1*s.* increase he earns for her after July 16, 1951, will then be paid at the 1*s.* 6*d.* rate. The pension of a woman under 65 is reduced by sixpence for each shilling of net earnings in excess of 50*s.* and a further sixpence for each shilling of net earnings in excess of 70*s.*

Special provisions apply to persons who enter insurance late in life. For persons who entered before September 30, 1946, the qualifying insurance period is five years, and, for persons who entered on or after that date, ten years.

Unemployment and sickness benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular employment at the same rate as the retirement pension they would have been entitled to had they retired from regular employment.

At the end of March, 1957, retirement pensions, or contributory old age pensions under the old Acts, were being paid to approximately 4,675,000 persons.

DEATH GRANT

A death grant is payable on the death of an insured person or of his wife, child or widow or, if the insured person is a woman, of her husband, child or widower. The normal grant (since Feb. 3, 1958) is for an adult £25, a child aged 6–17 £18 15s., a child aged 3–5 £12 10s., a child under 3 £7 10s. For the deaths of people who on July 5, 1948, were between 55 and 65 (men) or between 50 and 60 (women) the grant is £12 10s.

The normal contribution conditions for death grant are that (*a*) not less than 26 contributions of any class have been paid by or credited to the deceased or the person by virtue of whose insurance the grant is claimed since July 5, 1948, and (*b*) either not less than 45 contributions of any class have been paid by or credited to him in the previous contribution year, or the yearly average of the contributions paid or credited since July 5, 1948 (or 16th birthday if later) is not less than 45. No grant is payable for deaths of persons already over pension age on July 5, 1948, or of children born before July 5, 1948, if they die under the age of 10. In the year ended March 31, 1957, about 230,000 grants were paid.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

FINANCE

Under the Act of 1946 two funds are set up, viz. the National Insurance Fund, and the National Insurance (Reserve) Fund. The income from contributions, Exchequer grants and interest from both funds are paid into the National Insurance Fund, and payments are made out of the Fund to meet the cost of benefits and administration. Under the National Health Service Contributions Act, 1957, payments hitherto made from the Fund towards the cost of the National Health Service, which were equivalent to 10*d.* out of each total weekly National Insurance contribution for men, 8*d.* for women, and 6*d.* for boys and girls, were discontinued; consequential reductions were made in the rates of National Insurance contributions, and provision was made for separate National Health Service contributions, yielding twice the amount of the payments previously made from the National Insurance Fund to the National Health Service, to be collected in conjunction with the National Insurance contributions. Increases in the rates of National Health Service contributions under the National Health Service Contributions Act, 1958, took effect as from July 7, 1958. (*See* p. 974.)

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1957, were as follows:—

Receipts	£'000
Balance, April 1, 1956	317,665
Contributions from employers and insured persons	587,935
Exchequer contribution	96,300
Income from investments	8,814
Transfer from the Reserve Fund of income from investments, etc.	40,357
Other receipts	10
	1,051,081

Payments	£'000	£'000
Benefit:—		
Unemployment benefit	20,896	
Sickness benefit	96,699	
Maternity benefit	14,900	
Widow's benefit	38,200	
Guardian's allowance	320	
Retirement pension	447,870	
Death grant	3,329	
		622,215
Contribution to the National Health Service		40,796
Administration expenses		31,247
Other payments		5,431
Balance, March 31, 1957		351,392
		1,051,081

The higher rates of contributions and benefits introduced by the 1954 Act were in effect throughout 1956–57. The surplus of receipts over payments during the year was £33·7 million. Compared with 1955–56, and excluding the transfer in that year of £100 million to the Reserve Fund, the surplus fell by £2·9 million, receipts increasing by £22·8 million and payments by £25·7 million. The increase in payments was mainly on retirement pensions (£15·4 million) and unemployment benefit (£5·2 million).

The balance in the Reserve Fund at March 31, 1957, was £1,167·5 million, as compared with £1,167·4 million at March 31, 1956.

The Government Actuary has estimated that the excess of expenditure over income of the National Insurance Fund, with benefits and contributions as increased by the National Insurance (No. 2) Act, 1957, will rise to £49 millions in 1959–60, £322 million in 1969–70, and £475 million in 1979–80.

INDUSTRIAL INJURIES INSURANCE

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injury caused and prescribed diseases and injuries developed on or after July 5, 1948, operates under the Act of 1946, as amended by the National Insurance (Industrial Injuries) Acts, 1948 and 1953, the National Insurance Acts, 1951, 1954 and 1957, the National Insurance (No. 2) Act, 1957, and the Family Allowances and National Insurance Acts, 1952 and 1956, and Regulations made by the Minister under those Acts. Increases in the rates of contributions and benefits took effect, under the National Insurance (No. 2) Act, 1957, on Jan. 27, 1958 in the case of death benefit, and on Feb. 3, 1958 in the case of other benefits and of contributions.

The Workmen's Compensation Acts, including the Workmen's Compensation (Temporary Increases) Act, 1943 (which is now made permanent) continue to apply, subject to certain amendments, to cases arising before the new scheme started.

The Workmen's Compensation (Supplementation) Scheme, 1951, which came into operation on July 11, 1951, provides for the payment out of the Industrial Injuries Fund of allowances supplementing workmen's compensation where the accident or disease happened before 1924.

The Pneumoconiosis and Byssinosis Benefit Scheme, 1952, provides for payment of benefits out of the Industrial Injuries Fund for those totally disabled by pneumoconiosis or byssinosis, and for dependants of those who died from one of those diseases, after December 31, 1949, if they are not covered by either the Workmen's Compensation Acts or the Industrial Injuries Acts. This Scheme was extended by the Amendment Scheme, 1954,

to cases of partial disablement as a result of either disease, and was further amended by the Amendment Scheme, 1957.

The Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, provides for payment of benefit out of the Industrial Injuries Fund to or in respect of certain persons who are disabled or die or have died after December 31, 1949, as a result of certain malignant and other diseases due to occupational exposure to carcinogens, in cases where neither workmen's compensation nor benefit under the Industrial Injuries Act is payable.

As from August 28, 1956, under the Workmen's Compensation and Benefit (Supplementation) Act, 1956, a supplementary benefit of 17*s.* 6*d.* a week became payable out of the Industrial Injuries Fund to the classes of totally disabled persons mentioned in the Act who are receiving workmen's compensation.

INSURED PERSONS

The persons covered by the Industrial Injuries scheme correspond closely to the class of "employed persons" under the National Insurance Act, 1946 (excluding members of the Forces), and numbered in 1955 about 21¼ million, of whom rather more than one-third were women.

CONTRIBUTIONS

Contributions are payable by insured persons and their employers, unless exempted, and the Exchequer contributes an amount equal to one-fifth of the combined contributions of insured persons and employers.

The normal weekly rates of contributions payable by insured persons and employers respectively are 8*d.* and 9*d.* for men over 18, 5*d.* and 6*d.* for women over 18, 4*d.* and 5*d.* for boys under 18, and 3*d.* and 3*d.* for girls under 18. Normally contributions are paid by means of stamps on a single insurance card, the same stamp also covering National Insurance and National Health Service contributions.

There are no contribution conditions for the payment of benefits. Persons employed in insurable employment are covered from the time of starting work, but if employed while of school age pay no contributions.

BENEFITS

Injury Benefit is payable for not more than the first 26 weeks of incapacity; no payment is made for the first three days unless there are a further nine days of incapacity within the injury benefit period. Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of 85*s.* (days being paid for at one-sixth of the weekly rate), *plus* 30*s.* for one adult dependent, *plus* 15*s.* for the first or only child and 7*s.* for each other child. Juveniles not entitled to a child or adult dependant's allowance receive benefit at half the adult rate if under 17 and at three-quarters the adult rate if 17 and under 18.

Disablement Benefit is payable if at or after the end of the injury benefit period the insured person suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (in cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without a period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by a medical board or medical appeal tribunal by reference to the claimant's disabilities (incurred as a result of the loss of faculty) as compared with a normal person of the same age and sex. In cases of disablement of less than 20 per cent., benefit normally takes the form of a *gratuity* paid according to a prescribed scale, but not exceeding £280. Where the degree of disablement is 20 per cent. or more, the benefit is a weekly *pension* payable either for a limited period or for life according to the following scale:

Degree of disablement	*Weekly Rate*	
	s.	*d.*
100 per cent	85	0
90 ,, ,,	76	6
80 ,, ,,	68	0
70 ,, ,,	59	6
60 ,, ,,	51	0
50 ,, ,,	42	6
40 ,, ,,	34	0
30 ,, ,,	25	6
20 ,, ,,	17	0

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive one-half the adult rate if under 17, and three-quarters of the adult rate if 17 and under 18.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployability and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance. An increase of 30*s.* for an adult dependant and of 15*s.* for the first or only child and 7*s.* for each other child is also payable where the pensioner is either entitled to an unemployability supplement or receiving approved hospital treatment. Subject to certain exceptions, a pensioner who is not in receipt of unemployability supplement can draw other national insurance benefits in full in addition to disablement pension.

Death Benefit, in the form of a pension, a gratuity or a weekly allowance for a limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives a pension of 70*s.* a week for the first 13 weeks and thereafter of 56*s.* or 20*s.* a week according to circumstances, *plus* 20*s.* for the first or only child and 12*s.* for each other child.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of the former, that of submitting to medical examination and treatment and attending vocational training courses or industrial rehabilitation courses provided under the Disabled Persons (Employment) Act, 1944.

Industrial Diseases, etc.—The Act of 1946 extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an insured person's employment and developed on or after July 5, 1948.

Determination of Questions and Claims.—Provision is made for the determination of certain questions (*e.g.*, as to insurability and liability to contribute) by the Minister, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (*e.g.*, whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Minister, or a local appeal tribunal consisting of a chairman appointed by the Minister and equal numbers of members representing employers and insured persons, or, on appeal, by the Commissioner.

About three-quarters of a million new awards of injury benefit are made each year. The number of awards of disablement benefit and of special hardship allowance has increased year by year.

The number of disablement pensions in payment rose during the year ended October 31, 1956, from 135,200 to 142,100; of those in payment at the end of the period 37,800 were in respect of pneumoconiosis. During the same year the number of special hardship allowances in payment increased from 74,000 to 80,000. The annual number of awards of death benefit slightly exceeds 2,000; at the end of 1956, 14,500 pensions and 12,000 allowances were in payment.

FINANCE

Contributions from employers, insured persons and the Exchequer are paid into, and benefits and administrative expenses are paid out of, a fund established under the Act of 1946, viz., the Industrial Injuries Fund.

Receipts, 1956–57	£'000
Balance, April 1, 1956	139,005
Contributions from employers and insured persons	42,076
Exchequer contribution	8,300
Income from investments	5,211
Other receipts	325
	194,917

Payments, 1956–57	£'000	
Benefit:—		
Injury	12,755	
Disablement (*a*)	18,693	
Death (*a*)	1,865	
Other benefits (*b*)	1,145	
		34,459
Administration expenses		5,109
Other payments		22
Balance, March 31, 1957		155,328
		194,917

(*a*) Division estimated. (*b*) Allowances paid under the Workmen's Compensation (Supplementation) Scheme, 1951, allowances and death benefit paid under the Pneumoconiosis and Byssinosis Benefit Scheme, 1952, as amended by the Pneumoconiosis and Byssinosis Benefit Amendment Scheme, 1954, or under the Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, and allowances paid under the Workmen's Compensation and Benefit (Supplementation) Act, 1956.

As the Industrial Injuries scheme in general applies to cases arising after July 4, 1948, expenditure on benefits will not reach maturity for many years.

NATIONAL ASSISTANCE

The National Assistance Act, 1948, was designed, from July 5, 1948, to substitute for certain existing services provided by the State or by local authorities a unified State service of financial assistance according to need. The service is administered by the National Assistance Board, the ultimate responsibility to Parliament resting with the Minister of Pensions and National Insurance.

Application for assistance may be made by any person aged 16 or over who is in need, including a person who needs assistance in supplementation of a pension or insurance benefit. The National Assistance (Determination of Need) Regulations, 1948, as amended, lay down how the need of an applicant shall be determined, and for this purpose how his requirements and resources shall be computed.

The scale rates for requirements other than rent, prescribed by the amending Regulations which came into operation on January 27, 1958, are as follows:

	Ordinary	Special (*a*)
	s. d.	s. d.
Husband and wife	76 0	96 0 (*b*)
Single householder	45 0	
Other persons:—		
Aged 21 or over	41 0	65 0
Aged 18–20	31 6	48 6
Aged 16–17	26 0	40 0
Aged 11–15	20 0	20 0
Aged 5–10	17 0	17 0
Aged under 5	14 6	14 6

(*a*) For blind and certain tubercular persons.
(*b*) 110s. when both husband and wife are in the special classes.

The amount to be added for rent, if the applicant, or his wife or her husband, is a householder, or if the applicant is living alone, will be the net rent payable, or such part thereof as is reasonable having regard to the general level of rents in the locality. If an applicant over the age of 18 is a member of a household but is not himself the householder, the amount to be added for rent will be a reasonable share of the rent payable by the householder, subject to a minimum addition of 2s. 6d. a week and a maximum of 10s. a week.

The rules for the computation of resources contain provisions for the treatment of capital and earnings and certain statutory disregards.

The amount to be paid by way of assistance is settled by the local officer of the Board; an applicant who is dissatisfied with the amount granted has a right of appeal to the local Appeal Tribunal, whose decision is final.

On July 5, 1948, national assistance had to be given to some 800,000 persons who had previously been receiving unemployment assistance (321,000), supplementary pensions (512,000), outdoor relief (200,000), blind domiciliary assistance (40,000), or tuberculosis treatment allowances (20,000). The number of weekly assistance allowances in payment rose from 1,011,000 at the end of 1948 to 1,810,000 in February, 1955. By the end of September, 1955, the number had fallen to 1,595,000, due mainly to the increase in benefit rates under the National Insurance Act, 1954. Subsequently, the number again rose, and at the end of 1957 had reached 1,712,000, when the needs of nearly 2·4 million persons were being provided for wholly or in part. At the end of 1957 about 96,000 recipients were registered at the Employment Exchange; most of the rest were old, sick or otherwise incapable of work. More than two-thirds of the allowances were paid in supplemention of insurance benefits. During 1957 the Board also made about 892,000 single payments and 137,000 exceptional needs grants. In addition, assistance amounting to £1,829,000 was given to meet charges raised under the National Health Service for prescriptions, spectacles, dentures and dental treatment, and surgical appliances.

The total net expenditure of the Board during 1957 was about £134,448,000, as compared with £128,588,000 in 1956 and £60,760,000 in 1948. Included in the figure for 1957 were payments of national assistance £112,200,000, and payments of non-contributory old age pensions £14,200,000.

NON-CONTRIBUTORY OLD AGE PENSIONS

The maximum non-contributory old age pension payable under the Old Age Pensions Act, 1936, to persons aged 70 and over, and under the Blind Persons Act, 1938, to blind persons aged 40 and

over, was increased in October, 1946, from 10*s.* a week to 26*s.* a week for single persons of either sex and married men, and 16*s.* a week for married women. Pension was payable at the maximum rate where the yearly means, calculated in accordance with the provisions of the Act, did not exceed £26 5*s.* 0*d.* Where the yearly means were between £26 5*s.* 0*d.* and £89 5*s.* 0*d.*, pension was payable at rates varying from 24*s.* (16*s.* for married women) to 2*s.* Where the yearly means exceeded £89 5*s.* 0*d.*, no pension was payable. As from Jan. 27, 1958, when, under the National Insurance (No. 2) Act, 1957, the issue of weekly tobacco tokens to pensioners ceased, non-contributory pensions were increased by an amount equal to the current value of the tokens, i.e., 2*s.* 4*d.*

The National Assistance Act, 1948, which charged the National Assistance Board with the administration of non-contributory old age pensions, assimilated the pensions procedure to the national assistance procedure, and the Board have power to supplement old age pensions by national assistance in case of need.

The number of pensions in payment fell from 453,000 at the end of 1948 to 257,000 at the end of 1956, and declined further to 233,000 by the end of 1957. At the latter date, pensions were supplemented by national assistance in 143,000 cases. The award of new non-contributory pensions will eventually be brought to an end by the provisions of section 74 of the National Insurance Act, 1946, under which sighted persons will not qualify unless they reach the age of 70 by October 1, 1961.

FAMILY ALLOWANCES

The Family Allowances Act, 1945, which was brought into operation from August 6, 1946, provided for a payment by the Minister of National Insurance out of moneys provided by Parliament of an allowance of 5*s.* a week for each child in a family other than the elder or eldest. From September 2, 1952, under the Family Allowances and National Insurance Act, 1952, the allowance was increased to 8*s.* From October 2, 1956, under the Family Allowances and National Insurance Act, 1956, the allowance for the third and each younger child was increased to 10*s.* The allowance is payable (through the Post Office) while a child is of school age or, if handicapped, under 16, and up to the age of eighteen years if he or she is undergoing full-time instruction in a school or is an apprentice. Claim forms for allowances can be obtained at any post office or local Pensions and National Insurance Office. Claimants have a right of appeal to an independent Referee.

At the end of January 1957, about 5,299,000 allowances were in payment for about 3⅛ million families. It is estimated that in 1956 over £111 million was paid in allowances (excluding administrative expenses), as compared with £63 million in 1951 when the weekly rate was 5*s.* The increases in allowances in 1956 were expected to cost an extra £10 million in the first full year.

COMBINED WEEKLY CONTRIBUTIONS

Contributions to National Insurance, the National Health Service and, in the case of employed persons, Industrial Injuries Insurance are paid by means of stamps on a single insurance card. Combined rates of contributions current since July 7, 1958, are:—

	Employed Person	Employer*	Total	Self-employed Person	Non-employed Person
	s. d.	*s. d.*	*s. d.*	*s. d.*	*s. d.*
Men 18 and over	9 11	8 3	18 2	12 0	9 7
Women 18 and over	8 0	6 9	14 9	10 0	7 7
Boys under 18	5 5	4 11	10 4	6 9	5 5
Girls under 18	4 8	4 0	8 8	5 11	4 6

* The special rates of contribution payable by employers for certain employed married women, widows and people over pension age are:—Women: 18 or over, 7*s.* 4*d.* (5*d.*); under 18, 4*s.* 3*d.* (3*d.*); Men, 8*s.* 11*d.* (8*d.*). The amount in brackets is the employee's share. Full details are given in Leaflet N.I. 103, available at all Pensions and National Insurance Offices.

NATIONAL HEALTH SERVICE

The National Health Service was inaugurated on July 5, 1948, by the Minister of Health under the *National Health Service Act*, 1946, "to promote the establishment in England and Wales of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people of England and Wales and the prevention, diagnosis and treatment of illness." There are separate Acts for Scotland and Northern Ireland, where the Health Services are run on very similar lines.

The National Health Service is available to everybody in the country and is a charge on the National Income. Everyone is entitled to use any complete part or all of the services and no Insurance qualification is necessary. The cost of the Service is met by the National Exchequer, by contributions collected by the Ministry of Pensions and National Insurance together with National Insurance contributions (*see* p. 974) and by charges for the Service. About half the expenses of the local health services fall on local rates.

Under the 1946 Act, the only charges falling on the patient for any of the services were in certain cases for the renewal or repair of glasses or for the replacement of dentures; for domestic help, extra food at home, blankets, etc.; and for accommodation and treatment in private wards in hospitals. It was open to anyone, if they wished, in certain cases to pay the extra cost of more expensive glasses, more expensive dental treatment than is clinically necessary, and artificial limbs. In May, 1951, and May, 1952, charges were introduced for certain items in the National Health Service.

The *National Health Service (Amendment) Act*, 1949, had empowered the Minister *inter alia* to introduce a charge for prescriptions; a charge of 1*s*. for each prescription form was introduced on June 1, 1952, and this was increased to a charge of 1*s*. for each item on a prescription form on December 1, 1956. The *National Health Service Act*, 1951, authorized the making of charges to meet part of the cost of dentures and spectacles supplied through the Service. These charges came into force on May 21, 1951. The *National Health Service Act*, 1952, authorized the making of charges for medicines and certain appliances supplied to hospital out-patients, for dental treatment (excluding examination) provided under the General Dental Services and for day-nurseries run by local health authorities. These charges were effective from June 1, 1952. *Patients who are unable without hardship to meet charges under these Acts may apply to the National Assistance Board and there are also some exemptions from charges made to out-patients and for dental treatment.*

THE HEALTH SERVICES

Family Doctor Service

The Family Doctor Service is organized by 138 Executive Councils which also organize the Dental, Pharmaceutical and Supplementary Eye Services for their areas. There is an Executive Council for each County and County Borough area, but in some cases one Council covers two areas. Members, who serve voluntarily, are appointed by local doctors, dentists and pharmacists (12), the Local Health Authority (8) and the Minister of Health (5). All doctors may take part in the Family Doctor Scheme and about 20,000 out of some 21,000 general practitioners do so. They may at the same time have private fee-paying patients. Health Service doctors are paid on a capitation basis, *i.e.* an annual fee in respect of each patient accepted.

Everyone aged 16 or over can choose his doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he chooses. A person may change his doctor if he wishes, either at once if he has changed his address or obtained permission of the doctor on whose list he is, or by informing the local Executive Council (in which case a delay of about 14 days is usual). When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents," and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the doctor's surgery or when necessary, at home. Doctors may prescribe for their patients all drugs and medicines which are medically necessary for their treatment and also a certain number of surgical appliances (the more elaborate being provided through the hospitals).

Drugs, Medicines and Appliances.—The number of chemists (including drug stores and appliance suppliers) in England and Wales, within the National Health Service at December 31, 1957, was 15,856. 207,209,397 prescriptions were dispensed in 1957. Since December 1, 1956, there has been a charge of 1*s*. in respect of each item on a prescription form made out by the family doctor and presented for dispensing. The only exception is where the doctor prescribes elastic hosiery, in which case the patient pays 5*s*. or 10*s*. on each article. In those country areas where the doctor does his own dispensing, the 1*s*. is paid to the doctor.

Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About 9,800 of the dentists available for general practice have joined the National Health Service. They are responsible to the Executive Councils in whose areas they provide services.

Patients are free to go to any dentist taking part in the Service and willing to accept them, and do not require to register with any particular dentist. Dentists receive payment for items of treatment for individual patients, instead of the capitation fee received by doctors. There is no need for the patient to obtain a recommendation before seeking dental treatment. The dentist is able to carry out at once all normal conservative treatment (*e.g.* fillings), emergency treatment and ordinary denture repairs; he seeks prior approval from the Dental Estimates Board before undertaking treatment when it involves the removal of teeth necessitating replacement by denture; provision of dentures; extensive and prolonged treatment of the gums; gold fillings; inlays; crowns; special appliances and oral surgery.

A dentist may, with the approval of the Dental Estimates Board, charge his patient a prescribed sum for gold fillings or metal dentures where these are not clinically necessary, if the patient wishes to have them. Where a denture supplied under the Service has to be replaced because of loss or damage the whole or part of the cost may be charged to the patient if he has been careless. In May, 1951, charges were introduced for dentures whereby the patient has to pay £2 to £2 10*s*. for the supply of one denture or up to £4 5*s*. for a set. In June, 1952, a charge of £1, or the full cost of any treatment if less than £1, was introduced. No charge is made for the clinical examination of a patient's mouth. Charges for dental treatment (other than the usual charges for dentures) are not made in the case of anyone under 21 years of age or expectant mothers or mothers who have had a child during the preceding twelve months.

Supplementary Ophthalmic Service

Supplementary Ophthalmic Services which are run by the Executive Councils, form part of the

Eye Services available under the National Health Service, and provide for the testing of sight and supply of glasses only. Any ophthalmic medical practitioner or ophthalmic optician who has joined the Service may be consulted. The first time a person uses the Service he must obtain a recommendation from his doctor that his sight needs testing. After this he can use the Service direct without first obtaining a note from his doctor.

Until 1951 there were no charges under the Supplementary Ophthalmic Service except, in certain cases, for the renewal or repair of glasses or where the patient chose a more expensive spectacle frame than one of the standard frames available free, or asked to be supplied with special lenses where only flat lenses were necessary. In May, 1951, charges to patients of 10s. for each lens, plus the actual cost of the frames, were introduced. Children's glasses in the standard type of children's frame remain free of charge.

Hospitals and Specialists

On July 5, 1948, ownership of 2,688 out of 3,040 voluntary and municipal hospitals in England and Wales was vested in the Minister of Health. The remaining hospitals were disclaimed; many were run by religious orders. The hospital service, of which the specialist and consultant facilities are a part, includes general and special hospitals; maternity accommodation; tuberculosis sanatoria; infectious diseases units; provision for chronic sick; mental hospitals and mental deficiency institutions; accommodation for convalescent hospital treatment and medical rehabilitation, and all forms of specialized treatments—for example, plastic surgery, cancer, orthopædic and ear, nose and throat treatment, together with the provision of most surgical and medical appliances.

In the main, this part of the Service is organized by 14 Regional Hospital Boards (*see* pp. 386–7); in each hospital region there is a University having a teaching hospital or medical school. Hospitals are administered on behalf of the Boards by 388 Hospital Management Committees. The only hospitals in the Service outside the Regional Boards' immediate responsibility are the teaching hospitals which provide facilities for undergraduate and post-graduate medical or dental education and which are administered by Boards of Governors. There are 26 Boards of Governors in London and 10 in the rest of the country.

Specialists and consultants who take part in the Service (and nearly all of them are doing so) hold hospital appointments. They can take up whole-time or part-time service and those who have part-time appointments can still accept fee-paying patients outside the Service.

Certain hospitals have accommodation in small wards or single rooms which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. Amenity bed charges are fixed under Regulations and are at present 6s. to 12s. per day. In such a case the patient pays nothing for the cost of treatment or the normal cost of maintenance. In some hospitals a number of pay-beds has been placed at the disposal of part-time specialists taking part in the Service for use by private patients who agree to pay full hospital maintenance costs, and (usually) private fees to the specialist as well. The fees that may be charged by specialists to patients occupying private pay-beds are normally restricted to 75 guineas to cover everything. For exceptionally long or complicated treatment this limit may be raised to 125 guineas and special arrangements may be made in a limited proportion of pay-beds for patient and doctor to agree to fees outside these limits.

Arrangements to obtain the service or advice of a hospital specialist are made by the patient's family doctor as in the past. A specialist usually sees a patient at the hospital or clinic at which he works, but arrangements will be made for the specialist to visit the patient at home if he is unable, for medical reasons, to be taken to hospital. No charges are made to National Health Service in-patients (except for amenity beds as above), but since December 1, 1956, a charge of 1s. has been made to out-patients for each item on a prescription form for drugs and medicines (unless administered at hospitals). Exemptions from this charge are made in the case of patients receiving National Assistance or their dependants; war pensioners receiving medicines for their accepted disability; and patients attending V.D. clinics who receive medicines as part of their treatment. Also since June, 1952, hospital out-patients have to pay fixed charges for elastic hosiery, surgical abdominal supports, surgical footwear (and heeling and soling repairs), dentures, glasses and wigs. Exceptions are made in the case of a child under 16 years of age or at full-time attendance at school, to National Assistance recipients and their dependants and to war pensioners in respect of their accepted war disabilities.

In May, 1958, there were 81 hospitals providing distribution centres where hearing aids can be obtained after recommendation by a specialist.

Local Health Authority Services

The Local Health Services, mainly concerned with the care of patients in their own homes, are the responsibility of the major local authorities—County Councils and County Borough Councils. There are 146 Local Health Authorities in England and Wales.

Local Health Services provide such services as midwifery; ante-natal, post-natal and infant welfare clinics, and dental services where practicable for expectant and nursing mothers and young children; health visiting; home nursing; ambulances; provision of domestic help on health grounds; special care and after-care of the sick; local mental health services; and also vaccination and immunization. It will also fall to the Local Health Authorities to develop Health Centres.

All these services are free of charge except for domestic help and, in certain cases, provision of residential accommodation, meals, nursing requisites, bedding, etc., for which a charge may be made according to means. Since June, 1952, Local Health Authorities have also had power to make charges for the use of day nurseries. The Local Health Authorities may only charge what is reasonable, having regard to the means of the users.

Cost of the Service

	England and Wales	Scotland	Northern Ireland
	£	£	£
1948–49†..	179,281,787	22,360,725	5,660,000

Legal Notes

ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1950. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1950 (under sections which do not, however, apply to Scotland) that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on an intestacy occurring, or under any disposition (e.g. a Will) made, after the date of the adoption order. Applications are made to the High Court (Chancery), County Court, or Magistrates Court. Orders will not usually be made for a man to be *sole* adopter of a girl, and applicant (or in the case of a joint application one of the applicants) must be either:—

(*a*) Twenty-five years of age or over *and* at least twenty-one years older than the child in respect of whom application is made; or

(*b*) Twenty-one years of age or over and a relative (as defined in the Act of 1950) of the infant; or

(*c*) the mother or father of the infant.

The consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g. where the parent or guardian has ill-treated or neglected the child) the Court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1950 Act places restrictions on societies which make arrangements for the adoption of children.

Scotland.—The Adoption of Children (Scotland) Acts, 1930 to 1949, and the Adoption Act, 1950, cover the law relating to the adoption of children in Scotland, where an Adopted Children Register is maintained. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1950, which is a consolidating Act, also applies, with modifications, to Scotland. Owing to divergence of the laws of England and Scotland there is not, however, complete uniformity in this branch of the law in both countries. Thus, in regard to property rights, an adopted child in Scotland remains a member of the family of his actual parents, and an adoption order does not deprive him of any legal rights competent to him in the estate of his parents. (See further under note dealing with intestacy in Scotland.)

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers, including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates. (See below.)

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:—

1. The father or mother of the child. If they fail; 2. the occupier of the house in which the birth happened; 3. a person present at the birth; or, 4. the person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days (*Scotland* 21 days) of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of forty shillings (in Scotland the penalty is £1). The registration of a birth will be free when it takes place within 42 days (in *Scotland* 21 days). In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. The fee payable for this is 3*s.* 0*d.* There are special provisions relating to late registration. Under the Public Health Act, 1936, and the Public Health (London) Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was in attendance at the birth or has examined the body of the child must be produced to the registrar.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act, 1953. In *Scotland* re-registration of a child legitimated *per subsequens matrimonium* or whose birth entry is affected by a Decree of Court respecting status or paternity is provided for by the Registration of Births, etc. (Scotland), Amendment Act, 1934.

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's office, London.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 5*s.* 3*d.*, viz., 1*s.* 6*d.* for search, and 3*s.* 9*d.* for the certificate. (When application is made by post the charges are 7*s.* 6*d.*) They can also be obtained from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriages can also be obtained from the incumbent of the church in which the marriage took place (the customary fee being 3*s.* 9*d.*); or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (See *post* under Marriage).

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament, and under Births and Deaths Registration Act, 1953, a modified form of birth certificate, showing the names, sex and date of birth and certain other particulars, but not the parentage, may be obtained

from the Registrar General, or the appropriate Superintendent Registrar or Registrar, on payment of a fee of 9*d*. (inclusive of search) and on furnishing certain particulars.

English Registers.—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the General Register Office, Somerset House. *The Society of Genealogists*, 37 Harrington Gardens, S.W.7, possesses many records of Baptisms, Marriages and Deaths prior to 1837, including copies, in whole or in part, of about 4,000 Parish Registers.

Scottish Registers of Births, Deaths and Marriages.—Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained at the General Registry Office, New Register House, Edinburgh, or from the appropriate local Registrar, on payment of the fee of 3/-, viz.:—1/- for search and 2/- for the certificate. Certificates are issued at reduced rates for specified purposes as in England & Wales and similar provision exists for abbreviated birth certificates (fee 6d).

There are also available at the General Registry Office old parish registers of date prior to 1855, which were formerly kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained at the fee of 3/-. A fee of 20/- is payable for a general search of all the Scottish registers.

BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.—The law as to British Nationality is now to be found mainly in the British Nationality Act, 1948, which came into force on Jan. 1, 1949. The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, the Union of South Africa, India, Pakistan, the Federation of Rhodesia and Nyasaland or Ceylon (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject, and may be known either as a British Subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act, 1950, potential citizens of Newfoundland under the British Nationality Act, 1948, are deemed to have been potential citizens of Canada.

Nationality *before* Jan. 1, 1949, was determined mainly by the British Nationality and Status of Alien Acts, 1914–1943, though these Acts did not affect the status of any person born *before* Jan. 1, 1915.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act, 1949, styled the Republic of Ireland).

By the Ireland Act, 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act, 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (*a*) he has been in the service of the United Kingdom government; (*b*) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (*c*) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

Citizenship of the United Kingdom and Colonies.

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act, in the latter case, citizenship is acquired by:—

1. *Birth* on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

(*a*) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;

(*b*) children born to fathers who are enemy aliens in enemy occupied territory.

2. *Descent*, if the father was a citizen by *birth*. If the father was a citizen by *descent* only, the child acquires citizenship by descent if either:—

(*a*) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or

(*b*) the birth (occurring elsewhere than (*a*)) is registered at a United Kingdom consulate within one year; or

(*c*) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or

(*d*) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. *Registration* by the Home Secretary upon application by:—

(*a*) a citizen of one of the "Dominions" or of the Republic of Ireland who can show either that he is ordinarily resident in the United Kingdom and has been so resident for a period of twelve months, or is in Crown service under the United Kingdom government, or, in certain circumstances, if he is serving under an international organization of which the United Kingdom Government is a member, or is in the employment of a body established in the United Kingdom;

(*b*) a woman married to a United Kingdom, etc. citizen. If she is a British protected person or an alien she must take an oath of allegiance. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

4. *Naturalization.*—In order to be eligible for a certificate of naturalization an alien must:—

(*a*) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application *must* have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and

(*b*) be of good character and have a sufficient knowledge of the English language; and

(*c*) intend to reside in the United Kingdom or any colony, etc., or in the Sudan, or to enter or continue in the service of the Crown or in the service of certain organizations.

A British protected person who satisfies (*b*) and (*c*) above can apply for naturalization if he can show either that he has resided in the United Kingdom for the twelve months (or such shorter period as the Home Secretary may allow) immediately preceding his application, or that he is in the service of the Crown under Her Majesty's United Kingdom Government.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional Provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:—

(i) (*a*) he would, if born after that date, have qualified for citizenship by birth; or
(*b*) he is a person naturalized in the United Kingdom and Colonies; or
(*c*) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or

(ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or

(iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or

(iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or

(v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues as a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act, 1950, an adopted child becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost:—

(i) by declaration in the prescribed manner by a person who is also a citizen of a "Dominion" or of the Republic of Ireland or a national of a foreign country. The Home Secretary can withhold registration of the declaration in time of war;

(ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;

(iii) by the Home Secretary depriving a *naturalized* person of citizenship if such person has:—
(*a*) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or
(*b*) in time of war, traded with the enemy; or
(*c*) within five years after becoming naturalized, been sentenced in any country to a term of twelve months imprisonment; or
(*d*) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;
and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

(iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.

(v) Under sect. 2 of the British Nationality Act, 1958, which contains special provisions with regard to citizens of Ghana.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act, 1949, declares that the Republic, though not part of H.M.'s Dominions, is not a foreign country, and any reference in an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now, however, by the Crown Proceedings Act, 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Among exceptions to the Act are the following: (*a*) No action lies in tort against the Crown *or the individual Crown servant* for anything done or omitted to be done in relation to any postal packet or telephone communication, except for loss of a registered inland postal packet (in which case the action must be brought within one year of posting), not being a telegram. (*b*) The Crown *and any member of the armed forces* are immune from liability in tort in respect of death of, or personal injury to, another member of the armed forces on duty, provided that the death or injury is attributable to service for purposes of pension.

Scotland.—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal

systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court. The Lord Advocate is the proper defender in proceedings against the Crown.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of Post Office Savings Bank deposits. On the other hand, the former rule that the wages and salaries of the servants of the Crown are not arrestable remains unaltered.

DEATHS, BURIAL AND CREMATION

DEATHS

(For Certificates, *see* under BIRTHS)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the registrar. It is essential that a certificate for disposal should be obtained from the registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods. After twelve months no death can be registered without the Registrar General's consent and on payment of fees amounting to fifteen shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act*, 1926, s. 2).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib.* s. 3).

"Still-born" child. (*See* under Births (Registration), p. 977.)

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of *Scottish* domicile, particulars are sent to the Registrar General for Scotland.

In *Scotland*, the rules of registration are similar, but (1) the death must be registered within 8 days, failure to do so involving a penalty of £1; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

BURIAL

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable: legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council, or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, *see* above.

CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect. Cremation may not take place if deceased has prohibited that form of disposal.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016).

DIVORCE, ETC.

Preliminary.—Matrimonial Suits may be conveniently divided into three classes, viz. (1) those in which a declaration that there has never been a marriage is sought; (2) those in which the duties arising from marriage are sought to be upheld; and (3) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no sufficient consent on the part of one or both of

the parties, if one of the parties was insane, or if one of the parties was under the age of consent, *i.e.*, 16 —Marriage Act, 1949. Where the *formalities* of the marriage were defective, the marriage is generally void if *both* parties knew of the defect (*e.g.*, where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage. Inability to consummate a marriage may also be a ground for a nullity decree; but in this case, the marriage is only voidable and remains valid until the decree is made.

Under the Matrimonial Causes Act, 1950, which does not apply to Scotland, a marriage is also voidable (*i.e.* a decree of nullity may be obtained) on the following grounds—(*a*) respondent's wilful refusal to consummate the marriage; (*b*) that either party at the time of marriage was mentally defective or subject to recurrent fits of insanity or epilepsy; (*c*) that at the time of marriage the respondent was suffering from communicable venereal disease; (*d*) that at the time of the marriage the respondent was pregnant by another man. In cases, (*b*), (*c*) and (*d*), the petitioner must have been ignorant of the grounds at the date of the marriage and must not have agreed to intercourse taking place since discovering the grounds, and proceedings must be instituted within a year of the marriage.

By the Matrimonial Causes Act, 1950, and, as to Scotland, by the Law Reform (Miscellaneous Provisions) Act, 1949, it is provided that a decree of nullity in respect of a voidable marriage shall not operate so as to bastardize any child, who would have been the legitimate child of the parties to the marriage if the marriage had been dissolved instead of annulled.

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (*a*) above, even though there has been no normal intercourse, but it may in certain circumstances enable a petition for *Divorce* to be brought on the grounds of cruelty (as to which see below). Further it has been allowed as a *defence* to a charge of desertion against the aggrieved party.

In one High Court case the judge held that a husband's insistence on the practice of *coitus interruptus* amounted to wilful refusal to consummate the marriage, where there had been no other intercourse. In other High Court cases the judges have disagreed with this view, but held that, in the circumstances of the particular cases, a divorce could be granted on the ground of legal cruelty.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights is a ground for obtaining judicial separation.

(3) *Judicial Separation and Divorce.*—The third class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the same grounds as those for divorce and also on the ground specified in (*a*) above.

Divorce.—Complete divorce is now obtainable by either husband or wife upon any one of the following grounds: adultery of respondent since marriage; desertion by respondent for 3 years immediately before petition; cruelty to petitioner; incurable insanity (under certain conditions); and by the wife, also on commission by the husband of certain criminal sexual offences. Matrimonial Causes Act, 1950, s. 1.

The foregoing is subject to a clause prohibiting any petition for divorce before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Cruelty, in a legal sense, is conduct of such a character as to have caused injury or a reasonable apprehension of injury to life, limb, or health (bodily or mental). A course of conduct calculated to break the spirit of the sufferer, continued until health breaks down or is likely to break down under the strain, constitutes legal cruelty.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

If, upon disputes arising, the parties *agree* to live apart, then in general neither can be said to have deserted the other.

When the decree will be refused—A decree *must* be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. (There is no such thing in the Divorce Court as judgment against the respondent by default.) Other *absolute* bars to relief are (i) connivance at the *adultery* of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation of the respondent's *adultery or cruelty*, *i.e.*, complete forgiveness which restores the *status quo* (although the offence may be revived by later misconduct). There are also certain *discretionary* bars, as *e.g.*, where the petitioner has been guilty of adultery; of unreasonable delay; of cruelty; or of wilful neglect or misconduct conducing to the adultery, insanity, or desertion alleged. (1950 Act, s. 4.)

Intervention by Queen's Proctor.—At any time during the progress of a suit, and before the decree *nisi* is made absolute, the Queen's Proctor may intervene.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree *nisi*. The marriage subsists until the decree is made absolute, usually three months after decree *nisi*. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see Marriage—Miscellaneous Notes, p. 1143.

Maintenance, etc.—The Court has wide powers to make orders as to maintenance or alimony (usually payable to an innocent wife), and as to costs. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty co-respondent may be ordered to pay costs and damages.

By the Matrimonial Causes Act, 1950, the High Court in England may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, *even though* no matrimonial suit is pending between the parties to the marriage.

CUSTODY OF CHILDREN

In suits for nullity, divorce or judicial separation, and in proceedings for maintenance, the Court can make orders as to the custody of and access to the children and as to their upkeep and education. A guilty spouse will normally be entitled to reasonable access to the children and may even be awarded

the custody if the Court thinks fit. The paramount consideration is always the welfare of the child.

A spouse who has been deprived of the custody of a child will not thereby be deprived of his other rights as the child's *guardian* unless the Court expressly so orders.

SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case.

MAGISTRATE'S SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or assault or has deserted his wife, or has been guilty of persistent cruelty to her or her children, or of wilful neglect to maintain her or her infant children, or where he is an habitual drunkard, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on the ground that the wife has been cruel to his children; or is an habitual drunkard; or has committed adultery. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly sum not exceeding £5 for the benefit of the wife and a sum not exceeding £1 10s. a week for each child until the child attains sixteen. Further, if a child is or will be engaged in a course of education or training after attaining the age of sixteen, the Court may on the application of the wife make an order for the payment of maintenance in respect of that child for a further period of up to two years from the date of the making of the order; such further period may be extended on subsequent applications to the Court, but this maintenance provision will in no case be extended beyond the date when the child attains the age of twenty-one. Where the husband applies, the custody of any children of the marriage may be given to him. The Court may, on giving the custody of any children to either spouse, make such order as to access to those children by the other spouse as it thinks fit. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation or connivance or conduct conducing thereto by the husband; and if, having obtained an order, she commits adultery, the order must be discharged, unless the Court is of opinion that the husband conduced to the adultery by failing to make such payment of the separation allowances as he was able. An order may be altered, varied or discharged at any time on fresh evidence, or, as regards orders for payment, on cause being shown. All applications for relief, except on grounds of desertion or failure to maintain, must be made within six months of the offence complained of. The Magistrates' Courts Act, 1952, separates the hearing of matrimonial disputes from ordinary Court business; specifies the persons allowed to be present; limits newspaper reports, etc., etc.

(The Royal Commission on Marriage and Divorce has now submitted its report to Parliament, in which it recommends many changes, including three new grounds for divorce. However, legislation is required to give effect to most of the recommendations, and there is no immediate prospect of substantial change.)

SCOTLAND

DIVORCE

Proceedings are brought in the Court of Session and it is necessary that the husband be domiciled in Scotland, or, he not being domiciled in the United Kingdom or in the Channel Islands or the Isle of Man, that the wife is resident in Scotland and has been ordinarily resident there for a period of three years immediately preceding commencement of proceedings.

The following are the grounds for divorce:—

1. *Adultery.*—A mere confession by the defender is of itself insufficient; there must be proof of the facts. Direct evidence is not required, if facts can be established which give rise to an inevitable inference of adultery. There must be no collusion between the parties, and the pursuer is required to swear to this. It is not collusion, however, for a guilty spouse to give information of an act of adultery already committed. It is a defence to an action of divorce for adultery to plead that the innocent spouse has condoned the misconduct on which the action is founded.

2. *Desertion.*— The defender must have wilfully and without reasonable cause deserted the pursuer and persisted in such desertion for a period of not less than three years. It must be shown that the desertion was without reasonable cause, and that the pursuer has throughout the period been willing to adhere. Refusal by one spouse to have marital relations with the other for any period of three years without any overt act of desertion does not constitute desertion. Here also, collusion is fatal to the success of the action.

3. *Incurable Insanity.*—The defender must, for five years preceding the raising of the action, have been under care and treatment as an insane person.

4. *Cruelty.*—The degree of cruelty to be established depends on the circumstances of each individual case, but the test, generally speaking, is that the conduct complained of must be such as to endanger the health of the pursuer. Cruelty may take the form of habitual drunkenness on the part of one of the spouses.

5. *Unnatural Sexual Offences.*—An extract of the criminal conviction is sufficient proof.

Effect of Divorce on Property.—A husband or wife obtaining decree of divorce against the other, except on the ground of incurable insanity, is entitled to claim his or her legal rights, *jus relicti*, however, being excluded, as if the offender was dead. Where there has been a successful cross-action the effect is the same as though both spouses had died at the date of decree.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

SEPARATION

A decree of judicial separation may be obtained by one spouse against the other on the grounds of (*a*) adultery, (*b*) cruelty. This entitles the parties to live apart, but does not dissolve the marriage. The husband, if the guilty party, is liable for aliment.

CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the

right to claim custody, though where the considerations of welfare are equally balanced the Court will have regard to the element of guilt.

HIRE-PURCHASE

ENGLAND AND WALES

Protection of the purchaser against unscrupulous dealings is given by the Hire-Purchase Act, 1938 (as amended by the Hire-Purchase Act, 1954), which applies to a hire-purchase agreement under which the hire-purchase price *i.e.*, the total sum payable by the hirer to complete the purchase of the goods, does not exceed £1000 for livestock, or £300 in any other case.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and there must be a memorandum of the agreement signed by the hirer himself and by or on behalf of the owner and any guarantor. The memorandum must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his right to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*), and a copy of the memorandum must be sent to the hirer within seven days of the agreement being made. In breach of any of these conditions the owner can neither recover the goods nor enforce the agreement or any security given, although the Court can dispense with any of these requirements save that as to the signed memorandum. The same result ensues (whilst default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 1*s.* for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement, and, although he will not thereby escape liability for any instalments which have already become due he will be under no further obligation *under the agreement*. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due, he must pay the difference to the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

SCOTLAND

The Hire Purchase and Small Debt (Scotland) Act, 1932, provides that no contract of hire purchase to which the Act applies is binding on the hirer unless (1) it is signed by him and (2) either a copy is acknowledged by him to have been delivered at the time of his signature or sent to him by registered post within fourteen days thereafter. Any contract which limits any right conferred by the Act on the hirer is void to that extent. The hirer may terminate the contract at any time by (1) re-delivery of the article in a good state of repair, fair wear and tear excepted, and (2) paying any instalment then due together with the amount, if any, by which one-third of the total payments stipulated for in the contract by way of instalment exceeds the *cumulo* amount of the instalments due. Even after the owner has obtained decree of delivery of an article, the hirer is entitled to retain it in his possession or to recover it if, within fourteen days of the decree, he pays the whole instalment which is due, with expenses.

The above Act was extended by the Hire Purchase Act, 1954, to apply to articles exceeding £300 in value.

ILLEGITIMACY AND LEGITIMATION

ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Public Assistance Authority where the child becomes chargeable to the local authority, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 20*s.* a week. The evidence of the woman must be *corroborated* in a material particular. The mother has the custody of her bastard children. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence.

LEGITIMATION.—By the *Legitimacy Act*, 1926, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. This does not legitimate a person whose father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimated child.

Declarations of Legitimacy.—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (*e.g.*, a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

SCOTLAND

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such

order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognized by International Law so far as the laws of particular countries allow it and is valid to that extent in England. By the Legitimacy Act, 1926, an illegitimate child may, in certain circumstances, succeed on intestacy. By the Registration of Births, Deaths and Marriages (Scotland) Amendment Act, 1934, a child so legitimated, who has already been registered as illegitimate, may, in certain circumstances be re-registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

INTESTACY

ENGLAND AND WALES

As regards deaths on or after January 1, 1953, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952. The latter Act considerably increased the benefits of a surviving spouse of an intestate, and also extended the provisions of the Inheritance (Family Provision) Act, 1938 (see under "Wills"), to intestacies. These notes deal with the position under the 1952 Act, so that if the death occurred before 1953 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £5,000 with interest at 4 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £20,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents, and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy, any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £5,000 or £20,000 as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) issue; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain twenty-one or marry under that age, their shares going to the other persons (if any) within the same group who do attain twenty-one or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, *i.e.*, by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (*i.e.*, leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

Note that the old rule of primogeniture no longer applies.

For further details, *see* Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952.

The Legitimacy Act, 1926, contains special provisions concerning the intestacy of an illegitimate child or the mother of an illegitimate child.

SCOTLAND

Heritage.—The lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals and so on in the ascending scale. Males have preference over females and the rule of primogeniture obtains. Regard is had, however, to the right of representation; thus, if the eldest son of the deceased, being his heir, has predeceased him leaving issue, the issue (whether male or female) are preferred to the younger sons of the deceased. Daughters only succeed if there are neither sons nor the issue of predeceasing sons, and where there are more than one, they share equally. There being no descendants, brothers, etc., will succeed, those of the full blood excluding those of the half blood. Among collaterals it is noted that the deceased's immediate younger brother is preferred to an elder brother. Failing a younger brother and his issue the estate ascends to the next elder brother and so on. If there are no brothers and sisters, nor the issue of brothers and sisters, the estate goes to the father and failing him to his collaterals; failing these the estate ascends to the paternal grandfather and his collaterals. The succession never ascends to the mother and her relations; even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

By the Intestate Husband's Estate (Scotland) Acts, 1911 and 1919, the widow of a man dying intestate and without lawful issue is entitled to the whole estate both heritable and moveable if under £500 in value; if over that amount, she takes £500 with interest at 4 per cent. from the date of death, out of the heritable and moveable estate rateably before any division is made, and without prejudice to her rights of terce and *ius relictæ* (see *post*,

p. 994). Section 5 of the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1940, gives like rights to a surviving husband. The same section covers the case of partial intestacy.

Moveable.—One-third of the moveable estate goes to the surviving spouse as *jus relicti* (*relictæ*); one-third to surviving children as *legitim* (see *post*, p. 994); and one-third to surviving children and issue of predeceasing children *per stirpes*, *i.e.*, the share which would have fallen to a predeceased parent, if alive, is divided equally among the children. Where no children or issue of children survive, half of the estate goes to the surviving spouse and half to the heirs *in mobilibus*, *i.e.*, nearest heirs including representatives of predecessors, subject to the spouse's right to £500 (*supra*). The lines of succession are the same as in heritable succession, but the right of representation (*supra*) only applies where there are next of kin or the issue of predeceasing next of kin. Intestate Moveable Succession (Scotland) Act, 1855 (amended 1919). Beyond that relationship heirs take *per capita*. Where an intestate leaves no issue and is predeceased by his father, his mother is entitled to the same rights as the father would have had on survivance (1919 Act). It is of interest to note that a Committee was recently set up by the Secretary of State for Scotland to make such recommendations as seemed desirable for the alteration of the law in regard to intestate succession; the legal rights of spouses and children, and the law in relation to adopted persons and adopters. The Committee have issued their Report in which important alterations are proposed.

JURY SERVICE

Liability to Jury Service depends upon inclusion in the local Jury Book. This is compiled from the Electors Lists for each year (see *post* under "Voters' Qualifications"). The names of all persons who are on 10th October qualified and liable to serve as jurors are marked with the letter "J" on the Electors Lists. The marked Electors Lists are published, and anyone whose name is improperly marked may before the following 17th December claim that, although *qualified* to serve [see below] he is *exempt* from service [see below]; the marks will be removed from the names of exempted persons. The remaining marked names are thereafter included in the Jury Book. No one whose name actually appears in the Jury Book may claim exemption on any ground whatever except illness or, if a woman, for medical reasons.

QUALIFICATIONS

England and Wales—Every man and woman between the ages of 21 and 60 years [persons over 60 are exempt but not disqualified] residing in England or Wales being the owner, legally or under a trust, of freehold land worth £10 a year or more, or of leasehold land worth £20 a year or more (if the lease is for at least 21 years or a life interest) in the county in which they live; or being a householder assessed to the poor rate or inhabited house duty at £30 in Middlesex or £20 elsewhere; or occupying a house with at least 15 windows; is qualified and liable to serve on juries in the superior courts (civil and criminal), and at Assizes in their own county, and on petty juries in the local County Court or Quarter Sessions. Also all burgesses of boroughs having separate quarter sessions or a borough civil court are qualified and liable to serve on juries therein. Special regulations govern the qualifications and method of listing common jurors in the City of London; and jurors for a coroner's inquest. By the Juries Act, 1949, a person attending for jury service is entitled to be paid travelling and subsistence allowances together with compensation for loss of earnings and other loss or expenses.

Disqualifications.—Any person who has been attainted of treason or felony, or convicted of any infamous crime (unless he has obtained a free pardon) is disqualified from service on all juries.

Exemptions.—The persons who are exempt from serving on juries (including coroner's juries) include: peers; M.P.'s; judges; ministers of religion (Christian and Jewish); practising lawyers; officers of the Courts; coroners; prison, etc., officers; asylum keepers; practising M.R.C.S.'s, M.R.C.P.'s and L.R.C.P.'s; practising apothecaries, doctors and chemists (and registered practising dentists at their option); midwives; members of the armed forces; members of the Territorial Army (in certain cases) or the Royal Auxiliary Air Force; members of the Mersey Docks and Harbour Board, and of the Port of London Authority; certain members of Trinity House, Deptford Strond; masters of buoy and light vessels under the Trinity Houses, and all licensed water pilots; household servants of the Crown; officers of the Post Office, customs and excise; sheriff's officers; police officers; special constables; metropolitan magistrates and their court clerks and servants; officers of the Houses of Parliament; Registrars of births, deaths, and marriages.

As to their own counties: members of the L.C.C., and commissioners of income tax.

As to their local counties: borough councillors and J.P.'s., town clerks and borough treasurers; burgesses of boroughs having separate Quarter Sessions are exempt from serving on the County Sessions.

As to their own area of jurisdiction: J.P.'s.

Moreover a juror can never be called upon to serve oftener than once in each year; this period of exemption is longer in certain counties.

JURY SERVICE IN SCOTLAND

It is the duty of the Sheriff in each county to make up a list of persons qualified and liable to serve as jurors. The list is compiled from information which every householder is required to provide. From this list the General Jury Book is made up. Part II of the Juries Act, 1949, applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors, and for compensation for loss of earnings, of which the latter must not exceed 20s. per day.

QUALIFICATIONS

Every man or woman between the ages of 21 and 60 is qualified, who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 sterling.

Exemptions.—The persons who are exempt from serving on juries include: peers, judges of the supreme courts, sheriffs, magistrates of Royal Burghs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and officers of court, prison officers, university professors, physicians, surgeons and dentists, officers in the Navy or Army on full pay, customs officers, messengers-at-arms and other officers of the law, lighthouse keepers and their assistants, soldiers, members of the Territorial Army and the Auxiliary Air Force (in certain circumstances), Inland Revenue officials and officers of the Post Office.

Jurors failing to attend without good cause are liable to a penalty.

LANDLORD AND TENANT

ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the law on this subject is complicated by the mass of legislation thereon, and no attempt is made here to deal in any detail with that legislation. Some of the statutes which govern specific aspects of the topic are set out at the end of this note with brief particulars. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important statutes include:—

(1) As to agricultural holdings—the Agricultural Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Act, 1954, which does not extend to Scotland, has made substantial changes in the law. The compensation for improvement provisions of the Landlord and Tenant Act, 1927, are still applicable, although slightly amended, but the compensation for loss of goodwill and right to a new lease provisions of the 1927 Act have gone. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to unfurnished dwelling houses—the complicated mass of legislation generally known as the Rent Acts. If a house is within these Acts, the tenant may have a personal right to reside in the house and can only be ousted on certain grounds. Further, each house within the Acts has a rent limit, and the rent recoverable by the landlord is limited to this rent. Details of how this rent limit is determined are contained in the Rent Act, 1957 (see below). If there is a mortgage of a house which is within the Acts, the mortgagee can only take steps to enforce his security if certain grounds exist. Further, he cannot in general increase the rate of interest.

Houses let at a rent which includes board or substantial attendance or furniture are governed by the Furnished Houses (Rent Control) Act, 1946, as amended by the Landlord and Tenant (Rent Control) Act, 1949, if within the limits of rent control imposed by the Rent Act, 1957 (see below).

Since the Rent Act, 1957, the Rent Acts do not apply to a lease of a dwelling house granted for a term certain exceeding twenty-one years, but Part I of the Landlord and Tenant Act, 1954, gives protection in such cases, provided the rateable value does not exceed £100 in London and elsewhere in England and Wales, £75. Under this Act, the contractual tenancy is automatically extended until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on one of the grounds specified in the Act.

The Rent Act, 1957, has made considerable inroads into the importance of rent control by removing many houses from control altogether and fixing new maximum rent limits for all houses which remain subject to control. The principal changes effected by this Act are as follows:

1. Any house whose rateable value on November 7, 1956, exceeded £40 in London and elsewhere £30, is automatically decontrolled (and the operation of the Furnished Houses (Rent Control) Act is restricted to houses within the same limits of rateable value). However, the landlord cannot recover possession earlier than the date specified in a notice served by him, which must not be earlier than six months after service of the notice, and to recover possession the landlord must bring court proceedings. If, in these proceedings, the tenant can satisfy the court as to certain matters, the court can suspend the execution of the order for possession for a certain period. There are special provisions with regard to the rent payable by the tenant after the date specified in the landlord's notice. (Landlord and Tenant (Temporary Provisions) Act, 1958.)

2. No tenancies beginning on or after July 6, 1957, are subject to control unless the person to whom the tenancy is granted is already a protected tenant of that house.

3. For all houses remaining subject to control the maximum rent is determined by reference to the gross value shown in the rating valuation list on November 7, 1956. The maximum rent is then computed as follows:—(*a*) where the tenant is not responsible for repairs other than internal decorative—twice the 1956 gross value; (*b*) where the landlord is responsible for all repairs including internal decorative—7/3 of the gross value; (*c*) where the tenant is responsible for all repairs—4/3 of the gross value. (There are varying proportions in certain other cases.) In all cases there may be added, (*a*) rates borne by the landlord; (*b*) a reasonable charge for services provided by the landlord.

4. All increases in rent are only applicable to a statutory and not a contractual tenancy, except so far as may be consistent with the terms of the tenancy.

5. In order to obtain any increase in the rent of premises remaining subject to control, the landlord must serve notice of increase in the prescribed form which will take effect from the date specified therein; this date must be at least three months after service of notice, and the rent cannot be increased by more than 7*s.* 6*d.* a week during the nine months following service of the notice.

6. A notice to quit *any* dwelling house must be given at least four weeks before it is to take effect.

The 1957 Act also provides that the tenant of a decontrolled house may, before giving up possession, claim compensation for an improvement made after August 25, 1945, unless the landlord has made written objection to the improvement before completion.

SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 27, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed; (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949, which is a consolidating act applicable to Scotland, contains provisions similar to those in the English

Act, which is alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Act, 1949, gives a measure of security to tenants of shops. This Act enables the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Act applies to premises held by the Crown or Government Departments, either as landlord or tenant.

The series of complicated statutes known as The Rent and Mortgage Interest (Restrictions) Acts, 1920 to 1939, largely govern the relations between landlord and tenant in regard to certain unfurnished houses—including parts thereof if let as separate dwellings—and it is important to note that notwithstanding conditions in the lease of a controlled house providing for the removal of the tenant, it is not possible to contract out of the Acts. Employees occupying premises by virtue of their employment are not tenants and so cannot claim protection. The Housing (Repairs and Rents) (Scotland) Act, 1954, provides for increase in rent of a controlled dwelling house on which repairs of a certain value have been carried out. The Rent of Furnished Houses Control (Scotland) Act, 1943 contains provisions applicable to houses or parts of houses let with furniture and with or without services, as also to unfurnished premises let with services. These Acts have however been substantially altered or modified by The Rent Act, 1957. The changes in the law are *inter alia* as follows:—(1) Dwelling houses, the rateable value of which was on November 7, 1956, over £40, are released from control. (2) All tenancies coming into operation on or after July 6, 1957, are free from control, except where a new tenancy is granted to a statutory tenant already in occupation. (3) Provision is made for the increase of rent by a maximum of one quarter of all controlled houses. (4) The repairs increase of two-fifths provided for in the 1954 Act is increased to one-half.

The Rent Act, 1957, further provides that a notice to quit a dwelling house (furnished or unfurnished) must be sent at least four weeks before the date on which it is to take effect. It should be noted, however, that transitional provisions operate when a house is to be decontrolled: thus a landlord cannot recover possession earlier than 15 months after the date of decontrol and during this interim period the landlord cannot impose an increase in rent. Further, to obtain possession, he must serve a notice specifying the date when the tenancy will terminate, and must, under the Landlord and Tenant (Temporary Provisions) Act, 1958, bring court proceedings for possession. (See further *ante*, under England and Wales.) Compensation for an improvement made after August 15, 1945, may also be claimed. (See *ante* under England and Wales.)

The Landlord and Tenant Act, 1954, referred to in the preceding section, does not apply to Scotland.

LEGAL AID

LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid and Advice Act, 1949, is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the new service is contained in the Act itself, but the administrative details are embodied in a scheme made by the Law Society. The various parts and provisions of the Act may be brought into force at different times by statutory instrument.

The part of the Act dealing with legal aid in civil proceedings came into force on October 2, 1950, limited, however, to proceedings (including matrimonial causes) in the High Court and Court of Appeal and proceedings remitted by the Supreme Court to a County Court, although it has now been extended to proceedings in any County Court and in certain local courts *e.g.*, the Liverpool Court of Passage. Legal aid is *not* available in civil proceedings before Magistrates. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation, breach of promise of marriage, seduction, inducement of one spouse to leave or remain apart from the other are excepted from the scheme, as are also relator actions, election petitions and proceedings by way of judgment summons. The provisions of the Act which provide for legal aid by a solicitor in cases where the question of litigation does not arise or has not arisen, and oral legal advice generally, and legal aid in Courts other than those mentioned above, have been deferred, although it is probable that provisions for the giving of oral advice by solicitors for a fee paid out of the Legal Aid Fund will come into operation in 1959.

Eligibility for legal aid in civil proceedings depends upon an applicant's "disposable income" and "disposable capital." Legal aid may be available if the former does not exceed £420 per annum, but a person may be refused assistance if he has a disposable capital of more than £500 and it appears that he can afford to proceed without legal aid. Even so, the applicant *may* be required to contribute up to half the excess of his disposable income above £156, together with the whole excess of his disposable capital above £75. (The Lord Chancellor's Advisory Committee have recommended that the upper and lower limits of disposable income should be increased.) Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital the value of the house in which the applicant resides, of furniture and household possessions; a deduction of up to £75 may be made in respect of dependants. Except in matrimonial proceedings or cases where the spouses are living apart, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the National Assistance Board, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere, application should be made to the Local Committee for London. However, if the application is made in respect of proceedings in an *appellate* court and the applicant is resident in England or Wales, application should generally be made to any *Area* Committee—if resident elsewhere, to the *Area* Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel, from a panel. However, in

matrimonial causes, where the maximum contribution payable by an applicant does not exceed £10, his case will be conducted by a solicitor employed whole time to deal with such cases.

LEGAL AID IN CRIMINAL CASES

The Poor Prisoners' Defence Act, 1930, provides for free legal aid in criminal proceedings in specified cases, and official lists are kept of solicitors and barristers willing to undertake the defence of poor prisoners. On trial for an *indictable offence* (*i.e.*, before the higher courts, such as Assizes or Quarter Sessions) the person charged may have free legal aid, if Justices, on committal for trial, or Judge of trial court grant a *Defence Certificate*. If the person's means are insufficient, such Certificate *may* be granted in cases where desirable, and *must* be given for a murder charge. In Magistrates' Courts, a Defence Certificate may be granted to a person of insufficient means if it is considered desirable to do so owing to gravity of charge or exceptional circumstances. The Legal Aid and Advice Act, 1949, provides that application for free legal aid under the Poor Prisoners' Defence Act, 1930, may be made by letter by any person arrested or summoned for an offence, as well as by a person charged with an offence. The letter should be addressed to the clerk to the Justices and must give particulars of the offence charged and set out the grounds of the application. Refusal of a legal aid certificate by a Justice after such application does not prevent the applicant being granted a legal aid certificate at the hearing. Legal aid is also available under the 1930 Act in proceedings on the question of the sentence to be passed, and after as well as before the defendant has pleaded or been found guilty.

Provision is also made for applications for legal aid in the event of an appeal under the Criminal Appeal Act, 1907, and the Summary Jurisdiction (Appeals) Act, 1933.

In any application for aid under the Poor Prisoners' Defence Act, 1930, the Summary Jurisdiction (Appeals) Act, 1933, or the Criminal Appeal Act, 1907, if any doubt exists as to whether the applicant can afford to provide his own legal aid, or whether it is desirable in the interests of justice that he should have free legal aid, such doubt is to be resolved in favour of the applicant. Further, the Justices have an almost absolute discretion in deciding applications.

SCOTLAND

Civil Proceedings

The Legal Aid and Solicitors (Scotland) Act, 1949, came into force on and October, 1949. For the time being the scheme provided by the Act is limited to civil actions in the Court of Session and in the Sheriff Courts except actions in respect of defamation or verbal injury, breach of promise of marriage, the inducement of one spouse to leave or remain apart from the other, election petitions (under the Parliamentary Elections Act, 1868, or the Elections (Scotland) (Corrupt and Illegal Practices) Act, 1890), and small debt proceedings (*i.e.* under £20) and proceedings for summary removing, in both of which liability for the debt and the amount thereof are admitted. Advice from solicitors, as distinct from proceedings, is not yet available.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Committees which are set up to administer the scheme. Application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the National Assistance Board after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action.

Criminal Proceedings

In every sheriffdom there are Solicitors for the poor, and in the Court of Session there are Counsel and Solicitors for the poor, all of whom act gratuitously. No Court dues are payable in the first instance. The means that preclude a person from the benefit of the Poors' Roll are not fixed, and each application depends on its own circumstances.

MARRIAGE

A.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. MARRIAGE BY BANNS.—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, *which is the usual place of worship* of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is *in addition* to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (see below), or submit to the republication of banns.

2. MARRIAGE BY LICENCE.—Marriage licences are of two kinds:—

(i) *A Common Licence*, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, S.W.1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 Dean's Court, Doctors' Commons, E.C.4), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for *all* England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party

upon payment of fees amounting to thirty shillings. [The cost of licences through a clerical Surrogate in the country (see below) is £2 15s.] *No previous notice is required and the licence is available as soon as it is issued.* Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, *or* the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

(ii) *A Special Licence* granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although a stranger-clergyman be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

(*a*) A marriage in a registered building (*e.g.*, a nonconformist church registered for the solemnization of marriages therein).
(*b*) A marriage in a register office.
(*c*) A marriage according to the usages of the Society of Friends (commonly called Quakers).
(*d*) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
(*e*) A marriage according to the rites of the Church of England (see above—in this case the marriage can only be *without* licence).

NOTICE.—Notice of the intended marriage must be given as follows:—

(i) Marriage by certificate (*without* licence)—If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.

(ii) Marriage by certificate (*with* licence)—One notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (see below) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE:

(i) *Without* licence.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three months from the date of the entry of the notice.

(ii) *With* licence.—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than a Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

(i) *In a Registered Building.*—The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act,

1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," *or*, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

(ii) *In a Register Office.*—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar and a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.," and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Registry Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.

(iii) *Other Cases.*—If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

FEES OF SUPERINTENDENT REGISTRARS.

	s.	*d.*
For entering notice of a marriage by certificate (with or without licence) in the marriage notice book	1	6
For a certificate for marriage (with or without licence)	1	6
For a licence for marriage	45	0
For a marriage by certificate (without licence) in the presence of a Registrar	7	6
For a marriage by certificate (with licence) in the presence of a Registrar	15	0

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act). It is now permitted to contract a marriage with:—

Deceased wife's sister.
Deceased brother's widow.
Deceased wife's brother's daughter.
Deceased wife's sister's daughter.
Father's deceased brother's widow.
Mother's deceased brother's widow.
Deceased wife's father's sister.
Deceased wife's mother's sister.
Brother's deceased son's widow.
Sister's deceased son's widow

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister. *During the lifetime* of a person *upon whose decease* a marriage is now authorized (but which would otherwise be prohibited owing to affinity), it is not lawful for such a marriage to be contracted.

Minors.—Persons under 21 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, section 3 and 2nd Schedule). Where both parents are living, both must consent; where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, *e.g.*, the insanity of a parent. If consent is refused the Court may on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act *prohibits* any marriage where either party is under 16 years of age.

C.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate *with* licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

Impediments to marriage: These render the marriage null and void. (*a*) Age: If either party is under

the age of 16. (*b*) Forbidden Degrees: If the parties are within certain degrees of relationship. (*c*) Subsisting previous marriage. (*d*) Impotency of either party. (*e*) Non-residence, *i.e.*, if the legal requirement of prior residence of one or other of the parties in Scotland have not been complied with. (*f*) Insanity of either party.

No consent of parents or guardians is necessary.

Marriages may be regular or "irregular."

Regular Marriages.

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in the Registration District for at least 15 days before the ceremony. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (*a*) banns or (*b*) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed *2s. 6d.* A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons living in Scotland, *i.e.*, for at least 15 clear days prior to the notice. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate: fees, *2s. 6d.* Such certificate of publication is only valid for three months. The Naval Marriages Act, 1908, regulates the publication of banns on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication as above, it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. Such a marriage is regular and valid in all respects.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal methods of publication cannot be carried through, the Sheriff, on application by the parties may grant a licence which is deemed in all respects to be equivalent to a certificate of publication.

Irregular Marriages.

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, viz. marriage by co-habitation and habit and repute. If parties live together constantly as husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

MASTER AND SERVANT

Wages and Holidays

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to workmen, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen, certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. These Acts did not relate to the amount of wage to be paid to the employee, but to-day minimum wage rates for particular trades are prescribed by numerous statutes. The Wages Councils Act, 1945, established Wages Councils, which are given power to fix minimum wages in respect of a number of trades and industries. The Councils may also direct as to the length of holidays for workers in such trades and industries, and for payment of wages during holidays, under the Holidays with Pay Act, 1938. Subject to this Act, a servant's right to a holiday is a matter of contract. The terms of the contract may be express or implied; but if there is a right to a holiday once in a year and the servant is rightfully dismissed before the end of that year, he cannot successfully claim pay in respect of the loss of the holiday.

RECEIPTS

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

In *Scotland*, as in England, inability to produce receipts does not necessarily bar defence to an action for payment.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act, 1947, contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Development charge is not payable in respect of operations begun or uses of land instituted on or after the 18th November, 1952.

What is Development:—

(*a*) Carrying out of building, engineering, mining or other operations.

(*b*) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

Examples of what is not Deemed Development:—

(*a*) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior.

(*b*) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Minister may make Development Orders giving general permission for a specified type of development. Thus

a General Development Order of 1950 specified a number of types of development for which no permission is required *e.g.*, enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 1,750 cubic feet or one-tenth whichever is greater, subject to a maximum of 4,000 cubic feet.

Appeal against refusal of permission lies to the Minister, whose decision is final. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

Enforcement Notice.—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against an enforcement order lies to a Court of Summary Jurisdiction and thence to Quarter Sessions.

For further details and other provisions of the planning law, the Act of 1947 and the Orders made under the Act, the Town and Country Planning (Amendment) Act, 1951, and the Town and Country Planning Act, 1953, should be consulted. Elaborate provisions as to payments for loss of development value by reference to established claims on the £300 million fund (established under the 1947 Act) are contained in the Town and Country Planning Act, 1954.

Scotland.

In Scotland special provisions, on similar lines, have been made by the Town and Country Planning (Scotland) Act, 1947, which incorporates certain provisions of the Town and Country Planning (Scotland) Act, 1945, all other earlier planning Acts being repealed. The financial provisions of the 1947 Act, have, however, been amended by the Town and Country Planning Act, 1953, which abolished development charges, and by the Town and Country Planning (Scotland) Act, 1954, which set up a new Scheme of compensation and under which a number of Regulations have recently come into operation.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the latest of which, the Acts of 1948 and 1949, have made important changes in the law. Those entitled to vote as electors at a parliamentary election in any constituency are those resident there on the qualifying date who, at that date and on the date of the poll, are British subjects of at least twenty-one years of age and not subject to any legal incapacity to vote; but registration as an elector in the register to be used at the election in question in that constituency is a prerequisite, and at a general election no person may vote in more than one constituency. Since the Electoral Registrars Act of 1949, the registers are prepared once in each year only. Under the Electoral Registers Act, 1953, the Register (of parliamentary and local government electors or, in Northern Ireland, of parliamentary electors) is published not later than February 15 in each year and is for use in the period of 12 months commencing on February 16. The qualifying date referred to is, in England, Wales and Scotland the preceding October 10, and in Northern Ireland the preceding September 15. It is, however, provided that any person who is not of full age on the relevant qualifying date, but is of full age on June 15, and is otherwise duly qualified, is entitled to vote at elections held in Great Britain between October 2 of that year and February 15 of the following year. Detailed provisions are laid down as to the meaning of "residence" in doubtful cases.

The Act of 1948 abolished the university constituencies and the business premises vote.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration officer determines the claims and objections. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters," who include wives of Service voters resident with their husbands outside the United Kingdom. Such persons may make a Service declaration in a prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (*e.g.*, those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or, in some cases, by proxy as "absent voters."

The local government franchise now depends upon either residence in the area or the possession of a non-resident qualification, *i.e.*, occupation as owner or tenant of rateable lands or premises of the yearly value of not less than £10, excluding occupation of furnished dwelling-houses let for less than nine weeks and excluding occupation as a lodger. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the same register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only.

The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

WILLS

IMPORTANT NOTE.—*The following notes must be read subject to the provisions of the Inheritance (Family Provision) Act, 1938, which is liable to affect or modify the will of any person (domiciled in England) dying after July 13, 1939.* This Act empowers the High Court to order maintenance out of the testator's estate for the benefit of certain "dependants," *i.e.*, a surviving wife or husband; an unmarried (or invalid) daughter; an infant (or invalid) son. Such order can be made if the will does not itself make "reasonable provision" for the maintenance of the dependant who seeks the order. An application must normally be made within six months of probate. A legally adopted child comes within the definition of a "son" or "daughter" under the Act. For further details as to the limits of an order, the Act itself should be consulted.

Since the object of the Act is to provide *maintenance* for dependants, an application is not likely to be successful where the estate is very small, *e.g.*, two or three hundred pounds.

REASONS FOR MAKING A WILL.—Every person

should make a will. However small the estate, it is safer in every case to protect the interests of the survivors by a will, and by the appointment of one or more trustworthy persons as executors to carry the testator's wishes into effect. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—*e.g.*, the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. When property is thus "settled," there may be a saving in death duties. Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) an alteration *may* be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration *of any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of *codicils* should be left to the lawyer. *A will should be written in ink and very legibly, on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [*Thomas Smith*] of [*Vine Cottage, Silver Street, Reading, Berks*] which I make this [*thirteenth*] day of [*February, 1959*] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [*John Green of —— and Richard Brown of ——*] to be the executor(s) of this my will.

2. I give all my property real and personal to [*my wife Mary* or *my sons Raymond and David equally* or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our names as witnesses.

Thomas Smith
Signature of Testator;

William Jones (*signed*) of Green Gables, South Street, Reading, tailor.

Henry Morgan (*signed*) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:—

2. I give to —— of —— the sum of £—— and to —— of —— the sum of £—— and to —— of —— all my books (*or as the case may require*).

3. All the residue of my property real and personal I give to —— of ——.

TERMS.—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual ready money. The expression "goods and chattels" should not be used. In giving *particular* property, ordinary language is sufficient, *e.g.*, "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

RESIDUARY LEGATEES.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. *It should be remembered that a will operates on property acquired after it has been made.*

EXECUTION OF A WILL, AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

A *blind person* may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. *The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.*

EXECUTORS.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee pre-deceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

TESTAMENTARY CAPACITY.—A minor cannot make a will except, in certain circumstances, if he be a soldier, sailor or airman. A married woman (married on or since January 1, 1883) may dispose by will of any real or personal property as if she were a man.

REVOCATION.—A will is revoked by a subsequent will (but, if it does not expressly revoke former wills, only so far as such subsequent will operates as an implied revocation as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise *destroying* the same with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. *It is not sufficient to obliterate the will with a pen.* Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made *in person* at the Principal Probate Registry, or at a district registry, by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of property liable to estate duty; and (4) generally, a list of debts and funeral expenses. In an application for administration, the applicant will be required to enter into a bond for due administration, generally with two sureties who must attend at the Registry, although they need not do so at the same time as the applicant.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will proved in the District Registry, is there kept, and may be seen or a *copy* obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictae*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children —or children but no widow—the *jus relictae* or *legitim* is increased to a one-half share in the estate. The remaining portion is known as the *dead's part*. The widow is also entitled to terce, *i.e.*, a life rent in one-third of her husband's heritable property. A surviving husband and children have comparable rights in the wife's estate. The *dead's part* is the only portion of which the testator can freely dispose. All burdens falling upon the representatives in moveables are payable out of the whole of the moveables before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Minors may dispose of moveables without the consent of any other person; but minors (unless they be serving in H.M. forces) cannot dispose of heritage. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6*s.* 8*d.* sterling) and may be typewritten or even in pencil. A will may be either (1) *holograph*, *i.e.*, written by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed, are valid; (2) *tested*, i.e., signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will is revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of County in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £500 confirmation is obtained under a simplified procedure at reduced fees.

PROFESSIONAL FEES

The following notes on the Fees and Charges of various Professions are based on information supplied by the appropriate professional Societies and Institutes.

SOLICITORS

Solicitors and their clients may (subject to certain rules designed to prevent undercutting) make special agreements as to remuneration in non-contentious business (including conveyancing) under Section 57 of the Solicitors Act, 1935. In the absence of any such agreement the solicitor's remuneration is governed by Orders made under Section 56 of that Act. There are two methods of charging under the Orders. The more usual is by a scale based upon the amount of money involved; the other is by a charge (usually known as a Schedule II charge) determined by reference to all the circumstances of the case, the amount of money involved being only one factor amongst many. Usually a scale charge is payable in conveyancing matters, provided the transaction has not been abortive, but a solicitor has an option to elect, before undertaking any business, to be paid a Schedule II charge instead. For negotiating sales or purchases the charges are always under Schedule II. *In addition to solicitors' charges, disbursements such as Government stamp duty, search fees and Land Registry fees may be payable.*

Where under Table I below the charges would amount to less than £7 10*s.* 0*d.* there is a minimum fee of £7 10*s.* 0*d.*; if, however, the amount of money involved is less than £100 the minimum fee (except for conducting a sale of property by public auction) is £4 10*s.* 0*d.*

In sales by auction further charges may be payable, which will be computed under Schedule II below, e.g. for preparing or perusing Particulars of Sale and poster and attending the sale.

The following tables illustrate the scales of charges on sales, purchases and mortgages based upon the amount of money involved:—

I. For land (including houses) having a title which is *not* registered at the Land Registry.

Scale of Charges.

	For the first £1,000	For the second and third £1,000	For the fourth and each subsequent £1,000 up to £10,000	For the remainder without limit
	per £100 *s.* *d.*	per £100 *s.* *d.*	per £100 *s.* *d.*	per £100 *s.* *d.*
Vendor's solicitor for conducting a sale of property by public auction, including the conditions of sale:—				
When the property is sold	30 0	15 0	7 6	3 9
When property not sold, then on the reserved price.	15 0	7 6	3 9	1 10½
NOTE:—A minimum charge of £7 10*s.* is to be made whether a sale is effected or not.				
Vendor's solicitor for deducing title to freehold or leasehold property, and perusing and completing conveyance (including preparation of contract or conditions of sale, if any)	45 0	30 0	15 0	10 0
Purchaser's solicitor for investigating title to freehold or leasehold property, and preparing and completing conveyance (including perusal and completion of contract, if any)	45 0	30 0	15 0	10 0
Mortgagor's solicitor for negotiating loan	16 10½	16 10½	5 7½	3 9
Mortgagor's solicitor for deducing title to freehold or leasehold property, perusing mortgage and completing	45 0	30 0	15 0	10 0
*Mortgagee's solicitor for negotiating loan	33 9	33 9	11 3	7 6
Mortgagee's solicitor for investigating title to freehold or leasehold property, and preparing and completing mortgage	45 0	30 0	15 0	10 0

* These charges apply equally to land having a registered title.

Title registered after completion.—Where the title is registered under the Land Registration Act, 1925, after completion, charges under Schedule II are payable in addition in respect of the first registration.

II. For land (including houses) having a title registered at the Land Registry.

Scale of solicitor's charges for Transfers on Sale, Charges, Sub-Charges, Mortgages, Sub-Mortgages and Transfers thereof.

Value of Land or Amount of Charge	Scale of Remuneration
(1) Up to and including £200	£4.
Over £200 but not exceeding £300	£4 10*s.*
For each additional £100 thereafter up to £1,000.	£1 10*s.* per £100.
For the second and third £1,000	£1 per £100.
For the fourth £1,000	10*s.* per £100.
For each subsequent £1,000 up to £13,000.	7*s.* 6*d.* per £100.
For each subsequent £1,000 up to £17,000.	5*s.* per £100.
For the remainder without limit	4*s.* per £100.
(2) Fractions of £100 under £50 are to be reckoned as £50.	
Fractions of £100 above £50 are to be reckoned as £100.	

CHARTERED ACCOUNTANTS

The Council of the Institute of Chartered Accountants in England and Wales has not laid down any scale of fees for its members. There are no statutory scales of fees except for certain special appointments such as Approved Auditors under the Industrial and Provincial Societies Acts.

Accountancy and auditing.—The Council of the Institute has stated that chartered accountants charges should generally be calculated on the basis of the type of work involved, the seniority of the persons necessarily engaged on the work and the time occupied by each person engaged. The normal practice is therefore to calculate charges at an appropriate rate per day for the principal and for each of the clerks engaged on the work.

Special work.—The general basis referred to above will not usually be applicable to special types of work involving a special degree of skill or calling for priority, for example, prospectus reports and special investigations. For this type of work special fees are usually agreed with the client.

Receivers, Liquidators and Trustees in Bankruptcy.—Usually a percentage on the amount realized and on the amount distributed in dividend.

The remuneration of a liquidator of a company in a members' voluntary winding-up is fixed by the company in general meeting. In the case of a creditors' voluntary winding-up remuneration is fixed by the Committee of Inspection, or, if there be no such committee, by the creditors. In either case application may be made to the Court to fix the remuneration.

Taxation.—The rates charged for taxation matters are generally higher than those for audits. In 1935 the Council of the Institute passed a resolution that a member undertaking taxation work on the basis that he should be remunerated by a percentage on the amount recovered, or receive no remuneration if no recovery results would be liable to be regarded as acting discreditably.

ARCHITECTS

A.

Conditions of Engagement

1. Members of the R.I.B.A. are governed by the Charters, Bye-laws and Code of Professional Conduct of the Royal Institute.

2. The Architect shall give such periodical supervision and inspection as may be necessary to ensure that the works are being executed in general accordance with the contract; constant supervision does not form part of the duties undertaken by him.

3. In cases where constant superintendence is required a Clerk of Works shall be employed for this purpose. He shall be nominated or approved by the Architect, and appointed and paid by the Client. He shall be under the Architect's direction and control.

4. The Architect shall not make any material deviation, alteration, addition to or omission from the approved design without the knowledge and consent of the Client.

5. The Architect has authority to give orders on behalf of the Client if such are necessitated by constructional requirements provided that the Client shall be immediately notified thereof.

6. The Architect shall, if requested to do so, at the completion of the work, prepare free of charge to the Client, drawings sufficient to show the main lines of drainage and other essential services as executed.

7. The following Architects' charges do not include for Surveyors' work for which see Clauses B 11 to B 16 which are those of the Royal Institution of Chartered Surveyors adopted by the R.I.B.A.

8. The employment of Consultants shall be at the Architect's discretion in agreement with the Client and Consultants shall be nominated or approved by the Architect, and appointed and paid by the Client. Where it is agreed to retain the services of Consultants in no case shall the Architect's fee be reduced by more than one-third on the cost of the work upon which the services of the Consultants are retained, provided always that the Architect's fee on the cost of the whole scheme shall not be reduced by more than one-sixth.

9. An engagement entered into between the Architect and the Client may be terminated at any time by either party upon reasonable notice being given.

10. Copyright in all drawings and in the work executed from them will remain the property of the Architect.

11. Under these Conditions of Engagement, the fees and charges payable to the Architect shall be in accordance with the following Scale of Charges.

B

Scale of Charges

NOTE.—*Apart from the two copies of the drawings and documents provided for in Clause B 1 and the drawings specified in Clause A 6, the fees as set out in this Scale of Charges are in all cases exclusive of the cost of all prints and other reproductions of drawings and documents, travelling and hotel expenses, and other reasonable disbursements.*

1. *New Works*

For taking the Client's instructions, preparing sketch designs, making approximate estimate of cost by cubic measurement or otherwise, submitting applications for building or other licences and town planning, bye-law or other approvals, preparing working drawings, specification or such particulars as may be necessary for the preparation of bills of quantities by an independent Quantity Surveyor, or for the purpose of obtaining tenders, advising on tenders and preparation of contract, nominating and instructing Consultants (if any), preparing, and supplying for the use of the Contractor, two copies of all drawings, specification, or other particulars and of such further details as are necessary for the proper carrying out of the works, giving general supervision as defined in the Conditions of Engagement, issuing certificates for payment, and certifying accounts, exclusive of the services enumerated in Clauses B 5 and B 14, the charge is to be a percentage on the total cost of all executed works as follows:

Total Cost of Executed Works	*Percentage Fee*	*Minimum*
(i) Up to £500	10	
£500–£1,000	9½	£50
£1,000–£1,500	9	£95
£1,500–£2,000	8½	£135
£2,000–£2,500	8	£170
£2,500–£3,000	7½	£200
£3,000–£3,500	7	£225
£3,500–£4,000	6½	£245
Over £4,000	6	£260

(ii) When work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed wholly by the Contractor supplying all labour and materials.

(iii) In addition to a percentage on the total cost of executed works, the Architect is entitled to

charge in respect of all works included in the tenders, but subsequently omitted, two-thirds of the charge which would have been payable had they been executed.

2. Variations of Charges

The above Scale of Charges is subject to variation by prior written agreement between Client and Architect in respect of the following:

(i) Repetitive Works: In the case of extensive works of a simple repetitive character, the charge may be reduced by one-sixth.

(ii) Works to Existing Buildings: In the case of works to existing buildings a higher percentage is chargeable, not exceeding twice the amount payable under the Scale for new works of the same cost, and depending upon the intricacy of the work involved.

(iii) Special Works: In works involving special services in respect of fittings, furniture, decorations, exhibitions, garden or landscape design, special fees appropriate to the circumstances are chargeable.

3. Partial Services

In cases where the Architect performs partial services for any reason, including the abandonment, deferment, substitution or omission of any project and/or works, or part thereof, or if the services of the Architect are terminated, the charges in respect of the services performed are as follows:

(i) For taking Client's instructions and preparing preliminary sketch designs to illustrate possibilities of a site or cost of a scheme the charge is on *quantum meruit*.

(ii) For taking Client's instructions, preparing sketch designs sufficient to indicate the Architect's interpretation of the Client's instructions (but not in detail adequate to enable bills of quantities to be prepared) and making approximate estimate of cost, the charge is on *quantum meruit* and shall not exceed one-sixth of the percentage due under Clause B 1 or B 2 (as the case may be) on the estimated cost of such works.

(iii) For taking Client's instructions, preparing sketch designs sufficient to indicate the Architect's interpretation of the Client's instructions, and preparing drawings and particulars sufficient to enable applications to be made for Town Planning, Bye-law and/or Building Act approvals, the charge is one-third of the percentage due under Clause B 1 or B 2 (as the case may be) on the estimated cost of such works.

(iv) For taking Client's instructions, preparing sketch designs, making approximate estimate of cost by cubic measurement or otherwise, and preparing working drawings, specification, or such particulars as may be necessary for the preparation of bills of quantities by an independent Quantity Surveyor, or for the purpose of obtaining tenders, the charge is two-thirds of the percentage due under Clause B 1 or B 2 (as the case may be) on the estimated cost of such works.

(v) If the project or any part thereof is abandoned or deferred or any part omitted or substituted on the Client's instructions during the preparation of the working drawings, the charge is two-thirds of the appropriate percentage on the estimated cost of such works less a *quantum meruit* charge for bringing the working drawings and other particulars up to the stage defined in Clause B 3 (iv).

(vi) In all cases where fees are assessed on the basis of *quantum meruit* regard must be had to all relevant factors.

4. Mode and Time of Payment

The Architect is entitled to payment in stages as follows:

(i) On the completion of sketch designs one-sixth of the total fees payable.

(ii) On the completion of the drawings and particulars sufficient to enable applications to be made for Town Planning, Bye-law and/or Building Act approvals, one-third of the total fees payable less the amounts of any payments already received by the Architect pursuant to sub-clause B 4 (i).

(iii) During the preparation of working drawings and other particulars instalments consistent with the amount of work completed by the Architect.

(iv) On completion of the said working drawings and other particulars, two-thirds of the total fees payable less the amount of any payments already received by the Architect pursuant to sub-Clauses B 4 (i), B 4 (ii) and B 4 (iii).

(v) The remaining one-third of the total fees to be paid by instalments as the building work proceeds consistent with the value of the said building work as certified from time to time.

5. Services not Included in the Scale

Charges assessed on the basis of *quantum meruit* in accordance with Clause B 3 (vi) shall be payable in respect of any additional services involved:

(i) In advising as to the selection and suitability of sites. Negotiating as to sites or buildings. Surveying sites or buildings and taking levels, and making surveys, measurements, and plans of existing buildings.

(ii) In preparing for the use of the Client special drawings in addition to working drawings, and preparing drawings for negotiations with ground landlords, adjoining owners, public authorities, licensing authorities or others.

(iii) In amending working drawings or preparing new working drawings to give effect to alterations of the Client's instructions or changes in design due to causes outside the control of the Architect.

(iv) In negotiations arising from applications for building or other licences, town planning, bye-law or other approvals, and negotiations in connection with Party Walls, Rights of Light and other easements, reservations or restrictions.

(v) Arising out of delay in building operations due to causes outside the control of the Architect.

6. Inspections and Reports

For making inspections, preparing reports or giving advice on the condition of premises, the charge is on *quantum meruit* in accordance with Clause B 3 (vi).

7. Litigation and Arbitration

For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendance in Court or before Arbitrations or other tribunals, and for services in connection with litigation, the charge is based upon the time occupied in accordance with Clause B 10.

Architects acting as Arbitrators are recommended to base their charges upon the total time occupied in dealing with a case at the rate of £3 3s. an hour exclusive of out-of-pocket expenses and other disbursements.

8. Dilapidations

For preparing schedule and settling the amount if required, the charge is 5 guineas per cent. on the amount of the settlement, or on the estimated cost of complying with the Schedule. (Minimum fee, 5 guineas.)

9. Travelling Time

An additional charge may be made by prior written agreement if the work should be at such a distance as to lead to an exceptional expenditure of time in travelling.

10. Time Charges

In cases in which charges are based upon time occupied the minimum fee is 1½ guineas per hour exclusive of charges for Assistants' time.

NOTE.—*Clauses dealing with the following subjects are in accordance with the Schedule of Professional Charges of the Royal Institution of Chartered Surveyors and are adopted by the Royal Institute of British Architects.*

11. For approving plans submitted by lessees and inspecting buildings during progress.

12. The laying out or development of estates.

13. For land surveying and the preparation of plans and maps.

14. Preparing bills of quantities and valuing work executed.

15. Valuation of freehold or leasehold properties.

16. Work under the Lands Clauses Consolidation Act or other Acts for the compulsory acquisition of property.

STRUCTURAL ENGINEERS

The following charges are those usually in operation among Consulting Structural Engineers who are not connected with any firm of contractors and who receive remuneration for their services directly from their clients. Full details of the scales which it authorizes can be obtained from the Institution of Structural Engineers, 11 Upper Belgrave Street, S.W.1.

Reports, Advisory Work and Surveys

For inspections, professional advice, opinions and reports: a fee of Three Guineas per hour upwards, minimum three hours at rate agreed, plus any necessary expenses for travel and services of Engineer's staff.

Constructional Work

A fee of £25, plus (1) for Reinforced Concrete, 7½ per cent. on total cost of work, with an additional 1 per cent. on the first £20,000; for preparation of Bending Lists, 5 per cent. on cost of steel bent and fixed in work; (2) for Structural Steelwork and other work except (1) above, 6 per cent. on total cost of work, with additional 1 per cent. on first £20,000; (3) an additional fee where the Engineer is required to give advice or accept responsibility for the strength or safety of brickwork or other items not covered by (1) and (2) above.

The above scale is governed by conditions regarding constructional emergencies, remuneration for work done to the Engineer's Specification and/or Drawings, remuneration for works varied or abandoned, travelling and out-of-pocket expenses, etc.

Bills of Quantities, etc.

A fee of from 1½ per cent. to 2½ per cent. (depending on the size and complexity of the work) of the total actual cost or, in the case of abandoned work, the total estimated cost. Measuring and making-up accounts for variations upon contracts, including pricing and agreeing totals with contractors: 2½ per cent. upon the amount of the additions and 1½ per cent. upon the amount of the omissions, less the provisional sums or work omitted as a whole.

Technical Evidence

For "qualifying," considering documents, preparing proof of evidence, attending consultations, appearing before Parliamentary Committees, Courts of Law, Arbitration Tribunals and Official Enquiries: (1) a fee of Three Guineas per hour upwards, varying in accordance with the standing of the Engineer and the importance of the case, with a minimum of three hours at whatever rate is agreed; (2) a charge for the time spent by the Engineer's assistants; (3) a refresher for each day for which the Engineer is requested to hold himself in readiness to attend but is subsequently not required, at the rate agreed for one hour per day; (4) fees at the agreed hourly rate for time occupied in travel, together with travelling and out-of-pocket expenses.

Valuations and Negotiations for Purchase

For valuation of, and negotiations for the purchase of, engineering undertakings less than £10,000: a percentage charge dependent on the amount of work and responsibility involved; £10,000 or more: a fee in accordance with Ryde's Scale, *i.e.* Thirteen Guineas, plus one-half of one Guinea per cent. of the total.

CONSULTING ENGINEERS

The fees payable to Consulting Engineers for design and supervision are based on a percentage scale and for project reports, inspections, etc., on a lump sum or time scale. Full details can be obtained from the Association of Consulting Engineers (Incorp.), 36 Victoria Street, S.W.1.

A booklet "Professional Rules and Practice and Scales of Fees" which gives full details of fees in addition to containing Model Forms of Agreement between a Client and a Consulting Engineer is issued at 5s. per copy. The Model Forms of Agreement contained in this booklet are:—

Form "A"—For Design and Supervision of Works of Civil Engineering Construction.

Form "B"—For Design and Supervision of Works Principally of an Electrical and Mechanical Nature (not being Electrical or Mechanical Installation Work for Buildings or other Structures to which Model Form "D" applies).

Form "C"—For Design and Supervision of Structural Engineering Work in Buildings and other Structures (where an Architect has been appointed by the Client).

Form "D"—For Design and Supervision of Electrical and Mechanical Installation Work for Buildings and other Structures.

QUANTITY SURVEYORS

In general Quantity Surveyors' fees are calculated as a percentage upon the estimated cost of the work or are based upon the time involved. Details of the scales of charges which they authorize can be obtained from:—

THE ROYAL INSTITUTION OF CHARTERED SURVEYORS, 12 Great George Street, S.W.1., and THE INSTITUTE OF QUANTITY SURVEYORS, 98 Gloucester Place, W.1.

STOCKBROKERS

The Rules and Regulations drawn up by the London Stock Exchange Council are voluminous and technical. On British Government stocks the scale of brokerage is ⅛ per cent. on Stock up to £10,000 Stock and ¼ per cent. on Stock on any balance in excess of £10,000 Stock. On shares not exceeding 15s. the brokerage is ¼d. to 2½d. per share,

Not exceeding	20s.	3d.	per share
"	" 30s.	3½d.	"
"	" 40s.	4½d.	"
"	" 50s.	6d.	"
"	" 60s.	7½d.	"

and so on. There are minimum charges of 5s. on less than £20; 10s. on less than £100; and £1

on £100 and over. In certain circumstances the above charges may be modified. Copies of the Rules and Scale of Commission may be obtained from the Secretary.

SHIPBROKERS

A scale of Minimum Agency Charges became operative for members of the Institute of Chartered Shipbrokers (*Office*, 25 Bury Street, E.C.3) from 1920, and has been revised from time to time. Copies (price 6*d.* post free) may be obtained from the Secretary.

AUCTIONEERS AND ESTATE AGENTS

(*Summary based on the Scales of Charges of the Professional Societies*)

Sales by Private Treaty or by Auction

Freehold Property and Ground Leases, including in the case of auctions the preparation of particulars and advising as to reserves:—On the first £500, 5 per cent.; on the next £4,500, 2½ per cent.; on the residue, 1½ per cent.

In addition to the above charges:—On payments for goodwill, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; and on amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks*, and other *Movable Effects, Timber*, and *Tenant-right*, 5 per cent. to include inventory and valuation if required.

Where the division of an estate into a number of lots involves substantial additional work, an increased remuneration shall be payable.

On all sales by auction, commission is exclusive of out-of-pocket expenses, unless otherwise stated.

Sales before Auction

After acceptance of instructions, whether sale arranged by auctioneer or not, the same scale as for sale by auction.

Non-Sale

In the event of non-sale at the auction, a fee, the amount of which is a matter of arrangement, is payable.

Sales within 3 Months after Auction

Whether arranged by auctioneer or not, same commission as for sale by auction merging any fee for non-sale previously paid.

Leasehold Property (other than Ground Leases).—On disposing of leases by private treaty, auction, assignment or otherwise:—On the rent the same commission as for a letting (*see below*), *and*, in addition, where the necessary instructions are held.—On the premium and any consideration which is equivalent thereto, or on payments for goodwill, 5 per cent. on the first £1,000; and 2½ per cent. on the residue; and on payments for *Chattels, Fixtures, etc.*:—As for Freehold Property (*see above*).

NOTE.—Where two Agents are co-operating at the request of the owner, the commission shall be at the rate of a scale and a quarter.

Purchases

Freehold and Leasehold Property.—For seeking and negotiating the purchase of a property to suit a client's requirements:—2½ per cent. on the first £5,000; 1½ per cent. on the next £10,000; and 1 per cent. on the residue. For abortive work a fee to be fixed by arrangement. For negotiating the purchase of a particular property named by the client:—1½ per cent. on the first £15,000; and 1 per cent. on the residue. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the residue. Minimum fee, £7 17*s.* 6*d.*

Lettings

NOTES.—(*a*) Should the rent be a progressive one, the commission is based on the average rent for the period up to the first possible break of the tenancy. (*b*) When a property, which an Agent has been instructed to let or sell, is let with an option to purchase, and the tenant afterwards exercises his option, or becomes the purchaser within the period of the option, the commission for selling, less the commission already paid on the letting, will then become payable. (*c*) "Letting" includes a letting to a sitting tenant (including negotiating and agreeing a new rent) or to a nominee of the landlord. (*d*) For the purposes of these scales "rent" means (except where otherwise stated) the rent reserved by the letting plus any regular payments made to the landlord for which the tenant is responsible.

(1) *Unfurnished Premises.*—(*a*) Where there is a premium or any equivalent consideration and the rent (exclusive of any payment in respect of rates, heat, light, water, service or other incidental charges) is less than two-thirds of the rateable value, the same commission as is payable for the sale of leasehold property (*see* above); (*b*) in all other cases, 10 per cent. on 1 year's rent, or, in the case of a letting for less than a year, 10 per cent. on the amount of rent payable under the letting, and *in addition* a commission on the premium or goodwill as for leasehold property (*see* above).

(2) *Furnished Premises*, including collection of rent, if required, but excluding the making and checking of inventories: (*a*) for lettings of six weeks or less, 10 per cent. on the amount of rent payable under the letting; (*b*) for lettings of more than six weeks, 7½ per cent. on the amount of rent payable, with a minimum of the amount payable under (*a*) if the letting had been for six weeks.

(3) *Sporting Rights*, including collection of rent if required—10 per cent. on one year's rent or, where letting is for less than one year, 10 per cent. on the amount of rent payable under the letting.

(4) *Farms and Agricultural Land.*—10 per cent. on the first £250 and 7½ per cent. on the residue, of 1 year's rent.

(5) *Land on Building Lease, or at a Fee Farm Rent.*—100 per cent. on the first £100; 50 per cent. on the next £900; and 25 per cent. on the residue, of one year's ground rent; *and in addition* where a premium is paid, a Commission of 5 per cent. on the first £1,000 and 2½ per cent. on the residue.

Glasgow (1873), 201–203 Albion Street, Glasgow.
Chief Officer, W. McCollum.

SALVATION ARMY, THE.—Founded by General William Booth (*b.* 1829, *d.* 1912) in July, 1865, in the East of London. After the work had spread to many English cities under the name of the Christian Mission, it took its present name in 1878 and adopted a military plan of organization, with a uniform and other distinctive features. From the early 'eighties it spread to many parts of the world, and at the death of its Founder was established in 59 countries. Since 1890, following the publication of "In Darkest England and the Way Out," written by the first General, the Salvation Army has added social work of a varied and comprehensive character to the evangelistic work with which it began, and which remains the foundation and principal feature of its activities. In August, 1957, the number of Officers, Cadets and Employees was 53,395, Local Officers, Bandsmen, Songsters and Corps Cadets (unpaid) 245,469, languages used 103, Corps and Outposts 16,966. Social Centres and Agencies 2,183, including 376 Shelters and Cheap Food Depots, 203 Industrial Homes, 81 Employment Bureaux, 5 ex-prisoners' Homes, 300 Homes for Women and Children, 16 Farms, 140 Goodwill Centres, 828 Day and Industrial Schools, 136 Hospitals, Clinics and Dispensaries, 128 Eventide Homes. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 113 Queen Victoria Street, E.C.4.—GENERAL, Wilfred Kitching, *b.* 1893; elected General, May 11, 1954; *assumed Command* July 1, 1954.

THE PRESS COUNCIL

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 1949, recommended *inter alia* that a voluntary Press Council be formed.

A constitution ultimately set up provided for the establishment of such a council on July 1, 1953. The objects of the Council were stated in the constitution to be (1) to preserve the established freedom of the British Press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to keep under review any developments likely to restrict the supply of information of public interest and importance; (4) to promote and encourage methods of recruitment, education and training of journalists; (5) to promote a proper functional relation among all sections of the profession; (6) to promote technical and other research; (7) to study developments in the Press which may tend towards greater concentration or monopoly; (8) to publish periodical reports recording its own work and reviewing from time to time the various developments in the Press and the factors affecting them.

The membership of the Council is composed of 15 editorial representatives (3 national newspaper editors, 2 provincial newspaper editors elected by editors of newspapers in membership of the Newspaper Society, 2 provincial newspaper editors nominated by the Guild of British Newspaper Editors, 1 Scottish newspaper editor, 4 editorial representatives nominated by the National Union of Journalists and 3 editorial representatives nominated by the Institute of Journalists) and 10 managerial representatives (4 nominated by the Newspaper Proprietors Association, 4 nominated by the Newspaper Society, 1 nominated by the Scottish Daily Newspaper Society and 1 nominated by the Scottish Newspaper Proprietors Association).

Chairman, Sir Linton Andrews.
Vice-Chairman, G. Murray, C.B.E.
Members, D. M. Ballantine; W. D. Barnetson; H. Bate; T. Blackburn; K. Brown; S. Campbell; E. M. Clayson; M. Edmunds; G. R. French; R. A. Gibbs; A. J. Gibson; R. Hammond; C. Hamnett; F. M. Johnston; J. G. Jones; D. Machray; S. McClean; G. Newton; J. L. Palmer; B. Pook; G. Read; J. Sherret; R. E. Wilson.
Secretary, Alan Pitt Robbins, C.B.E., 1 Bell Yard, Fleet Street, W.C.2.

THE COUNCIL OF INDUSTRIAL DESIGN

28 Haymarket, S.W.1

The Council of Industrial Design, with its Scottish Committee, was set up in December, 1944, by the President of the Board of Trade, "to promote by all practical means the improvement of design in the products of British Industry." For manufacturers, the Council provides advice on the application of design policy, and recommends designers from its Record of Designers. For retailers, it provides courses for buyers and salesmen on design appreciation, and has organised exhibitions in retail stores. For the public it provides selective exhibitions of well designed goods.

The Council maintains a selective, pictorial record of well designed goods in current production known as *Design Index*, which is available for consultation at its headquarters. The Council also maintains a photograph and slide library, press and information services, and publishes a monthly journal *Design*.

In April, 1956, the Council launched the Design Centre for British Industries, which occupies an 8,000 sq. ft. showroom at 28 Haymarket, S.W.1.

Chairman, Sir Walter Worboys, B.Sc., D.Phil.
Chairman of Scottish Committee, Sir Charles Connell.
Director, Sir Gordon Russell, C.B.E., M.C., R.D.I.
Chief Executive, Scottish Committee, Alister Maynard, M.B.E., 46 West George Street, Glasgow, C.2.

THE NATIONAL BUILDINGS RECORD

31 Chester Terrace, N.W.1

Chairman of Advisory Council, Sir James Mann, K.C.V.O., Hon. V.P.S.A., F.B.A.
Director and Secretary, Walter H. Godfrey, C.B.E., F.S.A., F.R.I.B.A.

The National Buildings Record is an organization established in 1941 under the direction of an Advisory Council. It is supported by an annual grant from the Treasury, and its functions are:

To maintain a library of photographs and measured drawings of English and Welsh architecture which is open to the public for consultation and study. It is arranged topographically and contains approximately 475,000 items.

To supply copies of photographs where negatives are available. There are approximately 300,000 negatives.

To prepare and acquire additional records which are constantly being added to the library.

To maintain an index of architectural records (photographs, measured drawings, sketches, and engravings) in public and private possession.

FEDERATION OF BRITISH INDUSTRIES

21, Tothill Street, S.W.1.

The Federation of British Industries was founded in 1916, and in 1923 was granted a Royal Charter. In the Charter, the F.B.I. is defined as an association of manufacturers founded for the "encouragement, promotion and protection of British Industries of all kinds."

The membership consists of individual firms engaged in productive industry (excluding the nationalized industries) and trade associations. More than 7,500 firms and 300 trade associations (representing about 40,000 firms) are members. The Federation has 12 regional and district offices and has representatives in 140 centres overseas.

President, Sir Hugh Beaver, K.B.E.
Director-General, Sir Norman Kipping.
General Secretary, D. L. Walker, C.B.E.

NATIONAL UNION OF MANUFACTURERS

6, Holborn Viaduct, E.C.1

The National Union of Manufacturers is a national organization representing manufacturing industry. Formed in 1915, its membership (restricted to manufacturers) now totals over 5,000 individual firms with 60 affiliated trade associations. It is regarded both by Government and by industry as the national representative of medium-sized and smaller firms in particular. It has no party-political affiliations. There are branches in London, Birmingham, Manchester, Liverpool, Nottingham, Leeds, Newcastle, Glasgow and Cardiff.

President, C. S. Garland.
Director, Lt.-Col. V. I. Robins, O.B.E.

BRITISH EMPLOYERS' CONFEDERATION

36 Smith Square, S.W.1.

The British Employers' Confederation was established in 1919. Its membership consists of 60 national employers' organizations which deal with labour questions in most of the principal industries, other than the nationalized industries.

President, Sir William Garrett.
Director, George Pollock, Q.C.
Secretaries, F. J. C. Honey, C.B.E.; K. J. Burton.

EMPLOYERS' ASSOCIATIONS

BAKERS, CONFECTIONERS AND CATERERS, NATIONAL ASSOCIATION OF MASTER, 13 Ashley Place, S.W.1.—*Sec.*, L. F. Cadwallader, O.B.E.

BAKERS, FEDERATION OF WHOLESALE AND MULTIPLE, 4 Lloyds Avenue, E.C.3.—*Sec.*, D. McKelvie.

BISCUIT MANUFACTURERS, NATIONAL ASSOCIATION OF, Scottish Union House, Walbrook, E.C.4.—*Sec.*, C. T. Digby Jones.

WATERWORKS ASSOCIATION, BRITISH, 34 Park Street, W.1.—*Sec.*, L. W. F. Millis, O.B.E.

WOOL FEDERATION, BRITISH, Commerce House, Bradford.—*Sec.*, E. Barlow.

TRADES UNION CONGRESS (T.U.C.)

Congress House, 23–28 Great Russell Street, W.C.1.
[Museum: 4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions, the primary purpose of which is to enable the representatives of unions to meet annually to consider matters of common concern to their members. The Congress has met annually since its foundation (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliation fees are paid. Affiliated unions (in 1957–58) totalled 185 with an aggregate membership of 8,337,325.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with resolutions from affiliated societies on questions of policy and organization. Although 185 trade union organizations are affiliated to Congress, some of these, especially in cotton, are themselves federal bodies including in total 150 more unions. Only two British unions with large membership are not affiliated to the T.U.C.

One of the important responsibilities of the annual Congress is to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the Trade Union Movement, with authority to promote common action on general questions, and to assist Trade Unions in the work of organization. The General Council is elected by Congress and is composed of 35 members (33 representing 18 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group (the woman membership included in the total being shown separately), and with the number of representatives each group is entitled to have on the General Council:—

Trade Group (with representation)	Membership	
	Total	Women
Mining and Quarrying (3)	724,285	50
Railways (3)	529,073	29,766
Transport (other) (3)	1,366,147	156,680
Shipbuilding (1)	130,593	—
Engineering, Founding and Vehicle Building (3)	1,542,341	92,014
Iron and Steel and Minor Metal Trades (2)	212,520	7,859
Building, Woodworking and Furnishing (2)	558,889	14,888
Printing and Paper (1)	327,171	76,505
Cotton (2)	144,511	96,032
Textiles (other) (1)	100,135	41,445
Clothing (1)	172,735	132,047
Leather and Boot and Shoe (1)	106,960	44,191
Glass, Pottery, Food, Chemicals, etc. (2)	472,693	206,709
Agriculture (1)	135,000	7,500
Public Employees (1)	278,283	97,144
Civil Service (2)	468,761	149,358
Non-Manual (1)	257,124	73,223
General Workers (3)	820,104	161,861
TOTAL	8,337,325	1,387,272

Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjusting disputes and differences between affiliated organizations; such matters being dealt with by a Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also, if there appears to be justification, to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the Trade Union Movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty of suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council the Trade Union Movement maintains organic relations with the Government and Government Departments, and with a large number of outside bodies. The principal instrument for Government relations is the National Joint Advisory Council which functions on the Cabinet level; in this body the British Employers' Confederation and the Boards of nationalized industries are represented along with the T.U.C. for purposes of consultation and advice on matters of governmental policy and administration affecting industry. The same bodies, together with the chairmen of the eleven Regional Boards for Industry and representatives of the Federation of British Industries, serve on the National Production Advisory Council on Industry which meets under the chairmanship of the Chancellor of the Exchequer, who is accompanied by Ministers of Departments concerned with aspects of production, to advise the government on production questions. The General Council nominates members to serve on numerous other bodies, e.g. Economic Planning Board, the National Savings Committee, National Insurance Advisory Committee, British Institute of Management, Research Council, Consumers' Councils and numerous educational and miscellaneous bodies. Trades Councils and Federations, which are the local agents of the T.U.C., are registered annually and close contact is maintained with them through a Joint Consultative Committee. There are also a number of national advisory bodies for various groups of industries, including the engineering and shipbuilding trades, the non-manual workers, local Government employees and the nursing profession.

Chairman (1958–59), R. Willis.
General Secretary, Sir Vincent Tewson, C.B.E., M.C.
Assistant General Secretary, George Woodcock, C.B.E.
Assistant Secretary, V. Feather.

SCOTTISH TRADES UNION CONGRESS

12, Woodlands Terrace, Glasgow, C.3.

Chairman (1958–59), Alex Moffat.
General Secretary, George Middleton, C.B.E.

The Scottish Trades Union Congress was established in 1897 and it is pointed out that it is in no way a competitor of the British Congress, nor does it "justify its existence on strictly nationalist lines." Its objects are parallel to those of the T.U.C., with which it works in the closest co-operation.

In 1958 the Congress had 91 affiliated Unions and 42 Trades Councils with a membership of 791,983. The Annual Congress is held in April and a General Council of twelve members is elected.

TRADE UNIONS

A list of the 185 Trade Unions affiliated to the Trades Union Congress in 1957–58. The number of members of each Union is shown in parenthesis.

ACTORS' EQUITY ASSOCIATION, BRITISH (9,127).—*Sec.*, G. Croasdell, 8 Harley Street, W.1.

AGRICULTURAL WORKERS, NATIONAL UNION OF (135,000).—*Sec.*, H. Collison, 308 Gray's Inn Road, W.C.1.

ASPHALT WORKERS, THE AMALGAMATED UNION OF (2,500).—*Sec.*, F. V. Jenkin, 82 Newington Causeway, S.E.1.

ASSOCIATION FOOTBALL PLAYERS' AND TRAINERS' UNION (2,104).—*Sec.*, C. Lloyd, 105 Corn Exchange Buildings, Hanging Ditch, Manchester, 4.

ASSURANCE WORKERS, NATIONAL AMALGAMATED UNION OF LIFE (2,798).—*Sec.*, W. B. Hannaford, 11 Maulden Road, Withington, Manchester, 20.

BAKERS, CONFECTIONERS AND ALLIED WORKERS, AMALGAMATED UNION OF OPERATIVE (27,412).—*Gen. Sec.*, A. E. Halliday, 8 Guilford Street, W.C.1.

BAKERS AND ALLIED WORKERS, SCOTTISH UNION OF (13,935).—*Sec.*, W. Mowbray, 5 Burnbank Gardens, Glasgow, N.W.

BAKERS' UNION, LONDON JEWISH (60).—*Sec.*, S. Lever, 13 Sylvester Path, E.8.

BANK EMPLOYEES, NATIONAL UNION OF (50,147).—*Gen. Sec.*, T. G. Edwards, 28 Old Queen Street, S.W.1.

BASKET, CANE, WICKER AND FIBRE FURNITURE MAKERS OF GREAT BRITAIN AND IRELAND, NATIONAL UNION OF (192).—*Sec.*, T. Burrows, 9 District Road, Wembley, Middlesex.

BEAMERS, TWISTERS AND DRAWERS (HAND AND MACHINE), AMALGAMATED ASSOCIATION OF (3,493).—*Sec.*, H. Earnshaw, O.B.E., 21 Clayton Street, Blackburn.

BEDSTEAD WORKERS' ASSOCIATION (276).—*Sec.*, R. Eastwood, 17 Stafford Street, Birmingham, 4.

BLACKSMITHS, FARRIERS AND AGRICULTURAL ENGINEERS, AMALGAMATED SOCIETY OF (210).—*Sec.*, H. E. Cooper, 42 Court Road, Wolverhampton.

BLACKSMITHS' FORGE AND SMITHY WORKERS' SOCIETY, ASSOCIATED (11,322).—*Sec.*, W. J. Michael, 177 Hill Street, Glasgow, C.3.

BLASTFURNACEMEN, ORE MINERS, COKE WORKERS AND KINDRED TRADES, THE NATIONAL UNION OF (23,115).—*Sec.*, J. O'Hagan, O.B.E., 93 Borough Road West, Middlesbrough.

BLIND OF GREAT BRITAIN AND IRELAND, NATIONAL LEAGUE OF THE (5,351).—*Sec.*, T. H. Smith, M.B.E., 262 Langham Road, N.15.

BOILERMAKERS, SHIPBUILDERS AND STRUCTURAL WORKERS, UNITED SOCIETY OF (93,706).—*Sec.*, E. J. Hill, Lifton House, Eslington Road, Newcastle-on-Tyne, 2.

BOOT AND SHOE OPERATIVES, NATIONAL UNION OF (81,735).—*Gen. Sec.*, L. Poole, The Grange, Earls Barton, Northampton.

BOOT, SHOE AND SLIPPER OPERATIVES, ROSSENDALE UNION OF (7,376).—*Sec.*, R. Driver, 7 Tenterfield Street, Waterfoot, Rossendale, Lancs.

BRASSTURNERS, FITTERS, FINISHERS AND INSTRUMENT MAKERS' ASSOCIATION, SCOTTISH (1,468).—*Gen. Sec.*, R. Harkess, M.B.E., 221 West George Street, Glasgow, C.3.

BRASSWORKERS, AMALGAMATED SOCIETY OF (301).—*Sec.*, V. M. Robus, 347 Garratt Lane, S.W.18.

BRITISH AIR LINE PILOTS ASSOCIATION (1,954).—*Gen. Sec.*, D. Follows, M.B.E., 95 Mount Street, W.1.

BRUSHMAKERS, NATIONAL SOCIETY OF (2,500).—*Sec.*, G. F. Mayes, M.B.E., 77 Kingsland Road, E.2.

BUILDING TECHNICIANS, ASSOCIATION OF (2,000).—*Sec.*, F. E. Shrosbree, 1 Ashley Place, S.W.1.

BUILDING TRADE WORKERS OF GREAT BRITAIN AND IRELAND, AMALGAMATED UNION OF (88,864).—*Sec.*, G. H. Lowthian, M.B.E., "The Builders." Crescent Lane, Clapham Common, S.W.4.

CARD, BLOWING AND RING ROOM OPERATIVES, THE NATIONAL ASSOCIATION OF (48,584).—*Sec.*, Sir Alfred Roberts, C.B.E., 81 Fountain Street, Manchester, 2.

CARD SETTING MACHINE TENTERS' SOCIETY (281).—*Sec.*, R. Ashton, 627 Halifax Road, Hightown, Liversedge, Yorks.

CHAIN MAKERS AND STRIKERS ASSOCIATION (796).—*Sec.*, A. E. Head, M.B.E., Unity Villa, Sidney Road, Cradley Heath, Staffs.

CHEMICAL WORKERS' UNION (20,050).—*Sec.*, R. J. Edwards, M.P., 155 Kennington Park Road, S.E.11.

CIGARETTE MACHINE OPERATORS' SOCIETY (502).—*Sec.*, A. T. Knight, 153 Memorial Road, Hanham, Bristol.

CINEMATOGRAPH, TELEVISION AND ALLIED TECHNICIANS, ASSOCIATION OF (8,067).—*Sec.*, G. H. Elvin, 2 Soho Square, W.1.

CIVIL SERVICE CLERICAL ASSOCIATION (142,100).—*Sec.*, G. F. Green, 2 Upper Belgrave Street, S.W.1.

CIVIL SERVICE UNION (24,734).—*Sec.*, G. V. Carvell, 27–21 Hatton Wall, E.C.1.

INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country. The total expenditure of these Associations in 1957 was about £6,000,000 per annum, of which £1,600,000 was provided by the Department of Scientific and Industrial Research and the remainder by subscriptions of individual members.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1918. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Board of Trade and the Department of Scientific and Industrial Research have drawn up a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The income of the Research Associations is derived from subscriptions from their individual members, supplemented in most cases by substantial grants from the Government, through the Department of Scientific and Industrial Research.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firm in the particular industry, subject to the approval of the Councils of the Research Associations.

There are now 39 Research Associations and 10 other organizations in receipt of grants from the Department. They cover most of the principal industries of the country, as follows:—

Baking.

BRITISH BAKING INDUSTRIES RESEARCH ASSOCIATION, Baking Industries Research Station, Chorleywood, Herts.—*Dir.*, G. A. H. Elton, D.Sc., Ph.D.

Boots and Shoes.

BRITISH BOOT, SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Rd., Kettering.—*Dir.*, H. Bradley, C.B.E.

Cast Iron.

BRITISH CAST IRON RESEARCH ASSOCIATION, Bordesley Hall, Alvechurch, Birmingham.—*Dir.*, J. G. Pearce, C.B.E.

Ceramics.

BRITISH CERAMIC RESEARCH ASSOCIATION, Queen's Road, Penkhull, Stoke-on-Trent.—*Dir.*, A. T. Green, C.B.E., D.Sc.

Coal.

BRITISH COAL UTILISATION RESEARCH ASSOCIATION, Randalls Rd., Leatherhead, Surrey.—*Dir.-Gen.*, D. T. A. Townend, C.B.E., D.Sc., Ph.D.

Coke.

BRITISH COKE RESEARCH ASSOCIATION, 74 Grosvenor Street, W.1.—*Dir.*, G. W. Lee.

Cotton.

BRITISH COTTON INDUSTRY RESEARCH ASSOCIATION, Shirley Institute, Didsbury, Manchester.—*Dir.*, D. W. Hill, D.Sc., Ph.D.

Cutlery

CUTLERY RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Dir.*, E. A. Oldfield.

Electrical

BRITISH ELECTRICAL AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Thorncroft Manor, Dorking Road, Leatherhead, Surrey.—*Dir.*, H. G. Taylor, D.Sc.

Felt.

BRITISH HAT AND ALLIED FELTMAKERS RESEARCH ASSOCIATION, Stanley House, Manchester Rd., Fairfield, Droylsden, Manchester.—*Dir.*, T. Barr, Ph.D.

Files

FILE RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Dir.*, J. Pearson, Ph.D.

Flour.

RESEARCH ASSOCIATION OF BRITISH FLOUR-MILLERS, Cereals Research Station, Old London Road, St. Albans, Herts.—*Dir.*, T. Moran, C.B.E., D.Sc., Ph.D.

Food Manufacturing.

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—*Dir.*, F. H. Banfield, Ph.D.

Fruit and Vegetable Canning.

FRUIT AND VEGETABLE CANNING AND QUICK FREEZING RESEARCH ASSOCIATION, Chipping Campden, Glos.—*Dir.*, W. B. Adam.

Furniture

RESEARCH AND INFORMATION COMMITTEE OF THE FURNITURE DEVELOPMENT COUNCIL, 11 Adelphi Terrace, Robert Street, W.C.2.—*Dir.*, J. C. Pritchard, O.B.E.

Gelatine and Glue.

BRITISH GELATINE AND GLUE RESEARCH ASSOCIATION, 22 Dalmeny Avenue, Holloway, N.7.—*Dir.*, A. G. Ward.

Glass.

BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, Elmfield, Northumberland Road, Sheffield, 10.—*Dir.*, R. G. Newton, Ph.D.

Heating and Ventilating

HEATING AND VENTILATING RESEARCH COUNCIL, c/o B.C.U.R.A., Randalls Road, Leatherhead, Surrey.—*Dir.*, G. N. Cale.

Hosiery.

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION, Thorneywood House, 4 First Avenue, Sherwood Rise, Nottingham.—J. W. Illingworth, Ph.D.

Hydromechanics.

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, Temple Fields, Harlow, Essex.—*Dir.*, L. E. Prosser.

I.C. Engines.

BRITISH INTERNAL COMBUSTION ENGINE RESEARCH ASSOCIATION, 111–113 Buckingham Avenue, Trading Estate, Slough.—*Dir.*, W. P. Mansfield, Ph.D.

Iron and Steel.

BRITISH IRON AND STEEL RESEARCH ASSOCIATION, 11 Park Lane, W.1.—*Dir.*, Sir Charles Goodeve, O.B.E., D.Sc., F.R.S.

Jute.

BRITISH JUTE TRADE RESEARCH ASSOCIATION, Kinnoull Road, Kingsway West, Dundee, Scotland.—*Dir.*, H. Corteen.

Lace.

LACE RESEARCH ASSOCIATION, Glaisdale Drive West, Bilborough, Nottingham.—*Dir.*, John C. MacCallum.

Launderers.

BRITISH LAUNDERERS' RESEARCH ASSOCIATION, Hill View Gardens, Hendon, N.W.4.—*Dir.*, J. Leicester.

Leather.

BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—*Dir.*, K. W. Pepper, D.Sc.

Lime.

CHALK LIME AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Laboratories, Church Street, Welwyn, Herts.—*Dir.*, G. E. Bessey.

Linen.

LINEN INDUSTRY RESEARCH ASSOCIATION, Lambeg, Co. Antrim.—*Dir.*, D. A. Derrett-Smith.

Marine Engineering.

PARSONS AND MARINE ENGINEERING TURBINE RESEARCH AND DEVELOPMENT ASSOCIATION, Pametrada Research Station, Wallsend, Northumberland.—*Dir.*, T. W. F. Brown, D.Sc.

Motor.

MOTOR INDUSTRY RESEARCH ASSOCIATION, Lindley, nr. Nuneaton, Warwickshire.—*Dir.*, A. Fogg, D.Sc.

Non-Ferrous Metals.

BRITISH NON-FERROUS METALS RESEARCH ASSOCIATION, Euston Street, N.W.1.—*Dir.*, G. L. Bailey, C.B.E.

Paint.

RESEARCH ASSOCIATION OF BRITISH PAINT, COLOUR AND VARNISH MANUFACTURERS, Waldegrave Road, Teddington, Middlesex, *Dir.*, L. A. Jordan, C.B.E., D.Sc.

Paper.

BRITISH PAPER AND BOARD INDUSTRY RESEARCH ASSOCIATION, Welcomes Road, Kenley, Surrey.—*Dir.*, N. R. Hood, Ph.D.

Printing and Packaging.

PRINTING, PACKAGING AND ALLIED TRADES RESEARCH ASSOCIATION, Patra House, Randalls Road, Leatherhead, Surrey.—*Dir.*, V. G. W. Harrison, Ph.D.

Production Engineering.

PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Melton Mowbray, Leics.—*Dir.*, D. F. Galloway, Ph.D.

Rayon.

BRITISH RAYON RESEARCH ASSOCIATION, Heald Green Laboratories, Wythenshawe, Manchester.—*Dir.*, J. Wilson, C.B.E., M.C.

Rubber.

RESEARCH ASSOCIATION OF BRITISH RUBBER MANUFACTURERS, Shawbury, Shrewsbury, Shropshire.—*Dir.*, J. R. Scott, Ph.D.

Scientific Instruments.

BRITISH SCIENTIFIC INSTRUMENT RESEARCH ASSOCIATION, South Hill, Elmstead Woods, Chislehurst, Kent.—*Dir.*, J. Thomson, D.Sc., Ph.D.

Shipbuilding.

BRITISH SHIPBUILDING RESEARCH ASSOCIATION, 5 Chesterfield Gardens, Curzon Street, W.1.—*Dir.*, S. L. Smith, C.B.E., D.Sc.

Springs.

COIL SPRING FEDERATION RESEARCH ORGANISATION, Hoyle Street, Sheffield.—*Dir.*, R. Haynes.

Steel Castings.

BRITISH STEEL CASTINGS RESEARCH ASSOCIATION, East Bank Road, Sheffield, 2.—*Dir.*, A. H. Sully, Ph.D.

Tar.

COAL TAR RESEARCH ASSOCIATION, Oxford Road, Gomersal, nr. Leeds.—*Dir.*, D. McNeil, Ph.D.

Timber.

RESEARCH AND DEVELOPMENT COMMITTEE OF THE TIMBER DEVELOPMENT ASSOCIATION, 21 College Hill, E.C.4.—*Dir.*, P. O. Reece.

Welding.

BRITISH WELDING RESEARCH ASSOCIATION, 29 Park Crescent, W.1.—*Dir.*, R. Weck, Ph.D.

Whiting.

RESEARCH COUNCIL OF THE BRITISH WHITING FEDERATION, The Hall, Welwyn, Herts.—*Dir.*, D. C. Soul.

Wool.

WOOL INDUSTRIES RESEARCH ASSOCIATION, Torridon, Headingley, Leeds, 6.—*Dir.*, A. B. D. Cassie, C.B.E., D.Sc., Ph.D.

AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (*see* p. 362):—

Field Station, Compton, near Newbury, Berks—*Director*, W. S. Gordon, C.B.E., Ph.D., M.R.C.V.S., F.R.S.E.; Unit of Insect Physiology, Dept. of Zoology, Cambridge—*Director*, Prof. V. B. Wigglesworth, C.B.E., M.D., F.R.S.; Institute of Animal Physiology, Babraham Hall, Babraham, Cambs.—*Director*, J. H. Gaddum, M.A., Sc.D., M.R.C.S., L.R.C.P., F.R.S.; Animal Breeding Research Organisation, Glenbourne, 6 South Oswald Road, Edinburgh, 9—*Director*, H. P. Donald, D.Sc., Ph.D., F.R.S.E.; Virus Research Unit, Molteno Institute, Cambridge—*Director* K. M. Smith, C.B.E., D.Sc., Ph.D., F.R.S.; Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, A. W. Greenwood, C.B.E., D.Sc., Ph.D., F.R.S.E.; Unit of Experimental Agronomy, Department of Agriculture, University of Oxford—*Hon. Director*, Prof. G. E. Blackman; Unit of Biometrical Genetics, Department of Genetics, University of Birmingham—*Hon. Director*, Prof. K. Mather, C.B.E., D.Sc., Ph.D., F.R.S.; Unit of Microbiology, Department of Microbiology, The University, Sheffield, 10—*Hon. Director*, S. R. Elsden, Ph.D.; Unit of Soil Physics, School of Agriculture, Cambridge—*Director*, E. C. Childs, Sc.D., Ph.D.; Unit of Plant Nutrition (Micro-Nutrients), Long Ashton, Bristol—*Hon. Director*, Prof. T. Wallace, C.B.E., M.C., D.Sc., F.R.S. Unit of Embryology, Univ. College of N. Wales, Bangor—*Hon. Director*, Prof. F. W. Rogers Brambell, D.Sc., Ph.D., F.R.S.; Plant Growth Substance and Systemic Fungicide Unit, Wye College, Ashford, Kent—*Hon. Director*, Prof. R. L. Wain, D.Sc., Ph.D.; Unit of Statistics, University of Aberdeen.—*Director*, D. J. Finney, Sc.D. F.R.S., F.R.S.E.; A.K.C. Statistics Group, School of Agriculture, Cambridge.—*Officer-in-Charge*, R. C. Campbell, M.A., Ph.D.; Unit of Reproductive Physiology and Biochemistry, Molteno Institute, Cambridge—*Director*, T. R. R. Mann, M.D., Sc.D., Ph.D., F.R.S.; A.K.C. Unit of Animal Genetics, University of Edinburgh, King's Buildings, West Mains Road, Edinburgh, 9—*Hon. Director*, Prof. C. H. Waddington, C.B.E., Sc.D., F.R.S.; A.K.C. Radiobiological Laboratory, Grove, Wantage, Berks.—*Director*, R. Scott Russell, M.Sc., Ph.D.

GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made by the Agricultural Departments. Most of these Institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture for Scotland and these Departments seek the advice of the Agricultural Research Council in the consideration of research programmes and estimates.

(a) Research affecting Plants and Soils

Soil Science and Plant Pathology

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, F. C. Bawden, M.A., F.R.S.

Macaulay Institute for Soil Research, Craigiebuckler, Aberdeen.—*Director*, Prof. A. B. Stewart, M.A., B.Sc., Ph.D., F.R.I.C.

Plant Breeding

Hop Research Centre, Wye College, Ashford, Kent.—*Officer-in-Charge*, H. S. Darling, B.Sc.

Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.—*Director*, G. D. H. Bell, Ph.D.

Welsh Plant Breeding Station, Plas Gogerddan, Nr. Aberystwyth.—*Director*, Prof. P. T. Thomas, B.Sc., Ph.D.

Scottish Plant Breeding Station, Pentlandfield, Roslin, Midlothian.—*Director*, J. W. Gregor, D.Sc., Ph.D., F.L.S.

Horticulture

John Innes Horticultural Institution, Bayfordbury, Hertford.—*Director*, K. S. Dodds, D.Sc., Ph.D.

East Malling Research Station, Nr. Maidstone, Kent.—*Director*, F. R. Tubbs, Ph.D.

Agricultural and Horticultural Research Station, Long Ashton, Bristol.—*Director*, Prof. H. G. H. Kearns, O.B.E., B.Sc., Ph.D.

Scottish Horticultural Research Institute, Mylnefield, Invergowrie, Dundee.—*Director*, T. Swarbrick, M.Sc., Ph.D.

Plant Physiology

Research Institute of Plant Physiology, Imperial College of Science and Technology, Prince Consort Road, S.W.7.—*Director*, Professor F. G. Gregory, D.Sc., F.R.S.

Vegetables

National Vegetable Research Station, Wellesbourne, Warwickshire.—*Director*, J. Philip, Ph.D. F.L.S.

Grassland

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, William Davies, D.Sc.

Glasshouse Crops

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.—*Director*, F. W. Toovey, O.B.E.

Crop Variety Testing, Seed Testing and Seed Production

National Institute of Agricultural Botany, Huntingdon Road, Cambridge.—*Director*, F. R. Horne, C.B.E.

(b) Research affecting Animals

Animal Diseases

Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh, 9.—*Director*, J. T. Stamp, D.Sc., M.R.C.V.S., F.R.S.E.

Research Institute (Animal Virus Diseases), Pirbright, Surrey.—*Director*, I. A. Galloway, D.Sc., M.R.C.V.S.

Hill Farming

Hill Farming Research Organisation, 48 Palmerston Place, Edinburgh, 12.—*Director*, A. R. Wannop, O.B.E., F.R.S.E.

Dairying

National Institute for Research in Dairying, Shinfield, nr. Reading.—*Director*, Professor H. D. Kay, C.B.E., D.Sc., Ph.D., F.R.S.

Hannah Dairy Research Institute, Kirkhill, Ayr.—*Director*, J. A. B. Smith, D.Sc., Ph.D., F.R.S.E.

Nutrition

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, D. P. Cuthbertson, C.B.E., M.D., D.Sc., F.R.S.E.

Poultry

Houghton Poultry Research Station,* Houghton Grange, Huntingdon.—*Director*, R. F. Gordon, D.Sc., M.R.C.V.S.

(c) Research on Agricultural Engineering

National Institute of Agricultural Engineering, Wrest Park, Silsoe, Beds.—*Director*, W. H. Cashmore, C.B.E.

National Institute of Agricultural Engineering, Scottish Station, Howden, Mid-Calder, Midlothian.—*Director*, W. J. West.

* Financed jointly by the Agricultural Research Council and the Animal Health Trust.

PRINCIPAL BANKS OPERATING IN THE BRITISH COMMONWEALTH

* *Clearing Bankers.* ‡ *Army Agents.*

London Banking Hours are 10 a.m. to 3 p.m. (Saturdays 9.30 a.m. to 12 noon).

ALEXANDERS DISCOUNT CO., LTD. (1810), 24 Lombard St., E.C.3.—Capital, authorized. £2,600,000. Issued, £200,000 in £2 (fully-paid 6 p.c.) Cumulative Preference Shares, £2,400,000 £1 Ordinary Shares, fully paid, Reserves £2,142,000; Deposits, £99,356,885; Dividend, 1957, 6 p.c. Preference Shares, 5 p.c. Ordinary Shares (= 10 p.c. on former capital).

ALLAHABAD BANK, LTD. (1865), *Calcutta*, India. Affiliated to Chartered Bank.—Capital, authorized, Rs. 1,00,00,000. Issued and subscribed—45,000 Ordinary Shares of Rs. 100 each, 16,000 fully paid, 29,000 Rs. 50, paid; 15,000 6 p.c. Preference Shares of Rs. 100 each, fully paid; Reserve Fund, Rs. 1,08,00,000. Dividend for 50 years to December 31, 1957, 12 p.c. and bonus 6 p.c. on Ordinary Shares (free of tax). (81 Branches.)

THE AMERICAN EXPRESS CO. Inc. The Subsidiary of American Express Co., New York (1868), 65 Broadway, *New York*, U.S.A.; 6 Haymarket, S.W.1.—Capital, $6.000,000 (Shares fully paid).

ANGLO-FEDERAL BANKING CORPORATION, LTD., Capel House, New Broad Street, E.C.2.—Authorized Capital, £2,000,000. Capital Issued and Paid-up £541,875.

ANGLO-PORTUGUESE BANK, LTD. (1929), 7–9 Bishopsgate, E.C.2.—Capital, £1,500,000. Issued and fully paid, £1,250,000; Reserve £250,000; Deposits, 31/12/58, £9,545,559.

AUSTRALIA AND NEW ZEALAND BANK, LIMITED (in which are merged The Bank of Australasia, Ltd. (1835), and The Union Bank of Australia, Ltd. (1837), 71 Cornhill, E.C.3). Note.—Savings Certificates may be bought in denominations of 1, 2, 3, 4, 5, 10, 20, 50 and 100 15*s.* units.

SAVINGS BANKS

Post Office Savings Bank.—On Dec. 31, 1957, there were approximately 22,396,000 active deposit accounts in the *Post Office Savings Bank*, with the sum of £1,676,555,000 due to depositors. On December 31, 1957, Government Stock and Bonds to the amount of £766,711,000 stood to the credit of holders in the Post Office Savings Bank Section of the Post Office Register. Any sum from one shilling to £500 may be deposited and interest is allowed at 2½ per cent. per annum. A depositor may have more than one account. There is a limit of £3,000 to the amount which may stand to his credit and he may not deposit more than £500 in the aggregate in any year.

P.O.S.B. DEPOSITS

Dec 31	E. & W.	Scotland	N. Ireland
	£	£	£
1952....	1,713,786,000	69,694,000	28,819,000
1953....	1,650,431,000	68,261,000	28,138,000
1954....	1,631,848,000	67,819,000	27,713,000
1955....	1,605,621,000	67,285,000	27,123,000
1956....	1,594,594,000	66,774,000	26,577,000

In 1956 the *Average Amount due to each Depositor* in Active Accounts was £75 13*s.* 10*d.*

Trustee Savings Banks were started in the early years of the 19th century by public-spirited men who recognized the importance of individual thrift to the well-being of the community. They are not conducted for private profit, and their sole concern is to offer to the public the best service and the most convenient and remunerative method of saving compatible with sound administration and the greatest possible degree of security. They combine security, which is inseparable from a close connection with the State, with the freedom which can only come from independent management. They are directed by local voluntary Trustees and Managers, whose duties are set out in Acts of Parliament and in Rules certified by the Registrar of Friendly Societies. They are subject to Government supervision, and are also inspected on behalf of the Trustee Savings Banks Inspection Committee, a statutory body which submits an Annual Report to Parliament.

Trustee Savings Banks are full partners in the National Savings Movement, and consequently all deposits in these Banks directly assist the nation's finances

On Nov. 20, 1957, there were 10,391,760 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £1,298,607,878 which comprised £1,140,107,189 due to depositors in the Ordinary and Special Investment Departments, £138,560,788 Stocks and Bonds held for depositors and £19,939,901 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, numbering 1,333 (principal and subordinate) in November, 1957, can be obtained from the *Trustee Savings Bank Association*, Tavistock House South, Tavistock Square, W.C.1. *Chairman*, Sir Kenneth Stewart, G.B.E.; *Secretary*, R. T. H. Scott, M.B.E.

Life Assurance and Fire and General Insurance

LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices, and of Commonwealth companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked (O) in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter (I).

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1957.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 16½%, of which about 5½% is expended on commission and 11% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policy holder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The last columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, the most used being known as the A. 1924-29, H^m, O^m, $H^m(^5)$ and $O^m(^5)$—the latter exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and $O^m(^5)$ tables in conjunction are more stringent than the O^m table alone, the H^m is more stringent than the A. 1924-29 and with every table the lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity 1s. 6d.

Household goods therein, usually 2s.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2s.

Stock and Utensils in trade fixtures, and household furniture in such shops and warehouses, from 2s.

Most fire insurance companies transact accident (including Motor) and miscellaneous business, and if a strong company be selected it will probably be found to the advantage of an insurer that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies, previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, etc., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

NOTE.—As Insurance is highly technical, particularly where business risks are involved, the advice and assistance of a qualified Insurance Broker can be utilized with considerable advantage.

LIFE ASSURANCES IN FORCE

Returns published by the Board of Trade show that 8,188,000 ordinary life assurances to the amount of £5,484,500,000 were in force in 1954, with companies established within Great Britain. 88,618,000 industrial life assurances were in force at the end of 1954, with companies established in Great Britain.

The Annuity is calculated as payable half-yearly.

* Note.—The Valuation period is for the 5 years ending in December of the year stated, unless otherwise marked.

A.—Annual Valuation.

Atlas.—Three years ending December 31, 1955.

Beacon—Three years ending December 31, 1956.

Caledonian.—Three years ending December 31, 1956.

Clerical, Medl. and Genl.—Rates of bonus apply only to Policies effected since 1st Jan. 1946.

Ecclesiastical.—Five years ending February 28, 1954.

Equity and Law.—Three years ending December 31, 1955. Further revisionary bonus on existing bonus additions.

Ideal Life.—Three years ending December 31, 1956.

Life Association of Scotland.—Three years ending December 31, 1957.

Liverpool Victoria.—Three years ending December 31, 1956.

National Mutual.—Two years ending December 31, 1956.

National Mutual of Australasia.—One year ending Sept. 30, 1957.

National Provident.—Three years ending December 31, 1957.

Pilot.—Guaranteed Bonus.

Pioneer.—One year ending March 31, 1958

Royal Exchange.—Three years ending December 31, 1957

Scottish Mutual.—Three years ending December 31, 1955.

Standard.—Three years ending Nov. 15, 1955.

Sun Life.—Three years ending December 31, 1957.

United Kingdom.—Three years ending December 31, 1956.

Western Australian.—Five years ending June 30, 1953.

Yorkshire.—Three years ending December 31, 1957.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE

Life assurance may be effected either with or without participation in profits. If with participation then a higher premium is charged and the Policy is entitled to a Bonus, which is a share in the profits made by the Office, as and when declared. Valuations are made by Offices at periods varying from one to five years and the rate of Bonus then declared is usually in respect of each year since the previous valuation. These Bonuses are normally payable with the Sum Assured for their full amount, but, if desired, they can be applied to reduce the premium or surrendered for a cash payment. If a Policy is effected without participation the Sum Assured only is payable.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

The next table shows the annual premiums payable throughout life [with some Offices premiums cease at age 85] for a policy of £100 payable at death, with and without profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance. A without profit Insurance provides the maximum amount of cover at the lowest cost and if an Office, as in some cases, is prepared to allow the option of converting the Insurance at any time to "with" profits either for whole of Life or on the Endowment plan, this gives an attractive contract. The change would, of course, entail a higher premium being paid but under this arrangement the highest cover can be obtained in the early years and the alteration made when the increased cost can be met.

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realization of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—*see* first page of Life Assurance.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a " with profit " Policy.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 at the end of 15, 20 and 25 years, or at death, if previous, with profits.

HOW TO ASSIGN A LIFE POLICY

When a Policy is assigned by way of Mortgage, it is better to employ a solicitor: but when the Assignment is absolute, i.e., when a Policy is sold out and out, his services may be dispensed with, provided the Title is clear.

The Assignment may be in the following form to comply with English law, but may be subject to slight variation in other parts of the British Isles:—

I, (name)....., of (address)....., in the County of ....., (occupation)..... in consideration of the sum of (pounds) ..... paid to me by (name)....., of (address) ....., in the County of ..... (occupation)....., the receipt of which I herewith acknowledge, do hereby, as beneficial owner, assign unto the said ....., his Executors, Administrators and Assigns, all that Policy of Assurance on my life for £..... effected with the (name of Company)..... numbered ....., and dated ....., and all monies assured by or to become payable thereunder. *And I hereby certify that the transaction hereby effected does not form part of a larger transaction, or of a series of transactions, in respect of which the amount or value, or the aggregate amount or value, of the consideration exceeds five hundred pounds.* In witness whereof I have hereunto set my hand and seal this ..... day of ....., 19....

Signed, sealed and delivered by the above-named, in the presence of—
Name .....
Address .....
.....

The document must be stamped by the Inland Revenue Stamp Office.

Notice of the Assignment should be sent, in duplicate, to the Head Office of the Company immediately on execution. The Company is entitled to charge a fee of five shillings for acknowledgment, and will retain one copy and the other will be returned with acceptance of service endorsed thereon.

* This wording should be omitted when not applicable.

Friendly Societies—Great Britain

Acts 1896–1958

VOLUNTARY (*i.e.* Not including State) BUSINESS.

In spite of the expansion of *Compulsory* "Health" Insurance since the introduction of the *State* scheme in 1912 and its extension in 1948, the *Voluntary* business of Friendly Societies registered under the Friendly Societies Act, 1896, still continues on a large scale, as shown by the following comparative totals—those in ordinary type relate to registered Friendly Societies proper (embracing both "Centralized" societies and "Orders with Branches"); those in *italics* "Collecting" societies which, although registered under the Friendly Societies Acts, are subject also to the special provisions of the Industrial Assurance Acts:—

End of Year	No. of Societies on Register		Membership		Assurances or Policies		Total Funds	
			Thousands				£000's	
1956	12,048	*100*	6,373	*32,851*	230,414		*256,767*	
1938	19,000	*141*	8,491	*25,738*	151,013		*84,837*	
1913	25,475	*71*	6,783	*7,481*	51,489		*11,163*	

Although recent years have seen the growth of societies registered for such specific purposes as the provision of institutional treatment or assuring annuities and pensions, most friendly societies continue to provide the customary benefits in sickness and at death. During 1956 Friendly Societies proper paid out £5,145,000 in sickness benefit and £2,010,000 in death benefit while payments on death claims by collecting societies amounted to £8,666,000.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all or the greater part of their funds annually to the individual credit of the members to be withdrawn by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines one of which (known as the "Holloway" principle) is worked by a contribution increasing with each year of attained age after the member reaches age 30 up to age 65.

The membership and funds figures—as at the end of 1956—set out below indicate the strength of several leading old established societies including the three largest Orders which operate through registered districts and branches subject to a central body:—

FRIENDLY Socs.—Name with (in brackets) Year Established	Membership	Funds (including Reserves)
		£
National Deposit Friendly Society (1868)	677,000	23,110,000
Hearts of Oak Benefit Society (1842)	546,000	18,122,000
Independent Order of Odd Fellows, Manchester Unity (1810)	472,000	27,003,000
Ancient Order of Foresters (1834)	347,000	19,490,000
Independent Order of Rechabites, Salford Unity (1835)	229,000	6,851,000

COLLECTING Socs.—Name and Year Established	No. of Assurances		Funds (including Reserves)
	Premium Paying	Free Paid-up	
			£
Liverpool Victoria Friendly Society (1843)	12,582,000	4,088,000	150,385,000
Royal Liver Friendly Society (1850)	7,799,000	1,855,000	77,140,000
Scottish Legal Life Assurance Society (1852)	2,797,000	859,000	22,051,000

The present National Insurance scheme with its provision of "cradle to the grave" benefits has had serious repercussions on the Voluntary Friendly Societies. From the end of 1937 to the end of 1947 total membership rose from 8,341,000 to 8,608,000, an increase of 3 per cent., but during the next nine years it fell by 26 per cent. to 6,373,000. There are, however, signs that the decline in membership is now being arrested.

When the modest scheme of 1912 was introduced some people doubted the Voluntary Friendly Societies' ability to survive for long, and yet they continued to grow in the face of keen competition, although their remarkable expansion naturally brought many societies up to a point where they found it increasingly difficult to maintain a sufficient inflow of new, young entrants to replace membership losses due to death and other causes. In recent years, too, many of the older (non-deposit type) societies have had to introduce more attractive tables to cater for the growing preference amongst members for a curtailed (instead of whole-life) sickness insurance to enable a margin of contributions to accumulate to their credit as an increasing cash endowment payable in full at age 65, or in the event of prior death, with the option of drawing on the credit from time to time if the member is in need, subject to certain conditions, including the retention of a specified minimum sum in the member's account.

In considering how far the general body of members comprising the Friendly Societies movement can afford to continue their voluntary insurances along with their higher State scheme contributions in future, it must not be overlooked that present-day wage levels are substantially higher for all classes of workers than before the war and the Government has declared that continued Voluntary insurance to supplement State benefits, wherever one's means permit, should be encouraged.

Moreover, in addition to the widespread *branch*

units of the better known "Orders," there are numerous small independent societies whose membership is maintained more easily than in the large societies, by age-long custom of family and social ties within their own locality, and there still exist a few such societies whose formation dates back far beyond any "Friendly Society" legislation. In fact, long before the term "Friendly Society" came into use, the seeds of Voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution in order to obtain relief when sick or in old age and a payment to the widow in the event of death. Some of these old Guilds with their distinctive titles still survive, and the present Voluntary Register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the four earliest all operating in Scotland, the oldest being the "Incorporation of Carters in Leith" established as long ago as 1555. The three oldest in England were all formed in London—the "Norman Society" (estd. 1703); the "Society of Lintot" (estd. 1708) and the "Society for the Mutual Help of Swiss in London" (estd. 1703), the first two of these having been formed by Huguenot refugees from the Protestant persecution under Louis XIV.

The first Act for the encouragement and protection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration of sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The present consolidating Act of 1896 allows various specific classes other than "Friendly Societies" to be registered thereunder, but exemption from income tax (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

The Friendly Societies Act, 1955, extended the purposes for which societies may be registered under the Acts, and authorized societies to invest their surplus funds in other registered societies.

The Industrial Assurance and Friendly Societies Act, 1948 (Amendment) Act, 1958 increased from £20 to £30 the amount of insurance allowable on the life of a parent or grandparent.

Co-operative Societies—Great Britain

Industrial and Provident Societies Acts, 1893–1954

During the 10 years ended 1957 Co-operative Retail Trading Societies (almost all General Supply Stores) expanded their membership by 24 per cent. and assets by 16 per cent. as shown by the following particulars covering the 1,045 societies on the register at the end of 1957 and 1,118 societies in 1947:

Year	Number of Members	Share Capital	Sales	Surplus on Year's Working	Interest on Shares	Dividends on Sales	Total Assets
		£000's	£000's	£000's	£000's	£000's	£000's
1957	12,148,000	249,454	954,290	66,594	7,119	51,366	453,058
1947	9,805,000	246,729	434,215	46,179	6,857	35,216	390,275

In addition, 172 Co-operative Wholesale and Productive Trading Societies (with a total membership of 56,000) were on the register at the end of 1957. The total figures for these societies are dominated by those of the two main Wholesale Trading Societies (with their "Joint" undertaking) whose combined sales for 1957 amounted to £545,000,000, their assets at the end of the year totalling £196,000,000.

Building Societies—Great Britain

Acts 1874–1940.

Building Societies are, with few exceptions, associations incorporated with limited liability under the Building Societies Acts. All Building Societies are required to register their rules and file their accounts with the Registrar of Friendly Societies and Building Societies. The following particulars showing the growth of Building Societies (as also that of Friendly and Co-operative Societies respectively tabulated on p. 1078 and above) are based on the Registrar's Annual Reports. The Editor is also indebted to the publishers of the "Building Societies Year Book" for details of individual societies from which the second table hereunder has been compiled.

As indicative of the part played by the Building Societies movement in assisting the vast owner-occupier housing expansion after the 1914–1918 war, Building Societies advanced on mortgage a total of almost £1,600,000,000 during the 21 years 1919–1939.

There was, of course, a considerable decline in mortgage advances during the Second World War but £3,174,000,000 was advanced during the 11 years, 1946 to 1956. Advances during 1957 totalled £371,000,000 and although this amount was below the record figure of 1955 it represented an increase of 54 per cent. over the figure for 1947.

During 1957, shareholders and depositors added £433,000,000 to their accounts. Withdrawals of capital amounting to £337,000,000 were again the highest the societies have ever experienced but nevertheless the total assets increased to £2,408,000,000. Of this total, mortgage balances represented 84 per cent., the remainder consisting chiefly of investments in Government securities and cash. Reserves and profit balances represented 4·5 per cent. of the total assets.

For the year 1957 interest received by societies from borrowers amounted to £117,000,000

Interest payments to shareholders and depositors totalled over £74,000,000. Management costs, at £14,000,000 for 1957 averaged only about 1¾*d.* per £1 of the mean mortgage assets.

The average mortgage interest rate charged by societies is 6 per cent., and the interest rates offered to investors are mainly 3½ per cent. on shares and 3 per cent. on deposits (both tax paid by the societies).

The Council of the Building Societies Association advised its members in September 1958 to maintain these rates unchanged for the time being despite the reduction in the Bank rate. The largest building society, the Halifax (which is not a member of the Association), had earlier announced reductions of ½ per cent in the rate charged to its borrowers and ¼ per cent in the rates offered to investors.

BUILDING SOCIETIES, GREAT BRITAIN, 1957—with 1956 totals in italics.

TAXES, STAMP DUTIES AND LICENCES

INCOME TAX 1958

SPECIMEN TABLES

Tax payable by (*a*) single persons; and (*b*) married couples without children; after deduction of the personal allowance and, in the case of earned income, the earned income relief. The taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amounts shown in the Table.

Income	Single Persons				Married Couples without Children

RULES

STATUTORY INCOME is computed as follows:—

Under Schedule A.—Assessed on an actual year basis, the annual value of Houses, Lands, Tenements, etc., including houses occupied by the owner. Net assessment is computed by deducting scale allowance for repairs, insurance, etc., from rack rental, *i.e.* rent payable when landlord undertakes all repairs and maintenance and tenant pays rates. *Scale repairs, etc., by reference to gross assessment.*

Lands.....one-eighth

Houses: Where assessment does not exceed £40..... one-quarter

Exceeds £40, but not £50.. £10

Exceeds £50, but not £100 one-fifth

Exceeds £100.....£20 plus one-sixth of excess of £100.

A reduction may be claimed in the assessment of any year where average cost of previous five years' maintenance, etc., exceeds scale allowance for that year. In relation to recently acquired property it is permitted to claim a reduction in the net assessment equal to the excess of the actual year's maintenance over scale allowance provided this basis is used for first five years of ownership. Except in the case of agricultural property relief cannot exceed the net annual value. The cost of insuring the property and agents charges are allowable maintenance expenditure.

Under Schedule B.—Fixed assessment on actual year basis to cover value of amenity lands—parks, gardens etc., not used for husbandry. Also on woodlands, although these can be assessed on actual profits under Sch. D, Case I if taxpayer so elects. Schedule B assessments are to equal one-third of annual value of the land for Schedule A purposes.

INCOME TAX is chargeable on an individual's income of the fiscal year ending 5th April (a married woman's income is normally included with that of her husband). An individual receiving income from a business or a profession can, however, use his own accounting year as a basis for his assessment.

Married Couples with One Child—Earned Income

The standard rate of income tax for 1958–59 is 8*s.* 6*d.* in the £.

Under Schedule C.—Dividends, interest, annuities from public revenue on actual year basis. Income Tax is deducted at source. For exceptions see Schedule D.

Under Schedule D.—Generally on income of preceding year. Profits of Trades and Professions. Interest on public revenue escaping Schedule C and on Bank and Post Office Savings Bank Accounts, etc. Interest on P.O.S.B. and Trustee Savings Bank Accounts up to £15 per person exempt from income tax. Such amount of interest has to be included for Sur Tax purposes and has to be grossed at the standard rate. Income from Foreign or Commonwealth securities, rents and possessions. For persons domiciled and ordinarily resident in Great Britain this income is assessable whether remitted or not. Persons not domiciled or British subjects not ordinarily resident in Great Britain are assessable only on remittances to the United Kingdom of this income in any year in which they become technically resident. Income from Trades or Professions, carried on abroad is assessable only to extent that it is remitted and then only when person entitled thereto is technically resident in United Kingdom.

Profits from letting of Furnished Houses, etc., and Excess Rents (arising when rent of unfurnished house less attributable repairs allowance exceeds net Schedule A assessment).

Under Schedule E.—Income from all Employments and Pensions, including Salaries, Wages, Emoluments, Directors Fees, etc. Taxed under system commonly known as PAYE on actual year basis.

Income from employments exercised abroad assessable only to the extent that it is remitted and then only when employee is resident in United Kingdom.

Since 5th April, 1949, unemployment and sickness benefit payable under the National Insurance Act are not assessable to income tax. Maternity benefit under the same Act has never been assessable.

Expense allowances and payments in kind (less expenses incurred in performance of duties) to Directors and employees enjoying emolument of £2,000 p.a. or more now assessable. Fees and subscriptions to certain professional bodies and learned societies may be included in expenses.

TAXABLE INCOME is Statutory Income less Allowances and Deductions as under:

Personal Allowance.—To single person. £140

To married man living with or normally maintaining his wife. £240

Note.—When either husband or wife is absent from United Kingdom throughout a complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. This course is not followed if it is to the advantage of the spouses to be jointly assessed on the basis of the husband's residential position. A married woman permanently separated from her husband is treated as a *feme sole*.

Allowances for Children.—For each child under 16 (or over that age at the beginning of the fiscal year receiving full time education at a recognized educational establish-

ment) and who does not have income in that year exceeding £100 in its own right, the allowances are:—

(*a*) Child over 16 at commencement of fiscal year..... £150
(*b*) Child over 11 at commencement of fiscal year..... £125
(*c*) Other children (each)..... £100

Scholarship or bursary does not count for this purpose.

"Child" includes step child and adopted child.

When a husband and wife are divorced or permanently separated, relief in respect of any children of the marriage can be given to either the father or the mother or divided between them in any way they may mutually agree. Alternatively, the relief will be divided in the ratio in which they each contribute to the children's maintenance and education. In this connection, any payments which the father makes under an Order of Court or Separation Agreement for the benefit of the children or in any way which would entitle him to deduct the payments as a charge in his own income tax return would not count for the purpose of apportioning the Child Relief.

The "Family Allowance" for children ranks as the father's income subject to Earned Income Allowance. Allowance may also be claimed when child over 16 years is articled or apprenticed provided emoluments (exclusive of premiums returned) do not exceed £100 in the year.

Allowance for Dependent Relatives.—A maximum deduction for each dependent relative of..... £60

This allowance is reduced by £1 for every £1 by which the relative's own income (excluding voluntary allowance) exceeds £135. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother. If more than one person gives support to the dependent relative then allowance is divided pro rata. If annual maintenance afforded is less than £60 allowance limited to amount expended.

A taxpayer, who by reason of his or her own age or infirmity, has to retain the *services of a daughter* resident with him or her is entitled to an allowance of..... £40

Allowance for Housekeeper or person looking after children..... £60

An allowance of £60 is granted to:—

(*a*) any male taxpayer entitled to single personal allowances, any female taxpayer who was either working full time in some employment or business or was totally incapacitated throughout the year and a married man entitled to higher personal allowance whose wife is totally incapacitated throughout the whole of the year, who has a female person resident with and maintained or employed by him or her for the purpose of having care of any child or children for whom the taxpayer is entitled to claim child relief.

(*b*) a widow or widower who has a female relative (or, if no relative is available, a female person) resident with her or him in the capacity of Housekeeper.

Earned Income.—Allowance of the following fractions of earned income (after deducting allowances for tools, uniform, expenses, superannuation, etc.):—

Up to £4,005—Two-ninths.
The next £5,945—One-ninth.

Married woman earning income in her own right has deduction of two-ninths of such earnings and, in addition, an allowance equal to seven-ninths of her earnings subject to a maximum of £140 plus Reduced Rate Reliefs as shown below.

Age Allowance.—Allowance of two-ninths of unearned income where taxpayer (or his wife) attains 65 years subject to total income not exceeding £800. Marginal relief given on incomes slightly in excess of £800.

Age exemption.—Persons over 65 years of age before 6th April, 1959, are exempt from tax if their total incomes do not exceed:—

Single person £275
Married couple £440

Marginal relief is given where incomes are only slightly over those limits.

Pension Contributions and National Insurance Act.—Part of a taxpayers' N.I. contribution and contributions by both employed and self-employed persons to "approved" superannuation fund or for the provision of a life annuity in old age are allowed as deductions from income. Taxpayer paying "employer's" contribution in respect of personal servants may deduct whole of such contribution from his income.

Life Assurance Premiums.—Relief is given on premiums paid for Life Assurance or for Contracts for Deferred Annuities on life of taxpayer or his wife. In all cases, except those of policies or contracts taken up in connection with a Superannuation Scheme, a capital sum must be payable at death. Where date of policy or contract is after 22nd June, 1916, and total premiums available for relief to taxpayer and his wife do not exceed £25 an amount of £10 or total premiums, whichever is less, may be deducted from assessable income. Where total premiums exceed £25 relief given at two-fifths of standard rate. For policies or contracts dated before 22nd June, 1916, following rates of relief apply:—

Where total income does not exceed £1,000. Half standard rate (maximum 3*s.* 6*d.*).

Income between £1,000 and £2,000. Three-quarters standard rate (maximum 5*s.* 3*d.*).

Income exceeding £2,000. Full standard rate (maximum 7*s.*).

Where annual premium exceeds 7 per cent. of capital sum assured relief is limited to sum equal to 7 per cent. Relief also given on sums paid under Act of Parliament or under terms of employment for securing deferred annuity to widow or provision for children after death of the taxpayer. Relief is given as for life policy or deferred annuity premiums above except that there is no restriction on amount of standard rate. Total relief under either of these headings limited to one-sixth of total income.

Payments for Retirement Annuities, made under a contract approved by the Inland Revenue, and subject to certain statutory limits, may be deducted from total income for income-tax and sur-tax purposes.

PURCHASED LIFE ANNUITIES.—From 1956–57 onwards, the capital element of such annuities, whenever purchased, is not treated as income, and is not taxable. The annuities concerned are those, for a term referable to a life, which are purchased for money or money's worth from a person whose business is to grant annuities. The capital element, which is constant, is calculated actuarially, and is agreed between the grantor of the annuity and the Revenue. These provisions do not apply—

(*a*) To annuities which are already treated as having a capital element.
(*b*) To annuities bought with sums which have ranked for relief from Income Tax (*e.g.*, retirement annuity premiums).
(*c*) To annuities under wills or settlements.
(*d*) To annuities under sponsored superannuation schemes or purchased in recognition of services in any office or employment.

Rates of Tax on Taxable Income	in the £
On first £60	2*s.* 3*d.*
On next £150	4*s.* 9*d.*
On next £150	6*s.* 9*d.*
On balance	8*s.* 6*d.*

Small Income Relief.—All incomes up to £300 are treated as Earned Income. Marginal relief is given where incomes are slightly over this limit. Incomes slightly over £300 are charged at 9*s.* in £.

Building Society Interest.—Majority of societies operate under special arrangement with Inland Revenue Authorities and interest is paid to depositors and shareholders "free of income tax." While there is thus no liability to income tax on such interest it must be calculated in taxpayer's total income for assessment to sur-tax. The interest received must be grossed at the standard rate when brought in for sur-tax purposes.

Sur-Tax.—For a person entitled only to Single Personal allowance, no Sur-Tax is charged on the first £2,000. Married men add to that exempt portion the difference between Single and Married Personal Allowance (£100). Child, Housekeeper and Dependent Relative Allowance can similarly be added. Thus, for a married man with two children at school over 16 and one Dependent Relative the exempt portion of his income would be:—

Single man	£2,000
Higher Personal Allowance	100
2 Children (at £150 each)	300
Dependent Relative	60
	£2,460

Incomes over the exempt portion are charged on a sliding scale as follows:—

On each £ of next	£500	2*s.*	in the £
,,	£500	2*s.* 6*d.*	,,
,,	£1,000	3*s.* 6*d.*	,,
,,	£1,000	4*s.* 6*d.*	,,
,,	£1,000	5*s.* 6*d.*	,,
,,	£1,000	6*s.* 6*d.*	,,
,,	£1,000	6*s.* 6*d.*	,,
,,	£1,000	7*s.* 6*d.*	,,
,,	£1,000	7*s.* 6*d.*	,,
,,	£2,000	8*s.* 6*d.*	,,
,,	£3,000	9*s.* 6*d.*	,,
,,	£5,000	10*s.*	,,
On each £ above	£20,000	10*s.*	,,

Deeds of Covenant.—Where covenant to pay annual sums of money is made for other than valuable and sufficient consideration the period of the covenant must be for a term which can exceed six years if the Covenantor wishes to divest himself of such income for income tax purposes. Any such covenant entered into after 10th April, 1946, must be in favour of an individual, not employed in any way by Covenantor and not, for example,

a charitable body in order to divest the Covenantor of the income for Sur-tax purposes.

Settlements in favour of taxpayer's own infant children.—The Income of any such Settlement made since 22nd April, 1936, is treated as that of the Settlor for all income tax purposes if:—

(*a*) the Settlement can be revoked inside a period of six years (unless the child becomes bankrupt).

(*b*) the income can be paid to or for the benefit of the child during the lifetime of the settlor. This ceases to apply at the end of the fiscal year in which the child attains 21 years or marries.

Agreements for the Avoidance of Double Taxation have been made between the United Kingdom and Aden Colony, Antigua, Austria, Australia, Barbados, Basutoland, Bechuanaland, Belgium, British Guiana, British Honduras, British Solomon Islands Protectorate, Brunei, Burma, Canada, Ceylon, Cyprus, Denmark, Dominica, Falkland Islands, Federation of Rhodesia and Nyasaland, Fiji, Finland, France, Gambia, Germany (Rep.), Gilbert and Ellice Islands, Gold Coast (Ghana), Greece, Grenada, Guernsey, Ireland (Rep.), Isle of Man, Israel, Jamacia, Jersey, Kenya, Malaya, Mauritius, Montserrat, Netherlands, New Zealand, Nigeria, North Borneo, Norway, Pakistan, St. Christopher and Nevis, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Singapore, Swaziland, Sweden, Switzerland, Tanganyika, Trinidad, Uganda, Union of South Africa, United States of America, Virgin Islands, and Zanzibar.

Double Taxation Relief.—Relief may be obtained by residents of the United Kingdom in respect of any income tax payable in any other Country, Colony or Dominion, not covered by the specific Agreements referred to above, when that income is also liable to British income tax. A credit against the British tax liability on the doubly taxed income is given at a rate equal to the rate paid outside the United Kingdom subject to a limit of the taxpayer's average or effective rate of British tax.

Persons Resident Abroad.—Persons normally resident outside the United Kingdom are not liable to United Kingdom Tax on income arising outside the United Kingdom (including Dominion, Colonial and Foreign Loans issued in London) but on the interest from:—

3% War Stock 1955–59; 3½% War Stock 1952; 4% Victory Bonds; 4% Funding Loan 1960–90; 2½% and 3% Defence Bonds (all issues except the 5th); 2½% National War Bonds (except 1954–56 issue); 3% Savings Bonds (all issues); 5½% Funding Loan 1982–84.

Such persons become technically resident in the United Kingdom if they visit for a period or periods exceeding six months in any fiscal year. Also if they visit for any period in a year in which they have retained a place of abode in the United Kingdom, except such persons as are engaged in full-time employment abroad. They would then be liable to United Kingdom Tax on all remittances of income arising abroad. If they visit the United Kingdom in four consecutive years for periods averaging three months or more per annum they would be regarded as ordinarily resident there.

A person who is not resident in the United Kingdom who has income which is liable to United Kingdom tax cannot claim any of the normal income tax allowances unless he is.

(*a*) a British subject;

(*b*) a present or former servant of the Crown; or widow of a former Crown servant;

(*c*) employed by any missionary society controlled from the United Kingdom or a servant of a native State under British protection.

(*d*) a resident of the Isle of Man or the Channel Islands or

(*e*) was previously resident in the United Kingdom but resides abroad for the sake of his health or the health of a member of his family.

Such a person can claim a proportion of the normal allowances in the ratio which his income liable to United Kingdom Tax bears to his total income.

This relief is now extended to persons residing in Austria, Belgium, Burma, Denmark, Finland, France, Germany (Fed. Rep.), Greece, Netherlands, Norway, Sweden and Switzerland.

Post War Credits.—Those credits arising out of the temporary reduction of certain income tax allowances during the years 1941–42, 1942–43, 1943–44, 1944–45 and 1945–46 are repayable to women over 60 and men over 65 years of age. Where a man or woman who has died or become bankrupt would, but for that, be entitled to claim repayment then the person having the title to the credit shall be able to claim repayment. Forms for claiming repayment may be obtained at any Post Office.

INCOME TAX ACT, 1952

The Income Tax Act, 1918 and all subsequent Income Tax Acts and Finance Acts up to and including the Finance Act, 1951 (in so far as they relate to income tax) have been consolidated in the Income Tax Act, 1952. This Act came into force as from 6th April, 1952.

NOTES ON INCOME TAX ADMINISTRATION

Income Tax under Schedules A, B, D and E, is assessed by H.M. Inspector of Taxes. Where taxpayer is assessable under Schedules A and (or) B, these assessments will be made by H.M. Inspector for the district in which the land or property giving rise to the assessment is situated. Assessments under Schedule D (Profits of Trades and Professions) and under Schedule E are made by H.M. Inspector of Taxes for the district in which Trade, Profession or Employment is carried on, or from which Pension is paid. Other Schedule D income is assessable by H.M. Inspector for the district to which the taxpayer makes his individual return. This is called his Primary district and is determined by the main source of his earned income. Where taxpayer has no earned income his chief place of residence determines his Primary district. H.M. Inspector for this district decides, with the agreement of the taxpayer, against which assessment or assessments the Personal Allowances shall be given. Notices of Assessment are sent to taxpayer who should make a formal appeal against any assessment which he disputes direct to H.M. Inspector by whom the Notice was issued within the time limit for such appeals as stated on the notice. The reason for disputing the assessment must be stated on appeal. If the assessment cannot be agreed, the taxpayer may appeal to the General Commissioners (whose address will be supplied by H.M. Inspector) and an appeal may be made from their decision to the Supreme Court on points of law.

The tax on such assessments is demanded by and should be paid to the Collector of Taxes who receives the necessary instructions from H.M. Inspector of Taxes and is in no position to discuss the assessment.

Sur-tax is assessable by the Special Commissioners of Income Tax to whom returns for this purpose can be made; but this is unnecessary where a full return of all income is made to H.M. Inspector of Taxes. Procedure of appeal is the same as for Income Tax assessment.

PAYE.—Income Tax payable under Schedule E is deducted by employer, who accounts for it to the Collector of Taxes. The amount of tax deduction from each payment of salary, wage, pension, etc., is determined by reference to Tax Tables issued by H.M. Inspector of Taxes to employer, in conjunction with the taxpayer's Code Number. This Code Number is an interpretation of the taxpayer's Allowances and Reliefs. Notices of Coding are issued by H.M. Inspector of Taxes and they may take into account income assessable under other Schedules. Care should be taken to check Notice of Coding and advise H.M. Inspector of Taxes of any necessary amendment in order that no considerable over or under-deduction of income tax may take place. The tax deductions are on a cumulative basis and can be carried on by any number of employers should changes in employment take place during fiscal year. When leaving one employment a statement (Form P45) showing code number, remuneration, and tax deductions to date should be obtained from old employer and handed, in due course, to new employer. At the end of fiscal year employer should give employee a statement (Form P60) showing total remuneration and tax deductions for the year.

STANDARD RATES OF INCOME TAX

Standard Rates of Income Tax (since the passing of the Income Tax Act, 1842) —The Income Tax year from April 6 to the following April 5.

OTHER TAXES AND STAMP DUTIES

NOTE.—(1) The instruments for which the use of adhesive postage stamps is "permitted" include:—

Agreements liable to the duty of 6d.—s. 22. Bills of exchange (including cheques), for payment of money on demand—s. 34 (1). Policies of Insurance (not life or marine)—s. 99. Receipts—s. 101 (2).

(2) The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY: Foreign sea policies, within 10 days of arrival in U.K.

Deeds and instruments not otherwise excepted, within 30 days of *first* execution.

NOTE.—Where wholly executed *abroad*, the period begins to reckon from the date of arrival here.

PENALTIES ENFORCEABLE ON STAMPING, IN ADDITION TO DUTY:—

	£	s.	d.
Agreements under hand only. Attested copies or contracts: after 30 days from their first execution	10	0	0
Receipts, within 14 days after they have been given	5	0	0
Receipts, after 14 days, but within one month	10	0	0
Other Instruments presented after the proper time (subject to special provisions in some cases)	10	0	0

AGREEMENT for Lease, *see* LEASES.

AGREEMENT FOR SALE OF PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale (see *post*, pp. 1090–91) with certain exceptions, *e.g.* agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act, 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad val.* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val* duty paid.

	£	s.	d.
AGREEMENT, not otherwise charged with duty, under hand only	0	0	6
N.B.—The following agreements are exempt:—			
(*a*) Where the value of the subject-matter is less than £5.			
(*b*) For the hire of any labourer, artificer, manufacturer, or menial servant.			
(*c*) For the sale of any goods, wares, or merchandise (but hire purchase agreements, *post*, p. 1161, are not exempt).			
Not otherwise charged with duty, under seal or with clause of registration	0	10	0
APPOINTMENT of a new trustee or in exercise of a power over property, not being by a will; also on retirement of trustee, although no new trustee be appointed	0	10	0

ASSIGNMENT: £ s. d.
By way of security—*see* Mortgage.
By way of sale—*see* Conveyance.
By way of gift—*see* Voluntary Disposition.

ASSURANCE—*see* Insurance Policies.

„ 275 „ „ 300.	6 0 0
„ 300, for every £50, and also for any fractional part of £50 of such amount or value.....	1 0 0

"Marketable Security" includes the Registered Bonds and Debentures, generally, of Companies, Corporations, and Public Bodies.

Where a transfer is made to a body of persons established for charitable purposes only, or to the trustees of a trust so established, the maximum rate of duty is £1 per cent.; and a conveyance or transfer on sale of local authority stock issued by a local authority after the beginning of 1953, is chargeable at one-half of the above rates.

CONVEYANCE OR TRANSFER ON SALE (in the case of a Voluntary Disposition, *see* below, p. 1094) of any property (*except* stock or marketable securities for which, *see* above), where the consideration for the sale

	£ s. d.
does not exceed £3,500	nil
Exceeds £3,500 but does not exceed £4,500 for every £50 and any fraction of £50.....	0 5 0
Exceeds £4,500, but does not exceed £5,250 for every £50 and any fraction of £50.....	0 10 0
Exceeds £5,250, but does not exceed £6,000 for every £50 and any fraction of £50.....	0 15 0
Exceeds £6,000, for every £50 and any fraction of £50.....	1 0 0

If the consideration does not exceed £3,500 (or £4,500, or £5,250, or £6,000, as the case may be) the Conveyance or Transfer on Sale must contain a certificate of value certifying that the transaction does not form part of a larger transaction or series of transactions in respect of which the amount or value or the aggregate amount or value of the consideration exceeds £3,500 (or £4,500 or £5,250 or £6,000, as the case may be).

If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of £1 for every £50 or fraction of £50 will be payable whatever the amount of the consideration.

However, if the consideration does not exceed £300, and the instrument does not contain a certificate of value, then if the consideration for the sale does not exceed £5....

£4,500..... 1/10 of the above rates	
£5,250..... 1/8 „ „ „ „	
£6,000..... 1/6 „ „ „ „	

Where a transfer is made to a body of persons established for charitable purposes only, or to the trustees of a trust so established, the maximum rate of duty is £1 per cent.

CONVEYANCE OR TRANSFER of any other kind .....fixed duty 0 10 0

Included under this head are Transfers for nominal consideration within any of the following categories:—

(*a*) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust or on the retirement of a trustee.

(*b*) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor, (ii) from a mere nominee of the transferee, (iii) from one nominee to another nominee of the same beneficial owner.

(*c*) Transfers by way of security for a loan or re-transfer to the original transferor on repayment of a loan.

(*d*) Transfer to a residuary legatee of stock, etc., forming part of the residue divisible under a will.

(*e*) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (*Note.*—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation) are chargeable with *ad valorem* duty on the amount of the legacy so discharged.)

(*f*) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.

(*g*) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.

(*h*) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.

(*i*) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 10s. should take the form of a certificate setting forth the facts of the transaction. In cases falling within (*b*) or (*c*) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is excepted

from Section 74 of the Finance (1909–10) Act, 1910." A certificate in other cases should be signed by a solicitor or other person (*e.g.*, a bank acting as trustee or executor) having a full knowledge of the facts.

Registering Officers will in any case in which a Marking Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 10*s.* fixed duty is duly stamped.

COVENANT—For repayment of money, *see* MORTGAGE.

For original creation and sale of any annuity, *see* CONVEYANCE.

For an annuity (except on original creation and sale) or other periodical payments, *see* BOND.

500,000	750,000	70
750,000	1,000,000	75
1,000,000		80

Lower rates of duty are payable in certain circumstances on property passing on two deaths occurring within 5 years of one another. (Finance Act, 1958.)

A reduction of 45 per cent. of the above rates is applied to the "agricultural value" of agricultural property; and (as respects deaths on and after 30th July, 1954) to certain business assets, viz.: "industrial hereditaments" and "machinery or plant" (Finance Act, 1954, s. 28). £ s. d.

Gifts made by deceased during his life for public or charitable purposes are liable for duty, unless made more than twelve months before death; other gifts are liable for duty, unless made more than five years before death; gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in value or amount (or in certain circumstances £500) also excepted.

Payment of Estate Duty may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Interest at 2 per cent. per annum is also payable on the Estate Duty on personalty from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and 2 per cent. interest is charged on all unpaid instalments from twelve months after death.

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

FIRE INSURANCE POLICY..... 0 0 6

GIFT (*see* VOLUNTARY DISPOSITION, p. 1094).

GUARANTEE:

Where the premium does not exceed 2s. 6d. per cent.	0 0 1

Where the premium or consideration is expressed to be a sum not exceeding the rate of half-a-crown per cent., and is subject to an increase (whether defined or not in the policy) in the event of the occurrence of a specified contingency, it shall be treated as one not exceeding the rate of half-a-crown per cent. But if, owing to the occurrence of the contingency, the premium or consideration is increased so as to exceed the rate of half-a-crown per cent., the policy or a new policy to be thereupon issued shall be stamped with the additional duty payable and may be so stamped without penalty at any time not exceeding thirty days after the date on which the increased premium or consideration becomes ascertained.

Where the premium exceeds 2s. 6d. per cent.:

For any Voyage:—

Where the sum insured does not exceed £250	0 0 3
Exceeds £250 but does not exceed £500	0 0 6
„ £500 „ „ £750	0 0 9
„ £750 „ „ £1,000	0 1 0
„ £1,000 for every £500 or fractional part of £500	0 0 6

For Time:—

Where the insurance is made for any time:—

(1) Not exceeding 6 months, three times the amount which would be payable if the insurance were made upon a voyage;

(2) Exceeding 6 months and not exceeding 12 months, six times the amount which would be payable if the insurance were made upon a voyage.

N.B.—*No insurance can be made for a time exceeding 12 months, although a policy of such insurance for time may contain a continuation clause in which case an additional stamp duty of 6d. is payable* (see s. 11, *Finance Act*, 1901).

(3) A policy of insurance on baggage or personal or household effects only, if made or executed *out of* Great Britain, is exempt from stamp duty.

Penalty for fraud, or evasion of Sea Policy duty	100 0 0

LEASES:—Lease or tack of any dwelling-house or part thereof for any definite term not exceeding a year at a rent not exceeding £40 per annum, 1d., but if there is a consideration other than rent, the duty is 2d.; for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £25, 5s., unless there is a consideration other than rent, or the average rate of rent exceeds £100 per annum, when the duty is 10s.; of any lands, tenements, etc., in consideration of any rent, according to the following table:—

Annual rent not exceeding	* Term not exceeding 35 years	* Term not exceeding 100 years	Term exceeding 100 years
£	£ s. d.	£ s. d.	£ s. d.
5	0 1 0	0 12 0	1 4 0
10	0 2 0	1 4 0	2 8 0
15	0 3 0	1 16 0	3 12 0
20	0 4 0	2 8 0	4 16 0
25	0 5 0	3 0 0	6 0 0
50	0 10 0	6 0 0	12 0 0
75	0 15 0	9 0 0	18 0 0
100	1 0 0	12 0 0	24 0 0
Exceeding £100, for every £50 or fraction of £50	1 0 0	6 0 0	12 0 0

* If the term is indefinite the same duty is payable as if the term did not exceed 35 years. However, if the term does not exceed 35 years and the annual rent does not exceed £100, but there is a consideration other than rent, the duty is double that shown in the first column.

Agreement for lease not exceeding 35 years, same as actual lease.

Where a consideration other than rent is payable and duty is charged on that consideration at conveyance rates, the same graduation applies where the consideration does not exceed £6,000 as under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed £50 a year.

	£ s. d.
MINERAL RIGHTS DUTY.—This is payable in respect of minerals which are the subject of a mining lease, or which are being worked by the proprietor of the minerals. Duty is payable annually on the rental value of all rights to work minerals and of all mineral wayleaves. Rate, per 20s. of the rental value	0 1 0

MORTGAGE under hand only, *see* EQUITABLE MORTGAGE.

MORTGAGE, BOND, ETC., not exceeding £10	0 0 6
Not exceeding £25	0 1 4
„ „ 50	0 2 6
„ „ 100	0 5 0
„ „ 150	0 7 6
„ „ 200	0 10 0
„ „ 250	0 12 6
„ „ 300	0 15 0
Exceeding £300, for every £100 and fractional part of £100	0 5 0
Transfer of Mortgage (except marketable securities), for every £100	0 1 0
Reconveyance, Release, etc., per £100	0 1 0

No stamp duty is payable on discharge of a Building Society mortgage, or on the discharge of a local authority mortgage.

	£ s. d.
Collateral, or auxiliary, or additional, or substituted security (other than an equitable mortgage), when the principal security is duly stamped: for every £100, or fraction of £100, *ss. od.*, up to a maximum of	0 12 0
POWER OF ATTORNEY, etc., for receiving certain prize-money or wages	0 1 0
For the receipt of any money, or bill, or note, not exceeding £20, or of any periodical payments not exceeding £10 annually	0 5 0
For the receipt of dividends or interest of any stock, if for one payment only	0 1 0
Ditto in any other case	0 5 0
Power of attorney of any other kind	0 12 0
An order, request, or direction under hand only from the proprietor of any stocks or shares to any Company or to any officer of any Company or to any banker to pay the dividends or interest arising therefrom to any person therein named is not chargeable with duty.	
PROCURATION, Deed, etc., of	0 12 0
PROMISSORY NOTE, *see* BILLS OR EXCHANGE.	
PROPERTY AND INCOME TAX, *see* INCOME TAX, pp. 1084–9	
RECEIPTS, £2 or upwards	0 0 2
RECEIPTS FOR SALARIES, Wages, and Superannuation, and other like allowances are exempted by Sect. 36 Finance Act, 1924.	
REVOCATION of any Trust of Property not being a Will	0 10 0
SETTLEMENTS.—Any instrument whereby any definite sum, or stock, or security, is settled or agreed to be settled in any manner: for every £100 or part of £100	0 5 0
SHARE CERTIFICATE, FOREIGN, to Bearer in first negotiation in U.K. for every £25, or fraction of £25	0 0 6
SHARE WARRANT and Stock Certificate to Bearer:—	£ s. d.
Issued under the provisions of the Companies Acts—three times the *ad valorem* Duty chargeable on a Transfer for a consideration equal to the nominal value of the Shares or Stock.	
STOCK CERTIF.. *see* SHARE WARRANT.	
SURTAX, *see* p. 1087.	
TRANSFER OF STOCK, *see* CONVEYANCE.	
VOLUNTARY DISPOSITION *inter vivos*:—	
On any instrument being a voluntary disposition (*inter vivos*) of any property (except stock or marketable securities, *see ante*, under Conveyance or Transfer) where the value of the property conveyed or transferred does not exceed £3,500	nil
Exceeds £3,500, but does not exceed £4,500, for every £50 and fraction of £50	0 5 0
Exceeds £4,500, but does not exceed £5,250, for every £50 and fraction of £50	0 10 0
Exceeds £5,250, but does not exceed £6,000, for every £50 and fraction of £50	0 15 0
Exceeds £6,000, for every £50 and fraction of £50	1 0 0
The instrument must contain similar certificates of value as a Conveyance or Transfer on Sale (*see*, pp. 1090–1), with the substitution of the words "property conveyed or transferred" for the word "consideration."	
If the value of the property does not exceed £300, the same graduated rates apply as under Conveyance or Transfer on Sale (except Stock or marketable securities).	
N.B.—The instrument is not deemed to be duly stamped unless it has been adjudicated, *i.e.* the instrument has been lodged with the Commissioner who will adjudge the value of the property and the duty payable.	

EXCISE LICENCES

	£ s. d.
BEER-DEALERS' AND BREWERS (annual):	
Beer-Dealer, Wholesale	†10 10 ■
Brewer of Beer for sale: according to quantity brewed in preceding year, viz.: not exceeding 100 barrels, £1; exceeding 100, £1 for first 100, and 8*s. od.* for every further 50 or fraction thereof †.	
Other brewers, if the beer brewed by the brewer is not chargeable with duty, then, annual value of house *not exceeding* £10	1 5 0
The annual value exceeding £10 but not exceeding £15	2 10 0
Ditto in every other case in addition to the duty on the beer made	0 4 0
Retailers of beer (Beer-house Licence):	
*For consumption on the premises: a Duty equal to a third of the annual value of the premises†, subject to the following minima:	
In non-urban areas, and in urban areas with a population of less than 2,000	†3 10 ■
Urban areas, population over 2,000	†6 10 0
Not to be consumed on premises: from £1 10*s. od.*† where annual value does not exceed £10, up to £10 where it exceeds £300.	£ s. d.
BOOKMAKERS.—A licence is required for each meeting at a Dog Racecourse at which a totalisator is operated, by every bookmaker who attends the course for the purpose of receiving or negotiating bets. The rate is determined by the number of enclosures at the course and the category (as shown below) of the particular enclosure in which the bookmaker operates. For every meeting of 8 races or less:	
Where there is only one enclosure	12 0 0
Where there are two enclosures only:	
(*a*) The cheaper enclosure	6 0 0
(*b*) The dearer enclosure	24 0 0
Where there are more than two enclosures:—	
(*a*) The cheapest enclosure	6 0 0
(*b*) The cheapest but one enclosure	18 0 0
(*c*) Any other enclosure	48 0 0
Rates are increased proportionately for each race in excess of 8.	
CARD (Playing) makers, to sell	1 0 0

	£	s.	d.
CIDER RETAILER, annual licence:†			
*For consumption on the premises: from £2 5s. od. where annual value is under £30, up to £6 where it is £100 or over.

Wine retailers (or grocers) selling wine (off)†: from £2 10s. od. (annual value not exceeding £20) up to £10 (annual value exceeding £500).			
WINE, BRITISH, Manufacturers for sale of, *see* SWEETS.			

**For Early-closing and Six-day Licences*, proportionate reduction, as for Publicans (*q.v.*).

†Beginners are charged a proportionate part of the annual rate.

LOCAL TAXATION LICENCES

In England and Wales, Dog, Game and Gun Licences are administered by the respective County Councils and County Borough Councils and the proceeds retained by them; and in Scotland by the Commissioners of Customs and Excise. Licences are issued for the Councils by the Post Office.

	£	s.	d.
Dogs of any kind (annually), Great Britain	0	7	6

Dogs under 6 months of age, and those kept solely for the purpose of tending sheep or cattle on a farm, or by shepherds, or by blind persons for their guidance, exempt from Duty.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, airmen, territorial soldiers, or constables, *on duty or at practice*, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows:—

	£	s.	d.
GAME LICENCES, if taken out after 31st July and before 1st Nov., to expire on 31st July following	3	0	0
After 31st July, to expire 31st Oct.	2	0	0
After 31st Oct., to expire 31st July	2	0	0
For a continuous period of 14 days	1	0	0
Gamekeeper's (Great Britain), to expire 31st July	2	0	0
Game-Dealer's Licence, to expire 1st July, annually	2	0	0
GUN LICENCES (gun, air gun or pistol)	0	10	0

A *Firearm Certificate* (5/– for the first, 2/6 subsequently—renewable every 3 years) is also necessary (with certain exceptions) for any person in possession of a firearm, other than a smooth bore gun with a barrel not less than 20 inches in length, or an air weapon.

A person under 17 may not purchase or hire and (with certain exceptions) a person under 14 may not have in his possession a firearm.

Firearm regulations are strictly enforced.

	£	s.	d.
HAWKERS, annual licence	2	0	0
MONEYLENDERS, annual licence (to July 31st)	15	0	0
February to July	10	0	0
PAWNBROKERS, annual licence	7	10	0
REFRESHMENT HOUSES, annual licence	1	1	0

An abatement of 17s. 10d. may be obtained by a person also taking out a wine retailer's on-licence in respect of a refreshment house not open after 10 p.m.

MECHANICALLY PROPELLED VEHICLES

	£	s.	d.
Bicycles (other than electrically propelled):			
(*a*) If the cylinder capacity of the engine does not exceed 150 cubic centimetres	†0	17	6
(*b*) Exceeds 150 c.c. but does not exceed 250 c.c.	†1	17	6
(*c*) Exceeds 250 c.c.	*3	15	0
Bicycles which are electrically propelled	0	17	6
* Additional if used for drawing trailer or side-car	1	5	0

Reduced duty on certain bicycles.—Where the cylinder capacity of the engine of a bicycle exceeds 250 c.c. and the bicycle (*a*) is one in respect of which a licence was taken out before Jan. 1, 1933, and (*b*) does not exceed 224 lb. unladen weight the bicycle shall be treated for the purpose of the above table as if the cylinder capacity of the engine exceeded 150 c.c. but not 250 c.c.

* For each person over the number in column 1.

Licensing of Public Vehicles.

Public vehicles and also the persons concerned with driving and conducting them must be licensed. Vehicles are licensed by the Traffic Commissioners; licensing of personnel is effected by the authority in the area in which they live—not the area where the vehicle is to operate. Addresses of the Licensing Authorities can be obtained from local Police Stations. See also *Driving Licence Rates*, p. 1098.

Tractors, Cranes, Excavators, Agricultural Vehicles, etc.

	£	s.	d.
Locomotive ploughing engines, tractors, etc., not used for hauling on roads any objects except their own necessary gear, etc.	2	0	0

	£	s.	d.
Vehicles designed, constructed and used for the purpose of trench digging or any kind of excavating or shovelling work which (1) are used on public roads only for that purpose or for the purpose of proceeding to and from the place where they are to be used for that purpose, and (2) when so proceeding neither carry nor haul any load other than such as is necessary for their propulsion or equipment	2	0	0
Vehicles designed and constructed as mobile cranes which (1) are used on public roads only either as cranes in connection with work being carried on at a site in the immediate vicinity or for the purpose of proceeding to and from a place where they are to be used as cranes; and (2) when so proceeding neither carry nor haul any load other than such as is necessary for their propulsion or equipment	2	0	0
Mowing machines	2	0	0
Tractors, agricultural tractors, and agricultural engines other than such tractors or engines in respect of which a duty of 5s. is chargeable, being vehicles registered under the Vehicles (Excise) Act, 1949, in the name of a person engaged in agriculture and used solely by that person for the haulage of the produce of, or of articles required for the purposes of the agricultural land occupied by that person:—			
Not exceeding 5 tons unladen	12	0	0
5 tons to 10 tons unladen	20	0	0
Exceeding 10 tons unladen	20	0	0
And for each additional ton or part of a ton	2	0	0

Vehicles (other than vehicles in respect of which duty is chargeable under the foregoing provisions) which are constructed and used on public roads for haulage solely and not for the purpose of carrying or having superimposed upon them any load except such as is necessary for their propulsion or equipment:—

Electrically propelled vehicles	7	10	0
Other vehicles—			
(*a*) If registered under the Road Act, 1920, for the first time before January 1, 1947—			
Not exceeding 6 horsepower	9	0	0
Exceeding 6 horsepower but not exceeding 7 horsepower	10	10	0
(*b*) Other vehicles not included under (*a*) above	12	10	0

Motor-cars and cycles must be registered with, and licences to drive obtained from, the respective Clerks of the County Councils or County Borough Councils.

PERIODIC VEHICLE TESTS

The Road Traffic Act, 1956, provided *inter alia* for the periodic testing of motor vehicles in respect of fitness of brakes, steering and lighting. Proposals for the testing of vehicles first registered 10 years or more before testing commences were outlined in a White Paper (Cmd. 430). Certain classes of vehicles, *e.g.* public service vehicles, are exempt. Vehicles will be tested by Government and local authority testing stations and by commercial garages licensed by the Ministry of Transport.

A vehicle owner will be under no obligation to have repairs or adjustments necessary to qualify for a test certificate carried out at the garage of the examiner who has tested the vehicle. He will have the right of appeal to the Minister of Transport against the decision of an authorized examiner; in such cases the vehicle will be re-examined by a technical officer of the Ministry. Rejection notices will specify the particular items on which the vehicle has failed to pass the test, with a brief indication of the reasons for failure.

It was expected that testing would start in 1959. A provision requiring the production of a test certificate as a condition of obtaining a vehicle excise licence will be introduced after vehicle owners have had reasonable opportunity to have their vehicles tested.

Test and Appeal Fees	s.	d.
Vehicle test and certificate	15	0
Solo Motor Cycle	10	6
Failed Vehicle (test fee)	14	0
Certificate of fitness after (single) free retest at same testing station	1	0
Appeal Fees:—		
Motor Vehicle	25	0
Solo Motor Cycle	17	6

If the appeal is allowed, part or all of the Appeal Fee will be returned to the vehicle owner.

DRIVING LICENCES

By an Order under s.48 of the Road Traffic Act 1956, the issue of driving licences valid for a period of three years commenced on Sept. 1, 1957. Drivers (other than learners) whose surnames begin with the letters A-F were required to take out a three-year licence when they applied for renewal of their existing licences at any time after Aug. 31, 1957; drivers whose surnames begin with the letters G-N are required to take out a three-year licence when they apply for renewal at any time after Aug. 31, 1958; and those whose surnames begin with the letters O-Z when they apply for renewal at any time after Aug. 31, 1959. Annual licences will continue to be issued to the latter group in the interim period; three-year licences cannot be granted until after the appropriate date. Drivers taking out a full licence for the first time after passing the driving test must take out a three-year licence.

Licence Rates

	£	s.	d.
Annual Driving Licence	0	5	0
Replacement of lost or defaced licence	0	1	0
Additional Group: the existing licence is cancelled and a fresh licence issued, including added Group or Groups	0	5	0
Three-year Driving Licence	0	15	0
Replacement of lost or defaced licence	0	2	6
Amendment of licence (*e.g.* for additional Group of vehicles), for the unexpired period	0	5	0
Provisional Driving Licence: 6 months	0	10	0
Public Service Vehicle Driving Licence: 3 years†	0	3	0

† Additional to ordinary driving licence. *See* under Hackney Carriages.

BROADCAST RECEIVING LICENCES

Sound.—Broadcast Receiving Licences (excluding television) may be obtained at most Post Offices at a charge of £1.

Television.—Broadcast Receiving Licences (including television) are obtainable at most Post Offices for £4 (issue fee £3, plus £1 duty). In Scotland licences are obtainable at most Post Offices in areas conveniently situated for television reception. Elsewhere licences are only available at Head Post Offices. If application is made at any other office which conducts wireless licence business, arrangements can be made for a licence to be issued at a Head Post Office and forwarded by post to the applicant. If the applicant holds an unexpired (£1) sound licence it should be surrendered when the television licence is applied for and the price of the television licence will be abated at the rate of 1s. 8d. for each month of the unexpired portion of the surrendered (£1) licence.

Blind Persons.—Blind persons who produce the required certificates of registration may obtain free sound licences or concessionary television licences for £3 (issue fee £2 plus £1 duty).

Licensing requirements.—One licence (which must be a television licence if a television set is used anywhere in the household) covers any number of sets in a single household; but lodgers, paying guests and occupiers of flats (even if not self-contained) count as separate householders and require separate licences. Licences are required both for self-contained sets and for loud speakers worked by wire extensions from main receiving sets outside the household concerned. Licences are also required by those using apparatus which is rented or hired. A separate licence is necessary for a wireless receiving set fitted in a motor-car.

Period of Validity.—An initial licence (either sound or television) is dated to expire twelve months from the last day of the month preceding that of issue. Thereafter all renewal licences are dated to expire one year after the licence they supersede.

SCIENCE, DISCOVERY AND INVENTION IN 1958

INTERNATIONAL GEOPHYSICAL YEAR

Scientific work on a huge scale was carried on during the International Geophysical Year by the 60 nations engaged in a concerted programme of research into the physical properties of the earth. The results of their discoveries will be pooled and published in three or more world centres; and up to date they have been valuable enough to warrant the extension of the I.G.Y. for another year after January 1, 1959.

The most spectacular event, so far as Britain was concerned, was the completion of "the last great journey in the world," the 2,230 mile crossing of the Antarctic continent by Dr. (Sir) Vivian Fuchs, a journey which occupied 99 days. Sir Vivian Fuchs set out from Shackleton Base on the Weddell Sea at 9.45 p.m. (G.M.T.) on Sunday, November 24. He had previously made a proving trip to South Ice, and considered that the first 300 miles of the journey would be comparatively easy; the rest of the journey would be full of hazards from crevasses, blizzards, frostbite, snow blindness and low temperatures. Scientific observations were made all the way across on polar temperatures, wind speeds, glaciers, and diet, sleep rhythm, oxygen intake, calory intake, the loss and gain of bodily fat, solar radiation, atmospheric "noise," the electrified layers of the upper atmosphere, and even of finger prints to show the effect of cold on the human body. The average day's march was 17 miles; but from the Pole to the Scott Base an average of 33 miles was maintained.

Dr. Fuchs and the main party of the expedition reached the South Pole at 1.8 G.M.T. on January 20. There they had a pre-arranged meeting with Sir Edmund Hillary, who had travelled 1,250 miles from Scott Base on the Ross Sea. The combined party, after a short delay, set off for Scott Base, where they arrived at 1.47 a.m. on March 2, one day ahead of the scheduled time set by Dr. Fuchs. He was in a hot bath when he received a message that the Queen had conferred on him the honour of knighthood.

Dr. Fuchs explained afterwards that it was too early to assess properly the results of his journey. Certainly Geoffrey Pratt's seismic sounding and gravity traverse would provide a sub-ice profile across the continent. It was clear that along his route the rock surface is everywhere above sea level. On the Weddell Sea side of the Pole buried mountain ranges rise 7,000 ft. above sea level, and on the Ross Sea side nearly 9,000 ft. Beneath the Pole lies almost 8,000 ft. of ice, filling a 50-mile-wide depression between high rock masses, which themselves are buried beneath 2,000 ft. of ice.

In the glaciological field, Lister made Rammsonde measurements, examination of ice cores, and temperature gradient. La Grange maintained meteorological observations throughout the crossing, including fluxplate and radiation measurements. From surveys by Stratton and Blaiklock it would be possible to produce a map of the newly discovered Theron Mountains, Shackleton Range and Whichaway Nunataks. Stephenson's geological studies there and his fossil material lay between the known areas of Queen Maud Land and Graham Land.

Rogers's study of energy balance, David Pratt's friction work on snow faces, and a winter indoor climate study by Stratton would be of value. Dr. Fuchs was confident that the two halves of the expedition had made a worthwhile contribution to man's knowledge of Antarctica.

The rockets and satellites sent up during the International Geophysical Year engaged the mind of scientists throughout the world. The first Russian jet-propelled satellite (the "sputnik") was launched on October 4, 1957. It was formed of aluminium alloys, weighed 184 lb. and contained instruments for measuring solar radiation, cosmic rays, ultra-violet rays, x-rays, heavy nuclei in cosmic rays, magnetism and other phenomena in outer space. The Russians claimed that it looped the earth 560 miles high in an elliptical orbit once every 95 minutes, at an angle of 65 degrees to the equator. Its original speed of 18,000 miles an hour decreased by some minutes every day. Morse-like "peep" signals were heard in Britain and good results were obtained by the radio telescope at Jodrell Bank. The carrier rocket launched by the satellite fell about 100 miles south-east of Fairbanks, Alaska, on December 1; and the satellite itself was burned up in the earth's atmosphere on January 4, after completing 1,400 revolutions of the globe and covering 37,000,000 miles. On November 3, 1957, the Russians launched Sputnik II, having a weight of 1,100 lbs., which contained a dog from which it was hoped to obtain medico-biological data on life during cosmic flights. The height of this satellite ranged between 150 and 1,000 miles, and it was believed to have burned out over Barbadoes in April. Later Russia announced that her scientists had brought back to earth safely two dogs fired to a height of 279 miles in a rocket. The cabin of the rocket was fitted with a system of regeneration, an apparatus for recording biological functions, a camera for filming the behaviour of animals during flight, a sun spectrograph for recording the ultra-violet of the spectrum and an instrument for recording the infra-red radiation of the earth.

The existence of a zone of intense radiation above 600 miles from the earth, constituting a hazard to manned space flight, was said to have been confirmed by American and Russian observations. It consisted of protons trapped by the earth's magnetic field after being produced by the decay of neutrons, which in turn were set free by cosmic ray bombardment of the upper atmosphere. Protection from this radiation would have required lead covering four centimetres thick, making space ships impracticably heavy. As the protons moved in a circle in the same plane, perpendicular to the lines of force, a narrow ring of lead would be a sufficient shield, provided the ship maintained correct orientation while passing through the zone, which might be 40,000 miles thick.

Inspired presumably by Russian success, the United States entered the satellite competition, and on January 31 launched Explorer I, weighing 30 lb. and having an estimated lifetime of 2½–10 years. It consisted of a six-inch tube 80 in. long, carrying 10 lb. of radio transmitters and instruments to measure temperatures, cosmic rays, and dust in space. An attempt was also made to get a rocket within the gravitational orbit of the moon. The rocket used was the "Thor-Able," which had twice carried a mouse out of the atmosphere. With its satellite launcher it weighed 52 tons, stood 88 ft. high, and was powered by liquid fuel. It contained an electronic scanner to transmit pictures of the far side of the moon. The object was to

cover part of the distance between the moon and the earth, and to get within 50,000 miles of the moon would have been accounted a success. At 1.18 p.m., British time, on August 17, the telescope shaped rocket, situated at Cape Canaveral, Florida, rose vertically for 40 seconds; after 70 seconds the first stage of it fell away; but at a height of 60,000 ft., reached in 77 seconds, it exploded over the Atlantic. The 230,000 mile flight to the moon had been expected to take 2¾ days. The failure was officially attributed to a leak in a fuel line of the Thor intermediate missile. There were 300,000 parts in the vehicle, and the failure of one of them could have caused the explosion.

In Moscow members of the American satellite groups announced that atmospheric densities had been discovered at heights of between 200 and 600 miles, a little " hotter " than the " hot " atmosphere previously conjectured. There was no point at which the atmospheric temperature was constant. At 600 miles the temperature was 2,200 degrees, increasing at greater heights. The earth was embedded in the atmosphere of the sun 90,000,000 miles away, and might be regarded as a cool spot in the outer edge of the sun's hot atmosphere. The intense band of radiation was found to be farthest away from the earth above the Equator.

It was further announced by American scientists that an Aerobee rocket, fired on March 28, 1957, had reached a height of 196 kilometres, and had measured the intensity of ultra-violet light arriving from certain directions. The amount of hydrogen in the immediate neighbourhood of the earth was estimated to be one hydrogen atom in each cubic centimetre of space. The discovery in another part of the ultra-violet spectrum was that the Aerobee rocket had come across " ultra-violet stars," or patches of special density which radiate only ultra-violet light.

ANGLO-SAXON COINS FOUND.—The largest hoard of Anglo-Saxon coins found in Britain since 1872 was unearthed on the site of two houses being built for Wymondham College, Norfolk. The coins, 800 in number, lay between two and three feet below the surface, and nearby was the broken pottery jar which had contained them. When a coroner's jury decided that the coins were treasure trove, Mr. R. Rainbird Clarke, curator of Norwich Castle Museum, said that the coins ranged in date from about 875 to about 925, and he agreed with Mr. R. H. Dolley, of the British Museum, and Mr. Blunt, of the Numismatic Society, that the date of concealment was 924 or 925. The hoard included coins of Edward the Elder, dated 920 to 924, which were die-linked, 20 being from the same die of one moneyer. This suggested that the mint was nearby and the find might enable scholars to put back the date of the founding of the Norwich mint from the reign of Aethelstan to that of Edward the Elder. The coins were in three groups. The first, 108 coins dated 890 to 905, included 80 of Alfred the Great, five of Edward the Elder (early types), one of Ceolwulf II of Mercia (874 to 877), 19 coins of the St. Edmund memorial coinage, and three of Aethelstan II (Guthrum). The second group (900 to 920) of 16 coins included one of Cnute of York, one anonymous of York, and 14 St. Peter of York. The third group (920 to 924–25) consisted of 759 coins. There were 758 of Edward the Elder—almost entirely minted in East Anglia—and one of Aethelstan (924–25). It was this single coin which confirmed the date of the hoard. The coins have been handed to the British Museum and the finders rewarded according to the market value of the coins at the British Museum's valuation.

ANIMATION SUSPENDED BY FREEZING.—How soon will it be possible to preserve animals—including human beings—in a state of suspended animation by freezing was one of the questions raised by Dr. A. S. Parkes, of the National Institute of Medical Research, at the meeting of the British Association. Recent discoveries had shown that it was possible to cool animals until their temperatures fell below the freezing point of water and then to revive them. In such a condition an animal was dead by all clinical criteria, and yet it was possible to revive it. That raised the question of how to define death. Dr. Audrey Smith, of the same laboratory, said that it was a simple matter to cool hamsters, guinea pigs, monkeys and rabbits to a temperature about five degrees Centigrade below freezing point. If the water in their tissues was gradually frozen the animals could almost always be revived, either by shining electric lamps on them or by subjecting them to radar waves. Animals which had been revived appeared afterwards to be normal: some had produced young. Experiments had been made in cooling hamsters and monkeys to temperatures of 79 degrees Centigrade below freezing and it had proved practicable to restart their heart-beat and respiration. At first the animals died about an hour after revival: in later experiments they died about a day after revival.

APE'S WRITING ANALYZED.—" The behaviour of higher primates in captivity " was the title of an address by Mr. Desmond Mooris, of the Zoological Society, to the International Congress of Zoology. The behaviour of the great apes was in three categories: inborn activities; learnt activities, and self-rewarding activities, in which the performance of the action was its own reward. These occurred only when the basic needs of the individual (*e.g.*, hunger) were satisfied; and they appeared most in young animals and in adult captive animals. In one young chimpanzee one type of action was the interest in scribbling on paper with a pencil He would sit day after day at his drawing-board. There was in these scribbles a basic fan pattern, radiating from the animal. An analysis of several hundred of his drawings showed that (1) on a blank page a fan pattern was often drawn; (2) if a 2 in. square were put in the centre of the paper, the markings were concentrated on this square; (3) if the square were on one side of the paper, the markings were on the other side, with a balancing effect; (4) the farther the square was to one side, the more was the tendency to balance it, rather than to mark it; (5) a vertical line in the centre of the paper, sometimes produced lines crossing it at right angles, whereas horizontal lines were rare in other drawings.

ARCHÆOLOGISTS' FIELD CENTRE.—The first permanent field centre for the training of amateur archæologists was opened at the Roman city of Wroxeter (Viroconium) by Sir Mortimer Wheeler. The centre, the cost of which has been met by the Charles Henry Foyle and Walker Trust, will be run by Birmingham University extra-mural department. Three fortnightly courses—elementary, intermediate, and advanced—will be held there each summer. The training will be directed by Mr. Graham Webster, the department's staff tutor in archæology, who for five years has been guiding field research groups and archæological societies in the West Midlands. The societies linked with the University are undertaking a co-ordinated study of Romano-British defence work. The city of Wroxeter is an outstanding example of a larger Roman town unspoilt from the archæologist's view by overlying mediæval and later development.

Within the five acres under the guardianship of the Ministry of Works enough excavation remains to be done to provide field training for the next 20 years. Outside the present boundaries are 170 acres under cultivation which aerial surveys have shown to cover Roman buildings.

ATOMIUM: CRYSTAL OF IRON.—One of the most surprising exhibits at the Brussels Universal and International Exhibition was the Atomium, which illustrates the orbits of electrons round a central nucleus. It was 360 ft. high and its nine spheres 66 ft. in diameter, the whole resembling quaint silver table tennis balls perched on the ends of vast connecting tubes. Technically, each glistening sphere was described as representing the atomic structure of a crystal of iron magnified 150,000 million times. Some of the spheres, reached by escalators, housed displays of the peaceful uses of atomic energy, and two others, including the topmost, 360 ft. above ground, were used as restaurants.

BARNACLES ON THE IRISH COAST.—A small barnacle, scientifically known as *Elminius modestus*, has now established itself along the south coast of Ireland. This alien barnacle from the Antipodes was described by Darwin as inhabiting the south temperate waters of New Zealand, Tasmania and New South Wales. It appeared along the south coast of England in 1943, and shortly afterwards was becoming common around Portsmouth and Chichester and along the Isle of Wight. Our recent immigrant is said to have crossed the barrier of the tropics on the hull of a ship, *viâ* the freshwater lakes of the Panama Canal, with the shell plates firmly closed, to join the growing colony of such barnacles on our coast. Already *Elminius* has spread north to Scotland and eastward to Holland, which it reached in 1946 travelling on a vessel plying between Harwich and the Hook of Holland. It is now also common on the north coast of France from the Belgian frontier to Cap de la Hogue in Normandy and along the shores of Britanny. This barnacle, as its appearance in Ireland indicates, is very much on the move and it may be many years before the final pattern of its distribution in the northern hemisphere can be defined.

BEES: ARE THEY INTELLIGENT? Whether bees are governed entirely by instinct or possess intelligence is a question raised anew by the results of recent observations. Mr. S. Gooding, president of the British Bee-Keepers' Association, told the Royal Society of Arts that previous opinions favouring the control of instinct had been a little too inflexible. Bees showed a degree of choice that was much akin to intelligence. A returning forager-bee dances on the combs and waggles its abdomen to indicate the distance the forage is from the hive and the direction to be taken. During two years Lindauer, working in Munich, had noticed that scout-bees dance upon the surface of hanging swarms, presumably to indicate a desirable final home for the bees. The assumption is fortified by the fact that scout-bees have been observed flying around apiaries, apparently inspecting likely settling places. Lindauer was able, with a stop watch and a sextant, to foretell possible places to which the swarm might finally decamp. Although bees from different sites might be giving differing information to the swarm, it was only when the dances became the same that the information became unanimous, and the swarm left for their final resting place. The inference seems to be that there is among scout-bees some form of "parliament" whereby the minority yield to the majority so that unanimity is established. Another of Lindauer's experiments concerned a swarm which set out for a site 800 metres away but were scattered and reassembled after covering 500 metres. Very soon the scout-bees began dancing on the swarm, showing that only 300 metres remained to be covered. Lindauer's results indicate the exercise of a good deal of choice by the scout-bees in leading the swarm.

BIRD MIGRATION.—The British Trust for Ornithology received a five-year grant from the Nuffield Foundation for analyzing bird migration records. The work will be carried out by Mr. Kenneth Williams, who spent a year on St. Kilda as a warden for the Nature Conservancy, and who was formerly the director of the Fair Isle observatory between Orkney and Shetland. There are twelve observatories in Britain, two in Ireland, and one in Jersey for the study of bird migration. Skokholm in Pembrokeshire and the Isle of May in the Firth of Forth, have records going back to 1934. The process of recording is more than an intellectual field sport. The movements of birds can be related to a number of conditions, particularly the weather. The data over the years will provide some clues about why birds undertake local and intercontinental journeys, and it will please observers to know that their assembled records are to be worked on at the head offices of the trust in Oxford. One of Mr. Williams's first tasks will be to arrange for copying the records by a photographic method, and then, besides analysis, he will make recommendations for the future.

BIRD SONG EXPERIMENTS.—At the International Congress of Zoology, Dr. W. H. Thorpe, F.R.S., Lecturer on Entomology at Cambridge, read a paper on bird-song, based on his experiments with chaffinches, whose song contains both inherited and individually learned components. Birds caught in their first autumn and isolated until the next summer produced nearly normal songs, almost as elaborate as those of wild chaffinches. If, instead of being isolated, they were kept in groups, they copied one another and produced a fairly uniform community pattern of song. Chaffinches hand-reared from their fifth day out of sound of other birds produced simple songs that represented the inborn component of the song of the species. If these birds were grouped together in isolated communities from the third to thirteenth months of their lives, each group would build up a complex but sometimes highly abnormal song, quite unlike those of normal wild birds. Chaffinches could only learn song patterns during their first 13 months of life, and towards the end of that time there was a peak period during which a young bird could learn the fine details of up to six different songs.

BRITAIN JOINED TO EUROPE.—Ever since it was recognized that Britain was once joined to Europe, scientists have been discussing how and when the severance took place. A band of Cambridge botanists—Dr. H. Godwin, Dr. E. H. Willis and Mr. R. P. Suggate—have examined the evidence supplied by fossilized pollen-grains, and have suggested that the breakaway came about 8,000 years ago. They measured the ages of fossilized peat deposits and submerged strand-lines by the dating technique which makes use of radio-active carbon. Samples of material from New Zealand, North America and Britain, have been examined, and from the ages of these it has been possible to say how the level of the oceans has risen in the last 14,000 years. Until 5,000 years ago the seas were rising 3 ft. in a century. The flooding of the oceans came to an abrupt halt 5,000 years ago and since then

the level of the seas has been constant. The flooding of the oceans is accounted for by the melting of the ice-caps accumulated in the last Ice Age. The melting began more than 15,000 years ago and was well in progress 10,000 years ago. This knowledge allows of an explanation of the many similarities between British and Continental flora. If the land-bridge with the mainland had been submerged early in the melting of the ice, it would have been difficult to understand how so many species had been able to colonize this island. If the break had come later, greater similarities between the two areas should be recognizable. In fact the latest method of dating these processes appears to account for the biological facts.

BRITISH ASSOCIATION.—The British Association for the Advancement of Science held its 120th annual meeting at Glasgow on August 27–September 3, under the presidency of Sir Alexander Fleck, F.R.S., chairman of Imperial Chemical Industries.

The subject of his presidential address was "Science and Business: a Balanced Partnership." Science, he said, was an approach to an understanding of the universe along a broad highway of organized knowledge firmly founded on observation and experiment embedded in a matrix of theory. That highway led mankind to a fuller life and a better world, and it was fitting that the British Association was now devoting itself to the task of securing the greater use of the highway by all people as they entered the second industrial revolution. The Russian and American earth satellites depended on prior developments in science, and the chemical rocket fuels, refractory combustion chambers, and radio transmitters of great relevant information to the earth in the International Geophysical Year, all played their part. Creative possibilities of thermo-nuclear fusion energy had been opened up and there could be no doubt that Zeta and Sceptre were symbols of man's search into a future of boundless energy, a prize which could rank as the greatest material achievement in the history of the world.

Scientific effort cost money. The total annual research expenditure in this country alone was £300,000,000. Public expenditure on education (including the universities) was £740,000,000 a year, and if the universities could accommodate all people who could benefit by such an education, instead of merely the 3½ per cent. who enjoyed it now, £1,200,000,000 would be required. Such large sums could only come from the wealth which we produced, and it was easy to see the responsibility of business, which produced most of our national wealth. If business—a more comprehensive term than industry—were to function effectively over a period of years, it must contribute to the well-being of the community and to social evolution; it must have the capacity to change its methods and even its objectives, and, if it were to be self-perpetuating through modernization, it must make a profit, whether run by private enterprise or by the State.

The output in manufacturing industry in the United Kingdom had increased by 3½ per cent. a year since 1948, compared to 2½ per cent. between the wars. If science had laid the foundation for much of this expansion, business had provided the will and the means to complete the structure. Some of our traditional industries had suffered from the lack of proper scientific direction, and the lesson had not been fully learned to-day. There was scope for the scientist to infiltrate throughout the business structure.

If scientists were to play an important part in business administration, was the balance between science and business likely to be upset? As British industry was at present constituted the balance was heavily tilted the other way. The balance must come in great measure from the individual himself, a balance provided by the education which the scientist and the non-scientist ought to receive.

Our society would not be tolerable if its members were not permitted to develop their personalities and talents. They demanded from scientists and non-scientists alike such intellectual qualities as curiosity, judgment, and imagination. Equally they wanted young people to possess high qualities of character; and the society which a balanced partnership of science and business could help to build would call for courage, integrity and tenacity. These were some of the ideals they might have in their minds as they each addressed themselves to the problems of education for an age of science.

The Presidents of the Sections and the subject of their addresses were as follows:—Mathematics and Physics, Dr. T. E. Allibone, "Thermonuclear power"; Chemistry, Prof. H. J. Emeléus, "Transuranic elements"; Geology, Prof. L. R. Wager, "Beneath the earth's crust"; Zoology, Dr. A. S. Parkes, "Biological effects of low temperature"; Geography, Prof. E. Estyn Evans, "The Atlantic ends of Europe"; Economics, Prof. A. J. Brown, "Inflation and the British economy"; Engineering, Prof. O. A. Saunders, "Heat and the engineer"; Anthropology and Archaeology, Dr. I. C. Peate, "Folklife and the defence of civilisation"; Physiology and Biochemistry, Dr. E. N. Willmer, "Cellular differentiation"; Psychology, Prof. R. W. Pickford, "Colour vision and colour blindness"; Botany, Prof. R. S. Adamson, "The Cape as an ancient African flora"; Subsection Forestry.—Prof. H. M. Steven, "Native pinewoods of Scotland and current forestry practice"; Education, Sir Willis Jackson, "The partnership between Industry and Education"; Agriculture, Dr. D. P. Cuthbertson, "Digestion in the ruminant"; Assembly of corresponding societies, Lord Boyd Orr, "Cultural value of local societies".

Two evening discourses were delivered: Sir Christopher Hinton, "Nuclear power and the engineer"; and Dr. C. F. A. Pantin, "Living machinery and the electron microscope."

The council set up three lectureships for young people, the Kelvin, the Darwin, and the Lister lectureships, dealing respectively with the physical, biological and sociological sciences. A study group was also set up to examine the education of the graduate scientists in school and university.

Professor Sir James Gray, zoologist, was elected President of the Association for 1959, when the annual meeting will be held at York between September 2 and 9. The meeting in 1960 will be held at Cardiff.

BRONZE WORKMAN'S TOOLS.—Workmen excavating the footings of a new school at Bognor Regis found a hoard of bronze instruments apparently used by a smith more than 2,500 years ago. They were in a heap, which indicated that they had been left in a bag which had rotted. Dr. A. E. Wilson, hon. secretary of Sussex Archæological Society, reported that the hoard contained 14 almost whole but worn-out socketed axes, four of them with vertical lines cast in relief, seven plain and three with winged decoration. There was also one complete Bronze Age socketed gouge and parts of two others; fragments of blades of two swords; three hollow loops or looped tubes of uncertain use; four cakes of bronze from crucibles; and a number of

jets of bronze rubbed off the castings. All the articles are used and damaged and, is thought, formed the stock in trade of a bronze smith or founder. The winged decoration on the axes together with the sword fragments give the clue to date, the closing years of the late Bronze Age proper or even the overlap period with the early Iron Age.

BURIED STATUE OF CHRIST.—The sixteenth-century figure of Christ, which was uncovered during excavations for the rebuilding of Mercers' Hall, London, and was on exhibition in the Royal Exchange, was returned to the Company and placed in the ambulatory of the Mercers' rebuilt chapel. It is suggested that the sculpture may, upon its altar base, have formed part of an Easter sepulchre destroyed, or prudently buried, when the rite was abolished in 1549, and the building transformed for use as a grammar school. (See WHITAKER'S ALMANACK, 1955, p. 979.)

CAMBRIDGE BOTANIC GARDEN.—Many improvements have been made to the University Botanic Garden, Cambridge. Of these one is a series of beds in which plants familiar in English gardens are shown in chronological order of their introduction to Britain. The first bed contains plants introduced before 1550, many of them, it is believed, in Roman times. Here are leopard's bane, the large periwinkle, rosemary, sage and hyssop. After 1550 comes a long series of smaller beds, in 20 year periods, down to 1950. Honesty and sweet rocket came to us between 1550 and 1570; candytuft and love-in-a-mist in 1570–1590; the sunflower from Mexico and the day lily from the Caucasus in 1590–1610; and so on down the centuries; but not until 1890–1910 did the much admired *Lilium regale* arrive from China.

CELTIC HOARD IN THE SHETLANDS.—Archæologists from Aberdeen University, under Professor Andrew O'Dell, uncovered an early mediæval church, an earlier burial ground and a cache containing Celtic metal ornaments on the uninhabited St. Ninian's Isle of the Shetlands. Under a thin slab, inscribed with a cross, a wooden box was unearthed which contained 12 bronze Celtic brooches, some shell set with semi-precious stones. With them were six bowls and a hanging lamp with its hooks, a chased metal ornament believed to be the top of a sword hilt and three decorated pieces of metal shaped like a thimble. The most mysterious objects are two pieces of carved metal, which end in animal figures with garnets for eyes, and a slit on the inner curve as if to hold a grip. At an earlier date a church, eleventh or twelfth century, 50 ft. long, was discovered under the sand. The "founder's tomb" contained seven grooved stones, four of them with stylized sea-horse creatures, characteristic of Pictish decoration, and in the nave was a fragment of the marble quarried in Egypt which may have been part of a reliquary box. A pagan burial, in which the knees were bent up to the chin, dated from the time when Norse peasants settled in the Shetland Islands about 800 A.D.

CHEWING THE CUD.—Rumination is a complex act and its biological value remains unknown, Dr. D. P. Cuthbertson, Director of Research at Bucksburn, told the British Association. Rumination went on mainly at night, he said, particularly from 4 a.m. to 8 a.m.; and the only condition that seemed to alter its pattern was to grind all the food to a fine powder, which reduced the time devoted to that occupation. This was presumably due to lack of stimulation to the sensory pathways. The pre-gastric microbial digestion of food conferred important benefits upon the ruminant. Energy from fibrous foods was more efficiently garnered and the energy was yielded over a longer period, so that the animal was more resistant to periods of starvation; the uptake of nitrogen was controlled and that from non-protein sources utilized more efficiently, and considerable synthesis of vitamins took place. Further advances should help to clear the husbandman's understanding of "metabolic" diseases.

COELACANTH IN LONDON.—Professor J. Millot, Director of the Science Institute of Madagascar, has presented to the British Museum (Natural History) a specimen of the cœlacanth, *Latimeria chalumnae*, preserved in spirit. The cœlacanth belongs to a species about 400 million years old, and the few specimens obtained in recent years have been caught in the southern part of the Indian Ocean off Madagascar. Prof. Millot has also given a life-size coloured model of the cœlacanth to the British Museum.

COLOUR BLINDNESS.—In a review of some problems of colour vision and colour blindness, Professor R. W. Pickard, Professor of Psychology at Glasgow University, told the British Association that an important linkage between science and industry was to be found in colour-vision research. Testing yellow-blue vision might be important, especially since it tended to deteriorate somewhat in persons over about 45 years of age. Recent research had been directed towards trying to find signal lights which would be fairly satisfactory for colour-vision defective subjects, and the relationship between the magnitude of colour-vision defects and the degree of liability to accidents in ordinary road traffic. Colour vision was found in lower animals, such as insects, fish, reptiles, and birds, not among frogs and toads or the lower mammals. It had been evolved again by the higher apes and colour blindness might be found among them too. If natural selection did act upon colour blindness, tending to eliminate it, that would probably be through recognition of enemies and the choice and selection of food substances. In many animals sexual selection appeared to depend partly on colour, and that was true of some of the higher apes, but apparently not true of man.

COUNCIL FOR NATURE.—Within the last few years sites in Essex, Gloucestershire, Somerset and other areas have been chosen for nuclear power stations, all within hail of wild life sanctuaries and an implied threat to the wild life therein. Nature lovers, mostly unorganized, have had little effect in their protests against such danger; but a consultative Council for Nature has been formed which, it is hoped, will have greater influence and better fortune in any protest made on these lines. The Society for the Promotion of Nature Reserves has given a substantial grant towards the expenses in the next few years. The officers include Lord Hurcomb (President), Sir Julian Huxley and Mr. Peter Scott (Vice-presidents), Sir Landsborough Thomson (Chairman, Executive Committee) and Dr. W. E. Swinton (Hon. Secretary). Eighteen of the largest national societies have adhered to the new body. The aim of the Council for Nature is to act as an "umbrella" body for the nature movement, as the Councils for British Archæology and for the Preservation of Rural England do in their respective fields. It will speak for the whole body of naturalists if a

unique site is threatened with a nuclear power station. This does not mean that every such development must be opposed, but often by making informed representations some unnecessary damage may be averted or an alternative site be found. The Council will not compete with existing societies for members, but will be a " parliament " of natural history societies, aiming to support the work of its members and to provide technical services which individual societies cannot afford.

CRACK OF THE WHIP.—Few things would seem to be more different than a stockwhip and a supersonic aircraft, but they have in common the sound they make when they attain speeds greater than sound. The crack of the stockrider's whip, it appears from some research by a physicist at the naval research laboratory in the United States, is a minute version of the noise that comes from the sky as an aircraft breaks the sound barrier. Dr. Horace Trent, disclosing the results of his research to the Acoustical Society of America, said that his experiments indicated that the end of the whip must reach speeds of nearly 1,000 miles an hour as it cracks, a very intriguing phenomenon because of the great build-up in speed achieved with a very simple mechanism.

CRIME-PRONE GENERATION. — A crime-prone generation who reached the age of four during the war emerged from an analysis of juvenile crime records presented by Mr. L. T. Wilkins, of the Home Office, to the British Association. This indicated that the first years of life were not as critical as some had suggested. The war years did not wholly account for the crime wave between boys of 17 and 21 which was one of the most disturbing features of criminal statistics since the war. These boys were expected to be crime-prone and the girls behaved according to expectation, but for males the expectation was greatly exceeded in the years 1954, 1955 and 1956—in 1956 by 45 per cent. The teddy boy phenomenon could not be dismissed as only to be expected in view of their childhood experiences. Some increase in criminality might have been expected, but not to the present extent.

DANUBE TO BE HARNESSED.—Plans have been prepared, and the work already begun, to use the Danube for both power and pleasure, under a scheme which will make the river one of the biggest sources of power in Central Europe. A series of dams, of which the first have been constructed at Ybbs-Persenberg and Jochenstein, will turn the river basin into a chain of lakes. Water falling over the dams will generate a minimum of 14,000,000,000 kilowatt hours a year which would more than cover all Austria's consumption of electric current totalling about 10,000,000,000 kilowatt hours. The chain of lakes would provide the 1,700,000 people of Vienna with a play-ground for sailing, rowing and bathing and skating. So much water, some experts believe, might modify the climate of Vienna, which endures extremes of temperature between winter and summer, and day and night. It is estimated that when 15 dams have been built across the Danube, Austria's total hydro-electric production should reach more than 20,000,000,000 kilowatt hours a year. As Austria has to import coal at great cost, even from America, any increase in current derived from water power is advantageous. Each of the Danube power stations will have locks much bigger than any in Central Europe. The locks will have two chambers, each admitting a complete string of the long Danube barges, so that a continuous flow of traffic could be maintained in both directions. Harnessing the river would also eliminate rocks, narrows and shoals which seriously hinder traffic, especially when the water is low. It would make navigation possible at all times and seasons and eliminate the floods, which cost Austria millions of schillings every second or third year, and delay cultivation of large areas of fertile land near the river banks.

DARWIN-WALLACE CENTENARY.—On July 1, 1858, Charles Darwin and Alfred Russel Wallace gave the Linnean Society of London their views on natural selection. Darwin had been studying the problem for 20 years and he was finally brought to put his theory into print by the receipt of a short essay from Alfred Russel Wallace—a stranger to him—then living in Ternate, outlining an identical conception. Their joint papers were " on the tendency of species to form varieties," read before the Linnean Society, neither author being present. Scientists all over the world met in London at the International Congress of Zoology in 1958 to commemorate the centenary. At a meeting of the Linnean Society, attended by members of the Darwin and Wallace families, the President, Dr. C. F. A. Pantin, unveiled a plaque in the meeting room commemorating the reading of the joint Darwin–Wallace communications. An exhibition illustrating evolution was held at the Museum of Natural History. In 1959, Darwin's college, Christ's at Cambridge, will celebrate the publication of *The Origin of Species*. Sir Julian Huxley in an inaugural lecture on " The Emergence of Darwinism," to the International Congress of Zoology, said that they were celebrating the birth of Darwinism or evolutionary biology, initiated by Darwin and Wallace. Darwinism was in full flower until the 1890's, when Bateson began a reaction which lasted 25 years. This was succeeded by the present phase of neo-Darwinism, in which the central Darwinian concept of natural selection was related to the facts of modern genetics, ecology and palæontology. Man's true destiny now emerged in a startling new form. It was to be the chief agent for the future of evolution on this planet. Only in and through man could any further major advance be achieved—though equally he might damage or distort the process, including his own evolving self. It was largely due to Darwin's work on biological evolution that we now possessed this new vision of human destiny. Building on the foundations of Darwinism, we could now use evolutionary concept in thinking about the history and future of our species. Human destiny need no longer be merely an affair of hopes and fears. It could be rationally defined on the basis of scientific knowledge, and rationally pursued by the aid of scientific methods. We should need a science of human possibilities to help guide the long course of psycho-social evolution which lay ahead.

DEEP DRILLING OF THE EARTH.—In his presidential address to the Geology Section of the British Association, Professor L. R. Wager, spoke hopefully of the results which might be obtained by boring a hole 10 kilometres down into the crust of the earth at a depth twice that of any hole drilled so far. It was not beyond present engineering skill. Such a boring would enable direct determinations to be made of the velocities of earthquake waves and it would give increased confidence in extrapolating from their usual surface measurements. At the first attempt the bore hole might well not reach its deep objective, but petrologists and geochemists might find much of the earth's history

preserved in the successive layers of sediment on the ocean floor and also find the nature of the so-called basalt or intermediate layer. Costly and difficult as the drilling down to 10 kilometres would be, they would soon begin to consider the possibility of borings to even greater depths in Continental areas. The project was an obvious one for international scientific cooperation.

DIAMONDS: AN X-RAY CLUE.—A clue to the manufacture of artificial diamonds by the General Electric Company of America has been provided by an X-ray analysis of diamonds by Dr. Judith Grenville-Wells and Dame Kathleen Lonsdale of University College, London. Ten artificial diamonds, each less than a millimetre across, were examined by X-rays, according to a statement in *Nature*, and the direction of their beams showed that a major proportion of the artificial diamonds is of a structure undistinguishable from natural diamond. The artificial diamonds contain patches of crystal structure, differing from that of natural diamond which have been caused by concentrations of nickel. This X-ray identification is supported by chemical analysis, showing that the diamond specimens can contain up to 0·2 per cent. of nickel with smaller quantities of iron, copper and chromium. The size of the basic unit of a pure diamond crystal is not very different from that of a nickel crystal and differs by less than 1 per cent. from the size of the basic unit of nickel carbide crystal. It is suggested that nickel impurity helps the formation of crystals of artificial diamond. Meteorites containing large proportions of iron have been found to contain diamond. The discovery of the islands of nickel or its carbides does not show whether artificial diamonds will be harder or softer than the natural ones. It is unlikely that the difference will be great, so that the two materials will be critically dependent on the circumstances in which they are used industrially.

DREAM TIME OF THE ABORIGINES.—The strange mixture of magic, severity and good nature of the Australian aborigines was brought alive by Mr. Charles Mountford, ethnologist and explorer, in a lecture in London. The dream time, the time of the creation of the world, was so long ago, that its memory was dim, but its myths survived. In the beginning, according to the aborigine, the half-animal ancestors of man rose out of a vast, featureless plain; their wanderings created rivers, hills and water-holes. The aborigines were without caste, without rich and poor, with years bringing honour. Even a woman old enough might be acquainted with some of the mysteries, and had a real say in affairs. They were intelligent, kindly and courteous. Children were never punished, seldom chid, and restricted in their movements only if they came near the elders in conference. There followed the harsh intervention of initiation for a boy, the predetermined marriage which nevertheless seemed to produce a real bond of affection, the routine of hunting by the men and food-gathering for the women. Before death brought the spirit to the aboriginal heaven—where all are young, well-favoured and amiable in surroundings of plenty—the vengeful and lonely shade must be appeased, by ceremonies lasting sometimes as long as three months. There was an hysterical climax to a burial on Melville Island, ending abruptly as all but the widow departed, and all one heard was the little thin voice, still mourning for the man with whom she spent her life.

DRIP-FREE WATER TAP.—A drip-free water tap, guaranteed to serve for at least 25 years without repacking, has been invented by Mr. Baltzar von Platen, and demonstrated in Stockholm. The drip-free tap is based on the principle that sand and other solid particles in the tap water should be repelled by the rubber packing, while at the same time the force required for turning the faucet should be the least possible. Irritated by a dripping tap in his kitchen and puzzled by the fact that, on the threshold of the atomic age and space travel, nobody had solved one of the most trivial problems of our daily life, Mr. von Platen determined to solve the problem. His experiences in designing packings withstanding the high pressures required for his diamond-making machine led him on to the right track. The rubber packing of a drip-free faucet, he reasoned, should be soft and elastic, not only because it repels solid particles in the water but also because it ensures a 100 per cent. water-tight sealing. The rubber is enclosed in a casing with sturdy steel walls.

EARTHQUAKES IN MONGOLIA.—In response to an invitation from the Mongolian People's Republic, Professor A. A. Treskov and Professor N. A. Florenson investigated the earthquake area of that country, where, in the last half century, four great earthquakes have occurred. The first took place in the Gobi Altai in 1902 and embraced the Gurban-Saikhan mountain ridge. A 9-mile long fissure was formed at the southern foot of the mountain ridge; many people perished, and settlements and monasteries were destroyed. On July 9 and 23, 1905, in Northern Mongolia, to the south-west of Lake Kosogol (Khubsugul), two earthquakes formed fissures up to 300 miles long and another catastrophe occurred on December 4, 1905, on the northern branch of the Gobi Altai system, the Gurban-Bogdo ("Three Saints") mountain range which reaches a height of 13,000 ft. The epicentre was established by the first seismic waves in the Tsetsen and Bakhar Mountains, on the westward extension of the Gurban-Bogdo range. A gap 17 miles long and up to more than 800 yards wide formed here, and the earthquake shock was so powerful that people instantly fainted. This was the beginning of the ripping up of a previously existing seam in the earth's crust—a deep and ancient break—and the earthquake extended to the Ikhe-Bogdo and Baga-Bogdo mountain *massifs*. The main newly formed fissure that cuts the northern foothills of these *massifs* is 170 miles long. One of the peaks of this range was split in half, and the part that broke off, which was not less than 1,200 ft. high, came down into the ravine. Yellow-white clouds of dust were seen at a distance of 30 miles and more.

EARTH'S ROTATION SLOWER.—From careful measurements of time carried out at the National Physical Laboratory, the fact emerged that the earth is slowing down in its rotation about its axis, at a rate which has increased the length of the day by one-thousandth of a second in the last two years. This work has been possible by the use of the atomic clock at the laboratory. It has a "pendulum" action provided by the atomic vibrations of atoms of the element cæsium. These vibrations are used to control the frequency of vibration of radar waves, which transmit a record of the vibration of the cæsium atoms to electronic counters. By ordinary standards these pendulums are extremely fast—the useful vibrations of cæsium atoms occur nine billion times a second. Clocks based on this principle are expected to be accurate to one part in every ten billion. Evidence of the latest vagary in the movement of the earth as a time-keeper came from a comparison of the time-keeping of the

caesium clock with the earlier quartz crystal clocks used as time standards and with astronomical observations from which the length of a day is defined. The irregularity in the rotation of the earth amounts to one part in a hundred million, which is a hundred times as great as the expected error of the caesium clock. This irregularity is also distinct from the seasonal irregularities in the rate of the earth's rotation. The earth spins more quickly when it is summer in the northern hemisphere, which may be explained by the differing behaviour of the atmosphere in the two hemispheres in summer and winter. There is no explanation of the slowing down. Tidal forces between the earth and moon should produce some decrease in the speed of rotation, but this would amount only to about a fiftieth of the amount now observed. Some change in the structure of the earth's interior may be the cause.

EASTER ISLAND SECRETS.—Hr. Thor Heyerdahl, the Norwegian scientist of the *Kon Tiki* voyage, has published in a volume entitled "Aku-aku" the fuller results of a year's archæological discovery on Easter Island. Aku-aku is the name given by some of the islanders to their guardian spirits; when pleased and powerful they grant their devotees good luck and good fortune; when weak, neglected or angered, they produce accident, pain and death. They are the jealous guardians of the secret family caves—combined burial vaults, safe deposits, treasure houses and formerly refuges in time of danger—which were among Hr. Heyerdahl's discoveries. Fifteen family lines are probably descended in one line from the almost extinct caste of Long Ears, who used to enlarge their ears with bone plugs. The technique of carving, transporting and erecting the giant statues had been preserved by oral tradition in one family through eleven generations. Up till the end of the seventeenth century Easter Island had been inhabited by two castes, the Long Ears, who made the statues, and the subordinate Short Ears, who may be the descendants of a later group of immigrants. During the civil wars ending about 1670, all but one of the male Long Ears were massacred; the single individual who survived retained all the traditional techniques and passed them on verbally to his children in the male line; nearly 300 years later the Atan brothers partially carved another giant statue, transported a second from the quarry where it was carved, and erected a third on its base, using only the traditional stone-age tools. Hr. Heyerdahl's thesis is that Easter Island was settled by red-headed navigators who travelled in reed-boats from South America. They possessed highly megalithic and astronomical skill. The earliest constructions unearthed on Easter Island are dated about A.D. 400 and include finely fitted megalithic walls and a solar observatory. The giant statues were erected nearly a millennium later, and thrown down two centuries after.

ENERGY USED BY THE HUMAN BODY.—The integrating motor pneumotachograph is the name of an instrument developed by the Medical Research Council. For short it is known as the I.M.P. It measures the energy expended when an animal or person is wearing it and performing such tasks as walking, running, climbing or digging. The instrument was designed to operate at temperatures above and below freezing point, and formed part of the scientific equipment used by Sir Vivian Fuchs on his Trans-Antarctic expedition.

EQUATOR CURRENT MAPPED.—A sub-surface current, 250 miles wide and as swift as the Gulf Stream, which flows along the Equator eastwards for 3,500 miles from 14 degrees west, has been mapped by American scientists under the auspices of the National Academy of Sciences. Dr. Roger Revelle, an oceanographer, spent two months on a research vessel mapping the current, "one of the great oceanographic discoveries of our time." Measurements made from two research vessels showed that the current was at a depth of about 100 ft. below the ocean's surface and was at least 1,000 ft. deep. It travelled at three knots, compared with the one knot of the south equatorial current on the surface above it. The oceanographers said that they hoped the current would be named after their fellow-scientist the late Dr. Townsend Cromwell, who discovered the current's existence in 1955 but not how far, how fast, or how deeply it flowed.

ETRUSCAN TOMB FOUND BY CAMERA.—An Etruscan-painted tomb was detected by photography in the ancient necropolis of Tarquinia. The exploratory camera was put in through a drilled shaft, and revealed an important find. The film shows a chamber some 15 ft. below ground level, about 12 ft. long and 9 ft. wide, with murals on three walls believed to date from the fifth century B.C. The man for whom this tomb was made appears to have been fond of sport. On one surface athletes are shown running, jumping, and throwing the discus. The second surface shows chariots, the horses galloping and the drivers using their whips. The third mural shows a recumbent male figure, and below him several unidentified subjects, including one which looks like a chess board. The paintings give some new details of a civilization which dominated most of the Italian peninsula in the seventh and sixth centuries B.C.

FISH INFLUENCE IN SHIP DESIGN.—A tramp ship of new design, the *Weybridge*, of 10,500 tons, of the British Steamship Company, successfully ran trials in the Firth of Clyde. In hull design the *Weybridge* incorporates some of the ideas of the owners' chairman, Mr. Edmund Watts, who has for many years sought to incorporate into his ships ideas gleaned from observing fish. The *Weybridge* has the shoulders of a salmon and the tail fins of a blue tunny: the latter giving the ship another half knot of speed, and the former improving her seakeeping qualities in heavy weather. The ship is propelled by a Doxford diesel, and incorporates what is thought to be the first gas turbine as a main auxiliary in a merchant ship. The possibility of converting her to hydrogen power before her span is served is not excluded, and design features to facilitate such a conversion are incorporated. The duct keels, it is claimed, would serve for a marine Zeta should such an engine become possible within the next few years.

FOLKLORE OF BIRDS.—A survey of English folklore of birds is being made by the Department of English in University College, London, the object being to collect materials rather than to prepare early monographs on particular aspects of the subject. The English Folklore Society seeks information on popular beliefs about the physical appearance, habits and life-cycles of wild and domestic British birds, or any association of birds with good or ill luck or the weather.

FRESH WATER FISH TAKE TO SALT.—An experiment by which a fish breeding naturally in fresh or even brackish water may breed in sea water was carried through at the Zoo. The species was the mouth-breeder fish, *Tilapia mossambica*, whose original home is in the fresh and brackish waters of

East Africa. It enters the sea in its natural state, but does not breed there. In the London Zoo these mouthbreeders have been breeding in the fresh water of the Tropical Hall, but a small shoal was transferred, gradually, from fresh water to pure sea water, and was seen thriving in the Sea Water Hall. In nature, they breed not only in fresh water but also in brackish water containing up to 30 parts a thousand of salt. In the Zoo they quickly began to breed in the pure sea water, which contains 35 parts a thousand of salt. In recent years this species has assumed considerable economic importance. In 1939 a fisheries overseer, Pak Mudjair, found a few specimens of the Mozambique mouthbreeder in the fresh water of a river near the south coast of Java. Since that time the fish has been spread by fish culturists to tropical countries as far apart as Malaya and the West Indies, Japan, Celebes, and Fiji. This great spread has been intentional, because this and related species are quick-growing prolific fish. When they are ready to breed the male fish assumes a more brilliant coloration and digs a pit in the floor of river or pond by taking up mouthfuls of sand or shingle from a chosen spot and spitting them out elsewhere. In a short time he has produced a bowl-like pit, 9 or 12 inches across and 3 or 4 inches deep. He then pairs with a female and fertilizes the eggs which she lays in the nuptial pit. As soon as they are fertilized the female takes them into her mouth, where they hatch after 5 or 6 days. The young fish are retained in the mouth cavity for some days longer while they gradually use up the remains of their yolk. The mother fish then lets them free. As the young grow they rely less on the mother and eventually disperse. The first mother fish to breed in salt water at the Zoo hatched and released her brood; others have followed her example until there were three males each guarding a large pit in the shingle of the tank.

GALAPAGOS FAUNA AND FLORA.—A resolution emphasizing the urgent necessity of building an international research station on the Galapagos Islands, off the coast of Ecuador, was passed at the International Zoological Congress. The unique plants and animals of the islands include giant tortoises, flightless birds, and many land and sea lizards which bear a superficial resemblance to dinosaurs. They are said to be in danger of extermination from man and introduced predators. The station would be dedicated to the work of Darwin, who visited the Galapagos during his voyage in the *Beagle* and wrote afterwards that it was the geographic isolation of the islands and the particular evolution of the animals there which chiefly led him to study the origin of species.

GEODETIC SURVEY.—An extensive programme for determining the height of Britain above sea-level has been completed by the Ordnance Survey. It will now be possible to work out the relative points above sea-level of points a hundred miles apart with an error not exceeding a centimetre. The new geodetic levelling survey will replace the survey carried out between 1912 and 1921. The surveying for the new levelling programme was carried out with an instrument which was described by a member of the Ordnance Survey as "like a builder's level but with a more accurate bubble." It was used to make readings of height between surveying staves about one hundred feet apart. England and Wales were partitioned into a number of areas, and levelling surveys were carried out along their closed boundaries. Seventeen circuits averaging 190 miles in perimeter were used. The average error in height between the beginning and end of the circuit was less than an inch. The circuits were chosen to coincide with roads, so as to exclude the possibility that shifting ground might lead to inaccurate results. Precautions were taken to see that heat from the summer sun did not distort the reading of the instruments. The survey will provide an up-to-date indication of the changes in the level of the British Isles. Present indications are that some parts of the country are sinking into the sea and others are rising out of it. These trends appear to be accompanied by an overall rise in the level of the sea, believed to be due to the melting of ice caps at the Poles. The height of mean sea level at Newlyn in Cornwall is known to have increased by a fifth of a foot in the last 30 years, partly on this account.

HEAT DIRECTION TO ELECTRICITY.—Dr. Joseph Kaye and Dr. George N. Hatsopoulos, respectively professor and assistant professor of mechanical engineering at the Massachusetts Institute of Technology, have devised an engine without moving parts which converts heat from any source directly into electricity. This thermo-electron engine consists of two plates, one hot and the other cold, contained in a vacuum tube like a television tube. Electricity is created by electrons passing from the hot plate to the cold. Any heat source can be used to start the stream of electrons. The model machine has produced electrical power with thermal efficiencies of about 12 per cent., but eventually an efficiency of 30 per cent. may be achieved. Professor Kaye said that now that there was a working model of the machine a simple electron heat engine could be built using ordinary fuels, nuclear fuels, or solar energy. Isotope heating was a very promising possibility for the near future. Free electrons, found in most metals, were forced to leave a suitable metal by heating it to a high temperature, such as 2,000 deg. F. The heating created a stream of "hot" electrons, some possessing sufficient energy to overcome a potential barrier or an applied voltage. That tended to slow down those electrons and so provided a means of extracting directly useful energy in the form of electrical output. The electrons which overcame the applied voltage were collected in another metal and heat was rejected from this metal. The useful electrical output was obtained by connecting the hot metallic surface externally through a lead to the cold collecting surface. Thus the electron gas went through a heat engine cycle of receiving heat at a high temperature and rejecting it at a lower. The two professors have stated that an efficient power plant could be built to yield 5,000 to 15,000 watts in each cubic foot of plant volume. Engines built on the new principle might be used where small power plants are needed, such as satellites or missiles.

HEAVY WATER CHEAPER.—A British firm, Constructors John Brown Ltd., claims to have discovered a method of making heavy water more cheaply than any now available and so to make possible a change in the pattern of development for atomic energy in Britain. It would be more economical to build atomic reactors in which heavy water was used instead of graphite to slow down neutrons and thereby stimulate the fission of uranium. This would mean cheaper electricity from large power stations and also from atomic power stations of comparatively small capacity which would compete in cost with conventional diesel generating sets. Heavy water is cheaper in the United States than anywhere else, costing about £20,000 a ton. In Norway it sells at £75,000 a ton. In recent years the material has only been used sparingly in atomic reactors because of its high cost.

HERSCHEL'S TELESCOPE.—Parts of the astronomical instruments used by Sir William Herschel at Slough have been acquired by the National Maritime Museum at Greenwich. The largest of the instruments is the famous 40 ft. telescope made by Herschel in 1787. Early in 1840 his son, Sir John Herschel, dismantled the rotting wooden scaffolding which mounted the telescope; but the great tube, containing the 4 ft. metal mirror, was sealed up and left in a horizontal position on the lawn of Observatory House, Slough. The tube and its contents remained undisturbed until 1867, when the fall of a large tree destroyed the greater part of it. It was found possible to preserve a 10 ft. length of the tube in which the mirror was mounted; and this part lay in the garden until 1958. Considering that it consisted of sheet iron, only seven-tenths of a millimetre thick, it is remarkable that this 10 ft. section is still in a sound condition. The great mirror was removed from the tube after the accident of 1867, and has since been resting on its edge in Observatory House. After so long an exposure to air and moisture, the optical surface, last polished in 1809, has lost its original brilliance and reflective power. Weighing about 19 cwt., it is the second mirror made for the 40 ft. telescope. The first was found to be too thin to retain its exact shape when in use. On its replacement by the second and heavier mirror, it was laid aside; and for many years its whereabouts remained unknown. Eventually, in 1927, it was found concealed under a staircase.

HOTTER WEATHER DUE TO SEA CURRENT.—Scientists in Vancouver, who have done much research in connection with their fisheries on the Pacific coast, have attributed the unusual weather in British Columbia in the last year or so, to a shift in the Japanese current, the Pacific equivalent of the Gulf Stream. The change has altered the pattern of the salmon run, causing more fish to move towards the mouth of the Fraser river down the east side of Vancouver Island, instead of by the usual track around the west coast and up the strait of Juan de Fuca. The run was reported heavy but late, because of high water temperature. The point at which the Japanese current divides, one branch flowing northward up the British Columbia coast and the other turning southward to California, has moved south by several degrees of latitude and a far greater proportion of warm water is now coming north. This has raised ocean temperatures off the British Columbia coast by an average of five degrees F. As well as altering the pattern of salmon migration, the high water temperatures have brought southern fish species such as the barracuda to British Columbia waters, and have led to the heaviest commercial tuna catch known off the coast of Washington State.

JAPANESE UNDER-SEA TUNNEL.—The main Japanese island of Honshu is now linked by an under-sea road tunnel with Kyushu Island through the opening of Kanmon tunnel, spanning the Straits of Shimonoseki. The tunnel is about two miles long, 700 yards being under the sea. The construction of the tunnel took 22 years, with an interruption during and after the war. The total cost was £7m. The road tunnel is eight yards wide and about 15 ft. high, fluorescently lit throughout, and automatically ventilated. Accidents will be automatically reported to a control room. There is a pedestrian tunnel under the roadway. The tunnel is expected to prove an immense boon to southern Japan's economy by speeding up road traffic between important industrial centres in Kyushu and the main island, hitherto dependent on an uncertain and inefficient ferry service.

JERICHO, MOST ANCIENT CITY.—Jericho has strong claims to be considered as the oldest city in the world, according to Dr. Kathleen Kenyon, Director of the British School of Archæology in Jerusalem, who has completed many seasons of digging there. It had been established, she says, that a large community existed at Jericho which carbon-14 evidence suggested was as early as 6,250 B.C.; but it has now been found that a long stage of development preceded the settlement of that date. These earlier people lived in substantial round houses, surrounded by a massive wall, attached to which was a stone tower 40 ft. in diameter, which survives to a height of 30 ft. The carbon-14 evidence suggests that Jericho had become a town of 3,000 people in the eighth millennium B.C., about 2,500 years earlier than was previously conjectured. Beneath the earliest house in one area was 13 ft. of occupation material, which, with its flint and bone implements, links the full Neolithic of the first architectural stage with an earlier one. In another area a structure, dated 7,800 B.C., was found immediately on the bed-rock, and associated with it were a harpoon and flints considered to be of Mesolithic origin. The structure had sockets for massive poles, possibly totem poles, suggesting that it was a holy place frequented by hunters. Besides these relics from the remote past, a tomb dating from 1,800 B.C. was found, in which lay the remains of a woman, a man, two youths and three children. All, except the woman, had been struck on the head with a blunt instrument. Another tomb, dated 2,200 B.C., was the burial place of an Amonite tribesman, who had been operated upon four times by the removal of circlets of bone from his skull, presumably by copper or flint chisels. He had survived three operations long enough for the bone to heal partly over the hole. Dr. Kenyon considers this to be the most remarkable evidence of primitive surgery ever found.

LONDON TO SYDNEY, ONE HOUR.—Aircraft flying at speeds of 3,000 m.p.h. would be built in the future, according to Mr. F. L. Nicholson, of the Royal Aircraft Establishment, Farnborough, in an address to the British Association. It was now possible to find aircraft shapes whose efficiency in the supersonic region would increase aerodynamic speeds between twice and five times that of sound to about a third or a half of subsonic speeds. Heating the surface of an aircraft would be serious so that the first generation of supersonic transport aircraft would be limited to about 1,250 m.p.h. Even so these would make it possible to cross the North Atlantic in about two hours. The problem of flying up to five times the speed of sound was essentially that of finding materials for outer surfaces of aircraft which could operate for long periods at temperatures of 600 degrees Centigrade. In the more distant future aircraft would travel the paths now being mapped out for long-range ballistic missiles, which would be lifted out of the earth's atmosphere by rocket motors and glide at 12,000 m.p.h. Such advanced aircraft would be the ideal means for travelling from one end of the earth to the other; a journey from London to Sydney should take no more than an hour by this route.

LULLINGSTONE DISCOVERIES.—To the disappointment of a number of eminent antiquaries, the Ancient Monuments Board of the Ministry of Works has decided not to carry out any excavation beneath the pavement of the Roman house at Lullingstone. The discoveries there include a group of rooms, a bath house, a place of worship

where the Christian symbol Chi-Ro had been painted on a wall, and a hypocaust. (See WHITAKER'S ALMANACK, 1958.) It is proposed to erect a roof over the site, to prevent further decay of the pavement.

MACHINE ABLE TO READ AND WRITE.—Remarkable claims were made for an electronic "brain" called the perceptron which, when fully developed, will be able to recognize faces, read, write, translate and talk. According to Dr. Frank Rosenblatt, of the Cornell aeronautical laboratory, who worked on the machine, it will easily learn the alphabet and there is no reason why it should not be able to distinguish between Mozart and Wagner or between a Ford and a Chevrolet. He was demonstrating the 704 computor of the Weather Bureau, built by International Business Machines, from which the perceptron is being developed. He saw no fundamental reason why such machines in the future could not be taught to "reproduce" themselves on assembly lines and to become "conscious" of themselves in the human sense of the word. The perceptron would be the first device to correspond exactly to what is so far known of the human brain; as with human beings, it would be liable to make mistakes, but on perfection mistakes would become less frequent and eventually negligible.

MAGNETIC FIND OF B.C. IRON HOARD.—An instrument which can detect differences as small as one part in 100,000 in the strength of the magnetic field at ground level, and is thus capable of pointing to buried remains, has been used by Oxford University archæologists excavating an Iron Age camp at Madmarston Hill, Swalcliffe. Under the direction of Dr. P. J. Fowler they unearthed a hoard of iron objects and a ritual burial pit along with rubbish pits containing potters' sherds, establishing that the first occupation of the site was about 150 B.C. The occupation continued uninterrupted until the first century A.D., an indication that there was no invasion of Belgic peoples into the area before the Roman Conquest. The iron hoard included 10 currency bars, each over 3 ft. long, an axe head in good condition, a sickle and two horse bits. The burial pit contained a foundation sacrifice. The pit had been filled by deliberately breaking a large urn and laying the bits around the bottom and covering this pottery with parts of a cow or calf.

MOLLUSC OLDER THAN COELACANTH.—At the International Congress of Zoology, a group of French and Russian scientists presented papers on the fauna of the deep trenches of the Pacific Ocean. Each trench, said L. A. Zenkevitch, of Moscow, gave rise to its own endemic fauna, a situation similar to that in the Galapagos Islands, which attracted the attention of Darwin. Other results of the study of the deep sea fauna include a discovery of a small mollusc, *Neopilina*, by the Danish research vessel *Galathea*. This has been claimed as another example of a "living fossil," equivalent in its way to the famous cœlacanth, but more ancient in its origins. The mollusc belongs to a type which is known, from fossil remains, to have existed 330 million years ago; and was hauled up from a depth of 3,570 metres. The worm-snail stayed at the bottom of the sea when its fellow-molluscs such as the squids, with the aid of jet-propulsion, were getting higher up in the water. It is cold and dark at a depth of two miles, but there are advantages in having a constant fine rain of food from above. Apart from the immense length of time through which *Neopilina* has lived, the importance of the discovery is that it shows that the mollusca were originally segmented animals, which later lost their segments.

NEANDERTHAL MAN STOOD ERECT.—The ancestry of man was the subject of full discussion at the International Congress of Zoology. Dr. K. P. Oakley, of the British Museum (Natural History), said his conclusion was that the *Hominidae*, all members of the stock which led to man after separation from the stock leading to modern anthropoid apes, reached the level of Pithecanthropus between 500,000 and 300,000 years ago. By 100,000 years ago they had become *Homo Sapiens*, man in a broad sense, but there was no evidence of man in a restricted sense before about 30,000 years ago. Professor A. J. E. Cave, of St. Bartholomew's Hospital, challenged the view, that Neanderthal man was imperfectly erect with a convex back and a convex bull neck. His examination of the La Chapelle-aux-Saints skeleton in 1955 led him to the conclusion that this individual man was badly deformed by osteo-arthritis, and though Neanderthal man had distinctive physical characteristics, he stood and walked like modern man.

NIAH CAVE A SOURCE OF FOOD.—The Niah Great Cave in Sarawak, with its floor space of 26 acres, has been a storehouse of knowledge to geologists and historians indicating an unbroken human evolution in Borneo from the Upper Palæolithic to the metal age. A former assistant at Sarawak Museum said at the British Association meeting that the cave was a great larder with animals and birds in abundance. Over three million swiftlets, 300,000 bats and many large locustids, all presumably edible, nested in the cave. Several of these were exploited by the natives, whose present subsistence economy is not unlike the life of their Neolithic ancestors.

NIOBIUM FOUND IN SEA SQUIRT.—A type of sea-squirt, known as *Molgula manhattensis*, has been found to contain a portion of niobium, a rare metal of important value to the atomic physicist. It was discovered by Dr. D. B. Carlisle, at the Marine Biological Association laboratory at Plymouth. Niobium, also known as columbium, was first isolated more than a century ago. It has been used in the manufacture of vacuum tubes, and to harden steel for cutting-tools and abrasion-resisting surfaces. It is also a suitable material, because of its high melting-point and low absorption of neutrons, for canning the uranium in a fast reactor. *Molgula manhattensis* which may be described as the parent body, is about the size, shape, and colour of a pickled onion. A member of the ascidian (sea-squirt) family, it occurs abundantly along the Channel coast of Britain, coating rocks, bouys and the bottoms of ships. The average niobium content of the examples Dr. Carlisle examined was 26·5 parts per million dry-weight. Since one individual weighs about 0·2 grams, some 200,000 of them would be needed to obtain one gram of niobium. Niobium is also present sometimes in sea water, from which the sea-squirt is thought to absorb it. Here its concentration is much lower still—in unfiltered water from Plymouth Sound 0·05–0·1 millionths of a gram per litre and 40 kilometres south-west of Plymouth 0·01–0·02 millionths of a gram per litre. Its extraction from sea water seems unlikely.

NOISE AND ITS SUPPRESSION.—The effect of noise on industrial workers has been studied on both sides of the Atlantic and has yielded data which show

that in addition to loss of hearing, noise may result in faulty work and the loss of time and materials. An interesting chart showing in decibels the varying intensities of noise has been published by Mr. F. B. Greatrex, of Rolls-Royce. (A decibel is the unit of intensity of sound, measuring the energy of the sound.) According to this chart zero is the threshold of hearing; 20, a quiet garden; 30, a clock ticking; 40, a private office; 50, normal conversation level, or the sound of a quiet car passing; 60, loud conversation or the amount of noise inside a bus or train; 70, loud radio music or heavy traffic; 80, a motor horn; between 80 and 90, the cabin of a civil aircraft; 90, inside a tube train; 100, a pneumatic drill 10 ft. away; 110, a passing tank or a jet airliner at 500 ft. altitude, making conversation possible only by shouting; 120, an internal combustion aero engine 50 ft. away; 130 a jet engine 50 ft. away, regarded as the threshold of feeling conversation to be impossible; 150 brings acute pain in the ears; 160 causes permanent damage to the ear. In the United States an Air Force regulation has been established designed to minimise the effects of noise on Air Force personnel subjected to hazardous noise. The limits of exposure are 85 and 95 decibels for continuous daily exposure (eight hours) to noise given by jet engines. It is also laid down that the noise level in the ear canal should never exceed 135 decibels, and that, because exposure to noise levels of about 150 decibels may result in disorientation, nausea, and vomiting, even if the noise level in the ear canal is reduced below 135 decibels (*e.g.* by ear plugs or muffs), no one should be exposed to noise levels over 150 decibels. An ear muff has been produced by the National Research Council of Canada, by the application of a "liquid seal" between muff and head, consisting of a ring of soft rubber tube filled with glycerine. This enables good insulation of the ear to be made with only slight pressure; moreover the soft tube accommodates itself to such irregularities as the side pieces of thick horn spectacles. Much work has been done in this country in reducing airborne reverberant sound by absorbent materials—lining of walls and ceilings with fibre or slag wool, and ensuring that the doors and windows are properly fitted. Reverberation can also be reduced by spraying liquid asbestos compound on structural surfaces to a depth of 1–2 mm. and insulating floors, door openings and foundations with sound-absorbent strip. Reduction in reverberation has been achieved by suspending from factory-ceilings glass wool plates, bonded with Bakelite and covered with synthetic foil, measuring 100 cm. by 5 cm. by 3 cm. or 50 cm. by 25 cm. by 2 cm. Plates of silicate cotton have been successful. Does all this warrant the expense? In the United States millions of dollars are paid out annually in compensation. The amount of compensation paid out in one year by industry as a whole was in the region of $40 m.; a single firm paid out $2,500,000 of compensation in a year.

PISA TOWER LEANING MORE.—The tower of Pisa has been puzzling architects and engineers for seven hundred years, and they now state that unless some method of stopping its regular increase of inclination is found within the next 200 years the tower will fall over. Although a time limit of two centuries may not be desperate, the first of the line of consistent failures occurred in the thirteenth century before the tower was even finished. One of the last, in 1934, was thought to be sure of success; 90 tons of cement was injected into the base. The outcome was that the tower in that year more than doubled the normal increase in its inclination. The annual increase in the lean of the tower is seven-tenths of a millimetre. The trouble is in the damp sub-soil, which is a treacherous mixture of sand and clay. Difficulties with the shifting of the ground partly accounted for the many years spent on building the tower. Another complication may have been the legend that the original builders intended the tower to lean. More than 400 years ago Vasari tried to discredit it, but the theory still lingers. If it had always been accepted that the tower was meant to stand upright some more resolute action might have been taken earlier to put it and keep it straight.

PLANETARIUM IN LONDON.—Britain's first planetarium was opened on March 19, on a site in Marylebone Road. It has been sponsored by the directors of Madame Tussaud's, at a cost of nearly £100,000, and constructed in two years by the Zeiss Optical Company in Western Germany. This planetarium is a device for showing the motions of the stars and planets on the inside surface of a dome. A large instrument consisting of more than a hundred optical projectors is mounted at the centre of the sphere and beams of light shine through holes on a dark ground so that they throw images of the stars, in their correct positions on the sphere. Because all the fixed stars move together it is possible to project images corresponding to those in the Northern Hemisphere with the aid of sixteen projectors mounted in one bowl a few feet across. Another bowl mounted on the other end of a long steel beam can show the stars of the Southern Hemisphere. More projectors can be rotated independently of the fixed star bowls to represent the motion of the planets, the sun, the moon, and even of comets. Things can be made to happen quickly. A single rotation of the earth—the phenomenon which is responsible for the apparent movement of the stars across the sky in a single night—can be accomplished in a few seconds. This allows spectators to see what is happening to the stars much more quickly than would otherwise be possible; it also demonstrates what the night sky looks like in different parts of the world or at different epochs in history, as when Columbus set foot in North America, or when Galileo looked through his telescope.

PLANTS MAY DEFY THE WEATHER.—Efforts to encourage plants to disregard the weather and flourish under subnormal conditions were discussed by Professor J. P. Hudson of Nottingham University School of Agriculture, at the British Association meeting. Since the weather was so variable it was difficult to obtain precise information about plants out of doors; but it might be possible to alter the response of plants to the weather by using chemical stimulants such as gibberellic acid. The introduction of electric lamps made it possible to grow plants under artificial light. Experiments on environmental effect could be carried out in insulated rooms where light, temperature and humidity could be separately controlled. Controlled environments were particularly useful here, since plants could be brought prematurely into flowering. In Ottawa four or even five generations of wheat a year were being raised in breeding programmes and for the initial multiplication of seed stocks. The breeder was engaged in a race between the rate at which he could produce new varities of rust-resistant wheat and the rate at which the rust fungi could mutate. Dr. P. W. Brian, of the Department of Microbiology, Akers Research Laboratory, explained the gibberellins, which he said, were a group of chemical compounds having a profound effect on the growth of plants. Leaf and stem growth were accelerated if the compound was sprayed on in minute quantities, so that in some

species plants several times larger than usual might be formed; genetically dwarf plants became indistinguishable from those genetically tall, and the chemical stimulated immediate germination in darkness of some seeds which would normally germinate only in light. Winter-dormant shoots of deciduous shrubs and trees could be induced to start growth in completely adverse conditions. Most remarkable of all it would induce rapid flowering in certain plants, notably with biennials which normally flowered only after exposure to low temperature in winter, and long-day plants which normally flowered only in the long days of late spring and summer.

POISONED ARROWS.—New research is being made into the medical application of certain Asian plants, and scientists in Malaya are investigating those plants used by the aborigines in making poison. An impetus was given by the use of the plant *Rauwolfia* in India, from which the tranquillizer reserpine has been extracted. In India mothers have long given *Rauwolfia* to children to quieten them. Since its value was discovered there has been so much competition to collect it that the Indian Government has had to protect it. While civilization seeks to find out what the bomor in Malaya—in Africa he would be called a witchdoctor—knows which might help modern medicine, the aboriginal medicine men are being taught simple methods of westernized treatment. They have been brought in from the jungle and sent away after a week or two with pills, bandages, and disinfectants, to use among their people. After such rapid courses there may well be aborigines who are being bandaged for a headache and getting pills for an open wound, and yet—if they have faith in the new magic—are recovering. At a congress in Bangkok, Mr. K. E. Calderbank, of the Federation department of chemistry, read a paper establishing that the plant *Strychnos ovalifolia* is the source of the most effective dart poison used by the aborigines. About 95 per cent. of the alkaloid present in this plant is strychnine.

POOL OF GIBEON UNCOVERED.—One of the most famous Bible sites—the Pool of Gibeon—has been rediscovered by American archæologists in the Arab village of El Gib in Jordan. The waters of the ancient pool were found, after 6 weeks' work, to be still flowing at a depth of 82 ft. A 33-ft. cylindrical pit which had 79 steps in it led to the opening of the pool. In the Second Book of Samuel, the Pool of Gibeon is given as the scene of the encounter between the army of David and the army of Saul under Abner. The area round the pool, as the result of the fighting, became known as "the field of the strong men". The archæologists hope to cast further light on this Old Testament story.

PREHISTORIC MONSTERS.—The Birmingham Museum and Art Gallery has bought for about £700 the fossilized skull of a triceratops from the American Museum of Natural History. This mighty reptile flourished in America at the end of the long Mesozoic era, during the Cretaceous period, variously estimated to have been 80 to 140 million years ago. The Birmingham skull is about 6 ft. long and weighs nearly half a ton. It was found at Sand Arrayo, in central Montana, about 50 years ago, partly embedded in sand and clay, one of the Ceratops beds of fresh-water of brackish origin, which can now be traced for 800 miles along the east flank of the Rocky Mountains. The triceratops, about 20 ft. long, looks formidable enough even in skeleton form. The reptile had a limited mentality, its brain being no bigger than a kitten's and it was a vegetarian, or nearly so, with horny turtle-like or parrot-like jaws and hoof-like toes. Like other reptiles it laid eggs. It was a three-horned monster, with two long curved horns, one over each eye and a third horn, shorter and stouter than the others, but equally efficient. Like the monoclonius (single-horned) and the torosaurus (the bull lizard) it had a bone collar, or frill, to protect its neck, warding off blows or glancing them aside when attacked by a carnivorous enemy, such as the tyrannosaurus. The Natural History Museum has acquired from Canada a fossil edmontosaurus, a duck-billed herbivorous reptile which lived about 140 m. years ago. It is related to the iquanodon, which was discovered in a Kentish quarry about a hundred years ago. This particular specimen was about 14 ft. in height. The "hand" has only four fingers, connected by a web of skin, and the thumb is absent. The foot is three-toed, but the toes are also connected by a web of skin and end in little hoofs. It was adapted for movements on soft ground round the margin of lakes, and agile enough to escape from an enemy into the water. In some species the number of teeth in each half of the jaw may have been 500 or 600, so that over 2,000 teeth may have been in use at the same time. A fossil of the head and vertebrae of an ichthyosaurus, a fossil reptile which lived about 130 m. years ago, was found at Stow Bridge, Norfolk. The head measures 47 in., and from its size Dr. C. L. Forbes, of the Sedgwick Museum of Geology at Cambridge, believes that the reptile was 24 ft. long and had 200 vertebræ.

RADAR AID FOR THE NAVY.—The Navy's latest type of radar equipment, which has been fitted in H.M.S. *Victorious*, gives general long-range warning of the approach of enemy aircraft and accurate ranges, bearing and height data of interceptor aircraft. The claim made for it is that it revolutionizes the operational effectiveness of a modern warship and gives to the captain powers undreamed of in the past. Essentially the eyes, brain and central nervous system of the ship in which it is installed, it is a device without which modern warships would be highly vulnerable to long-range attack from the air. The radar antenna on the *Victorious* is like an enormous searchlight, a form of "magic eye" which, with its electronic brain between decks, not only gives the captain phenomenal far sight but also provides him with greater powers of calculation and judgment than his own eyes and brain could produce unaided. The "eye" part of the system is a revolving structure weighing 27 tons, which instead of a reflector uses a radio lens made up of hundreds of short sections of different length wave-guides stacked together like a honeycomb. It sends out narrow pencil beams, all sharing the same lens. One of these provides the long-range warning, while the others scan the target area as the structure rotates. Like the human eye, this radar antenna unit sends to the "brain"—an electronic computer in the ship—impulses which contain all information on airborne targets which the operational staff need. The equipment uses about 10,000 valves and 100,000 components, with 250,000 soldered joints and 275 slip rings in the revolving structure.

RADAR WATCH ON MIGRATING BIRDS.—That migrating birds such as blackbirds, starlings, redwings and chaffinches, are blown off their course even by moderate winds has been established by the use of a radar set by Dr. David Lack, of Oxford, at an R.A.F. station in Norfolk. The use of the set is practicable up to a range of 60 miles. The variations in direction caused by wind drift can be

spread over 45 degrees, so that a bird which sets out from Norfolk to cross the North Sea will make a landfall between Belgium and Denmark. This apparent inability of birds to correct for cross-winds in flight confirms the view that migrating birds rely on astral navigation, either by the sun or stars, for fixing the direction of their flight over wide expanses of sea. It is assumed that their homing instinct can correct the errors of their astral navigation only when they are within sight of land. Migrating birds fly about in apparently aimless directions when cut off from sight of the sky by overcast clouds and they drift slowly in the direction of the prevalent wind. One of the principal stimulations of migration is an absence of wind. Scarcely any migration was observed when winds, at 900 ft., were stronger than ten knots by day and fifteen knots by night. The exceptions to this rule may be explained by the absence of a wind at ground level coupled with a high wind at the common altitude of migration—about 2,000 ft. Birds are careful not to migrate in high winds; they wait until the weather provides them with a tail wind.

RADIATION FROM THE HUMAN BODY.—Apparatus has been installed at the Atomic Energy Research Establishment, Harwell, to measure the amounts of gamma-radiation, equivalent to X-rays, which our bodies project round us continuously. The human being to be measured lies on a stretcher in an enclosed chamber heavily shielded with lead. Four large crystals, sensitive to gamma-radiation, are detectors; two above the body, two below. The apparatus enables gamma-radiation of different energies to be sorted out and identified. In this way it can be seen to what extent radioactive potassium 40—which must have been present in all living creatures from the beginning of life—has been reinforced by caesium 137, formed in nuclear explosions.

RAINDROPS ACT LIKE BULLETS.—Raindrops which act like bullets and damage aircraft are one of the difficulties in this high speed age, said Dr. P. F. Bowden, in a discussion on problems in friction and lubrication at the British Association meeting. At Cambridge, he said, they were working on problems in travel on the earth or in the air at speeds of 2,000 m.p.h., the sort of speed at which the driving band of a shell rubs against the barrel of a gun or at which rocket-propelled sledges can be driven on metal rails. Raindrops were not serious at ordinary speeds, but the damage increased as speed went up and at 500 m.p.h. it was marked. Laboratory experiments had shown that when a small cylinder of water about one-twentieth of an inch in diameter and a quarter of an inch long, corresponding in volume to a rather large raindrop, struck a flat surface at 2,000 m.p.h., the metal flowed plastically and a saucer-shaped crater was formed in it. In aluminium the crater was deep and even in steel it was pronounced. An even more serious cause of damage was due to shock waves developed in a solid by water impact causing large cracks near the back face of the material when it was struck on the front. Water impact on the front surface could cause rapid disintegration of the back face of the solid. Even rubber would at those high speeds be shattered like glass. If we wish to go hurtling round the earth at a few thousand miles an hour, Dr. Bowden said, we must learn more about the way solids slide, bend, and break at very high speeds.

RHINOCEROS PROTECTION.—Some remarkable facts about the present state of the larger mammals of Borneo are given in reports of Mr. Tom Harrisson, of the Sarawak Museum, and M. Pierre Pfeffer, a French zoologist who visited Indonesia. The creature most endangered is the Sumatran rhinoceros, which is now reduced to 15 or 25 individuals, mostly isolated specimens without a chance of breeding. Magic qualities are attributed to every part of its body, especially its horn, which, being made into a drinking cup, is believed to protect the drinker from poison, or, being reduced to a powder, is taken as an aphrodisiac. Village chiefs are ordering their hunters to kill a rhinoceros whenever they can. Against this may be set the fact that in Java the Indonesian authorities are giving protection to the fifty odd survivors of another species, the Javan rhinoceros.

ST. LAWRENCE DAM BLOWN UP.—A major stage in the construction of the St. Lawrence Seaway, which is due to be opened by the Queen in 1959, was reached when a 600 ft. copper dam, built to divert the river down the south side of Barnhart Island a few miles east of Cornwall, was blown up by a 30-ton charge of explosives. A 25 ft. wave surged down the old river bed, which had been dried out for construction work, for four miles to reach the hydro-electric power dam which joins Canada to the eastern tip of the island in New York State. Water at the power dam will eventually reach a height of 90 ft., and will rise until a headpond of 38,000 acres, in some places five miles wide, is created between Cornwall and Iroquois, 35 miles up stream. The headpond will put 20,000 acres of the Canadian shore under water. Seven different townships, as well as the Canadian National Railway from Montreal to Toronto, have been re-located on higher ground.

SOLAR FURNACE ON MOUNTAIN.—The United States Air Force has planned to build the world's largest solar furnace, 15 storeys high, which will reflect almost as much heat as the sun. It will be situated on a lonely mountain top five miles north of Cloudcroft, New Mexico. The purpose of the furnace, which is to cost $10 m., is to trap and concentrate the energy of the sun's rays so as to fire a super hot furnace for testing materials which may be used in future missiles, manned space craft, and nuclear reactors. The solar furnace will consist of a big parabolic mirror 108 ft. in diameter; another big 154 ft. square flat mirror, called a "heliostat," to capture and reflect the sun's rays on to the curved focussing mirror; and an "attenuator," or giant venetian blind-like mechanism, between them to regulate the amount of sunlight reaching the curved mirror. This solar furnace is expected to reach temperatures as high as 8,500 deg., or about 80 per cent. as hot as the sun's surface and much hotter than those reached in previous solar furnaces.

SOLARTRON INSTRUCTOR.—Saki, the solartron automatic keyboard instructor, was shown for the first time at the Physical Society Exhibition. Described as the world's first thinking electronic teacher, Saki is designed for training operators of card punches. It is claimed that it can take its pupil step by step from the beginning to the final performance, and can adjust itself at every stage to the pupil's ability to absorb and execute. Idiosyncrasies, weaknesses, strengths and errors are noted and the pupil's exercises and tests adapted accordingly. The final result, an operator with a completely balanced skill and accuracy of operation, is of great importance, because much of the time lost through inaccurate card-punching is due to the fact that the personal operating weaknesses have not been overcome.

SOUND FROM SNOW CRYSTALS.—How does one part of a growing snow crystal know what the other parts are doing, so that the beautiful symmetry of shape and form is maintained during growth? This is a serious question to which crystallographers have devoted considerable thought. An ingenious new theory to explain the matter is put forward by Professor S. Tolansky, of Royal Holloway College. He suggests that the flat snow crystal vibrates over its whole surface. The complicated pattern of vibration would be affected symmetrically if one part of the crystal started to grow thicker or longer, and might tend to speed up growth in other corresponding parts of the crystal to maintain symmetry.

STONEHENGE RESTORATION.—The re-erection of a trilithon and three other stones at Stonehenge, at a cost of £8,500, was carried out by the Ministry of Works. The trilithon, consisting of two uprights weighing about 45 tons each, and a lintel, fell on January 3, 1797, and the three other stones, in the outer circle, fell in 1900. The carvings on the trilithon were being worn away by the feet of sightseers. One of the uprights was successfully raised by a 60-ton crane with a sprung 10-ton cradle. Radioactive sodium 24 was used at the base of one of the uprights which was known to be cracked in parts, for the purpose of determining the extent of the flaw. The rays passed through the stone, which is 4 ft. 6 in. thick, and were recorded on an x-ray film, and the photographs showed that, as the cracks did not extend through the width, the stone was safe to move. It was placed in a massive steel corset and the upright, weighing 43 tons, and about 23 ft. high, was lifted, lowered into its original stone hole and cemented into place. The other upright was raised in the same manner and the major work was completed by the replacement of the lintel on the top of the two uprights.

STRONTIUM in HUMAN BONES.—A definite increase in the proportion of strontium-90 in human bones in Great Britain, as a result of nuclear explosions in other parts of the world, is recorded by the Atomic Energy Research Establishment, Harwell. Measurements were made on soil, grass, milk, and the bones of sheep and human beings during 1956. The highest proportions of strontium-90 were for grass grown on acid hill soils, and the figures for the bones of hill sheep were from three to ten times higher than for lowland sheep. Strontium is chemically related to calcium, and like calcium is prefcrentially absorbed in bone. The "strontium unit" used is one micro-microcurie of strontium-90 to a gram of calcium. The highest previous figure for human bones was 1·2 strontium units in the skeletons of one-year-old children. This may be compared with a maximum of 1·55 strontium units in the latest report, for children of 0–5 years. The latter is one-sixth of the level above which immediate consideration would be required, in the view of the Medical Research Council. A striking fact which emerges from the report is the very big difference between the highest content of strontium-90 found for grass grown on normal soils (maximum 77 units) and on acid hill soils (maximum 2,100 units). Possible factors are the low supply of calcium in such soils—with the result that strontium is more readily taken up—and the fact that the amount of vegetation is smaller in relation to area than in more favourable conditions for growth. The minimum for acid hill grass was greater than the maximum for lowland grass, and the average was about three and a half times as great.

SUBMARINE UNDER THE NORTH POLE.—Commander William R. Anderson, of the United States Navy, piloted the nuclear-powered submarine *Nautilus* under the ice-cap of the North Pole, and thus established a sea-lane between the east and west. The power source was a piece of uranium the size of a golf ball, weighing 2 lb. and equivalent to 3,000 tons of coal. The *Nautilus* started from Pearl Harbour, Hawaii, on July 23, with a crew of 116 men. She passed through the Behring Strait on July 29 and surfaced briefly to inspect the ice pack and ascertain the precise navigation point between the Diomedes Isles and the Alaska coast. She went under the ice pack near Point Barrow, on the north coast of Alaska, on August 1, and found a deep sea valley widening from 5 to 12 miles and ranging in depth from 300 ft. to 1,200 ft. which was followed into the Arctic Sea basin. Under the North Pole, which was reached on August 4, the depth was reckoned to be 13,410 ft., 1,927 ft. deeper than had been thought. At the actual moment of passing under the Pole a few moments of silence were observed. The entire Arctic basin was deep and contained submerged mountain ranges. Navigation under the North Pole was difficult. There are no charts of the ocean bed there; no stars are visible and the gyro-compass was difficult to use with accuracy near the Pole itself, owing to its tendency to point upwards or downwards. Drift under water was difficult to calculate, and it was possible for the *Nautilus* to go round in a circle—which the crew named "longitude roulette"—instead of in a straight line. The *Nautilus* averaged almost 20 knots for 2,900 miles from Pearl Harbour, and was under the ice pack at a depth of 400 ft. or more for about four days. In addition to observing ice overhead through the periscope, it was possible to see what was going on above on the closed television circuit. Owing to pressure of winds and currents, ice in the Arctic basin formed downward projections 50 ft. deep and sometimes more. The temperature of the water under the ice cap was 32 degrees Fahrenheit (zero Centigrade). The *Nautilus* emerged from the ice pack on Greenwich meridian at 79 degrees north on August 5, the gyro-navigating instruments having worked so well that she was within ten miles of her estimated position. Three days later, Commander Anderson flew from Iceland to Washington, where he was decorated with the Legion of Merit. The distance from London to Tokio is 11,200 miles. By the new route it would be 6,300 miles.

TEKTITES.—That those strange, round, glassy objects called tektites found in various parts of the world may come from the moon, is the theory discussed by a number of scientists writing in *Nature*. The idea is that these tektites may have originated from explosions caused by meteors hitting the surface of the moon. Such an impact might temporarily melt the surface so that globules of liquid material were thrown out into space. These would solidify into rounded glassy objects and might reach the earth. Most tektites are found within 40 deg. of the Equator, and also occur in localized regions. The British astronomer, Mr. T. Gold, now working in America, suggests that if the tektites do come from the moon, careful study of them should provide a lot of information about the moon's surface. The formation of molten glassy beads by a meteor impact could only happen if the surface had certain physical characteristics. It is possible that the bright "rays" which radiate from certain lunar craters are also glassy, and originated in the same way as tektites.

TIDAL STUDY AT SOUTHAMPTON.—The Caltex Oil group has presented Southampton University with a model tank which reproduces all the physical features of Southampton Water and the Solent, and will yield information on the complex tidal movements in the port. Costing £16,000, and situated in the University grounds, the tank is thought to be the only tank of its kind which has two tides, for Southampton itself has the unusual phenomenon of a double tide—one round each side of the Isle of Wight. Until now the calculation of tides and currents has been a most complex matter, in which at least 35 separate influences have had to be taken into account. In the model tank the tidal period of 12½ hours is completed in six minutes, and so faithfully simulated that pilots and local sailing men who have seen it in action have recognized distinctive currents and eddies around Southampton Water. The tank was first built with a view to discovering whether the oil jetty proposed by Caltex near the entrance to the Hamble River would cause serious shifting of shingle and thus interfere with the main channel, used weekly by the big liners. The model showed that it would not.

TIME ATOMS MEASURED.—Dr. J. G. Ruthergien, Lecturer in Natural Philosophy at Glasgow University, in an address to the British Association, said that it was now possible to measure time intervals as short as one thousandth of a millionth of a second and to detect even shorter differences in time. In the past 10 years detectors and electronic techniques had been improved, mainly because of the development of the scintillation counter in which part of the energy of nuclear radiation was converted into light in a block of transparent material and the light flash was converted into an electrical pulse by means of a photo-multiplier.

TOWER OF LONDON WATER GATE.—Excavations by the Ministry of Works at the Tower of London have brought to light a private entrance stairway built for Henry III about 1230 to serve as backdoor entrance to the royal apartments from the river. Workers on the present excavations believe that it may have been the modesty of the king which caused the construction of the entrance so that, without disturbing anyone, he could come and go by the attractive little stairway adjoining the Wakefield Tower (where the Crown jewels are now kept). The discovery was made accidentally. Excavations were begun near the Wakefield Tower and disclosed about 20 ft. of the thirteenth-century curtain wall which joins the tower below ground level. After this, the remains of the water gate were uncovered. When the clean hard lines of Reigate stone came into view, Mr. Frank Hilson took special pains to see that nothing was damaged by chance blows of the spade. He and his colleagues switched first to trowels, then to broom-heads, and finally to stout scrubbing brushes and pails of water. The medieval stonework now revealed may be the most perfect to be seen in England, since it was covered up a few years after it was built and has been preserved intact beneath six feet of sandy loam. The stonework is in excellent condition and both the tooling and a number of masons' marks are clearly seen. Behind the walls where the newly uncovered steps end stood the great hall of Henry III which was destroyed during the Commonwealth.

TRANSLATION MACHINE.—An experimental machine capable of translating into any language from the spoken word was visualized in about five years by Dr. A. D. Booth, head of the Department of Numerical Automation, Birkbeck College, speaking at the British Association meeting. Work was being done on spoken word recognition. A first objective was to build a spoken word typewriter, but dialects created a major difficulty and first experiments were based on recognizing spoken sounds made by different persons. The speed at which that could be done would be about 3,000 words an hour. No translating machine existed at the moment, but a partial translating machine was being built in the United States. A human translator could work at 3,000 words an hour only in exceptional circumstances. Such a machine had been designed on paper, but the finance for building it was not forthcoming. The first prototype would cost about £100,000 and copies about £10,000 each.

TROUT'S HOMING INSTINCT.—Experiments carried out by the Scottish Home Department show that brown trout, like salmon, possess a "homing instinct" and undertake well-defined migrations. Observations have been made over many years on streams entering Dunalastair Reservoir, Perthshire. Each fish caught in the spawning streams was marked. Out of more than 3,000 fish marked over the years, only one was found to have strayed from the stream in which it had spawned previously.

TURTLE EGGS PROTECTED.—Recent turtle-tagging experiments in the United States, Malayan and East Indian waters have begun to throw more light on the life of marine turtles, probably the most extensive wanderers of the ocean. Sarawak now has a turtle trust, a turtle board, and a turtle clerk under a turtle trust ordinance—all for the purpose of collecting the eggs and studying the habits of *Chelonia mydas*, the green or edible turtle. The turtle industry centres on three islands called Talang-Talang Besar, Talang-Talang Kechil, and Satang Besar, near the extreme western end of Sarawak. For nearly a century Malays have collected the eggs of the green turtle. In 1941 the last Rajah of Sarawak bought out the Malay interests and established a trust to dispose of the profits of the industry for Malay charitable and religious purposes. The membership of the board has the sole right to take turtles and their eggs on the islands. The turtle lays her eggs at night, says Mr. T. H. Harrisson, curator of Sarawak Museum. Over an acre or less, a hundred or more full-scale female turtles may stagger, crawl, trample, and dig during one night. The turtle will continue laying—no matter what interruption comes along, as Mr. Harrisson found when he fixed metal tags to the forward flippers to chart the turtle's habits and movements—up to 100 eggs. She then shovels the sand over them and drags herself back into the safety of the sea before dawn. Her young, if allowed to hatch in the warm sand above high water mark, instinctively try to reach the sea. Many do not, because their natural enemies, such as birds, pounce on them.

WATER 2000 YEARS OLD.—After long investigations of the water that melts off the Antarctic ice cap, two New Zealand scientists, J. W. Brodie and R. W. Burling, have evolved the theory that water 2000 years old lies at the bottom of the Southern Ocean between the Antarctic and New Zealand. The age of this deep ocean water has been determined at two different stations on a line between New Zealand and the Ross Sea. At one point on latitude 65 degrees South, 500 miles from the Antarctic coast, water from a depth of 2,643 metres (350 metres above sea bottom) was found to be 2,540 years old. At the second station, in

latitude 53 degrees, where the ocean is shallower (depth 800 metres), water from near bottom was 1,900 years old. The conclusion of hydrographic expeditions to the southern oceans has been that this cold and dense water, which is not heavily contaminated with salts, normally behaves in two ways. Part of this cold water flows outwards on the surface of the southern oceans, moving in a northerly and easterly direction for thousands of miles. In southerly latitudes a southward-moving layer of warmer and more saline water underlies this topmost cold layer of ocean water. The remainder of the water which melts off Antarctica keeps to the bottom, and forms a third layer of cold and dense bottom water which moves northwards and eastwards. There is some reason to believe that the great bulk of water originates in the south-west corner of the Weddell Sea, whence it flows right round Antarctica. The New Zealand results would imply that it has taken two thousand years for this cold water to travel a distance of two or three thousand miles. In other words, the speed of the currents of bottom water flowing off Antarctica is about a mile a year, considerably less than that of about a mile a day which is typical of the migration of large volumes of deep ocean water. The method now used to determine the age of the ocean water is based on the detection of the very small quantities of radio-active carbon-14 carried in the traces of carbonates always present in sea water. In all material which has spent thousands of years on the surface of the earth, the proportion of radio-active carbon in ordinary carbon appears to be constant, because the influence of cosmic rays in making radio-carbon appears to be uniform over the surface. Material deficient in radio-carbon can therefore be assumed to have been buried out of reach of the cosmic rays for a time which can be worked out once the degree of deficiency is measured.

WILDFOWL AND THE WEATHER.—The International Wildfowl Research Bureau has issued an important statement on the immense intercontinental movements of geese and ducks. The general situation is that about the month of March the geese of the world set off on flights from the China Sea to the Siberian Steppes, from the Euphrates to the Volga, from the Nile to Murmansk, and, nearer home, from Gloucestershire and Lincolnshire to Spitzbergen. This immense flight, it is said, has been happening every year since the Ice Age. The Research Bureau is concerned, however, about sudden irruptions of birds in unexpected places owing probably to complex weather conditions. Such irruptions usually inspire the local inhabitants to shoot everything they can. The exceptionally hard weather in Northern and Central Europe and Scandinavia during the winter of 1956 sent huge skeins of pink-footed geese down the German, Dutch, and French coastline as far as Brittany. It was during the legal shooting time in France and the birds had a bad time at the hands of pot-hunters. In the Netherlands, where the shooting season was over, the Dutch spent thousands of pounds in feeding 430,000 swans, geese, and ducks which sought refuge on their waters. It was estimated that about 100,000 divers, grebes, and rails arrived. The result was that most of the birds were able to depart in largely undepleted flocks. The report announces the establishment of reserves for blue geese on Baffin Island and refuges for all fowl in a corner of the Ardennes and on the dunes of the Franco-Belgian frontier at La Panne.

WIND AT 335 M.P.H.—Observations from Aerobee-Hi rockets fired from Fort Churchill rocket site in the north of Canada have shown that winter winds at height above the earth in this area sometimes travel at 335 m.p.h.

ZETA: POWER FROM THE SEA.—The epoch-making discovery by British scientists of a process which is expected in twenty years time to lead to the production of unlimited power from hydrogen extracted from the sea was announced on January 23 by the United Kingdom Atomic Energy Authority at the Harwell establishment in Berkshire. The apparatus is known as ZETA (Zero Energy Thermonuclear Assembly), which, it is claimed, can generate a temperature of 5 million deg. Centigrade. The heat of the sun at its core is estimated to be 15 million deg. Zeta is essentially a transformer. It consists of two iron cores (immensely thick wheels the size of a railway compartment) coupled together by the torus, a ring-shaped discharge tube of aluminium, 1 metre in bore and 3 metres in diameter, containing ionized hydrogen or deuterium. The iron cores and the torus are held in a steel framework 12 ft. high, which is surmounted by a control and observation platform, bringing the overall height of the apparatus to 25 ft. Zeta weighs 150 tons and cost about £300,000. It is enclosed in concrete walls 3 ft. thick for radiation shielding. In Zeta, every ten seconds, as 200,000 amperes are passed through the deuterium, a bluish-purple flash (like a neon advertising sign) glows brilliantly for a split second on a reflector to enable observations to be made. From the duration of these flashes, measured by a spectroscope, can be calculated the degrees of heat generated by the electric current passing through the deuterium. A spectrograph is used to sort out the various wavelengths emitted by the atoms into their spectrum. Besides emitting light, the atoms in the hot gas are moving about in all directions at speeds varying from zero up to hundreds of miles per second. The shift in wavelength is proportional to the speed of the atom. This phenomenon is called the "Doppler" effect and is illustrated by the fact that the pitch of a train whistle drops as the train rushes past the listener—when the train is approaching, the wavelength of the sound waves is less than when the train is receding. As the gas atoms are moving in *all* directions the spectrum line is broadened and from the breadth of the spectrum line it is possible to determine the temperature of the gas. Sir John Cockcroft, the director of the machine, said that the eventual commercial application of Zeta, which it was hoped to achieve at Harwell, should be considered against the following background: the world's reserves of coal and oil are expected to last about another 100 years and those of uranium and thorium, now being used in fission reactors, 200 to 300 years. If it proved possible to construct a power station operating on the fusion of deuterium, the oceans of the world would provide an inexhaustible source of fuel. Five gallons of sea water yield 1 g. of deuterium gas and the present cost of extraction is two shillings per gramme. The energy stored in 1 g. of deuterium is equivalent to the energy stored in 10 tons of coal.

NATIONAL NATURE RESERVES

Fourteen new nature reserves were declared by the Nature Conservancy (*see* pp. 412–3) in the year ended September 30, 1958, and additions to existing reserves were also made. Permits are required for access to the reserves marked * and for access to some parts of reserves marked †. New nature reserves are :—

Bedfordshire.—*Knocking Hoe** (22 acres).—This Reserve is a small relic of a particular type of close-grazed chalk downland turf, which is rapidly disappearing under the present system of land use in this country. The turf is thought to be of very ancient origin, and has probably remained undisturbed by cultivation at least through historic times. There is a rich flora of low-growing chalk downland species.

Lancashire.—*Rusland Moss** (30 acres).—A raised bog, only 20 feet above sea-level, which originated in a lake, Rusland Moss still retains most of the characteristic bog plants and animals. It provides a good representative sample of the birds characteristic of Willow Carr, moss and semi-natural Pine Wood. A small but flourishing heronry has existed for many years. A small number of wild Red Deer, as well as Roe Deer, have managed to survive unprotected in the Rusland Valley, in the sanctuary of the mosses.

Norfolk.—*Bure Marshes*† (1,019 acres, 9 miles north of Norwich).—The Reserve is a living museum of Broadland mammals (including the Otter and the Coypu), insects (including Swallow-tail Butterflies) and plants. Among the birds benefitting from the Reserve are rare duck, such as Garganey and Gadwall, March Harriers, Bittern and many Great Crested Grebes.

Hickling Broad† (1,204 acres, 10 miles north-west of Great Yarmouth).—The rich flora supports some notable insects, of which the most outstanding is the Swallowtail Butterfly. The Bittern has bred at Hickling again since 1912, and the Marsh Harrier, which returned rather later. Today Harriers, Bearded Tits and Bitterns are flourishing together with ducks, waders and other interesting birds.

*Weeting Heath** (338 acres, west of Brandon).—Weeting Heath has a wide range of Breckland Heath vegetation types and consequently a flora and fauna of considerable interest. Typical Breckland birds such as Stone Curlews, Woodlarks, Wheatears and a few pairs of Ringed Plovers (which rarely breed so far inland) are to be found.

Oxfordshire.—*Aston Rowant* (70 acres).—A grassy promontory known as Beacon Hill, the Reserve displays stages in ecological succession from previously open chalk grassland to scrub and woodland. Dense chalk scrub of varying age and height and typical chalk plants. There is a public right of way across the Reserve.

Suffolk.—*Thetford Heath** (225 acres, 2½ miles south-west of Thetford).—Breckland birds in special need of conservation are well-represented and the breeding species include Stone Curlew, Woodlark, Wheatear and Ringed Plover. Of outstanding interest are the fine examples of fossil "stone stripes".

Yorkshire.—*Ling Gill** (12 acres).—A small wooded ravine cut into the limestone, close to the source of the Ribble, the Reserve is thought to carry remnants of vegetation once widespread over the carboniferous limestone, but vanished elsewhere owing to grazing. The flora is very rich; six species of orchid and fourteen ferns are found.

WALES

Glamorgan.—*The Gower Coast Reserve* (116 acres).—The south coast of the Gower Peninsula forms one of the most magnificent stretches of limestone cliffs in the British Isles. The steep south-facing slopes have for long been known to botanists for their exceptional floral richness. Many sea birds breed on the cliffs and ledges of Worm's Head, while on the mainland a number of the caves in the coastal cliffs contain remains of animals and also of man.

Merionethshire.—*Morfa Harlech** (445 acres, north-west of Harlech).—A triangular sandy foreland, the Reserve includes an extensive system of acidic and lime-rich dunes, estuarine salt-marshes and freshwater swamps and pools, of great biological interest.

SCOTLAND

Dumfries-shire.—*Tynron Juniper Wood* (12 acres).—The Wood consists of a dense growth of Juniper up to about 10 feet high, unmatched elsewhere in the south of Scotland. Juniper played an important part in primitive woodlands.

Inverness-shire.—*Loch Druidibeg, South Uist* (2,577 acres).—This is the most important surviving ancestral breeding-ground in Britain of the native Greylag Goose. The loch shore is broken up into innumerable bays and islets by small peat or boulder-covered peninsulas, and in the shallow waters there is a rich aquatic flora. The islets bear a luxuriant vegetation.

Perthshire.—*Rannoch Moor* (3,485 acres, in the north-east corner of the Moor of Rannoch on the Perth–Argyll border).—The moor lies at an altitude of 1,000 feet. It is one of a series of bog areas of different types and is the only National Nature Reserve exemplifying shallow, high altitude, blanket bog. There is a bog flora of considerable interest including the rush *Scheuchzeria palustris*.

Stirlingshire.—*Clairinsh* (15 acres).—This Reserve, which is an island in the southern part of Loch Lomond, is one of the very few oakwoods remaining in Scotland in which mixed age composition has been largely retained and regeneration has continued naturally. As the vegetation is of the rich lowland type, the result is a combination unique in Scotland.

Brief details are given below of national nature reserves declared to September 30, 1958.

Bedfordshire.—*Knocking Hoe** (22 acres).

Berkshire—*Cothill** (4 acres).—Shows succession from open water through various swamp associations to woodland of alder, birch, ash, etc.

Cheshire.—*Wybunbury Moss** (25 acres, 3½ miles S. of Crewe).—Example of "Schwingmoor" bog.

Devonshire.—*Yarner Wood* (360 acres).—Woodland. *Axmouth–Lyme Regis Undercliffs*† (794 acres, between Seaton and Lyme Regis).—Of geological interest.

Dorset.—*Arne** (9 acres, 2½ miles east of Wareham).—Shows transition from dry woodland to salt marsh. *Hartland Moor* (214 acres, 1½ miles south-east of Wareham).—Dorset Heath and other rare bog plants. *Morden Bog* (173 acres, near Wareham).—Southern heathland.

Essex.—*Hales Wood** (20 acres, 2½ miles north-east of Saffron Walden).—Example of oak-ash woodland on chalky boulder clay.

Hampshire.—*Old Winchester Hill* (140 acres, 2½ miles south of West Meon, between Petersfield and Winchester).—Rough chalk grassland with yew and other chalk-loving trees.

Hertfordshire.—*Tring Reservoirs*† (49 acres, 1 mile north of Tring).—Important sites for the observation of breeding and migratory birds. Also a habitat for rare plants.

Huntingdonshire.—*Monks' Wood*† (387 acres, some 5 miles north-east of Huntingdon).—Example of woodlands on Oxford clay. Rare plants and insects. *Woodwalton Fen** (514 acres, 10 miles south-east of Peterborough).—Rich flora and fauna *Holme Fen** (640 acres).—Adjoins the site of Whittlesey Mere, drained in 1851. Raised-bog flora with uncommon plants and insects.

Kent.—*Blean Woods** (76 acres).—Sessile oak with hazel and hornbeam, coppice, chestnut and birch, and a variety of unusual plants. Important for the presence of the Heath Fritillary butterfly. *Ham Street Woods** (240 acres, 6 miles south of Ashford). *High Halstow** (131 acres).—Includes the largest heronry in England. *Swanscombe Skull Site* (*Geological Reserve*) (5 acres, 4 miles east of Dartford).—In 1935–36 parts of a human skull, thought to be closely ancestral to modern man and the earliest known in Europe, were discovered.

Lancashire.—*North Fen* (5 acres, 4 miles east of Coniston).—Vegetational succession of open water, rich in mineral salts, to fen, carr and bog. Mainly woodland with signs of sphagnum bog development.—*Blelham Bog* (5 acres, 3½ miles south of Ambleside).—Example of development of sphagnum bog from wet willow woodland. *Roudsea Wood** (287 acres, about 10 miles west of Grange-over-Sands).—Yew, oak and ash woodlands. *Rusland Moss** (30 acres).—*See* above.

Norfolk.—*Bure Marshes* (1,019 acres, 9 miles north of Norwich).—*See* above. *Hickling Broad*† (1,204 acres, 10 miles north-west of Great Yarmouth).—*See* above. *Scolt Head* (1,821 acres, 3 miles north of Burnham Market).—Famous for its bird life and of interest for study of coastal evolution, etc. *Winterton Dunes* (259 acres, 8 miles north of Great Yarmouth).—A wide range of heath, bog and dune habitats.

Oxfordshire.—*Aston Rowant* (70 acres).—*See* above. *Wychwood* (647 acres, 7 miles west of Woodstock).—Mixed woodland, chiefly oak standards and high scrub, on a wide range of soils.

Soke of Peterborough.—*Castor Hanglands*† (218 acres, 4½ miles north-west of Peterborough).—Heath and woodland on Oolitic Limestone and calcareous clays, with a wide range of plant life.

Somerset.—*Bridgwater Bay*† (6,076 acres, 12 miles south of Weston-super-Mare).—Protected area for wildfowl. *Rodney Stoke** (86 acres, 2 miles south-east of Cheddar).—Example of a Mendip Ashwood. Fauna includes Badger, Buzzard and many species of Mollusc.

Suffolk.—*Cavenham Heath* (208 acres). *Orford-ness–Havergate*† (514 acres, 1½ miles south of Orford).—Famous in post-war years as the site to which the Avocet has returned. *Thetford Heath** (225 acres, 2½ miles south of Thetford).—*See* above. *Westleton Heath* (117 acres, 2 miles south of Dunwich).—A good example of characteristic East Suffolk heathlands, most of which have been reclaimed. Interesting bird life.

Sussex.—*Kingley Vale* (230 acres).—Displays all stages of yew wood development. *Lullington Heath* (155 acres, 3½ miles north-west of Seaford).—Unploughed chalk heath with interesting flora.

Westmorland.—*Moor House*† (10,000 acres, bounded on the north and east by the Tees).—Includes a Field Station for research on bog growth, peat erosion, effects of grazing and burning, etc.

Wiltshire.—*Fyfield Down* (612 acres, 3 miles west of Marlborough).—High chalk downland rich in Sarsen stones.

Worcestershire.—*Wren's Nest* (74 acres).—A classical exposure of Upper Silurian rocks. The Wenlock Limestone has yielded an extensive fossil fauna.

Yorkshire.—*Ling Gill* (12 acres).—*See* above.

WALES

Anglesey.—*Newborough Warren and Ynys Llanddwyn*† (1,256 acres, 6 miles west of Caernarvon).

Brecon.—*Craig Cerrig Gleisiad* (698 acres, 6 miles south-west of Brecon).—An Old Red Sandstone crag; cliffs and gullies contain uncommon plants and birds, including arctic-alpine plants.

Caernarvonshire.—*Coed Tremadoc** (49 acres, 1½ miles north-east of Portmadoc).—Survival of oak woodland, formerly found on cliff and rock faces in Wales. Complex vegetation. *Cwm Idwal* (984 acres, 6 miles west of Capel Curig).—Wide variety of volcanic rocks with an interesting flora.

Cardiganshire.—*Coed Rheidol* (80 acres, 10 miles east of Aberystwyth).—Examples of moist, mossy Sessile Oak Woodlands with rich associated flora and fauna. *Cors Tregaron** (1,842 acres, 2 miles south-east of Aberystwyth).—Actively growing raised bog and a large area of peat moss.

Glamorgan.—*Gower Coast Reserve* (116 acres).

Merionethshire.—*Cader Idris* (969 acres, about 4 miles south-west of Dolgelley).—Variety of Ordovician volcanic lavas with intrusive igneous rocks interbedded with fossiliferous mudstones and slates. *Morfa Harlech* (445 acres).—*See* above.

SCOTLAND

Bute.—*Glen Diomhan* (24 acres in Arran).—A steep-sided post-glacial gorge between Neall nan Damh (1,870 feet) on the west and Ben Bhiorach (1,572 feet) on the east.

Dumfries-shire.—*Caerlaverock** (6,226 acres).—Salt marsh and foreshore or mud between the River Nith and the Lochar Water. Noted winter haunt for wildfowl, particularly Pinkfooted and Barnacle Geese. *Tynron Juniper Wood* (12 acres).

Fifeshire.—*Isle of May* (140 acres, at the mouth of the Firth of Forth).—218 species of birds have been observed here. A Bird Observatory and Field Station was set up in 1947. *Morton Lochs** (59 acres, on Tentsmuir).—Artificial lochs on a main migration route of wildfowl and waders. *Tentsmuir Point* (92 acres).—Area for the study of coastal accretion and plant colonization.

Inverness-shire.—*Cairngorms* (39,689 acres).—Flora includes the native Scots pine and birchwoods, moorland vegetation and arctic-alpine plants. *Rhum** (26,400 acres, 7 miles south of Skye).—Small mountains of exceptional geological interest. Interesting fauna. *South Uist* (2,577 acres).—*See* above.

Kirkcudbright.—*Silverflowe* (472 acres, 12 miles N.N.W. of New Galloway).—Seven raised bogs, undrained and virtually undisturbed.

Perthshire.—*Rannoch Moor* (3,485 acres).

Ross-shire.—*Beinn Eighe* (10,450 acres, 24 miles from Kyle of Lochalsh).—Remnant of Caledonian pinewood. *North Rona and Sula Sgeir* (320 acres, 47 miles north-west off Cape Wrath).—Home of the Atlantic Grey Seal and believed to hold about half the world's population of this seal. *Rassal Ashwood* (202 acres, near the head of Loch Kishorn, Wester Ross).—Example of ashwood growing on limestone pavement.

Shetland.—*Hermaness* (2,383 acres in the north-west of Unst).—Important breeding station of the Great Skua, Arctic Skua, Red-throated Diver, Eider Duck and Arctic Tern. Large gannetry and other seabird colonies. *Noss* (774 acres).—Mainly rough moorland. On the cliffs there are important seabird colonies, and on the moorland Great and Arctic Skuas occur.

Sterlingshire.—*Clairinsh* (15 acres).—*See* above

Sutherland.—*Inchnadamph* (3,200 acres).—Includes the Karst type of limestone country with sink holes, underground streams and caves.

Saint Kilda.—*St. Kilda Reserve* (2,107 acres, 45 miles west of the Outer Hebrides).—Seabird colonies, including Gannets, Fulmars and Puffins.

LITERATURE OF THE YEAR

Book Production 1957–58

In 1957 British publishers issued a total of 20,719 titles, of which 5,927 were reprints and new editions. These figures were the highest ever recorded, the previous record total, in 1955, having stopped a little short of 20,000. The increase was distributed over most of the main categories of books and was particularly noticeable in fiction which, in 1957, totalled 3,737 titles, an increase of 294 over the figure for the previous year. Other notable increases were in children's books of which 1,951 titles were published in 1957 (197 more than in 1956) and in religious books of which 1,199 titles were published in 1957 (164 more). The number of titles issued during the first nine months of 1958 (16,323, showing an increase of 1,285 over the corresponding period of 1957) indicated that the trend towards greater output was continuing strongly.

These record-breaking output statistics were received without elation by the book trade in which the predominant view is that overproduction offers the greatest threat to its prosperity. Fortunately the year in which the output of books passed the 20,000 mark for the first time was also that in which British publishers' trading receipts passed the £60 million mark for the first time. The value of the sales of different categories of books is not known with anything like accuracy and a report of the Publishers Association issued in March, 1958, suggested that if the turnover in general books was separated from that of educational, scientific and technical books, a picture very much less encouraging to general publishers would emerge. Nevertheless, the success of a wide variety of general books has been one of the unmistakable features of the recent literary scene. These have ranged through every price level from the "Do-it-yourself" manual published at a few shillings to the sumptuously illustrated fine art book which British houses, often in co-operation with publishers in other European countries, can now make available at a popular price.

A further decline in the sale of popular fiction manifest during the past year was attributed by the chairman of W. H. Smith & Son, the largest distributor of books in this country, to the rapid development of television, but this was balanced by increased borrowing from public libraries and by the enlarged size of Sunday newspapers which, like many large-circulation magazines, are becoming increasingly dependent upon the serialization of books as a means of pleasing their readers. It was also reported by W. H. Smith in midsummer, 1958, that the remarkable popularity of war books "was at last on the wane", and that there was a drop in the membership of book clubs. On the other hand there was an encouraging sign in the increased sale of children's books, particularly encyclopaedias. As yet there has been no sign of a glut in paperbacked books.

British Textbooks Abroad

Of the total trade done by book publishers in 1957 of £60,456,372, the overseas market accounted for £22,505,440 or 37·4 per cent. This notable achievement did not lessen the concern felt not only by publishers but by other informed people about the effect which currency difficulties in many countries, and particularly in the Commonwealth, were having on the status and influence of British books abroad. In a debate in the House of Lords in July on this country's overseas information services, Lord Croft pointed out that the United States textbook was today a familiar sight in universities everywhere, and that in practically all technical subjects it was firmly established overseas, while in countries like India, Pakistan, Burma and Ceylon, the British textbook had practically disappeared from library shelves. Another member, Lord Crook, drew attention to the situation in such countries as Israel and Turkey, where "we can wipe English books completely out of existence from the point of view of the ordinary person."

In all discussions of the subject, stress is naturally laid on the commercial benefits that accrue to a country whose technical books are used by potential customers overseas; but far more important, Lord Chandos, a former President of the Board of Trade, pointed out in October, 1958, was the need to demonstrate to the world at large what human beings could do in a country of free speech. He made an earnest plea to the Government to assist the export of British books to under-developed countries and to countries which, through currency exchange difficulties, were not able to obtain them by normal purchasing methods. It was a contribution to understanding, to enlightenment, to civilization and to peace, he declared, to see that English works which had survived the passage of time, as well as those which were now seeking their place, should irrigate the great deserts of ignorance and prejudice which could be seen all around us.

Obscenity in Books

The Select Committee appointed in April, 1957, by the House of Commons to consider the Obscene Publications Bill, issued its report and recommendations at the end of March, 1958. Evidence was heard from the Home Secretary, the Commissioners of Customs and Excise, the police authorities, the Publishers Association, the Society of Authors, the British Federation of Master Printers, the Public Morality Council, and from two eminent authors, Mr. T. S. Eliot and Mr. E. M. Forster. The Bill which the Select Committee was considering was the revised and simplified Obscene Publications Bill prepared by the Herbert Committee under the sponsorship of the Society of Authors, which passed its second reading in the House of Commons unopposed in 1957. The Select Committee's recommendations covered many of the principles which the Herbert Committee was endeavouring to introduce into the law of obscene publications—the defence of literary and artistic merit, the consideration of a work as a whole, the right of an author to be heard in any legal case, the admission of expert evidence and the defence of innocent dissemination. With regard to the much-disputed words in the Hicklin case of 1868, which is the test still applied—"whether the matter tends to deprave and corrupt"—the Committee reported that it was the general view of witnesses that although the meaning of the expression might be difficult to define with academic precision, it would be preferable to retain it in default of a better alternative.

London Library Rating

The London Library lost its appeal to the Lands Tribunal in July, 1958, against the rating assessment of £11,000 gross value The Library had been exempt from rates for 80 years under the Scientific Societies Act of 1843, and great concern was expressed by many people, including eminent authors, about this assessment. Giving the decision of the Tribunal, the president, Sir William Fitz-Gerald, Q.C., referred to the London Library as an institution that added lustre to the city, and said that it could be classed among the world's greatest libraries. It had been instituted for the purpose of literature; but to qualify for exemption under the Scientific Societies Act it had to be instituted for that purpose exclusively, and the Courts had held,

time and time again, that the word *exclusively* must be strictly interpreted. Putting the question "Is the primary purpose of the Library the convenience of members, or the advancing and fostering of literature exclusively?", the president said that nowhere in its bye-laws did the Library stipulate what use members might make of their books, except to return them in good condition. With regret he felt forced to decide that the Library came down on the wrong side of the line, and that it could not be said that its primary purpose was not the convenience of its members.

Author's Rights Upheld

Awarding the plaintiff £200 damages in the case *Joseph v. National Magazine Co. Ltd.*, in which the defendants were sued for breach of contract for failing to publish an article as the plaintiff had written it, Mr. Justice Harman said in his judgment that he could see no justification for the contention that an editor might alter the matter and manner of a signed article in such a way; the plaintiff was entitled to write his own article in his own style, expressing his own opinions and was not bound to submit to having his name published as the author of a different article, expressing other opinions in a different style.

Library Reservation Charges

A memorandum drawn up by the Finchley Labour Party in July vigorously opposed the practice common among public library committees of levying reservation charges and fines upon their borrowers. Of all charges, the memorandum declared, the "most stupid and the least defensible" were the charges for reserving books; they violated the principle laid down by Parliament in the Public Libraries Act, 1850, that public libraries were to be administered as a social service—a principle that was fundamental to a civilized community.

Centenaries, etc.

Among the centenaries which received due recognition were those of the births of George Gissing and Joseph Conrad, at the end of 1957, and of Henry Fowler, the lexicographer, and of E. Nesbit, the children's author, in 1958. The 100th anniversaries of the publication of some notable works were also duly celebrated: Darwin's "Origin of Species", Gray's "Anatomy", "Crockford's Clerical Directory" and Samuel Smiles's "Self-Help" (published by the same publisher as "The Origin of Species", John Murray, on the same day, and never out of print since).

"The Bookseller", journal of the book trade, which Joseph Whitaker founded in 1858, ten years before he started "Whitaker's Almanack", also celebrated its centenary during the year.

An anniversary that did not pass unnoticed in the book trade was the 25th birthday of Book Tokens in November, 1957. The first tokens were sold in the bookshops in November, 1932. This ingenious scheme was devised by a publisher, Mr. Harold Raymond. It caught on at once among booklovers, and subsequently among other trades, many of which now have token schemes. In the 25 years of its existence the Book Token scheme—a non-profit-making scheme operated by booksellers—has resulted in the sale of over 21 million token cards.

Literary Translation

An Association of Translators was formed under the auspices of the Society of Authors with the principal objects of "improving the status of translators and, by doing so, raising the general standard of English literary translation." One particular point the Association stresses is that newspapers and journals should print the name of the translator, after that of the author, at the head of all reviews of translated works, irrespective of whether the review contains any reference to the translation.

Prizes for Literature

The Nobel Prize for Literature was awarded in 1957 to the French author, Albert Camus, for "his important literary work, which has with penetrating seriousness thrown light on the problems of human consciousness in our times."

The Guinness Poetry Award of £300 was given to Vernon Watkins for his poem "The Tributary Seasons", the second prize of £200 went to C. Day Lewis for his "Moods of Love," and the third prize of £100 to Roy Fuller for his "Seven Mythological Sonnets". Some 3,000 poems were submitted.

The second presentation of the Duff Cooper Award, instituted in 1956 in memory of the late Lord Norwich, was made by the Queen Mother in December, 1957, to Lawrence Durrell for his "Bitter Lemons".

The James Tait Black memorial prize for the best novel published during 1957 was awarded to Anthony Powell for his "At Lady Molly's." The biography prize was awarded to Maurice Cranston for his "John Locke".

The Somerset Maugham Award of £450 was given to John Wain for his "Preliminary Essays".

The William Foyle Poetry Prize of £250 was presented to Dame Edith Sitwell for her "Collected Poems".

The Library Association's Carnegie Medal for an outstanding children's book published during 1957 was awarded to William Mayne for his "A Grass Rope". The Association's Kate Greenaway Medal was awarded to V. H. Drummond for her illustrations to "Mrs. Easter and the Storks". The year 1958 was the 21st anniversary of the Carnegie Medal. At a function celebrating this anniversary, congratulations to the Library Association were offered by the Parliamentary Secretary of the Ministry of Education, Sir Edward Boyle, and the President of the Publishers Association, Mr. Ian Parsons.

The Heinemann Awards for Literature (£100 each) were given to Peter Green for his historical novel, "The Sword of Pleasure", and to Gavin Maxwell for his "A Reed Shaken by the Wind".

BOOKS PUBLISHED

Among the books published between October, 1957, and October, 1958, were the following:

Biography

"King George VI," by John W. Wheeler-Bennett; "The Later Churchills," by A. L. Rowse; "Letters from Hilaire Belloc," ed. Robert Speaight; "Against the Wind" by Geoffrey Household; "Damned shall be Desire" (de Maupassant) by Stephen Coulter; "The Diaries of John Ruskin," Vol. II: 1848–1873; "Drawn from Memory" by Ernest H. Shepard; "Dylan Thomas: Letters to Vernon Watkins"; "End of an Innings" by Denis Compton; "Extraordinary Seaman" (Thomas, Lord Cochrane), by J. P. W. Mallalieu; "Frances Anne," by Edith, Marchioness of Londonderry; "Grock," by Grock; "Gulbenkian" by John Lodwick; "Georgina Hogarth and the Dickens Circle," by Arthur A. Adrian; "Here I Stand," by Paul Robeson; "The History of Fanny Burney," by Joyce Hemlow; "Letters of John Cowper Powys to Louis Wilkinson"; "The Living of these Days," by Harry Emerson Fosdick; "Memories of a Catholic Girlhood," by Mary McCarthy; "The Mist Procession," by Lord Vansittart; "The Pen and the Sword," by Michael Foot; "A Portrait of Lord Nelson," by Oliver Warner; "The Rainbow Comes and Goes," by Lady Diana Cooper; "Scot-

land the Brave," by Iain Hamilton; "Schubert: Memoirs by his Friends," ed. Otto Erich Deutsch; "A Soldier with the Arabs," by Sir John Glubb; "Sold for Silver," by Janet Lim Chiu Mei; "Some Memories," by Lord Percy of Newcastle; "Three Musketeers," by André Maurois; "Three Steps to Victory," by Sir Robert Watson-Watt; "Till I End My Song," by Robert Gibbings; "The Steadfast Man" (St. Patrick), by Paul Gallico; "George Moore: Letters to Lady Cunard," ed. Rupert Hart-Davis; "Voltaire in Love," by Nancy Mitford; "A. H. Clough: Correspondence," Ed. F. Mulhouser; "With a King in the Clouds," by Erika Leuchtag; "Lady Palmerston's Letters," Ed. Tresham Lever; "Shackleton," by Margery and James Fisher.

Fiction

"At Lady Molly's," by Anthony Powell; "A Bit off the Map," by Angus Wilson; "The Sibyl," by Per Lagerkvist; "As Music and Splendour," by Kate O'Brien; "An End and a Beginning," by James Hanley; "Doctor in Love," by Richard Gordon; "Immortal Queen," by Elizabeth Byrd; "Madeleine," by Catherine Gavin; "Peyton Place," by Grace Metalious; "A Ring has no End," by Thomas Armstrong; "Scent of Cloves," by Norah Lofts; "A Summer Place," by Sloan Wilson; "The White Witch," by Elizabeth Goudge; "The Winthrop Woman," by Anya Seton; "The Darling Buds of May," by H. E. Bates; "A Cup of Tea for Mr. Thorgill," by Storm Jameson; "The Contenders," by John Wain; "The Exile and the Kingdom," by Albert Camus; "Time and the Hour," by Howard Spring; "The Conscience of the Rich," by C. P. Snow; "Cocktail Time," by P. G. Wodehouse; "The City and the Dream," by Ernest Raymond; "By Love Possessed," by J. G. Cozzens; "Anatomy of a Murder," by Robert Traver; "The Etruscan," by Mika Waltari; "The Rainbow and the Rose," by Nevil Shute; "The Road to Socorro," by Charles Locke; "The Roots of Heaven," by Romain Gary; "September Roses," by André Maurois; "Those without Shadows," by Françoise Sagan; "Onionhead," by Weldon Hill; "On the Road," by Jack Kerouac; "From Many Countries," by Sholem Asch; "The Gold Slippers," by Frances Parkinson Keyes; "The Greengage Summer," by Rumer Godden; "The Habit of Loving," by Doris Lessing; "Home from the Hill," by William Humphrey; "Hornblower in the West Indies," by C. S. Forester; "House of Lies," by Françoise Mallet-Joris; "I Like it Here," by Kingsley Amis; "Ice Palace," by Edna Ferber; "Jephthah and his Daughter," by Lion Feuchtwanger; "The King Must Die," by Mary Renault; "The 4.50 from Paddington," by Agatha Christie; "A Letter to Elizabeth," by Bettina Linn; "The Law," by Roger Vailland; "The Little Old Admiral," by Louis Golding; "Made for Man," by Sir Alan Herbert; "Maggie-Now," by Betty Smith; "March the Ninth," by R. C. Hutchinson; "The Mountain is Young," by Han Suyin; "Mutiny," by Frank Tilsley; "Sylvester," by Georgette Heyer; "They Came to Cordura," by Glendon Swarthout; "The Time of the Dragons," by Alice Ekert Rotholz; "The Town," by William Faulkner; "Two Women," by Alberto Moravia; "Voss," by Patrick White; "Young People," by William Cooper; "Dr. No," by Ian Fleming.

Politics and World Affairs

"Brighter than a Thousand Suns," by Robert Jungk; "Defence and the English-Speaking Role," by Sir Norman Angell; "Defence in the Nuclear Age," by Stephen King-Hall; "Encyclopaedia of Parliament," Ed. Norman Wilding and Philip Laundy; "The Evolution of Political Thought," by C. Northcote Parkinson; "The First Ten Years: Israel between East and West," by Walter Eytan; "I Saw for Myself," by Anthony Nutting; "Imré Nagy on Communism"; "The Long March," by Simone de Beauvoir; "Inside Russia Today," by John Gunter; "Land without Justice," by Milovon Djilas; "The Naked God," by Howard Fast; "The New Class," by Milovan Djilas; "The Question," by Henri Alleg; "Russia, The Atom and the West," by George F. Kennan; "Soviet Russia in China," by Chiang Kai-Shek; "The Treason Cage," by Anthony Sampson; "The Voice of Israel," by Abba Eban.

Literature and Criticism

"A. E. Housman: Scholar and Poet," by Norman Marlow; "The Angry Decade," by Kenneth Allsop; "Boswell in Search of a Wife, 1766–69," Ed. Frank Brady and Frederick A. Pottle; "The Court and the Castle," by Rebecca West; "Dr. Johnson and Others," by S. C. Roberts; "England's on the Anvil," by John Raymond; "The Epic Strain in the English Novel," by E. M. W. Tillyard; "Granite and Rainbow," by Virginia Woolf; "Henry James and H. G. Wells," Ed. Leon Edel and Gordon N. Ray; "Andrew Young: Prospect of a Poet," Ed. Leonard Clark; "The Image and the City," by Charles Williams, Ed. Anne Ridler; "S. T. Coleridge: Notebooks," Ed. K. Coburn; "On the Continent," by Sir Osbert Sitwell; "By Way of Sainte-Beuve," by Marcel Proust (Tr. by Sylvia Townsend Warner); "Poetry for Supper," by R. S. Thomas; "The American Novel and its Tradition," by Richard Chase; "The Present Age," by David Daiches; "On Poetry and Poets," by T. S. Eliot; "The Search for Good Sense," by F. L. Lucas; "From a Writer's Notebook," by Van Wyck Brooks; "Six Proust Reconstructions," by Pamela Hansford Johnson; "Parisian Sketches," by Henry James; "The Sovereign Flower," by G. Wilson Knight; "New Bottles for New Wine," by Julian Huxley; "Concise Cambridge Bibliography of English Literature," Ed. George Watson; "The Tenth Muse," by Sir Herbert Read; "T. S. Eliot: A Symposium," Ed. N. V. Braybrooke; "Joseph Conrad and his Characters," by Richard Curle; "Thoughts in the Wilderness," by J. B. Priestley; "A Visit to Mrs. Wilcox," by Naomi Lewis; "Writers at Work," Ed. Malcolm Cowley; "The House of Fiction," by Henry James.

Poetry

"The Variorum Edition of the Poems of W. B. Yeats," Ed. Pater Allt and Russel K. Anspach; "The Triumph of the Muse," by John Heath-Stubbs; "The Talking Skull," by James Reeves; "The Penguin Book of Australian Verse"; "The Oxford Book of Irish Verse"; "The Hawk in the Rain," by Ted Hughes; "Excursus in Autumn," by John Smith; "Collected Poems and Epigrams," by George Rostrevor Hamilton; "The Unicorn and Other Poems," by Anne Morrow Lindbergh.

Religion and Philosophy

"St. Thérèse of Lisieux: Autobiography of a Saint," Tr. by Ronald Knox; "Benedict de Spinoza: The Political Works," Ed. A. G. Wernham; "Christianity among the Religions of the World," by Arnold J. Toynbee; "Documents on Christian Unity," Fourth Series, Ed. G. K. A. Bell; "Windsor Sermons," by Alec R. Vidler; "Early Christian Doctrines," by J. N. D. Kelly; "Theology of the Old Testament," by Edmund Jacob; "The Undiscovered Self," by C. G. Jung; "In Search of Reality," by Viscount Samuel; "Religion and the Rebel," by Colin Wilson; "Theology for Beginners," by F. J. Sheed; "The Day Christ Died," by Jim Bishop; "The Spirit of Lourdes,"

by John Anthony Shields; "Julian of Norwich," by Paul Molinari; "The Tower and the Abyss," by Erich Kahler; "Anglicanism," by Stephen Neill; "Dean Church: the Anglican Response to Newman," by Basil Alec Smith; "The Christ of Faith," by Karl Adam; "A Study in Ethical Theory," by D. M. MacKinnon; "The Oxford Dictionary of the Christian Church," Ed. Frank Leslie Cross; "St. Anthony," by Norman Painting and Michael Day; "Saint Bernadette Soubirous," by Francis Trochu; "Crown of Glory: The Life of Pope Pius XII," by Alden Hatch and Seamus Walshe; "These Made Peace," by Cecily Hallack and Peter Frederick Anson; "The Doctrine of the Buddha," by George Grimm; "Nine Sermons on the Psalms," by St. Augustine, Tr. E. Hill; "A New Testament Commentary," by Ronald Knox; "Freedom of the Will," by Jonathan Edwards; "The Doctrine of God," by Karl Barth; "Psychology and Religion: West and East," by C. G. Jung; "Healing Power of Faith," by Will Oursler; "New Developments in Analytical Psychology," by Michael Fordham; "Reconstruction in Philosophy," by John Dewey; "Parapsychology," by Joseph Banks Rhine and J. G. Pratt.

History and Archaeology

A History of the English-Speaking Peoples, Vol. IV, "The Great Democracies," by Sir Winston Churchill; "The New Cambridge Modern History," Volumes I and VII; "The Later Herods," by Stuart Perowne; "The Kingdom of Free Men," by G. S. R. Kitson Clark; "Europe Since Napoleon," by David Thomson; "The Greek Experience," by C. M. Bowra; "Russian Activities in the Arctic," by Terence Armstrong; "Warwick the Kingmaker," by Paul Kendall; "English Historical Documents," Vol. X, Ed. D. B. Horn and M. Ransome; "Lord Chatham and America," by O. A. Sherrard; "The Boer War," by Edgar Holt; "Business and Politics under James I," by R. H. Tawney; "The Celts," by T. G. E. Powell; "Charles V," by Gertrude von Schwarzenfeld; "The Decipherment of Linear B," by John Chadwick; "The Excavations at Qumran," by J. Van der Poeg; "The Generalship of Alexander the Great," by J. F. C. Fuller; "George III and the Historians," by Herbert Butterfield; "Germany and the Revolution in Russia, 1915–1918," by Z. A. B. Zeman; "King Mob," by Christopher Hibbert; "The Megalith Builders of Western Europe," by Glyn E. Daniel; "My Dearest Louise: Marie Louise and Napoleon, 1813–1814"; "The Prehistory of European Society," by Gordon Childe; "Roman History from Coins," by Michael Grant; "The Sicilian Vespers," by Sir Steven Runciman; "Soviet American Relations: The Decision to Intervene," by George F. Kennan; "War and Society in the 17th Century," by Sir George Clark; Survey of International Affairs: "The Eve of War, 1939" and "The Initial Triumph of the Axis," Ed. Arnold J. and Veronica M. Toynbee; "Lord Chatham and America," by O. A. Sherrard; "Arnhem," by Maj.-Gen. R. E. Urquhart; "The Business of War," by Sir John Kennedy; "Evidence in Camera," by Constance Babington Smith; "The Knights of Bushido," by Lord Russell of Liverpool; "Operation Sea Lion," by Ronald Wheatley; "The Blitz," by Constantine Fitzgibbon; "Jutland," by Donald MacIntyre.

Travel

"The Crossing of Antarctica," by Sir Vivian Fuchs and Sir Edmund Hillary; "Aku-Aku," by Thor Heyerdahl; "The First Ascent of Mont Blanc," by T. Graham and Sir Gavin de Beer; "High Arctic," by Mike Banks; "Journey to Java," by Sir Harold Nicolson; "Mischief in Patagonia," by H. W. Tilman; "Noone of the Ulu," by Dennis Holman; "As Far as my Feet Will Carry Me," by J. M. Bauer; "Below the Tide," by Penelope Tremayne; "Blackwater," by H. L. Tredree; "Portrait of a Wilderness," by Guy Mountfort; "Portugal," by Roy Campbell; "A Reed Shaken by the Wind," by Gavin Maxwell; "We Come from the Sea," by Hans Hass; "The White Desert," by Noel Barber; "The Marches of El Dorado," by Michael Swan; "The White Men Sang," by Alexander Fullerton; "The Bernese Oberland," by Sir Arnold Lunn; "The Land of Stones and Saints," by Frances Parkinson Keyes; "Malta," by Sacheverell Sitwell.

Miscellaneous

"Selected Speeches, 1948–1955," by H.R.H. Prince Philip, Duke of Edinburgh; "The Bayeux Tapestry," Ed. Sir Frank Stenton; "Platero and I," by Juan Ramón Jiménez; "Big Sur and the Oranges of Hieronymous Bosch," by Henry Miller; "Zoo Quest for a Dragon," by David Attenborough; "The British Museum," by Geoffrey Grigson; "Parkinson's Law," by C. Northcote Parkinson; "I Chose Caviar," by Art Buchwald; "The Hidden Persuaders," by Vance Packard; "Everyman's Dictionary of Literary Biography," Ed. D. C. Browning; "Greece in Colour"; "The Picture History of Painting"; "Essays in Appreciation," by Bernard Berenson; "The Art of Cricket," by Sir Donald Bradman; "The Way of the Tumbrils," by Sir John Elliot; "Sweet and Twenties," by Beverley Nichols.

BOOK CLUBS

The following Book Clubs were registered with the Publishers Association in 1958:—

FOYLE (W. & G.) LTD., 121 Charing Cross Road, W.C.2.
- The Book Club.
- Catholic Book Club.
- Children's Book Club.
- Garden Book Club.
- Quality Book Club.
- Romance Book Club.
- Scientific Book Club.
- Thriller Book Club.
- Travel Book Club.
- Western Book Club.

HANSOM BOOKS LTD., 21 Lower Belgrave Street, Buckingham Palace Road, S.W.1.
- Seven Arts Book Club.

HUTCHINSON & CO. (PUBLISHERS) LTD., 178 Great Portland Street, W.1.
- Beaver Club.
- Mystery Book Guild.
- Universal Book Club.
- Valentine Romance Club.

ODHAMS PRESS LTD., 67–68 Long Acre, W.C.2.
- Companion Book Club.
- *Herald Sun* Readers' Book Club (Australia).
- Popular Book Club.

PHOENIX HOUSE LTD., 38 William IV Street, W.C.2.
- Jazz Book Club.
- Science-Fiction Book Club.
- Country Book Club.
- Readers Union Book Club.
- Sportsman's Book Club.

REPRINT SOCIETY LTD., 22 Golden Square, W.1.
- World Books.

S.C.M. PRESS LTD., 56 Bloomsbury Street, W.C.1.
- The Religious Book Club.

Principal Book Publishers and Their Addresses

More than 3,700 firms, individuals and societies have published one or more books in recent years. The list which follows is a selective one comprising, in the main, those firms whose names are most familiar to the general public. An interleaved list containing over 2,000 names and addresses is available, price 5*s*. *od*. post free, from the publishers of "Whitaker."

Abelard-Schuman, 38 Russell Sq., W.C.1.
Aberdeen University Press, Aberdeen.
Adprint, 37 Hertford St., W.1.
Allan (Ian), Craven House, Hampton Court, Sy.
Allen (W. H.), 43 Essex St., W.C.2.
Allen & Unwin, 40 Museum St., W.C.1.
Allenson & Co., 33 Store St., W.C.1.
Allman & Son, 17 Creechurch Lane, E.C.3.
Amalgamated Press, Fleetway House, E.C.4
Angus & Robertson, 105 Gt. Russell St., W.C.1.
Architectural Press, 9 Queen Anne's Gate, S.W.1.
Arco, 10 Fitzroy St., W.1.
Arnold (E.), & Co., 41 Maddox St., W.1
Arnold (E. J.) & Son, Butterley St., Leeds.
Arrowsmith, Winterstoke Rd., Bristol.
Athlone Press, 2 Gower St., W.C.1.
Bagster (S.), 4 New Bridge St., E.C.4.
Baillière, Tindall & Cox, 8 Henrietta St., W.C.2.
Barker (Arthur), 30 Museum St., W.C.1.
Barrie Books, 3 Clement's Inn, W.C.2.
Bartholomew & Son, 12 Duncan St., Edinburgh.
Batsford, 4 Fitzhardinge St., Portman Square, W.1.
Bell (Geo.) & Sons, 6 Portugal St., W.C.2.
Benn (Ernest), 154 Fleet St., E.C.4.
Black (A. & C.), 4 Soho Sq., W.1.
Blackie, Glasgow, and 16 William IV St., W.C.2.
Blackwell (Basil), 49 Broad St., Oxford.
Blackwood, Edinburgh and 1–8 Bateman's Bldgs., W.1.
Blandford Press, 16 West Central St., W.C.1.
Bles (Geoffrey), 52 Doughty St., W.C.1.
Boardman (T. V.), 37 Hertford St., W.1.
Bodley Head, 10 Earlham St., W.C.2.
Bowes & Bowes, 42 Gt. Russell St., W.C.1.
Brockhampton Press, Corridor Chambers, Market Place, Leicester.
Brown, Son & Ferguson, 52 Darnley St., Glasgow.
Browne & Nolan, 41 & 42 Nassau St., Dublin.
Brython Press, 9 Hackins Hey, Liverpool.
Burke Pub. Co., 55 Britton St., E.C.1.
Burns, Oates & W., 28 Ashley Place, S.W.1.
Burrow (Ed. J.), Imperial House, Cheltenham.
Business Dictionaries, 133–137 Fetter Lane, E.C.4.
Butterworth & Co., Bell Yard, W.C.2.
Calder (John), 17 Sackville St., W.1.
Cambridge Univ. Press, 200 Euston Rd., N.W.1. and Cambridge.
Cape (Jonathan), 30 Bedford Square, W.C.1.
Carey Kingsgate Press, 6 Southampton Row, W.C.1.
Cassell & Co., 35 Red Lion Sq., W.C.1.
Caxton Publishing Co., 25–26 St. George St., W.1.
Chambers (W. & R.), 11 Thistle St., Edinburgh.
Chapman & Hall, 37–39 Essex Street, W.C.2.
Chatto & Windus, 40–42 William IV St., W.C.2.
Children's S.S.M., 5 Wigmore St., W.1.
Christophers, 40 William IV St., W.C.2.
C.M.S., 6 Salisbury Square, E.C.4.
Churchill (J. & A.), 104 Gloucester Place, W.1.
Clark (T. & T.), 38 George St., Edinburgh.
Clarke (Jas.) & Co., 33 Store St., W.C.1.
Cleaver-Hume Press, 31 Wright's Lane, W.8.
Clonmore & Reynolds, 29 Kildare St., Dublin.
Clowes (Wm.), Little New Street, E.C.4.
Collingridge, 2–10 Tavistock St., W.C.2.
Collins, Sons & Co., 14 St. James's Place, S.W.1.
Constable & Co., 10 & 12 Orange St., W.C.2.
Country Life, 2–10 Tavistock St., W.C.2.
Cresset Press, 11 Fitzroy Square, W.1.
Dakers (Andrew), Spring House, Spring Place, N.W.5.
Davies (Peter), 38 Bedford Sq., W.C.1.
Davis (R. Hart-), 36 Soho Square, W.1.

BOOK PRODUCTION AND BOOK EXPORTS

Figures issued by The Publishers Association (based on information supplied to its Chartered Accountant by individual publishers) show a marked increase in book exports since the outbreak of war in 1939. The totals for the years 1946 to 1957 are shown below :—

Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.
1946.....	£26,961,622	£6,715,212
1947.....	30,203,763	7,412,905
1948.....	33,241,431	8,739,236
1949.....	34,297,252	9,798,838
1950.....	37,158,652	11,394,220
1951.....	41,553,760	13,740,323
1952.....	£42,790,387	£14,482,036
1953.....	44,892,291	15,566,874
1954.....	46,270,953	16,527,054
1955.....	49,439,087	18,156,084
1956.....	56,659,484	20,870,594
1957.....	60,456,095	22,505,440

BOOKS PUBLISHED IN GREAT BRITAIN IN 1957

This Table, from *The Bookseller* of January 4th, 1958, shows the books published in 1957 with the number of new editions, translations and limited editions.

Books and pamphlets priced at less than 6*d.* have been omitted, as are also all Government publications except the more important issued by H.M. Stationery Office.

COPYRIGHT

The Government Department dealing with literary and artistic Copyright is the *Industrial Property Department, Board of Trade*, 25 Southampton Bldgs., London, W.C.2.

Subject to the provisions of the Copyright Act, 1956, in full effect from June 1, 1957, copyright subsists automatically without registration in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. Libraries entitled to receive free copies of books published in the United Kingdom, are the British Museum, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a *new* Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 10*s.* for a Book, or a Fine Art; certified copies 10*s.* in either case. The fee for a search is 5*s.*

MUSIC AND OPERA OF 1957–58

(1957) **Oct. 1.** The City of Birmingham Symphony Orchestra under its new conductor, Andrzej Panufnik, gave the first performance of Edmund Rubbra's seventh symphony. **7.** At a concert in the Festival Hall by the St. Paul's Cathedral Choir, a new *Festival Gloria*, by Edmund Rubbra, dedicated to the choir, was sung. **8.** Rubbra's seventh symphony was introduced to London by the City of Birmingham Symphony Orchestra at a Festival Hall concert. **9.** The first concert of the Royal Philharmonic Society's season, at the Festival Hall, was devoted to works by Vaughan Williams, whose eighty-fifth birthday took place three days later. **26.** At the annual brass band championship at the Albert Hall the first piece was a new set of variations specially composed by Vaughan Williams, who presented the awards to the prize-winners at the evening concert. **28.** The winter season at the Royal Opera House opened with a new production of *Aida* with new scenery. **30.** In a B.B.C. concert at the Festival Hall, conducted by Rudolf Schwarz, *The Bermudas*, a new symphonic cantata by Iain Hamilton, specially commissioned by the B.B.C., was performed.

Nov. 1. Karl Rankl's fifth symphony was heard for the first time in London, being played by the London Symphony Orchestra in an Albert Hall concert, with the composer himself as conductor. **5.** Performance of the B minor Mass by the Bach Choir at the Festival Hall. **19.** The Royal Philharmonic Orchestra gave the first of two concerts at the Festival Hall under the direction of Rafael Kubelik. Concert given at St. James's Church, Piccadilly, to inaugurate the work of the Schubert Society. **26.** Annual St. Cecilia's Festival Concert at the Festival Hall. The B.B.C. Concert Orchestra (under Vilem Tausky) and the B.B.C. Chorus took part and trumpeters of the Royal Military School of Music played fanfares by Bliss and Malcolm Arnold. **27.** Artur Rubinstein played concertos by Schumann and Saint-Saëns with the B.B.C. Symphony Orchestra, under Rudolf Schwarz, at a Festival Hall concert.

Dec. 2. The Royal Liverpool Philharmonic Orchestra visited the Festival Hall and gave the first performance of Malcolm Arnold's third symphony. **3.** The Paris Radio Orchestra made its first appearance at the Festival Hall in the first of two concerts conducted by Jean Martinou.

(1958) **Jan. 16.** Poulenc's opera *The Carmelites* given its first English performance, being sung in an English version at the Royal Opera House. **22.** Shostakovich's eleventh symphony in G minor received its first performance outside Russia at a B.B.C. concert in the Festival Hall. **17.** The Hallé Orchestra under Sir John Barbirolli gave a concert in the Festival Hall in the week of the Orchestra's centenary. Included in the programme were Weber's overture to *Der Freischütz*, played at the opening concert in January, 1858, and Vaughan Williams' recent eighth symphony, dedicated to the Hallé Orchestra and Sir John Barbirolli. **40.** The Hallé Orchestra Centenary Concert took place in the Free Trade Hall, Manchester, in the presence of the Princess Royal. A season of Italian opera opened at Drury Lane.

Feb. 5. Michael Tippett's second symphony, commissioned by the B.B.C., received its first performance at a B.B.C. concert at the Festival Hall, conducted by Sir Adrian Boult. **10.** A cantata written by Edmund Rubbra for the Lourdes Centenary celebrations was performed simultaneously in six centres in the country, including the Albert Hall. **10.** The annual performance of Elgar's *Dream of Gerontius* was given by the Royal Choral Society at the Albert Hall, with William Herbert, James Milligan and Marjorie Thomas as soloists. **20.** Harry Blech and the London Mozart Players gave the first London performance of a new sinfonietta by Gordon Jacob at a New Era Concert Society programme at the Festival Hall. **25.** Beethoven's Mass in D was performed at the Festival Hall by the Bach Choir and the London Symphony Orchestra under Reginald Jacques. The soloists were William Herbert, Owen Brannigan, Norma Procter and Jacqueline Delman.

March 4. Yehudi Menuhin played in the first of two concerts at the Festival Hall with the Royal Philharmonic Orchestra under the Hungarian conductor László Somogyi. **12.** Berlioz' *The Damnation of Faust* performed in a B.B.C. concert at the Festival Hall by the B.B.C. Orchestra and Choral Society under Sir Malcolm Sargent, with Richard Lewis, James Milligan, Owen Brannigan and Joan Hammond as soloists. **20.** The Royal Choral Society, conducted by Sir Malcolm Sargent, sang the *St. Matthew Passion* at the Albert Hall, the soloists being Hervey Alan, Richard Lewis, John Cameron, Erna Spoorenberg and Pamela Bowden. **26.** Concluding concert of the B.B.C. series at the Festival Hall.

April 2. The first performance of Vaughan Williams' ninth symphony, dedicated to the Royal Philharmonic Society, was given at the Society's concert at the Festival Hall, with Sir Malcolm Sargent as conductor. The summer opera season opened at Covent Garden with a performance of *Aida*. **3.** Claudio Arrau was the soloist in Grieg's A minor piano concerto at a Festival Hall concert in which the Philharmonia Orchestra played under the American conductor, Thomas Schippers. Two days later the pianist played Schumann's piano concerto and Brahms' B flat major concerto at the Albert Hall. **27.** Yehudi Menuhin played Mendelssohn's and Brahms' violin concertos at the Albert Hall with the London Symphony Orchestra, conducted by Sir Malcolm Sargent.

May 12. The Philadelphia Orchestra, conducted by Eugene Ormandy, played at the Festival Hall. **15.** The hundredth anniversary of the present Covent Garden Theatre was commemorated by a special performance of Verdi's *Don Carlos*. **29.** The Bath Festival opened with a concert in Bath Abbey, given by the London Philharmonic Orchestra, conducted by Colin Davis. Yehudi Menuhin was the soloist in Beethoven's violin concerto. Later during the Festival, the London Philharmonic Orchestra played in another concert, in the Guildhall, with Ingrid Haebler as soloist in Beethoven's piano concerto, and Rosalyn Tureck gave a Bach recital. The Festival ended on June 7 with a performance in the Abbey of Bach's Mass in B minor by the City of Bath Bach Choir under its conductor, Cuthbert Bates. **31.** Dietrich Fischer-Dieskau gave a recital of Brahms' songs at the Festival Hall.

June 3. The London Symphony Orchestra's series of Beethoven concerts at the Festival Hall under Josef Krips ended with a performance of the ninth symphony with the Alexandra Choir, and, as soloists, Owen Brannigan, Richard Lewis, Jennifer Vyvyan and Norma Procter. **5.** New production of *Tristan und Isolde*, sung in German, at Covent Garden. **8.** At the Festival Hall, Yehudi Menuhin, with the Festival Chamber Orchestra, performed Bach and Mozart concertos. **10.** Excerpts from six operas were given at a gala performance at Covent Garden, in the presence of the Queen and the Duke of Edinburgh, to mark the centenary of the building. **15.** Artur Rubinstein gave a recital at the Festival Hall. The young

American pianist, Van Cliburn, played the Tschaikowsky B flat minor and Rachmaninov D minor concertos at the Albert Hall with the London Philharmonic Orchestra under the Russian conductor, Kiril Kondrashin. **17.** The Bach Choir and London Symphony Orchestra, with Reginald Jacques as conductor, William Herbert, Hervey Alan and Norma Procter as soloists, performed Elgar's *Dream of Gerontius* in the Festival Hall. **18.** Benjamin Britten's new "Musical Mystery Play", *Noye's Fludde*, was produced in Orford Church during the Aldeburgh Festival. **24.** Yehudi Menuhin and his sister Hephzibah Menuhin gave a sonata recital together at the Festival Hall. **25.** A new commissioned concertino for viola by Alan Hoddinott was performed at Llandaff Cathedral Festival with Cecil Aronowitz as soloist. During the Festival, the Hallé Orchestra appeared, Jeanne Demessieux gave an organ recital and Handel's *Esther* was performed with William Herbert, Hervey Alan, Wilfred Brown, Helen Watts and April Cantelo as soloists.

July 2. The Piccolo Teatro di Milano opened a short season at Sadler's Wells with a performance of Goldini's *The Servant of Two Masters*. **11.** At the fourteenth Cheltenham Festival, a string serenade by Martelli and part of Simpson's third string quartet were played for the first time. **14.** The Buenos Aires Chamber Opera began a short season at Sadler's Wells. **15.** The Hallé Orchestra under Sir John Barbirolli played a new piano concerto at Cheltenham written by the young Australian composer Malcolm Williamson. **16.** A harp concerto, written by Alan Hoddinott for Osian Ellis, was performed by the latter at Cheltenham at its first hearing. **17.** Mátyás Sieber's concerto *Tre Pizzi* for 'cello and orchestra was played at Cheltenham for the first time in England. **18.** The last concert of the Cheltenham Festival included the first performance of a concerto for *cor anglais* and orchestra by Ian Parrott. Roger Winfield was the soloist. **19.** The opera season at Covent Garden ended, Rafael Kubelik making his last appearance as musical director of the company. **22.** Gian Carlo Menotti's madrigal fable *The Unicorn, the Gorgon and the Manticora* was produced by the New Opera Company at Sadler's Wells in a double bill with Stravinsky's *The Soldiers Tale*. **26.** First night of the Promenade Concerts at the Albert Hall; Sir Malcolm Sargent conducted the B.B.C. Symphony Orchestra and Benno Moiseiwitsch was the soloist in Rachmaninov's *Rhapsody on a Theme of Paganini*. **29.** New Opera Company produced Vaughan Williams' opera *Sir John in Love* at Sadler's Wells. **30.** The Promenade Concert took the form of a Sibelius memorial programme.

August 5. Vaughan Williams' ninth symphony was performed for the first time at a Promenade Concert, in the presence of the composer. **7.** Carl Orff's *Carmina Burana* received its first performance at a Promenade Concert, with the B.B.C. Chorus and Choral Society, a section of the Highgate School Choir and the London Symphony Orchestra under Basil Cameron, with John Hauxwell, Andrew Pearmain and April Cantelo as the soloists. **10.** Paul Robeson gave a song recital at the Albert Hall. **19.** Sir Malcolm Sargent conducted the B.B.C. Symphony Orchestra, the B.B.C. Choir and the Royal Choral Society in Verdi's *Requiem* at a Promenade Concert. **25.** The Hallé Orchestra, in its centenary year, performed during the week at Promenade Concerts under Sir John Barbirolli. **Aug. 25–Sept. 13.** Edinburgh Festival. During the Festival the Stuttgart State Opera produced four German operas at the King's Theatre—Mozart's *Die Entführung*, Weber's *Euryanthe*, Wagner's *Tristan und Isolde* and Lortzing's *Der Wildschütz*. Orchestral music was provided at the Usher Hall by the Philharmonia Orchestra, the Royal Danish Orchestra (making its first appearance at Edinburgh and accompanied by the Royal Danish Chapel Choir), the Royal Opera House Orchestra from Covent Garden and the Vienna Symphony Orchestra under Josef Krips. The Philharmonia Orchestra gave the opening Beethoven concert under Dr. Klemperer and was later also conducted by Ernest Ansermet and Wolfgang Sawallisch. The Royal Danish Orchestra and Royal Danish Chapel Choir took part in a performance of Haydn's *Creation* conducted by the Danish choral expert Mogens Wöldike, which included Nicolai Gedda, Kim Borg and Jennifer Vyvyan among the soloists. Among the orchestras providing chamber music were the Vegh String Quartet, the Juilliard Quartet and the Pasquier Trio, and Louis Kentner and Claudio Arrau gave recitals. The Montreal Bach Choir also took part in the Festival.

Sept. 5. First performance in England of Shostakovich's piano concerto, op. 101, given at a Promenade Concert with Eileen Joyce as soloist and the B.B.C. Symphony Orchestra under Sir Malcolm Sargent. The concerto was written for the composer's son, who was the soloist at its *première* in Moscow on his nineteenth birthday in May, 1957. **7.** The Three Choirs Festival opened at Hereford with a service in the cathedral, at which the music included Vaughan Williams' cantata *The Hundredth Psalm*. In the evening Fernando Germani gave an organ recital. **8.** The Three Choirs Festival continued with a performance of Berlioz' *Te Deum* and Britten's *Sinfonia da Requiem* and *St. Nicolas*, conducted by the composer. **9.** Dr. Vaughan Williams was specially commemorated at the Three Choirs Festival by the singing of his anthem *How Amiable*, before the performance of Elgar's *The Kingdom*, with Gordon Clinton, David Galliver, Helen Watts and Elsie Morison as soloists. In the evening, Verdi's *Requiem* was preceded by a cantata by Kenneth Leighton, *The Light Invisible*. **10.** At the Three Choirs Festival, Monteverdi's *Vespers* was sung in the afternoon and a new oratorio, *Genesis*, by Franz Reizenstein (with libretto by Christopher Hassall), together with Poulenc's *Stabat Mater* in the evening. **11.** In the afternoon at Hereford, the City of Birmingham Orchestra provided an orchestral concert. The main choral performances were of Elgar's *Dream of Gerontius* and Haydn's *St. Cecilia's Mass*. **12.** The programme on the last day of the Three Choirs Festival included a little-known Requiem Mass by the early French composer, Jean Gilles. Geoffrey Bush's first symphony received its first London performance at a Promenade Concert. **13.** The second half of the Promenade Concert was devoted to Puccini, whose centenary fell later in the year, the programme comprising two intermezzi from *Madame Butterfly* and *Manon Lescaut* and the complete last act of *Tosca*. **17.** Gunnar Staern, a young Swedish conductor, appeared with the London Philharmonic Orchestra at a Promenade Concert. **18.** The National Symphony Orchestra of Mexico played at the Festival Hall, the programme consisting entirely of contemporary Mexican music. **19.** The funeral service of Dr. Ralph Vaughan Williams in Westminster Abbey was preceded by a musical commemoration which included passages from his own works and Bach's D minor double concerto. The autumn season at Covent Garden opened with a production of *Das Rheingold*, the cast including Hans Hotter, Otakar Kraus, Richard Holm and Rut Siewert. **20.** The Promenade Concert season ended with the customary last night music and celebrations.

DRAMATIC SUMMARY, 1957–1958

From the box-office point of view the theatrical event of the year was the production at Drury Lane of *My Fair Lady*, the musical version of Bernard Shaw's *Pygmalion*, which proved as great a success in London as it had done in the United States. Another "classic" of the not too distant past given a new musical look was *Charley's Aunt*, which under the name of *Where's Charley?* also won public favour. Of greater artistic value were T. S. Eliot's new play, *The Elder Statesman*, which had provided a feature for the Edinburgh Festival, and the translation by Christopher Fry of a Giraudoux play, *Duel Of Angels*. Other successes of the year included *Flowering Cherry*, by Robert Bolt, *The Party*, by Jane Arden, *Not In The Book*, by Arthur Watkyn, and *Simple Spymen*, by John Chapman, while Agatha Christie, who achieved the record long British run with *The Mousetrap* during the year, had a second success with *The Unexpected Guest*. Shakespeare was again well represented at the Old Vic and the Open Air Theatre in Regent's Park, and among many interesting visiting companies was the Moscow Arts Theatre.

The following is a list of productions between Oct. 1, 1957, and Sept. 30, 1958:—

ADELPHI, Strand, W.C.2.—(1958) *May* 20. *Simply Heavenly*, musical play by Langston Hughes and David Martin (Melvin Stewart, Ilene Day, Bertice Reading and Marpessa Dawn). *Sept.* 10. *Auntie Mame* (Geoffrey Toone, David Bird, John Hall, Beatrice Lillie and Florence Desmond).

WIRELESS DEVELOPMENTS AND BROADCASTING, 1957–58

NEW B.B.C. TELEVISION STATIONS

With the opening during the year of several more B.B.C. television stations, the B.B.C. Service became available to virtually the whole population of Great Britain and Northern Ireland. On December 18, 1957, the new transmitting station on Sheriffs Mountain, near Londonderry, came into operation, bringing B.B.C. television within reach of more than 130,000 people in an area of Northern Ireland, mainly in Co. Derry and Co. Tyrone, which included Londonderry, Strabane, Newtown Stewart, Dungiven and Limavady, and also providing television for a large number of viewers in the Republic of Ireland. It was estimated that the Belfast and Londonderry stations together would cover 96 per cent. of the population of Northern Ireland.

In the same month permanent B.B.C. transmitters were opened at Sandale, near Wigton, in Cumberland and at Douglas, Isle of Man, both replacing low-power stations and on March 20, the B.B.C. announced that low-power stations were to be set up at Swingate, near Dover, and in Folkestone. The temporary station at Swingate would come into service on April 21, and the Folkestone station, using a satellite transmitter of a new type, would be ready a few months later.

In addition to new stations, the effective power of the Crystal Palace station was approximately doubled in December, 1957, and the signal strength increased by about 40 per cent., the aerial henceforward radiating on full power, after a temporary aerial had been in use since the opening of the station in March, 1956. The B.B.C. said that the increase would benefit viewers in the fringes of the service area where reception was liable to interference and that a large proportion of the 15,000,000 people within range of the station should get better pictures.

In August, 1958, the B.B.C. announced future television plans for East Anglia and the East Midlands. A permanent television link would connect Birmingham with the Norwich station and a new station would be built at Peterborough. Eventually the link would be two-way, so that programmes from East Anglia could be fed into the national programme. During 1959, the B.B.C. intends to instal television cameras in its Norwich studios and to transmit a daily news service for East Anglia in a ten-minute news bulletin each evening from Monday to Friday.

COLOUR TELEVISION

In October, 1957, the B.B.C. started a further six months' series of experimental colour television transmissions. The material, which included live studio productions and films, was transmitted outside normal programme times from the Crystal Palace station on Channel 1.

In June, the B.B.C. issued a report on the situation disclosed by its colour television tests to date. The report said that after extensive research, and with the co-operation of some British radio manufacturers, using principally the American N.T.S.C. system, adapted to the 405-line standard used in this country, it was considered that the technical performance of the system was adequate for the launching of a colour television system in the frequency bands at present in use. The B.B.C. said that further experiments with the system would be carried out and that there were still many problems to be solved before colour television could become part of the broadcasting service, the first requirement from the public point of view being the production of a reasonably priced and reliable colour television set.

It was further stated that colour television transmissions in Bands IV and V, using experimentally the 625-line standard, would be started in collaboration with the radio industry.

SCOTTISH V.H.F. PROGRAMMES

Mr. Andrew Stewart, B.B.C. Controller in Scotland, described a new departure in sound broadcasting for Scotland which was to take place during the year. It consisted of localized programmes on V.H.F., comprising a weekly newsletter, a monthly topical magazine and news of local sport, totalling 30 minutes a week, to be broadcast from Rosemarkie, Ross and Cromarty, Meldrum, Aberdeenshire and Sandale, Cumberland. Mr. Stewart also said that a station would later be installed to cover the Orkneys and Caithness on V.H.F. and that television time for Scotland would be increased to about four hours a week.

TELEVISING BY-ELECTIONS

The televising of short programmes during a by-election campaign took place during the Rochdale by-election in February. The programmes, which took place under I.T.A. on the Granada network, included interviews with all three candidates, Conservative, Labour and Liberal, after they had all agreed to participate. The Conservative Central Office obtained counsel's opinion to the effect that the proposals were legal under Section 63 of the Representation of the People Act provided that the individual programmes were balanced in accordance with the provisions of the Television Act, 1954. At the Kelvingrove by-election in March, the B.B.C. and the I.T.A. collaborated in covering the contest, the B.B.C. thus taking part in television of a by-election campaign for the first time. In agreement with the Conservative, Labour and Independent Labour Parties and the Independent Liberal candidate, several programmes were produced at which the candidates appeared before an estimated 1,000,000 Scottish viewers.

STEREOPHONIC SOUND EXPERIMENTS

In January the B.B.C. made experiments in stereophonic sound transmission, whereby two separate transmitting and receiving channels are used in such a way that when they are connected to two loud-speakers near to one another, an impression of three-dimensional sound is conveyed. The experiment was conducted from the medium-wave Home Service transmitter at Brookman's Park, the V.H.F. Home Service and Third Programme transmitters at Wrotham and the television sound transmitter at Crystal Palace, and was carried out after the sound and television services had closed down. The sound of a train entering a station was broadcast and gave the impression of the train coming in at one side of the room and leaving at the other, and a test with an orchestra and singers gave the impression that they were on opposite sides of the room. The B.B.C. first experimented with stereophonic sound transmission as long ago as 1926, when a concert was broadcast from Covent Garden. Reports on the recent tests confirmed that with properly adjusted receiving equipment the transmissions would give extremely good results, adding to the fidelity of music and creating a three-dimensional impression of sound. It was stated, however, that though the B.B.C. might decide to broadcast an occasional concert in this way, there was no immediate likelihood of the system being used regularly.

TAPE-RECORDED TELEVISION

On April 7, Sir Harold Bishop, the B.B.C. Director of Engineering, gave a demonstration of the Vision Electronic Recording Apparatus (known as Vera), which had been developed during the last few years, whereby television programmes, like sound programmes, could be recorded on magnetic tape. At the demonstration, a complete broadcast in vision and sound was reproduced on a television screen by Vera within one minute. A B.B.C. representative said that the reproduction would have taken three or four hours by the ordinary method of filmed tele-recording and that the new system would be particularly advantageous for news items, outside broadcasting and talks. Moreover, it produced good results, having none of the disadvantages of using a film camera, since a film was expensive, could only be used once and was liable to produce distortion.

The B.B.C. offered full information about the equipment to British manufacturers for its commercial production. It was stated that a method of television recording on magnetic tape was in use in the United States, but that the running cost of the British equipment, about £85 an hour, was only about a third of that used in America and the capital cost was also much less. Sir Harold Bishop said that there was no fundamental reason why Vera could not be used for recording colour television when that was in service.

LONGER SOUND BROADCASTING HOURS

From September 28, the B.B.C. provided six and a half hours more sound broadcasting time a week. Two hours, cut from the Third Programme on Saturdays the previous year, were restored and the Home Service remained on the air for half an hour after the 11 p.m. news bulletin to broadcast music. Announcing the new arrangements, B.B.C. spokesmen said that instrumental music of many different kinds, almost all of it familiar, would be presented at nights. On weekdays the Home Service would begin at 6.45 a.m. instead of 6.25 and the Light Programme at 6.30 a.m. instead of 7. There would be an additional "Lift up your Hearts" programme at 6.50 a.m. for those who had to leave home early. It was stated that the existing audience for "Lift up your Hearts" was nearly three million and that in the early morning the radio was being used by more and more people, who would benefit by the new arrangements. As a result of various economies it had been found possible to finance the increased hours without any addition to the B.B.C. budget for sound broadcasting.

DISTRIBUTION OF WIRELESS LICENCES

An interesting appendix to the B.B.C.'s annual report showed the distribution of wireless licences in Great Britain and Northern Ireland on March 31, 1958. The total number of licences extant in the London Region was 4,156,296 or 92·49 per 100 families, including 2,357,646 combined wireless and television licences or 52·46 per 100 families. The corresponding figures for other parts of England were: West Region, 1,337,566 licences (95·09 per 100 families); 660,872 combined licences (47·43): Midland Region, 2,533,298 (94·42 per 100 families); 1,485,804 combined licences (55·38): North Region, 4,343,933 (91·71 per 100 families); 2,521,473 combined licences (53·23). The figures for other parts of the United Kingdom were: Scotland, 1,303,702 (85·82 per 100 families); 600,227 combined licences (39·51): Wales, 706,410 (86·31 per 100 families); 378,491 combined licences (46·24): Northern Ireland, 265,415 (60·88 per 100 families); 85,490 combined licences (19·63). The grand total for the United Kingdom was 14,646,350 (91·08 per 100 families), including 8,090,003 combined licences (50·31 per 100 families).

I.T.A. DEVELOPMENTS

Southern Television, operated from the new television centre at Southampton, and described as the first truly local television station in Britain, began to broadcast on August 30. The programmes are transmitted from the I.T.A. mast at Chillerton Down in the Isle of Wight and reach some 2,750,000 people in a crescent-shaped area roughly bounded by Weymouth in the west, Newbury in the north and Brighton in the east. Fifteen to twenty per cent. of the programmes are to originate from Southampton and it is the aim of those responsible to impart a strong regional emphasis into these broadcasts.

The chief engineer of I.T.A. said that during test transmissions from Chillerton Down before the service started, it was finally established that a third network could be accommodated in the same wave band, Band 3, which was being used for commercial programmes, and that existing sets could receive such a programme with only minor adjustments.

I.T.A.'s future intentions in other parts of the country were described at the same time. The Authority hoped to bring its North-East England station into service in January, 1959, and to complete stations for South-East England, Northern Ireland and East Anglia by the end of 1959. Later, local services would be provided in South-West England, North-East Scotland and the Carlisle area. These services were expected to be in operation by the end of 1960, by which time 96 per cent. of the population of the United Kingdom would be covered by commercial television.

The acceptance by the I.T.A. of programme contractors for the North-East England and East Anglia stations had previously been announced. In the North-East a group had been formed by the *News Chronicle*, Messrs. George and Alfred Black, the impresarios, and Mr. Sidney Box, the film producer, with Sir Richard Pease as Chairman. The station for the area is to be built at Burnhope, about 5 miles south-east of Consett, Co. Durham, and will cater for 2,500,000 people, including those in the industrial areas of the Tyne, Wear and Tees. The East Anglian station will be built at Mendlesham in Suffolk. The group providing the programmes has been formed in East Anglia under the chairmanship of the Marquess Townshend. It will have headquarters and studios in Norwich and a majority of East Anglian shareholders, including a number of local newspaper companies.

At a press reception on June 30, Sir Ivone Kirkpatrick, who during the year became chairman of I.T.A. in succession to Sir Kenneth Clark, said that the television programme companies would spend £100,000 a year on patronage of the arts. Each company would decide its own allocations but a co-ordinating committee would be set up to see that the donations of the individual companies did not overlap. Associated Television, Limited, said that they themselves would be distributing £21,000 during the first year, divided between London and the Midlands and with a special emphasis on the theatre. The largest single donation was of £2,000 to a fund to be shared by the R.A.D.A., the Central School of Speech and Drama and the London Academy of Music and Dramatic Art.

BROADCASTING STATIONS

A select list of broadcasting stations in various Commonwealth and European countries, giving the name of the station and its administration followed by its strength in kilowatts; and (*F.*) wave-lengths in metres followed by frequency in kilocycles per second. Certain details of the stations in foreign countries are drawn from *Nomenclature des stations de radiodiffusion* by permission of the Director-General, International Telecommunication Union.

Independent Television Authority

14 Princes Gate, S.W.7

Set up under the *Television Act*, 1954, the Authority is responsible for the provision of television services and for the control and development of independent television in Great Britain; it owns and operates television stations, transmitting programmes provided by programme companies (*see below*) under contract to the Authority. Independent television is financed from advertising revenue and draws no income from licence fees or from other public funds. The Authority regulates the system under which the programme companies sell time for advertisements and has wide responsibilities for securing proper standards in the programmes. Independent television broadcasting was inaugurated on September 22, 1955, by a programme broadcast from the Authority's station at Croydon.

Transmitters

London (Beaulieu Heights, Croydon) (120 kw.). Vision: 194·74 mc/s. Sound: 191·27 mc/s. Channel 9. *Midlands* (Lichfield, Staffs.) (200 kw.). Vision: 189·75 mc/s. Sound: 186·25 mc/s. ART AND OTHER EXHIBITIONS, 1957–1958

THE AGE OF LOUIS XIV

This year's Royal Academy Winter Exhibition was entitled "The Age of Louis XIV," though it was not strictly confined, chronologically speaking, to the reign of *Le Roi Soleil*, surveying as it did French art in one of its greatest periods, from about 1615 to 1715. The exhibition was arranged by the Franco-British Cultural Commission, in collaboration with *L'Association Français d'Action Artistique*. Paintings predominated, but drawings, sculpture, tapestries, metalwork and book-bindings, though not furniture, were represented. The paintings included works by Georges de la Tour, Nicolas de Largillière, Philippe de Champaigne, Pierre Mignard, Monnoyer, Charles Le Brun, the decorator of Versailles, Nicolas Poussin, Rigaud and Claude, by whom there were also some notable drawings. Among sculpture was a fine marble tomb statue by Jean Dubois and a plaster bust of the King himself, attributed to Antoine Coysevox, which dominated the Central Hall at Burlington House against a background of four Gobelins tapestries from the set of fourteen known as the *Histoire du Roi*. The number of exhibits was smaller than in some recent winter exhibitions but reached a high standard of excellence. The collection was very largely drawn from about 70 of the provincial museums in France, thus demonstrating the remarkable number of works in the first rank, if comparatively little-known, which these museums contain, although some exhibits came from the great national collections, and other paintings were lent by French churches.

BRITISH AND EUROPEAN WATERCOLOURS

An exhibition held at Norwich Castle Museum from December, 1957, to February, 1958, formed the third and last in a series of exhibitions which showed the development of watercolours in this country. In the two previous years the periods from 1750 to 1820 and 1820 to 1870 had respectively been covered, and on this occasion, under the title of "The Modern Movement in British Water-Colour Painting," watercolours of the last ninety years were represented, ranging from the work of Sir George Clausen, who was born in 1852, to young artists of the present day, and including examples by such masters as Wilson Steer, Sargent, Sickert, Paul Nash and John Piper. It was stated that the exhibition aimed to illustrate the links with the earlier periods of British watercolour painting, to emphasize the strong influence from France on British artists since the late nineteenth century and to account for other trends in modern watercolours, with particular regard to the effect which two world wars had had on them.

Another important exhibition of watercolours was opened at the British Museum in June. It was entitled "Eight Centuries of Landscape and Natural History in European Water-Colour, 1180–1920" and was arranged by the Museum's Departments of Prints and Drawings largely from among its own possessions. The exhibition was divided into three sections. The first dealt with early landscape and ranged from miniatures from French and Flemish manuscripts, through such great names as Dürer, Rubens, Van Dyck and Jan Brueghel to Francis Place, one of the earliest English landscape draughtsmen. The second section covered landscape in the last two hundred and fifty years, all the watercolour artists of the English school, as well as of the French Barbizon and Impressionist schools, being well represented. The third section, of Natural History, brought together drawings of plants and animals from the twelfth to the twentieth century, with again fine drawings by Dürer, and, among English artists, by Bewick, J. F. Lewis and Landseer.

MANCHESTER ART TREASURES

A centenary of an unusual kind was marked by an equally unusual exhibition at Manchester in November and December, 1957. The Manchester Art Treasures Exhibition of 1857, which contained no fewer than 16,000 objects of art, including 2,000 paintings, was regarded as one of the outstanding artistic events of its day. To commemorate it, the City of Manchester Art Gallery gathered a collection of "European Old Masters," consisting of some 250 paintings of great distinction. About a third of these, including such works as Van Dyck's *Cupid and Psyche*, lent by Her Majesty the Queen, and Botticelli's *Virgin adoring the Infant Christ*, had been shown in the original 1857 exhibition and were now lent again to the Manchester gallery from public and private collections at home and abroad. The rest were borrowed entirely from British private collections.

CENTENARY EXHIBITIONS

Other commemorative exhibitions during the year included those connected with such diverse occasions as the centenary of the present Covent Garden Theatre and the tercentenary of the death of Oliver Cromwell. The first, which was celebrated on May 15, gave rise to a small exhibition at the Arts Council Gallery in St. James's Square, recording the history of Covent Garden and including not only manuscripts and engravings, but such costumes as that worn by Adelina Patti in *Lucia di Lammermoor*. In September, a loan collection of the chief contemporary portraits of Oliver Cromwell was opened at the National Portrait Gallery. It included several early portraits of Cromwell by Robert Walker, closely imitating Van Dyck, the famous miniature by Samuel Cooper and the equally famous Lely portrait, a marble bust attributed to Edward Pierce, coins and medals by Cromwell's personal medallist, Thomas Simon, and a number of engravings, including Faithorne's of 1658 and a curious set in which, on Van Dyck's equestrian portrait of Charles I, the heads of Charles and of Cromwell were placed in turn in succeeding states of the plate.

The 400th anniversary of the accession of Queen Elizabeth I, which was not celebrated until Nov. 17, was marked by a special exhibition, "The London of Elizabeth I," on view at the London Museum from May till November, and including not only many exhibits from the Museum's permanent collection, but a number of loans. Among the latter, lent by Her Majesty the Queen, were the domestic accounts of the Princess Elizabeth, when she was at Hatfield in 1551 and 1552, a close helmet and gorget for tilting made in the Royal Armoury at Greenwich and lent by Lord Salisbury, and a parcel gilt standing salt of 1599 lent by the Goldsmiths' Company. Other exhibits included the complete costume of an Elizabethan sailor and a legal document with an initial coloured portrait of Elizabeth I in the first year of her reign.

MASTERPIECES FROM YORKSHIRE HOUSES

The late Mr. Ernest Musgrave, Director of the Leeds City Art Gallery and Temple Newsam House from 1946 till his death as the result of a road accident in 1957, was responsible for many years for a "Picture of the Month" scheme, whereby each month a masterpiece from a private house in Yorkshire was lent by its owner for exhibition in the Gallery. In July and August, as a memorial to

Mr. Musgrave, thirty-eight of these pictures were gathered together in an exhibition at Temple Newsam, forming a very noteworthy display.

THE ACADEMY SUMMER EXHIBITION

This year's Academy Summer Exhibition was notable for alterations in the established system of arrangement. The watercolour, architecture and sculpture rooms remained as before, but paintings of contrasting styles were hung together, works of modern tendency being grouped throughout the rooms with the more traditional, instead of being confined, as in previous years, to Galleries VII and VIII. Among such works were three large paintings by John Bratby and two exhibits which were purchased for the Chantrey Bequest, *Flowers on a Chair*, by Adrian Ryan and *The Cockatoos*, by William Roberts, a newly elected A.R.A. Royal portraiture in the Academy included *H.M. the Queen, Captain-General, H.A.C.*, by Anthony Devas and an unfinished portrait of the Duke of Edinburgh by the late David Jagger. Among other portraits which attracted attention were John Merton's study of the Countess of Dalkeith, which received the Academy's "A" award, a conversation-piece by Norman Hepple, *Short Adjournment: Lincoln's Inn Members of the Court of Appeal*, and the same artist's portrait of Sir Dermot Boyle, painted for the R.A.F. College, Cranwell, *Jane LVIII*, by Sir Gerald Kelly, *Tom Chalk*, by Ruskin Spear and portraits of Sir Gerald Templer by James Gunn and Theodore Powys by Augustus John. Sir Winston Churchill contributed four paintings, a still-life, *Oranges and Lemons, March*, 1958, and three landscapes, *Near Breccles*, *The Olive Grove of La Dragonière*, *Cap Martin* and *Menton from La Pausa*, 1957. There was also in the exhibition a bronze head of Sir Winston by David McFall. Among other paintings which should be noted were characteristic works by Stanley Spencer, *In Church*, 1958, and L. S. Lowry, *Countryside*, *Lancashire*, and several fine landscapes by the late Oliver Hall, who had died during the year.

EDINBURGH EXHIBITIONS

As in previous years, the Edinburgh Festival was the occasion of important exhibitions which, after the Festival, were transferred, in whole or in part, to London. At the Royal Scottish Museum, Professor D. Talbot Rice had collected treasures of Byzantine art from many countries of a range not previously seen together in Britain. The exhibition was mainly restricted to work produced at Constantinople, or under its direct influence, between the fourth and seventeenth centuries, and was notable for its splendid ivories and rich miniature mosaics, as well as many mediaeval icons, silverwork and paintings. From October 1, the exhibition was to be seen at the Victoria and Albert Museum.

At the same time, the first full-scale exhibition of paintings and drawings by Sir David Wilkie was shown at the National Gallery of Scotland. The exhibition contained about 120 works covering all phases of the artist's life, from a self-portrait at the age of about 20 to a portrait of the Sultan Abdul Medjid (lent by Her Majesty the Queen) painted at Constantinople the year before his death, which occurred on his way home from the East in 1841. This exhibition was shown at the Royal Academy Diploma Gallery from Oct. 17.

NATIONAL TRUST TREASURES

An exhibition at Christie's from December 31, 1957, to January 26, 1958, in aid of the National Trust, brought together nearly 300 items from 23 houses owned by the Trust. Most of the exhibits were small, consisting mainly either of objects which cannot normally be shown to the public, or which might well be overlooked by visitors. There was much fine furniture and silver but the chief impression was one of remarkable variety, ranging in time from a sculptured head of the nineteenth Egyptian dynasty to an enamelled gold box and gold-mounted jade dish by Fabergé and in material from a silver-gilt cup of 1524 from Charlecote and a Turkish pottery jug from Nostell Priory with English silver mounts of about 1600 to a child's perambulator of 1870 made in the form of a hansom cab. A fan sent from Buscot was reputed to have belonged to Marie Antoinette and there were a snuff-box and a Swiss musical-box from Cliveden left in charge of the British Consul at Genoa by Byron on his departure for Greece in 1822.

RETROSPECT OF SPORT 1957-58

BRITISH EMPIRE AND COMMONWEALTH GAMES

The First Empire and Commonwealth Games were held at Hamilton, Canada, in 1930. These were followed by the IInd Games at London, 1934, the IIIrd at Sydney, 1938 and after World War II, the IVth at Auckland, 1950, and the Vth at Vancouver, 1954.

The VIth Games, the winners of which are given below, were held at Cardiff in 1958. The Sports comprising the Games are: Athletics (men and women), Bowls, Boxing, Cycling, Fencing (men and women), Rowing, Swimming (men and women), Weightlifting and Wrestling. The VIIth Games will be staged in Perth, Australia, in November 1962.

VIth EMPIRE AND COMMONWEALTH GAMES

Held at CARDIFF, July 19–26, 1958

EUROPEAN ATHLETIC CHAMPIONSHIPS

The European Athletic Championships were first held at Turin in 1934 and continued at Paris (1938), Oslo (1946), Brussels (1950), Berne (1954) and Stockholm (1958). At Stockholm there were 24 events for men and 12 for women, and new "Best Performances" were set up in all the events except the 200 metres (men), 200 metres (women), 800 metres and 400 metres hurdles.

BRITISH ATHLETIC RECORDS

British (All-comers') Records are those made by any amateur athlete within the United Kingdom of Great Britain and Northern Ireland. British National records are those made by any British athlete, also within the United Kingdom. Where the latter differ from the former they are given with an asterisk.

MILES UNDER 4 MINUTES

On May 6, 1954, at Oxford, Roger Bannister of Great Britain became the first man ever to run a mile in under 4 minutes. This feat has now been accomplished on 49 occasions, by 21 athletes from different parts of the world. A list of these athletes with the first occasion on which they accomplished the time is given below. There are 5 from Australia and Great Britain, 2 from Hungary and 1 from Belgium, Czechoslovakia, Denmark, Eire, Finland, New Zealand, Poland, Sweden and U.S.A.

THE DERBY, 1948–1958

For particulars of the Derby from 1780–1947 see 1921–48 editions.

The *Distance* of the Derby course at Epsom is 1½ mile. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1886), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G.B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945 a substitute Derby was run at Newmarket. By winning his 5th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

Year	Owner and Name of Winner	Betting	Jockey	Trainer	No. of R'n'rs.
1948	H. H. Aga Khan and M. L. Volterra's My Love (Fr.)	100 to 9	W.R. Johnstone	R. Carver	17
1949	Mrs. M. Glenister's Nimbus P*	7 to 1	E. C. Elliott	G. S. Colling	15

CRICKET

Cricket is played under the "Laws of Cricket" and is governed by the Committee of the Marylebone Cricket Club (1787), Lord's, N.W.1. *Pres.*—Marshal of the Royal Air Force Viscount Portal of Hungerford. *Sec.*, Maj. R. Aird. *Asst. Secs.*, J. G. Dunbar; S. C. Griffith.

County Championships

The first County Championship was in 1873 when Gloucestershire and Nottinghamshire finished equal on points. Yorkshire have won 22 times; Surrey 16; Notts 8; Lancs 8; Middlesex 5; Kent 4; Gloucester 2; Derby 2; Warwick 2; Glamorgan 1; Notts and Lancs tied in 1879 and 1882, and Notts, Lancs and Surrey were all equal in 1889. Middlesex and Yorkshire tied in 1949 and Lancashire and Surrey tied in 1950.

Laws, etc., 1958

Test Selectors for 1958: G. O. Allen (Chairman); L. E. G. Ames; W. Wooller; H. E. Dollery.

County Cricket Reforms.—The alterations in conditions in the County Cricket Championship, adopted experimentally in 1957, were continued for 1958 with certain modifications to the rule governing bonus for faster scoring on first innings. The chief points are:

1. On-side fielders to be limited to five, only two of them to be behind the popping crease.
2. First innings points to be reduced from four to two, with the allocation of a bonus of two points for faster scoring.
3. The size of boundaries to be standardized.
4. Counties to be limited in the number of overseas cricketers on their staff.

Declarations.—New amendment to Law 15 giving the Captain of a batting side power to declare at any time during a match irrespective of its duration.

1958. Cricket Feats

Firsts.—1,000 runs—P. B. H. May (Surrey). 100 wickets—G. A. R. Lock (Surrey). 1,000 runs and 100 wickets—None. 2,000 runs—P. B. H. May (Surrey). 200 wickets—None.

High Scores.—Northants 529 (for 9) *v.* Surrey; Hants 427 (for 5) *v.* Somerset; Glamorgan 427 (for 7) *v.* Middlesex.

Low Scores.—Hampshire, 23 *v.* Derbyshire (lowest in first-class cricket since 1939); Glamorgan, 26 *v.* Lancs.; Lancashire, 27 *v.* Surrey (lowest for Lancashire since 1871); Leicestershire, 39 *v.* Kent; New Zealand, 47 *v.* England (second Test, Lord's).

Fastest Century.—A. C. D. Ingleby-Mackenzie (Hampshire) · 100 runs in 61 minutes *v.* Somerset.

Bowling Feats.—G. E. Tribe (Northants) 9 for 43 *v.* Worcs.; 15 for 31 in match *v.* Yorkshire; P. J. Loader (Surrey) 9 for 17 *v.* Warwicks.; D. Shackleton (Hants.) 9 for 59 *v.* Glos. (13 for 106 in match); M. Heath (Hants.) 13 for 86 in match *v.* Sussex; 13 for 87 in match *v.* Derbyshire; C. Cook (Glos.) 10 for 43 in match *v.* Derbyshire; L. Jackson (Derbyshire) 9 for 26 in match *v.* Hants.; 12 for 67 in match *v.* Leics.; B. Langford (Somerset) 15 for 54 in match *v.* Lancs.

Highest Individual Scores.—R. Subba Row (Northants) 300 *v.* Surrey; D. M. Young (Glos.) 194 *v.* Hampshire; R. E. Marshall (Hants.) 193 *v.* Oxford University.

Wicket-keeping.—J. T. Murray (Middlesex), for third year in succession obtained largest number of dismissals by a wicket-keeper (81—74 catches and 7 stumpings).

County Cup Awards.—Fastest century, A. C. D. Ingleby-Mackenzie. Best bowling performance, P. J. Loader, 9 for 17 *v.* Warwicks. Most catches, M. J. Stewart (Surrey) (for second year running), 61. Most wicket-keeping dismissals, J. T. Murray. Visitor's award, J. R. Reid, captain of New Zealand. Special award, D. Shackleton (Hampshire).

County Championship Table, 1958.

County Order for 1958, 1957 in brackets	Played	Won	Lost	Drawn	No dec.	First Innings Lead in Match		Bonus Points	Points
						L'ts.	Dns.		
Points Awarded	—	12	—	—	—	2	2	2	—
Surrey (1)	28	14	5	8	1	0	6	32	212
Hampshire (13)	28	12	6	10	0	3	4	28	186
Somerset (8)	28	12	9	7	0	2	3	20	174

MISCELLANEOUS CRICKET RECORDS

Highest individual scores.—In first-class cricket in England: A. C. Maclaren, 424, for Lancashire *v.* Somerset at Taunton, July, 1895. In Australia: D. G. Bradman (Australia), 452 (not out) for N.S.W. *v.* Queensland, Sydney, 1929–30. In India: B. B. Nimbalkar (Maharashtra *v.* W. Indian States), Poona, 1948–49, 443 (not out). In a minor inter-county match: F. E. Lacey (Hampshire *v.* Norfolk), Southampton, 1887, 323 (not out). In other minor matches: A. E. J. Collins, aged 14, scored 628 (not out) in a junior House match playing for Clarke's House *v.* North Town at Clifton College. This score extended over five afternoons, 1899. This is the highest individual score recorded for any class of cricket.

Highest team innings.—Australia, Victoria 1,107 *v.* N.S.W., Melbourne, 1926; England, England 903 (for 7 dec.) *v.* Australia, 1938.

Win.—Victoria beat New South Wales by innings and 656 runs, Dec. 29, 1926.

Runs in a day.—Australia *v.* Essex, Southend, May 15, 1948, 721.

Smallest totals.—Oxford University (one man absent), 12 *v.* M.C.C. at Oxford, May, 1877; Northants, 12 *v.* Gloucester, June 11, 1907.

Highest Aggregate.—Fifth Test, Durban, March, 1939. S. Africa 530 and 481; England 316 and 654 for 5 wickets. 1,981 (35 wkts.). India, Bombay, 651 and 714 for 6 dec. *v.* Maharashtra, 407, 604. Total 2,376 (38 wkts.).

Highest Partnership.—Gul Mahomed (319) and V. S. Hazare (288 not out) made 577 for 4th wicket for Baroda *v.* Holkar (Mar. 7, 1947). Previous: C. L. Walcott and F. M. Worrell, 574 for Barbados *v.* Trinidad, 1946. P. Holmes and H. Sutcliffe 555 for Yorks. *v.* Essex, Leyton, 1932, 1st wicket highest.

Most centuries in one season.—D. C. S. Compton, 18 (1947); J. B. Hobbs, 16 (1925); W. R. Hammond, 15 (1938); H. Sutcliffe, 14 (1932); D. G. Bradman (1938), C. B. Fry (1901), W. R. Hammond (1933, 7), T. Hayward (1906), E. P. Hendren (1923, 7, 8), C. P. Mead (1928), and H. Sutcliffe (1928, 31), 13 centuries. Six consecutive—C. B. Fry, 1901; D. G. Bradman (Australia), 1938–9; five consecutive Test centuries, E. Weekes, 1949. Total centuries in career—J. B. Hobbs, 197 (175 in Eng.).

Most runs made in a year.—D. C. S. Compton (Middlesex), 3,816 (1947); W. J. Edrich (Middlesex), 3,539 (1947); T. Hayward (Surrey), 3,518 (1906). L. Hutton (Yorks), 3,429 (1949); F. E. Woolley (Kent), 3,352 (1928); H. Sutcliffe (Yorks.) 3,336 (1932).

Most wickets in season.—A. P. Freeman (Kent), 304, 1928, and 298, 1933; T. Richardson (Surrey), 290, 1895.

Aggregates.—J. B. Hobbs, 61,221; W. G. Grace, 54,896, 2,876 wkts. W. R. Rhodes, 44,788 wkts. Also F. E. Woolley, 58,969; E. P. Hendren, 57,619; W. R. Hammond, 50,408; A. P. Freeman, 3,775 wkts.

Record Benefits.—C. Washbrook (Lancs.), £14,000 (1948); D. C. S. Compton (Middlesex), £12,200 (1949); A. V. Bedser (Surrey), £12,866 (1953).

Sir D. G. Bradman received £10,000 for his Testimonial match in Australia, 1948–49.

1,000 runs in May.—W. G. Grace, 1895, W. R. Hammond, 1927, C. Hallows, 1928, D. G. Bradman, 1930, 1938, W. J. Edrich, 1938; incl. April, T. Hayward, 1900. In June, L. Hutton, 1,294, 1949. In July.—A. E. Fagg, 1,018, 1938; August.—W. R. Hammond, 1,281, 1936; L. Hutton, 1,050, 1949.

Fastest scoring.—P. G. H. Fender for Surrey *v.* Northamptonshire in 1920, 100 runs in 35 mins.

Double.—J. H. Parks (Sussex), 3,003 runs and 101 wkts., 1937. In match: A. E. Fagg (Kent) *v.* Essex, 1938, Colchester, 244 and 202 (not out).

Highest batting average in England 115·66, D. G. Bradman (S. Aust.), 1938.

Most Catches in Match —W. R. Hammond 10, Gloucestershire *v.* Sussex at Cheltenham, 1928.

UNIVERSITIES AND SCHOOLS, ETC.

Oxford and Cambridge

First played 1827. Played 113. Cambridge have won 50, Oxford 42, drawn 22.

1954 Drawn. (Oxford 401 for 3 (dec.) and 148 for 9 (dec.); Cambridge 344 for 9 (dec.) and 160 for 8).
1955 Drawn (Cambridge 304 and 178 for 8 (dec.); Oxford 170 and 230 for 6).
1956 Drawn. (Cambridge 303 for 7 (dec.) and 134 for 5 (dec.); Oxford 247 for 9 (dec.) and 58 for 5).
1957 Cambridge (innings and 186 runs). Oxford 92 and 146; Cambridge 424 for 7 (dec.).
1958 Cambridge (99 runs). Cambridge 161 for 7 (dec.) and 269 for 8 (dec.); Oxford 180 and 151.

Eton and Harrow

First played 1805. Played 122. Eton have won 46, Harrow 37. Drawn 39.

1952 Harrow (7 wkts.). (Harrow 159 and 68 for 3; Eton 151 and 73).
1953 Eton (10 wkts.). (Eton 238 and 3 for 0; Harrow 82 and 158).
1954 Harrow (9 wkts.). (Eton 168 and 119; Harrow 221 and 69 for 1).
1955 Eton (38 runs). (Eton 161 and 166; Harrow 105 and 184).
1956 Drawn. (Eton 157 for 8 (dec.); Harrow 94 for 1 (match abandoned)).
1957 Drawn (Harrow 183 for 9 (dec.); Eton 204 for 6).
1958 Drawn (Eton 170 and 110 for 7 (dec.); Harrow 96 and 81 for 7).

School Matches, 1958

Winchester beat Eton by 143 runs. Winchester 189 for 9 (dec.); Eton 46.

Beaumont beat Oratory by 5 wickets. Oratory 206; Beaumont 207 for 5.

Clifton beat Tonbridge by innings and 55 runs. Clifton 267; Tonbridge 99 and 113.

Cheltenham beat Haileybury and I.S.C. by 4 wickets. Haileybury 83 and 257 for 7 (dec.); Cheltenham 196 and 145 for 6.

Marlborough beat Rugby by 8 wickets. Rugby 153 and 145; Marlborough 237 and 64 for 2.

Southern Schools beat the Rest by 5 wickets. Rest 241 for 5 (dec.) and 109 for 5 (dec.); Southern Schools 190 for 9 (dec.) and 163 for 5.

Combined Services beat Public Schools by 9 wickets. Public Schools 134; Combined Services 135 for 1. (Reduced to single-innings match by rain.)

Gentlemen *v.* Players (Lord's)

Drawn. Players 316 for 5 (dec.) and 70 for 0 (dec.); Gentlemen 219 for 8 (dec.) and 82 for 3.

R. Morand (France).—16 hr. 27 m.

R. Ocana (Mexico).—17 hr. 5 m.

B. Thomas (U.S.A.).—Cap Gris Nez—Kingsdown, Nr. Deal—19 hr. 45 m.

YACHTING

The America's Cup

The New York Yacht Club accepted the Royal Yacht Squadron's challenge for a series of match races for the America's Cup in 1958. The races took place off Newport, Rhode Island, from Sept. 20–26, 1958, between two yachts of the 12-metre class, the British *Sceptre* and the American *Columbia*. The *Columbia* won all four completed races.

History.—The America's Cup, originally a British trophy, was won outright by the U.S. schooner America at Cowes on August 22, 1851, and every contest since has been won by the U.S.A. There have been 17 unsuccessful attempts to take the cup out of the United States—15 by Britain and 2 by Canada. There have been 17 contests and 54 races, 48 of the races being won by the U.S.A.

Shamrock I lost to Columbia, 1899; Shamrock II lost to Columbia, 1901; Shamrock III lost to Reliance 1903; Shamrock IV lost to Resolute, 1920; Shamrock V lost to Enterprise, 1930; Endeavour lost to Rainbow, 1934; Endeavour II lost to Ranger, 1937; Sceptre lost to Columbia, 1958.

Yachting, 1958

National Flying Fifteens (Dundee, June 16–20).—Ffreak (W. G. Carson, Royal North of Ireland Y.C.).

Universities (*National Swallow*) (Cowes, July 2–4).—Cambridge University beat Oxford University 105½–89 pts.

National 18 ft. (Southern Championship) (Chichester Harbour, July 5–12).—Silhouette II (L. Pipe).

Crankshaw Bowl (*Round the Island*).—Jocasta (G. P. Patterson), 7 hr. 9 m. 39 s.

International 5–0–5 (*Coronet Trophy*) (Hayling Island, July 14–17).—Water Music II (D. Court-Hampton).

International Dragon Championship (*Duke of Edinburgh Cup* (Belfast, July 14–18).—Nirvana II (R. F. Buckley).

International 14 ft. Dinghy (*Prince of Wales Cup*) (Cowes, July 21–24).—Atua Hau (G. A. Smale).

Britannia Cup (Cowes, Aug. 5).—Griffin II (R.O.R.C.).

National Firefly (Weymouth, Aug. 24–29).—Goblin (J. B. Heron).

Hornet Class World Championship (Thorpe Bay, Sept. 8–13).—Tantalus (J. S. Partridge).

Brent Trophy (*British Moths*) (Hayling Island, Sept. 20–21).—Fundi (E. Willis).

PUNTING, 1958

Championships (Maidenhead)

Men.—1, A. Christie (Wraysbury) 6 m. 44 s.; 2, J. E. Holden (Wraysbury). Won by 1¼ lengths.

Women.—1, Miss P. A. Chuter (Laleham) 3 m. 40 s.; 2, Miss R. Gale (Laleham). Won by 2½ lengths.

Men's Doubles.—1, J. Harris and F. Holden (Wraysbury) 4 m. 42 s.; 2, D. Burrows and C. Maidment (Wargrave). Won by 3½ lengths.

Women's Doubles.—1, Miss P. A. Chuter and Miss R. Gale, 5 m. 11 s.; 2, Miss J. E. Tessier and Miss A. Haines (Wraysbury). Won by 3 lengths.

Mixed Doubles.—1, Miss J. E. Terrier and F. Holder. Second pair disqualified.

CANOEING, 1958

Devizes–Westminster Race (124 miles).—1, G. R. Howe and C. J. Edmonds (Royal Marines) 24 hr. 27 m.; 2, R. Careless and G. Polli (Royal Marines), 27 hr. 10 m. 30 s.

THE UNIVERSITY BOAT RACE

(Putney-Mortlake, 4m. 1f. 180 yds)

Year	Winner	m.	s.	Won by
1948	Cambridge ...	17	50	5 lengths (Record time)
1949	Cambridge ...	18	57	¾ length
1950	Cambridge ...	20	15	3½ lengths
1951	Cambridge ... (After re-row)	20	50	12 lengths
1952	Oxford	20	23	Canvas (about 10 f.)*
1953	Cambridge ...	19	54	8 lengths
1954	Oxford	20	23	4½ lengths
1955	Cambridge ...	19	10	16 lengths
1956	Cambridge ...	18	36	1½ lengths
1957	Cambridge	19	1	2 lengths
1958	Cambridge ...	18	15	3½ lengths

*This was the closest verdict ever given in the Boat Race except for the dead-heat in 1877.

Cambridge have won 58 times, Oxford 45, and there has been 1 dead-heat.

Race Mishaps.

1859.—Cambridge sank, Oxford won.

1912.—Cambridge sank at 1 mile, and Oxford shortly after Hammersmith Bridge, Oxford won re-row.

1925.—Oxford sank soon after Hammersmith Bridge and Cambridge paddled home to win.

1951.—Oxford sank after half a mile. Race abandoned because of weather and rowing conditions. Cambridge won the re-row.

HENLEY REGATTA, 1958

Grand Challenge Cup.—Trud, Leningrad (U.S.S.R.) beat Leichhardt (Australia) by 2½ lengths, 6 m. 40 s.

Ladies' Challenge Plate.—Jesus College (Cambridge) beat Christ Church (Oxford) by ¼ length, 6 m. 52 s.

Princess Elizabeth Cup.—St. Edward's beat Oundle by 1½ lengths, 6 m. 59 s.

Thames Cup.—Harvard University (U.S.A.) beat Thames by ⅜ length, 6 m. 57 s.

Stewards' Cup.—Barn Cottage beat National Provincial Bank by ½ length, 7 m. 16 s.

Visitors' Cup.—Keble College (Oxford) beat St. Edmund Hall (Oxford) by 3 lengths, 7 m. 32 s.

Wyfold Cup.—Burton Leander beat Putney Town by 1½ lengths, 7 m. 35 s.

Silver Goblets.—D. A. T. Ladley and C. G. V. Davidge (Leander) beat F. Streuli and G. Kottmann (Switzerland) by 3½ lengths, 8 m. 4 s.

Double Sculls.—A. Berkutov and Y. Tukalov (U.S.S.R.) beat G. W. Baker and M. A. Spracklen (Marlow) easily, 7 m. 21 s.

Diamond Sculls.—S. A. Mackenzie (Australia) beat V. Ivanov (U.S.S.R.) easily, 8 m. 6 s.

OTHER AQUATIC EVENTS

Head of the River (Thames, Mortlake–Putney).—1, Barn Cottage, 18 m. 28 s.; 2, Isis (Oxford), 18 m. 36 s.; 3, London Rowing Club, 19 m. 1 s.

Oxford Torpids.—Queen's College.

Oxford Summer Eights.—Christ Church.

Cambridge Mays.—Jesus College.

Cambridge Lents.—First and Third Trinity.

Wingfield Sculls (Putney–Mortlake.—1, D. V. Melvin (John O'Gaunt), 22 m. 12 s.; 2, W. G. Beech (London R.C.), 22 m. 15 s.; 3, G. C. Justicz (Birmingham).

Doggett's Coat and Badge (Estab. 1715, 243rd Race) (London Bridge–Chelsea) (4½ miles).—1, R. G. Crouch (East Greenwich), 32 m. 6 s.; 2, T. A. Darsey (Belvedere); 3, B. A. Evans (Wandsworth).

Sculling, Head of the River (Mortlake–Putney).—1, D. V. Melvin (John O'Gaunt) 23 m. 37 s.; 2, W. G. Beach (London R.C.) 24 m.; 3, G. W. Baker (Marlow) and M. A. Spracklen (Marlow) 24 m. 2 s.

WORLD SCULLING CHAMPIONSHIP

(For 1920–32 see 1951 and earlier editions).

Year	Winner and Country
1933	R. H. Pearce *beat* E. A. Phelps (Toronto)
1934	R. H. Pearce ,, W. C. Miller (Toronto)
1937	E. Paddon ,, A. Burns (Australia)
1938	R. H. Pearce ,, E. Paddon (Toronto)
1948	E. Paddon ,, M. Fisher (Australia)
1950	M. Wood ,, J. Kelly (Philadelphia)
1952	J. Saul ,, E. Paddon (Australia)

For each further 2 oz. or less ..... 4d.
Plus appropriate fee for insurance.
LIMITS: size, 12 × 8 × 4 in.: weight, 2 lb.

PARCELS

Should be marked "Parcel Post," and must be handed across the counter; postage must be prepaid by stamps, affixed by the sender. On Sundays parcels are not accepted or (except during Christmas) delivered. The name and address of sender should be inside and (not too prominent) on the outside of every parcel, and preferably at right angles to the name and address of the addressee

A rural postman will accept any packets he can conveniently carry, except overseas parcels or overseas letters intended for insurance; but if on foot or cycle not more, without notice, than 15 lb. from one person. He may weigh parcels on request. Mail-drivers need not accept between regular stopping points.

Parcels to or from Irish Republic Channel Is. or I. o Man are liable to customs duty except in last case, the sender must declare content when posting. Addressee must pay clearance fees (1s. or 2s.) if any duty be payable. Senders can undertake to pay customs charges of Irish Republic and some overseas countries (fee 6d., and a deposit).

Inland:—(Limit of size, length, 3 ft. 6 in.; length and girth combined, 6 ft.) :—

U.K. and Irish Republic :—

Not over 2 lb. ...	1s. 6d.	Not over 6 lb. ...	2s. 6d.
,, ,, 3 lb. ...	1s. 9d.	,, ,, 7 lb. ...	2s. 9d.
,, ,, 4 lb. ...	2s. 0d.	,, ,, 8 lb. ...	3s. 0d.
,, ,, 5 lb. ...	2s. 3d.	,, ,, 12 lb. ...	3s. 3½d.

Not over 15 lb. (limit) ... 3s. 6d.

H.M. Forces Abroad, *see* p. 1178.

*

Limit of size—as for Inland. For mode of packing, prohibitions, &c., see Post Office Guide.

AIR MAIL SERVICES

Limit of size—as for Inland. For mode of packing, prohibitions, &c., see Post Office Guide.

Normal regulations as to make-up and acceptance of various categories of postal packets and parcels apply equally to air mail items. A blue air-mail label, obtainable free from post offices, must be affixed to each air mail item (except letters, letter packets and postcards for Europe) at the top left-hand corner on the address side; alternatively the words "By Air Mail" may be written boldly in the same position, but the absence of an Air Mail Label may lead to delay. Special air-mail rates apply to correspondence for members of H.M. Forces overseas (*see* leaflet PL89).

AIR LETTERS, postage 6*d.*, written on special Air Letter forms may be sent to all countries. The special forms may be obtained at post offices.

SECOND CLASS MAIL. Printed papers, Commercial Papers, Samples, Small Packets may be sent by air to countries outside Europe at the rates shown in col. 4 below. Minimum charges: Commercial Papers, 6*d.*; Small Packets, 10*d.* NEWSPAPERS. Publications registered at the G.P.O. as newspapers may be sent at the reduced rates indicated in the footnote below. There is no Second Class air mail service to Europe.

European Countries

Letters, letter packets and postcards for all European countries, prepaid at the ordinary international postage rates, are in general despatched daily by air or surface transport, whichever offers earlier delivery. The rates are:—

Letters, 6*d.* for the first ounce,
4*d.* for each additional ounce.
Postcards, 4*d.*

For *Gibraltar* and *Malta* the rates are:
Letters, 3*d.* for the first ounce,
1½*d.* for each additional ounce.
Postcards, 2½*d.*

Air mail labels should not be used.

Air Parcel Post to Europe. Rates are included in the Overseas Parcel Post tables, see pp. 1166–8.

Countries Outside Europe

Rates for letters, postcards and second class mail appear below; for air parcel rates, see pp. 1166–8.

COUNTRIES OUTSIDE EUROPE

For air mail services to Europe, see above; Air Parcel Rates, pp. 1166–8. For details of insurance and times of posting at London Chief Office and of transmission to principal cities, see G.P.O. Air Mail Leaflet from Post Offices (*free*).

GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Board of Trade regulations many kinds of goods, including certain foodstuffs, may be sent abroad (including Irish Republic) only under the authority of an export licence. Enquiries in the matter should be addressed to the Controller, Export Licensing Branch, Board of Trade, Gavrelle House, 14, Bunhill Row, London, E.C.1.

Under the Defence (Finance) Regulations, senders of trade letter packets or parcels exceeding £500 in value to most foreign countries, including the U.S.A., and also to Canada (including Newfoundland), must furnish with the parcel a currency declaration (form C.D.3) which, together with explanatory notices, may be obtained from banks.

Senders of private gift packets or parcels exceeding £25 in value must furnish with the packet or parcel a currency declaration C.D.3.

PROHIBITED AND DUTIABLE ARTICLES.—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement. To Channel Islands, and I. of Man dutiable articles must be sent in Parcels. Abroad generally they may be sent in Parcels, in Insured Boxes and Small Packets (to those countries which accept them) or (where the "Green Label" system applies) in Letters.

CERTIFICATE OF POSTING.—Given as a matter of course for registered and insured items. May also be obtained for ordinary parcels (no charge) and other unregistered packets (fee, 1*d*.).

UNPAID PACKETS, except Business Reply packets and redirected parcels are charged *double postage* on delivery; UNDERPAID PACKETS, *double the deficiency*.

UNDELIVERABLE POSTAL PACKETS.—*Inland packets chargeable with a postage of 3d. or more*, undelivered, are returned to sender without charge, if his address is found either outside or inside. If the sender's address is not available, letters containing nothing of value are destroyed; packets containing anything of value, and parcels, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 2½d.* are returned to sender only on payment of a second postage, and if name, address and request for return appear on outside; those without such request are disposed of. *British packets undelivered abroad* are returned to sender here on payment of charges due; printed papers of no value only if request for return appears outside in a language known in the country of destination. Magazine Post packets are charged with return postage, when return is requested. Parcels further incur other charges unless abandonment is requested *at the time of posting*.

REPLY COUPONS, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum letter postage rate from the country concerned to the U.K. Price (valid in all countries of the Universal Postal Union), 9*d*.; (valid within the Commonwealth and Irish Republic only), 3*d*. Sold at chief offices.

POSTE RESTANTE (solely for the accommodation of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship are kept 2 months; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

REDIRECTION.—(1) By agent of addressee: *Packets other than parcels and business reply* may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. *Parcels* may be redirected free of charge, within the same time limits, only if the original and the corrected addresses are both within the same Town Delivery Area (or within the London Postal District). *Registered packets*, which must be taken to a Post Office, are *re-registered* free only up to day after delivery. (2) By the Post Office (not undertaken when other persons remain at the address). Requests for redirection of *letters*, &c., should be on printed forms, obtainable from the postmaster, and must be signed by the persons to whom the letters are to be addressed. Redirection is free for 3 months; thereafter for each different surname and each new address costs 5*s*. for 12 months, and 10*s*. for each subsequent year. Separate forms must be filled in for the forwarding of *telegrams*.

REGISTRATION, INLAND.—All kinds of postal packets intended for registration should be marked "Registered" in bottom left-hand corner, and *must be handed to an officer of the Post Office, and a receipt taken*. The packets must be made up in a reasonably strong cover appropriate to their contents. Parcels (or the string with which they are tied) and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, &c. Minimum fee 1*s*. exclusive of postage. Advice of delivery, a further 3*d*. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (*a*) any packet apparently meant for registration and wrongly posted (1*s*. less any prepaid excess postage); (*b*) packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., in each case 10*s*. or more in value (1*s*.).

COMPENSATION, INLAND.—Subject to certain prescribed regulations which are fully set forth in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters and parcels, (ii) though not as a legal right, for loss of or damage to unregistered parcels and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. *Registered letters and parcels* (*including items sent to the Irish Republic*): The fees for registration are 1*s*. covering compensation up to £10; 1*s*. 1*d*., £20; and 1*d*. for each additional £20 up to the maximum of 2*s*. 8*d*. for £400. (No legal right to compensation exists in respect of registered letters and parcels sent to and from Irish Republic.) *Unregistered parcels and unregistered packets conveyed by Express Messenger all the way*: Maximum compensation £5 (£4 for unregistered parcels sent to or received from Irish Republic).

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by *registered letter* post in one of the special envelopes sold officially (see p. 1173) and, in the case of paper money, if particulars (for identification) are kept; the maximum compensation for coin, which must be packed so as not to move about, is £5.

Compensation for eggs, fish, poultry, game and rabbits, meat, fruit and vegetables is paid only if sent by *parcel post*; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care." No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic whether registered or not.

REGISTRATION, BRITISH COMMONWEALTH AND FOREIGN (except for parcels and a magazine post packet for Canada, including Newfoundland), is in force to all countries with the exception of Chagos Islands, North Korea and North Viet-Nam. Valuable articles may not be sent in unregistered letters. Fee, 1*s.* 0*d.* If claimed within a year, compensation (in the U.K., £2 18*s.*) is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions.

INSURANCE, BRITISH COMMONWEALTH AND FOREIGN, may be effected on packets to many countries at the following rates:—1*s.* 2*d.* for £12; 2*d.* each further £12 up to 6*s.* 8*d.* for £400 (lower maxima in many countries). For *H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses* (e.g. British Forces Post Office followed by a number) only parcels are insurable, up to £50. Packets containing no articles (besides correspondence) but valuable papers (banknotes, &c.) or valuable documents (plans, &c.) can be insured as *letters*; other valuable articles should be sent as insured parcels, or as "insured boxes."

COMPENSATION up to a maximum of 93*s.* may be given for loss or damage in the U.K. to *uninsured* parcels to or from most Commonwealth and Foreign Countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

INSURED BOX POST.—Jewellery and precious articles (*not* letters or paper valuables) may be sent in insured boxes to certain countries. Customs declarations must be filled in.

CASH ON DELIVERY SERVICE, INLAND (*not* to or from Irish Republic, nor to H.M. Ships.)—A sum (Trade Charge) up to £40 can, under certain conditions, be collected from addressee and remitted to sender of a parcel or registered letter posted at a Money Order Office, or of goods consigned by railway. Fees (extra to usual postal or rail charges): For Trade Charge up to £1, 1*s.* 2*d.*; £2, 1*s.* 4*d.*; £5, 1*s.* 6*d.*; and for each further £5 or part thereof, 2*d.* An additional charge of 6*d.* is made on consignments sent by rail.

CASH ON DELIVERY, BRITISH COMMONWEALTH AND FOREIGN.—Applicable to parcels only, but not to all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. Fees for collection: 4½*d.* for Trade Charge (amount to be collected) not exceeding £1, with 2½*d.* extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (fee 8*s.* 6*d.*), but in some countries less. Addressee has also to pay on delivery, besides Customs, if any, a further fee (4*d.* in U.K.) not prepayable. If Trade Charge cannot be collected, the rules for undeliverable parcels apply.

EXPRESS and SPECIAL SERVICES (INLAND).—In general the express services are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. No. (4) (*below*) is available on Sundays only. Waiting fees: 10 minutes free, each further 10 minutes or less, 4*d.*:—(1) *All the way*, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 1*s.* per mile, or part of a mile, with 3*d.* on each *separate* packet after the first. Live animals, liquids, and money may be delivered by this service. (2) *After transmission by post*, on *addressee's* application (1*s.* per mile, or part of a mile, and 2*d.* for every ten or less additional packets). (3) *After transmission by post*, at *sender's* request "Special Delivery" from the ordinary delivery office, if messengers are available (1*s.* + postage). Packets must be marked "Express," and letters bear a broad blue or black vertical line back and front. (4) *Special delivery on Sundays of postal packets (except parcels) handed in on Saturdays.* Limited inter-city services, for London, Belfast, and certain provincial cities (except that the service is not in operation from Southampton to Belfast) are available *only*: (1) Sundays: reciprocally between certain towns as shown in the Post Office Guide; (2) Good Friday: *to* London only *from* towns in (1). Delivery is made from offices only during periods when they are open for telegraphic business. The handing-in offices in London are:—The London Chief Office, King Edward St., E.C.1., W. and S.W. District Offices, and (Branch Offices) Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Leicester Square, Stratford, and Swiss Cottage. Packets, marked "Express: Sunday Delivery," must be handed in in time to catch *preceding* night mails (in London 4.15 p.m.—6.30 p.m. for provincial towns). The latest time of posting to Belfast should be ascertained at selected office of posting. Fee is 3*s.* 0*d.* in addition to postage. Not available for parcels. (5) ("*Railex.*") Postal packets not liable to registration are despatched by rail met, and specially delivered in Britain, Douglas (I.O.M.), Northern Ireland, Jersey and Guernsey. Inclusive charges, 2 oz., 6*s.*; 1 lb. (maximum) 7*s.* 0*d.*; but packets from Jersey and Guernsey to Britain, Douglas or N. Ireland may not exceed 2 oz. (6) *A Railway Parcel* is similarly accelerated at the cost of a telegram, of railway charges, and of Service (1) at both ends of its journey.

RAILWAY LETTERS, &c.—A letter, not liable to registration, may be handed in at the parcel or booking office of a railway station, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at a station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland, between Great Britain and Jersey, Guernsey and Douglas (I.O.M.), and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage): at stations in Great Britain, Jersey, Guernsey and Douglas (I.O.M.), 2 oz., 1*s.* 0*d.*; 4 oz., 1*s.* 8*d.*; 1 lb. (maximum), 2*s.* 7*d.*; at stations in Northern Ireland, 2 oz. (maximum), 7*d.* The maximum weight for letters to the Irish Republic is 2 oz. Except on Sundays, or in Irish Republic, the letter can be delivered Express under Service (3), or directly from the station (Service (1)) by wiring for messenger to meet it. For other combinations of rail and express, *see* preceding paragraph, Services (5) and (6).

AIRWAY LETTERS.—On certain internal air routes operated by the British European Airways Cor-

poration, letters may be handed in at the airport or town terminal for conveyance by the next available direct air service to be transferred to the post at the distant town terminal or to be called for at the airport or town terminal. Fees (besides postage): 2 oz., 11*d.*; 4 oz., 1*s.* 6*d.*; 1 lb. (maximum), 2*s.* 4*d.* The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. The service is not available to the Irish Republic or to any country overseas. Full information can be obtained from any office of B.E.A.C.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (including parcels) to or from certain countries. In some cases the service is restricted to certain towns. 1*s.* is paid by the sender, the rest, if any, by addressee, according to the local regulations. (*See* P. O. Guide.)

POST CARDS.—Minimum size 4 × 2⅜ in., maximum 5⅞ × 4¼ in. The left-hand half of the address side may be used for correspondence, inland or abroad. Plain cards, if as stiff as official cards and not under $\frac{7}{100}$th inch thick, may also be used both inland and abroad.

Reply Post Cards for abroad must have the heading *Carte Postale avec réponse payée* on first part, and on the second part (valid only to country of origin) *Carte Postale—Réponse.*

BUSINESS REPLY SERVICE (inland, excluding Irish Republic). This service enables a person or firm to receive cards, letters, etc. from clients without prepayment of postage, the postage together with a fee of 1*d.* being paid by the addressee on each card or letter delivered.

A licence to use the service must be obtained from the Post Office.

PRINTED PAPER POST (including former BOOK POST).—For certain printed or written matter (p. 1165).

By this post may be sent books and other works of a literary character, with or without written dedications, and in the inland service any other *written, typed or printed* matter not being *in the nature of a letter*, drawings, paintings, photographic prints, engravings, maps, &c., together with normal non-fragile binding and anything necessary for safe transmission. Commercial, printed forms, legal documents, printers' copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 5 words or initials, are also admitted, and circulars (if in characters resembling typewriting, only under special conditions). To overseas, only printed matter in general is admitted as Printed Papers; items written or drawn, such as receipts, invoices and statements of account, admissible in the inland printed post service, go only as Commercial Papers, and there are other differences. Written chess-moves and puzzle-solutions, also blank stationery, are inadmissible. Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, *i.e.* without breaking, tearing, ungumming, or cutting. (For full conditions see the official Guide, or free leaflet P. 386.)

ARTICLES FOR THE BLIND (inland, including Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Rate:—2 lb., ½*d.*; 5 lb., 1*d.*; 8 lb., 1½*d.*; 11 lb., 2*d.*; 15 lb., 2½*d.* Limits: weight, 15 lb.; size, as for letters.

BLIND LITERATURE, COMMONWEALTH AND FOREIGN (in other respects treated as Printed Papers):—Papers, periodicals and books, if printed in special type (also plates for embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Blind Literature", with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts.

SAMPLE POST (not to Irish Republic).—Restricted to bona-fide *Trade* Samples, without saleable value; but keys sent unaccompanied, printers' blocks, fresh cut flowers, and certain scientific specimens can be sent *abroad* by Sample Post. Packets must be capable of easy examination in the post. (*See* p. 1165.)

SMALL PACKETS POST (Commonwealth & Foreign).—For small articles of merchandise by Printed Paper mails. Registration is allowed; not insurance. Available only to certain countries. A green Customs label must be affixed and, in certain cases, Customs declarations prepared. (*See* p. 1165.)

NEWSPAPER POST (INLAND).—For newspapers "registered at the G.P.O." (p. 1165).

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments", name and address of sender, request for return if undelivered and a reference to a page.

Newspapers not "registered at G.P.O." or supplements to registered newspapers apart from their ordinary publications should be sent at printed paper rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps of reigns before that of King George V are no longer valid.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties) are sold for the respective values of ½*d.*, 1*d.*, 1½*d.*, 2*d.*, 2½*d.*, 3*d.*, 4*d.*, 5*d.*, 6*d.*, 7*d.*, 8*d.*, 9*d.*, 10*d.*, 11*d.*, 1*s.*, 1*s.* 3*d.*, 1*s.* 6*d.*, 2*s.* 6*d.*, 5*s.*, 10*s.*, and £1. Books containing 6 3*d.*, 6 1½*d.*, 6 1*d.* and 6 ½*d.* stamps, 3*s.*, or containing 18 3*d.* stamps, 4*s.* 6*d.*, or containing 12 3*d.* and 6 each of 2½*d.*, 1*d.* and ½*d.* stamps, 5*s.* Rolls of ½*d.*, 1*d.*, 1½*d.*, 2*d.*, 2½*d.*, 3*d.* or 4*d.* stamps are also sold, joined lengthwise or sideways and rolls of 6*d.* stamps joined lengthwise.

INLAND REGISTERED LETTER ENVELOPES with a 1*s.* 3*d.* embossed stamp (1*s.* for registration and 3*d.* for postage), are of four sizes: F. 5½ in. × 3½ in. or G. 6⅛ in. × 3⅝ in., 1*s.* 4½*d.* each; H. 8 in. × 5 in., 1*s.* 5*d.* each; K. 11½ in. × 6 in., 1*s.* 7½*d.*

OVERSEAS REGISTERED ENVELOPES with a 1*s.* 0*d.* embossed stamp (for registration fee only) are in two sizes: G.2 6½ in. × 3⅝ in., 1*s* 1½*d.* each; K.2 11½ in. × 6 in., 1*s.* 4½*d.* each.

LETTER CARDS with 3*d.* stamp: 4*d.* each.

POST CARDS, with impressed 2½*d.* stamp: 3*d.* each. *Reply*: double the *Single* figures.

EMBOSSED ENVELOPES with 3*d.* stamp: "A" (4⅛ × 3⅝ in.) or "Commercial" (5⅛ × 3⅛ in.), 4*d.* each. Air Letter Forms impressed with 6*d.* stamp, 6*d.* each.

Embossed or impressed postage stamps cut out of envelopes, post cards, letter cards, air letter forms, newspaper-wrappers, or telegram forms, may be used as adhesive stamps in payment of postage or telegrams provided they are not imperfect, mutilated, or defaced in any way.

MONEY ORDERS

Advice of Payment: 6*d.* inland (and to Irish Republic), 3*d.* for foreign and colonial orders (to certain countries). Payment may be stopped (fee 9*d.*); or deferred up to 10 days in case of Ordinary Inland Money Orders. Inland orders (including those for Irish Republic) may be crossed for payment through a bank.

Inland Ordinary Money Orders (and to Irish Republic).

The poundage charged is, for sums not exceeding £10, 1s. 0d.; and for each additional £10, 2d., to £50 (maximum), 1s. 8d. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (*e.g.*, Income Tax) if demand note is produced.

Inland Telegraph Money Orders (and to Irish Republic).

Money may be transmitted by this means from most Money Order offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day and Good Friday and in Scotland on New Year's Day, Inland telegraph money orders for amounts not exceeding £5 are issued at all Money Order Offices which transact telegraph business at the times when these offices are open for telegraph counter business and sums up to £5 are payable at, or in the delivery areas of, London Chief Office, the District Offices, and some Branch Offices in London, and all head and many of the more important other offices outside London.

Poundage at the same rate as for Ordinary Inland Money Orders, *plus* supplementary fee of 6d., and cost of official Telegram of Advice, 3s. 0d. for Inland Orders and 3s. 6d. for Irish Republic Orders.

Ordinary Money Orders for Abroad.

Poundage, up to £2, 2s; £5, 3s.; £10, 4s., and thereafter 2s. per £10 or part thereof. Limits of amount vary according to destination but in any case may not exceed £40; validity, normally 12 months.

At present, not more than £10 per day per remitter can be sent to Canada or any other country outside the *Scheduled Territories* (formerly known as the Sterling Area), and then only when the purpose of the remittance is declared on a special form and permission has previously been granted by the Accountant General's Depattment, G.P.O. (Postal Remittance Branch I).

Telegraph Money Orders for Abroad.

Only to certain countries, *e.g.*, Australia, Canada, India, New Zealand, S. Africa, U.S.A. Poundage as in last paragraph, *plus* cost of official Telegram of Advice (at Letter Telegram rate, if desired, to certain countries) *plus* a supplementary fee. For restrictions, see the preceding paragraph.

POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and paid in most countries within the Commonwealth. Transmission of postal orders to Canada or any other country outside the Scheduled Territories (formerly known as the Sterling Area) is prohibited except to members of H.M. Forces under special arrangements, particulars of which may be obtained at any Post Office transacting Postal Order business. They are *paid* (but not *issued*) in Irish Republic. They are printed with a counterfoil, for every multiple of 6d. up to 5s., for 6s., and by 1s. steps up to £1 1s. then for £2 and every multiple of £1 up to £5. Adhesive, unmarked current British Postage Stamps not exceeding two in number, if affixed in the 2 spaces provided, increase the value of an Order by not more than 5a. (orders up to 4s. 6d.) or 11d. (orders of 5s. and upwards). Poundage: 6d. and 1s., 2d.; 2s. 6d. to £1 1s., 3d.; £2 to £5, 6d.

The name of payee must be inserted. If not presented within six months of the last day of the month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster, for verification, and commission equal to the original poundage will be charged.

INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office or railway station at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone at all times. Rate, 12 words or less 3s. 0d. (to Irish Republic 12 words or less 3s. 6d.), each further word 3d. Ordinary Greetings and Birthday Greetings telegrams cost 3s. 6d. for 12 words, each extra word 3d. Wedding Greetings telegrams cost 5s. 0d. for 12 words, each extra word 3d. Appropriately designed forms in special envelopes are used. Greetings telegrams may be tendered by telephone or handed in any day prior to day of delivery. Priority rate (not available to or from Irish Republic) 1s. extra. A redirection charge of 3s. 0d. per telegram is made if the original and new addresses are in the same place, delivery area or London Postal District. In all other cases the charge is at the ordinary inland rate. Telegrams handed in on *Sundays* and (exc. Scotland) *Good Friday or Christmas Day* are charged 1s. 6d. extra. Replies may be prepaid up to 12s.; the reply voucher may be used in payment or part payment of any Post Office telegram or any telegraph or telephone account rendered by the Post Office, or its value refunded to sender of original telegram. Receipt for charges free on request. Certified copy 1s. 6d., sometimes more. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within 1 mile of the delivery office; beyond that the charge is 3d. per mile and is collected on delivery.

TELEGRAPH OFFICES ALWAYS OPEN IN LONDON.—Chief Office (King Edward Street, E.C.1), Leicester Sq., Charing Cross Road, W.C.2.

COMMONWEALTH AND FOREIGN TELEGRAMS

The charges for ordinary or FULL RATE telegrams from the United Kingdom to Commonwealth countries are shown below. The minimum charge for an ordinary telegram is as for 5 words. To any place in the British Commonwealth the full rate does not exceed 1s. 10d. per word. Urgent telegrams may be sent at double the ordinary rate.

For telegrams of a social character the GLT (Commonwealth Social Telegram) service is available to Commonwealth countries. The charge is 9s. 2d. for 12 words or less (including the indicator =GLT=), and 11d. for each word after 12 except to Canada, Cyprus, the British West Indies, Bermuda, British Guiana, and British Honduras to which lower charges apply.

Most countries admit Letter Telegrams at half the full rate but there is a minimum charge as for 22 words. Letter Telegrams, which must be written in plain language, are subject to delay in transmission in favour of ordinary telegrams.

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in Facsimile to many European and extra-European countries. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Postal Telegraph or Post Office Cable & Wireless Office.

RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any Postal Telegraph Office or dictated over the telephone. The standard rate of charge for messages sent to ships through coast stations in the British Isles is 1*s.* 6*d.* a word; there is a reduced rate of 9*d.* a word for messages to ships regularly engaged on short voyages to or from ports in the British Isles. The address should contain (1) the name and/or rank of the addressee, (2) the name of the ship, and (3) either the name of a British coast station if the sender knows that the ship is within range of that station, or, if the sender does not know the name of the appropriate coast station, standard rate messages should be addressed to Portishead Radio or "Wireless", and reduced rate messages to Wick Radio.

Radiotelegrams may be sent to service personnel on board H.M. Ships in foreign waters at a charge of 11½*d.* a word and in the Home Fleet at a charge of 6½*d.* a word. The address should contain (1) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine") (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio" (or, in the case of the Home Fleet, the words "Homewaters Admiraltyradio").

Radiotelegrams may also be sent to R.A.F. vessels at a reduced rate of 6½*d.* per word. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words R.A.F. Vessel before the name of the ship.

INLAND TELEPHONES

The quarterly rental for single exclusive lines for residential subscribers is £3; if over 3 miles from the exchange, an extra 10*s.* a quarter is payable in respect of each furlong or part thereof beyond the 3 miles. Shared service, in which two subscribers use one line but enjoy nearly all the facilities of exclusive line service, is offered under certain conditions. For this service a rebate of 10*s.* 0*d.* is allowed from the normal quarterly rental for a single exclusive line. Calls to exchanges within the local call area are charged 3*d.* (4*d.* from a call office). Trunk call charges (*viz.*, to exchanges outside the local call area) vary with distance but do not exceed 3*s.* 6*d.* by day (for 3 minutes) and 2*s.* 6*d.* during the cheap rate period which is 6 p.m. to 6 a.m. weeknights and 2 p.m. Sundays to 6 a.m. Mondays (7*s.* 6*d.* and 3*s.* 3*d.* to Irish Republic). Call office charge 3*d.* extra. Personal calls (to specified person) 1*s.* 6*d.* extra (cheap rate period 9*d.*); if the person cannot be found nothing further is charged. Where subscriber trunk dialling facilities are provided local and dialled trunk calls are charged in 2*d.* units (3*d.* from a call office); the length of time per unit depends on the distance of the call, from 3 minutes for local calls to 12 seconds for distances over 50 miles (the time allowance is increased during the cheap rate period). For fuller information see Preface to Telephone Directory.

TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is £160 per annum in most cases. Where nearest Telex exchange is more than 30 miles distant an additional rental based on the excess mileage applies. Charges for inland calls between exchanges 35 miles or more apart are about half equivalent charges for daytime telephone calls. International calls to European countries are about two-thirds of equivalent charges for telephone calls; to United States of America and to South Africa charges are the same as for telephone calls, *i.e.* £1 per minute (minimum three minutes). Automatic equipment allowing messages to be sent at the maximum speed of 66 words per minute can be rented in addition. Descriptive booklet available from all Telephone Managers; for local address see telephone directory.

OVERSEAS TELEPHONES

The caller should ask for CONTINENTAL or INTERNATIONAL Service. Callers in London with Dial Telephones with letters should dial "CON" or "INT." The charges shown on p. 1176 are minimum rates for a call of three minutes duration, each further minute or part thereof costing one-third of this charge. Transferred charge calls are possible with certain countries. Details of countries and rates will be advised by the Continental and International Exchange.

A. *Continental Service.*

The rates quoted are for calls from all places in Great Britain, Northern Ireland, the Isle of Man and the Channel Islands to the first zone of the country concerned. For *Personal Calls* an additional charge equivalent to one minute's conversation is made.

B. *International Service.*

Minimum rates, the same from all parts of Great Britain, Northern Ireland, the Isle of Man and the Channel Islands are shown below. Hours of Service to most countries are limited. A *person to person call* may be booked without extra charge; if if fails (or call is cancelled) a *Report Charge* is made (4*s.* to 6*s.*) but not if call matures. On Radio Services a time allowance is made for interruption by adverse conditions. A *limited duration* facility (minimum 3 mins.) is available enabling connection to be terminated after a specified period of effective conversation. *A reduced rate* (10 p.m. to 10 a.m. on weekdays and all day on Sundays) is available on services with Canada, U.S.A., Cuba and Mexico. Reduced Sunday rates apply also in certain other services.

C. *Long Range Ships' Service.*

A Long Range service is available to certain British and foreign ships. Minimum charge to ships in Northern waters within limits., 35° W., 35° E. and 35° N. and in the Mediterranean Sea is 36*s.*; beyond these limits it is 72*s.*

D. *Short Range Ships' Service*

A short-range radiotelephone service is also available between telephone subscribers in Great Britain and Ireland, and suitably equipped trawlers, coasting vessels and other small ships. The service is available continuously through the Radio Stations listed below and normally provides satisfactory communications over sea-ranges up to about 150 miles from these coast stations.

Cullercoats Radio	Whitley Bay 23479
Humber Radio	Maplethorpe 3147
Ilfracombe Radio	Ilfracombe 845
Land's End Radio	St. just 23
Niton Radio	Niton 225
North Foreland Radio	Thanet 21303
Oban Radio	Oban 2059
Portpatrick Radio	Portpatrick 311
Seaforth Radio	Liverpool/Waterloo 3636
Stonehaven Radio	Stonehaven 19
Wick Radio	Wick 9

The inclusive charge for a call is 10*s.* 6*d.* for three minutes (minimum) and 3*s.* 6*d.* for each additional minute or part of a minute. Subscribers should book their call through their local telephone exchange, stating the name of the ship and, whenever possible, the name and telephone number of

† Night and Sundays, 15*s.* less.

the coast station with which the ship is expected to be in contact. Calls to ships cannot be accepted from telephone call boxes or from subscribers' telephones fitted with coin-collecting boxes.

The service is also available for calls to and from H.M. Ships in home waters (excluding H.M. Ships proceeding to and from foreign naval stations).

The conditions of service and charges are the same as those which apply to the service with small ships, but as H.M. Ships do not normally keep watch for radiotelephone calls from the shore, a subscriber should not attempt to book a call to one of H.M. Ships unless prior arrangements have been made with the person concerned on board ship. The subscriber must also state either the name of the coast station through which the call is to be set up, or the approximate position of the ship at the time the call is required.

LONDON POSTAL DISTRICTS

CENTRAL AREA.—Principal streets or approximate boundaries of the postal districts are named in the area from Edgware Road and Park Lane to Bishopsgate; and from Marylebone and Euston Roads to the Thames.

E.C.1.—Clerkenwell, City Road, Old Street, Goswell Road, Aldersgate Street, St. Martin's le Grand, Newgate Street, Holborn Viaduct, etc.

E.C.2.—Rivington Street, Liverpool Street, Bishopsgate, Threadneedle Street, Poultry, Cheapside, Foster Lane, Finsbury Square, Tabernacle Street, Moorgate, London Wall, Gresham Street, Old Broad Street, etc.

E.C.3.—Cornhill, Houndsditch, Leadenhall Street, Aldgate, Gracechurch Street, Lombard Street, Fenchurch Street, Eastcheap, Lower Thames Street, Tower Hill, etc.

E.C.4.—Fetter Lane, Fleet Street, Temple, Farringdon Street, New Bridge Street, Old Bailey, Ludgate Hill, Paternoster Row, Queen Victoria Street, Cannon Street, Upper Thames Street, King William Street, etc.

W.C.1.—From (excl.) Tottenham Court Road to (incl.) Phoenix Place and Gray's Inn Road; from (excl.) Euston Road and (excl.) Pentonville Road to (incl.) New Oxford Street, High Holborn and Holborn.

W.C.2.—From Charing Cross Road, Leicester Square, Trafalgar Square to Chancery Lane and Essex Street; from (excl.) New Oxford Street and (excl.) Holborn to the Thames.

W.1.—From (excl.) Edgware Road and (incl.) Park Lane to (incl.) Tottenham Court Road and (incl.) Shaftesbury Avenue; from (excl.) Marylebone Road and (excl.) Euston Road to (incl.) Piccadilly.

S.W.1.—From (incl.) Pont Street, Sloane Street and Chelsea Bridge Road to Haymarket, Victoria Embankment and Millbank; from (incl.) Knightsbridge and (excl.) Piccadilly to Grosvenor Road.

OTHER AREAS.—Boundaries of the postal districts are not necessarily the same as those of boroughs of the same name.

GENERAL SUNDAY AND HOLIDAY ARRANGEMENTS

(For Express services see p. 1172)

On SUNDAY *THROUGHOUT THE U.K. no Parcel Post, non-telegraphic Money Order, Postal Order* business is transacted, nor is there a delivery of letters, &c. There is a collection for night despatch in most places. *IN LONDON*, the Chief Office and Leicester Square Branch Office are open always, and some other offices are open from 9 a.m. to 1 p.m. for stamps, telephone, telegrams, and with some exceptions telegraph money orders up to £5 and savings bank demand withdrawals up to £3. *OUTSIDE LONDON*, most Head Offices and some country telegraph Sub-offices open 9–10.30 a.m. (Scotland 9–10 a.m.) for stamps, telegrams, registration and with some exceptions telegraph money orders up to £5 and Savings Bank demand withdrawals up to £3; but all town Sub-offices, and most non-telegraph country offices, are closed.

Christmas Day, Boxing Day and Good Friday

London: One delivery of letters and parcels on Christmas Day; none on Boxing Day and Good Friday. Most offices are closed on Christmas Day. Selected offices open from 9 a.m. to 1 p.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Outside London: In Scotland, normal weekday deliveries; offices open as usual on Boxing Day and Good Friday; on Christmas Day some town sub-offices are shut, and after 1 p.m. many chief offices are open only for telegraph business. In England, Wales and Northern Ireland one delivery of letters and parcels on Christmas Day and Good Friday; none on Boxing Day; most offices are closed on Christmas Day; head offices and some country telegraph sub-offices are open from 9 a.m. to 10.30 a.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Other Public Holidays

In Scotland on New Year's Day office hours and classes of business are as on Sundays; no delivery of letters and parcels. Post Office counter services and postal deliveries on other public holidays in the U.K. vary in accordance with local conditions—details may be obtained from the local Head Postmaster.

LETTERS AND PARCELS FOR MEMBERS OF H.M. ARMY OR AIR FORCE

MEMBERS STATIONED AT HOME.—While serving in Great Britain or Northern Ireland a unit will employ a "Place name" address.

Addresses must show: (*a*) Army or Air Force number (in the case of "other ranks" only); (*b*) rank; (*c*) name; (*d*) squadron, battery, company, or other section of the unit; (*e*) Army or Air Force Unit (including in the latter case the letters "R.A.F."); (*f*) correct postal address of the place at which the unit is stationed.

MEMBERS SERVING OVERSEAS.—Addresses must show (a) Army or Air Force Number (in the case of "other ranks" only); (*b*) rank; (c) name; (*d*) squadron, battery or company (or other section of the unit) or name or number of the R.A.F. unit, where this is allowed; (*e*) Army unit or the words Royal Air Force; (*f*) British Forces Post Office, followed by the appropriate number. Where a British Forces Post Office address has not been adopted, the name of the place and country of destination.

Rates of Postage to H.M. Armed Forces

(*a*) Members of H.M. Army and Air Force *stationed at home* and personnel of H.M. Ships believed to be in Home Waters (including the North Sea)—the ordinary inland rates of postage apply.

(*b*) Members of H.M. Army and Air Force *serving overseas* and personnel of H.M. Ships believed to be in Foreign Waters:—

Letters, 3*d.* for the first ounce and 1½ *d.* for each additional ounce.

Postcards, 2½*d.* each.

Printed Papers, including Newspapers, 1½*d.* for first 2 oz. and 1*d.* each additional 2 oz.

Parcels, not exceeding: 3 lb., 1*s.* 6*d.*; 7 lb., 2*s.* 6*d.*; 11 lb., 4*s.* 0*d.*; 22 lb., 6*s.* 0*d.*

Particulars of the rates, including air mail, are in leaflet PL 89 obtainable at Post Offices.

NAUTICAL MEASURES

Distance is measured in nautical (or sea) miles. The nautical mile is traditionally defined as the length of a minute of arc of a great circle of the earth; but as this length varies in different latitudes (owing to the fact that the earth is not a perfect sphere), 6,080 feet, a "rounded off value" of the mean length, has been adopted in British practice as the standard length of the nautical mile. On this basis 33 nautical miles exactly equal 38 statute miles; the statute (land) mile contains 5,280 feet. A *cable*, as a measure used by seamen, is 600 feet (100 fathoms) approximately one-tenth of a nautical mile. *Soundings at sea* are recorded in fathoms (6 feet).

6 feet = 1 fathom.
100 fathoms = 1 cable length.
10 cables = 1 nautical mile.

Note.—In the United States the nautical mile is legally defined and has a length of 6,080·2 (U.S.) feet. Some other countries have adopted the nautical mile of 1,852 metres as recommended by the International Hydrographic Bureau in 1929.

Speed is measured in *nautical miles per hour*, called *knots*. A knot is a measure of speed and is not used to express distance. A ship moving at the rate of 30 nautical miles per hour is said to be "doing 30 knots" and as the nautical mile is longer than the land or statute mile this represents a land speed of over 34½ miles per hour. In 1945 the *Royal Air Force* adopted the knot and the nautical mile as the standard measurements for speed and distance.

Knots	m.p.h.	Knots	m.p.h.	Knots	m.p.h.

14	16·1212	28	32·2424	42	48·3636

WEIGHTS AND MEASURES

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1873 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

20 grains = 1 scruple (℈1).
3 scruples = 1 drachm (ʒ1)
8 drachms = 1 ounce.

Measures of Capacity.

60 minims (*min.*) = 1 fluid drachm.
8 fluid drachms = 1 fluid ounce.
20 fluid ounces = 1 pint.
8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *dram*, and is spelled differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid *drachm* (54·6875 grains) is equal in weight to TWO Avoirdupois *drams*.

Approximate Equivalents:—
1 "table-spoon" = ½ fluid oz., 1 "dessert-spoon" = ½ fluid oz. 1 "tea-spoon" = ⅛ fluid oz

Avoirdupois Weight.

7000 grains (*gr.*) = 1 pound (*lb.*).
16 drams (*dr.*) = 1 ounce.
16 ounces = 1 POUND.
14 pounds = 1 stone.
28 pounds = 1 quarter (of a *cwt.*).
100 pounds = 1 cental.
4 quarters (112 lb.) = 1 hundredweight (*cwt.*).
20 hundredweight (2,240 lb.) = 1 ton.

Troy Weight.

24 grains = 1 pennyweight (*dwt.*).
20 dwt = 1 ounce.

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31·1035 *Grammes*) in weight. There is *no* Troy POUND.

Jewellers' Weigh.

The metric *carat* of 200 *milligrammes* is the legal standard of weigh for precious stones and pearls.

Measures of Capacity.

4 gills = 1 pint.
2 pints = 1 quart.
4 quarts = 1 GALLON.
1 gallon = 277·274 cubic inches.
2 gallons = 1 peck.
8 gallons = 1 bushel.
8 bushels = 1 quarter.
A chaldron is 36 bushels = 4½ quarters.

Measures of Length.

12 inches (*in.*) = 1 foot (*ft.*).
3 feet = 1 yard (*yd.*).

CONVERSION.
Let F = Fahr. ,, C = Cent. ,, R = Réaum.

$$°F = \frac{9}{5}C + 32 \qquad C = 5\left(\frac{F-32}{9}\right)$$

$$F = \frac{9}{4}R + 32 \qquad R = \frac{4(F-32)}{9}$$

$$F = C + R + 32$$

NOTE.—The *normal* temperature of the *human body* is 98·4° F., or 37° (36·9°) C., or 29·5° R. *Freezing point* = 32° F. = 0° C. = 0° R.; *Boiling point* = 212° F. = 100° C. = 80° R.
"*Absolute Temperature*" is Temperature reckoned from "*Absolute Zero*," which is at 273° C. below 0° C., 459·4° below 0° F., and 218·4° below 0° R. and is denoted by the letter "K."

Thermometer Comparisons.

Comparison between Scales of Fahrenheit Réaumur, and Centigrade.

6 feet = 1 fathom.
5½ yards = 1 perch or rod or pole.
22 yards = 1 chain = 100 links.
10 chains = 1 furlong.
8 furlongs = 1 mile = 1,760 yards.
3 miles = 1 league (obsolete).

Height of Horses: Hand = 4 inches. Span = 9 inches

A *Cricket Pitch* is 22 yards (one chain) between the stumps.

A *Lawn Tennis Court* is 78 × 36 feet (double) and 78 × 27 feet (single).

A *Croquet Lawn* is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

A *Badminton Court* is 44 × 20 ft., with net 30 ins. deep and 5 ft. high at centre.

A *Polo Ground* is 300 × 160 yds.

A *Football Ground* (*Association*) is 130 × 100 yds. (full size) and 120 × 80 yds. for (international matches; (*Rugby*) 110 × 75 yds. (full size).

Square or Surface Measure.

144 sq. inches = 1 sq. foot.
9 sq. feet = 1 sq. yard.
30¼ sq. yards = 1 sq. perch, or rod, or pole.
40 perches = 1 rood.
4 roods = 1 acre.
10 square chains = 1 acre = 4,840 sq. yards.
640 acres = 1 square mile.

Dimensions of an Acre.—The acre is 4,840 sq. yards, or 220 × 22 yards. The length of a side of a *square* acre is 69·57 yards; an area 110 × 44 yards (or 220 × 11 yards) would be *half an acre*; an area 55 × 22 yards (or 110 × 11 yards) would be *one quarter of an acre*, and so on.

Decimal Parts of an Acre.—The following note is appended to Ordnance Maps: "To convert Decimal Parts of an Acre into Roods and Perches, multiply by 4, this will give Roods and Decimals of a Rood, multiply this Decimal by 40, thus obtaining Perches and Decimals of a Perch."

Cubic Measure.

1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

Angular or Circular Measure.

60 seconds (″) = 1 minute (′)
60 minutes = 1 degree (°).
30 degrees = 1 sign (of the Zodiac. *See* p. 164).
90 degrees = 1 right angle or quadrant.
12 signs (4 quadrants) = 1 circumference.
Diameter of circle × 3·1416 = circumference.
Diameter squared × ·7854 = area of circle.
Diameter squared × 3·1416 = surface of sphere.
Diameter cubed × ·5236 = solidity of sphere.
One degree of circumference × 57·3 = radius.*
Diameter of cylinder × 3·1416; product by length or height, gives the surface.
Diameter squared × ·7854; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57·3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Water Measures.

Cubic inch . . . . . = 252·458 grains.
Gallon (277·274 cu. in.) . . . = 10 lb. (distilled).
Cubic foot . . . . . = 62·321 lb.
35·943 cubic ft. (224 gals.) . = 1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

An *Inch of Rain* on the surface of an acre (43,560 sq. feet) = 3,630 cubic feet = 100·992 tons.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·963 gallons, weighing 16 cwt. 2 qrs. 21·6 lbs. in addition to its own weight.

Fuel and Power

British Thermal Unit (B. Th. U.) = The amount of heat required to raise 1 lb of water through 1 degree Fahrenheit at or near 39·1 degrees F.

Unit of electricity (kilowatt-hour) = Output of 1,000 watts for one hour. 1 k.w.h. = 3,413 B.Th.U.

Therm = 100,000 B.Th.U. = 29·3 k.w.h.

Atmosphere = pressure of 14·223 lb. per sq. in. = 1 kilogram per sq. cm.

Petroleum

Barrel = 35 Imperial gallons = 42 U.S. gallons.

By Weight.

Petroleum products are commonly quoted in metric tonnes, the conversion to barrels varying slightly according to the specific gravity of the product, e.g. the metric tonne in the major oil producing states (U.S.A., Venezuela, Persian Gulf, Saudi-Arabia, Iraq, etc.) varies from 7·0 barrels per metric tonne to 7·7 barrels, and in the smaller oil producing states (e.g., Albania) is as low as 6·7 barrels per tonne. Crude petroleum in the United Kingdom, 7·355 barrels per metric tonne (2,205 lbs.); 7·472 barrels per long ton (2,240 lbs.).

Shipping

Gross tonnage.—The total volume of all the enclosed spaces of a vessel, the unit of measurement being a ton of 100 cubic feet.

Net tonnage.—The gross tonnage less certain deductions for crew space, engine room, water ballast and other spaces not used for passengers or cargo.

METRIC WEIGHTS AND MEASURES

See also "Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

10 millimetres = 1 centimetre = 0·39370113 inch.
(*mm.*) (*cm.*)
10 centimetres = 1 decimetre = 3·9370113 inches.
(*dm.*)
10 decimetres = 1 METRE (*m*) = 1·0936143 yards.
10 metres = 1 dekametre = 10·936143 yards.
(*dam.*)
10 dekametres = 1 hectometre = 109·36143 yards.
(*hm.*)
10 hectometres = 1 kilometre = 0·62137 mile.
(*km.*)

A kilometre is approximately *five-eighths* of a mile, so that 8 kilometres (4·97082 miles) may be regarded as 5 miles.

2.—MEASURES OF SURFACE.

1 sq. centimetre = 0·15498 sq. inch.
1 sq. METRE = 10·76365 sq. feet = 1·19596 sq. yds.
1 are (*a*) = 0·0988 rood.
1 hectare (10,000 sq. metres) (*ha*) = 2·4711 acres.
1 sq. kilometre = 0·38611 sq. mile.

3.—Measures of Capacity.

1 centilitre (*cl.*) = 0·0704 gill.
1 decilitre (*dl.*) = 0·17598 pint.
1 LITRE (1/1,000 cubic metre) (*lit.*) = 1·7598 pints = 0·88 Imp. quart = 0·22 Imp. gallon.
1 hectolitre (*hl.*) = 21·9975 imp. gallons = 26·4171 U.S. gallons = 2·7497 Imp. bushels = 2·8377 U.S. bushels.
1 cubic metre = 35·31338 cu. ft. = 1·30794 cu. yds. (*cbm.* or m^3.)
1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—Measures of Weight.

1 centigram (*cg.*) = 0·15432 grains.
1 decigram (*dg.*) = 1·5432 grains.
1 gramme (*grm.*) = 15·4323 grains.
1 dekagram (*dag.*) = 5·6438 drams.
1 hectogram (*hg.*) = 3·5274 oz.
1 KILOGRAM kg. = 32·1507 oz. Troy = 35·2734 oz. Avoirdupois = 2·2046223 lb. Avoirdupois.
1 myriagram = 22·046223 lb. Avoirdupois.
1 quintal (*q.*) = 220·46 lb. Avoirdupois = 2·2046 Centals = 1·9684 cwt.
1 tonne (*t.*) = 0·98421 long ton = 1·10231 short tons.

Notes.

1 hectolitre ..... = 2·75 bushels.
1 hectolitre per hectare = 1·11 bushels per acre.
1 quintal ..... = 3·6743 bushels.
1 quintal per hectare. 1·49 bushels per acre.

Music	=	14 × 10½	"

NOTE.—*Folio* means a sheet folded in half, *quarto* folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

Sizes of Types

The type size chiefly used in "Whitaker" is 5½ point, or *Ruby*, set on a 6 point "body." The column contains 78 lines, and is 12 Pica ems wide; on an average every column contains about 3,100 letters, or 710 words.

Today type up to 14 point size is usually set by a keyboard machine, and mechanically cast in single letters or in complete lines of type (e.g. Monotype and Linotype). All type is cast to one uniform height ("type high"), which is 1⅛ inch. Individual letters vary in *breadth*, but the "body" of each character is of uniform *depth* throughout the alphabet in each size. The unit of *breadth* is the Pica M (*Em*) 6 of which, side by side, occupy one inch of space. The unit of *depth* is the Point (72 Points = 1 inch), so that 6 lines of 12 Point occupy 1 inch in depth. The names of the various sizes are:—

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 132 lines, and about 1,450 words.

Printing is the art of producing impressions from characters or figures

Diamond (4½ point) is the next size; the column would contain 102 lines, and about 1,020 words.

CORRECTING FOR THE PRESS

Copyright by WILLIAM CLOWES & SONS, LTD., Printers of "WHITAKER'S ALMANACK."

The following extract is set up incorrectly in order to explain the conventional methods of correcting for the Press:—

The process of printing, when compared with that of writing, is unquestionably a ~~dear~~ process; provided a sufficient number of any particular book are printed, so as to temper the proportion of the first expense upon a single copy inconsiderable. If, for example, it were required, even at the present ~~moment~~ time, to print a single copy, or even three copies or four, only of any production, the cost of printing would be greater than the cost of transcribing.

It is when hundreds and especially thousands, of the same work are demanded that the great value of the printing press in making knowledge cheap is particularly shown. It is probable that the first printers did not take off more than two or three hundred, if so many, of their works and, therefore, the earliest printed books must have been still dear, on account of the limited number of their readers. CAXTON, as it appears by a passage in one of his books, was a ~~cautious~~ printer; and required something like an assurance that he should sell enough of any particular book to repay the cost of producing it. In his 'Legends of Saints,' he says, "I have submysed (submitted) myself to translate into English the Saints of Legend,' called 'Legenda aurea' in Latin; and William, Earl of Arundel, sent me a worshipful gentleman, promising that my said lord should, during my life, give and grant to me a yearly fee, that is to note, a buck in summer and a doe in winter.

desired me — and promised to take a reasonable quantity of them — and

1. Is the mark for changing the wrong letter in the word process.
2. To substitute one word for another.
3. and 24. The first is the method of marking a short insertion, the second of marking a long one.
4. To have a space put between the two words.
5. To turn a letter which has been placed upside down.
6. To close the word in which a space has been improperly left.
7. and 8. To take away (*dele*, blot out) a superfluous letter or word.
8. 12, and 22. Different marks for transposing the arrangement of letters, words, or sentences.
10. To have no fresh paragraph.
11. To substitute a comma for a full-point or period.
13. To commence a new paragraph.
14. 19, 21, and 27. To insert points and marks of quotation.
15. To have any particular part printed in Italic.
16. To have words or letters printed in 'lower case,' or small letters; Roman is always understood, unless otherwise directed.
17. To have a word remain, which has been accidentally or erroneously marked. *stet* is the Latin for 'let it stand.'
18. Points out a letter which does not match with the others: a 'wrong fount.'
20 and 23. To have certain parts printed in small or full capitals.
25. To set straight whatever may stand crooked.
26. To remove the unnecessary black mark between the words, which arises from what should form the space not having been pushed down.

HALL MARKS ON PLATE *

ASSAY OFFICE MARKS.—Official marks stamped on gold and silver plate at Assay Offices in the United Kingdom until 1921 and thenceforward in Great Britain.

Assay Office ...	*Distinguishing Mark.*
London (Goldsmiths' Hall)	Leopard's Head (uncrowned from 1300 to 1478–9, when it became crowned until 1821, since when it has been uncrowned). From 1697–1720 this mark was used in London, for gold only and not for silver.
Birmingham ...	Anchor.
Chester	City Arms (3 Garbs and a Sword).
Sheffield	Crown.
Edinburgh.....	Castle.
Glasgow	Tree, Salmon, Bell, Bird and [Ring.
Dublin	Harp crowned.

The Assay Offices at Bristol, Exeter, Newcastle upon Tyne, Norwich and York have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark (instituted in 1478–9).—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the *type of letter* and the *shape of the shield* being changed in cycles of 20, 25 or 26 years. The "year" (at Goldsmiths' Hall) runs from May 20 to May 28. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted; in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "j" is omitted from the alphabet; at Sheffield in the first two cycles, letters were used not alphabetically but arbitrarily, at Glasgow all the letters are employed in a 26-year cycle.

The Standard Mark (originally "*The King's Mark.*")—The "lion passant,"  for silver articles only, was first used in 1544, and has been in use ever since (except during the *Higher Standard* period, 1697–1720). From 1544–9 it was crowned; since then, uncrowned.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784—1889–90. The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On *gold* articles only, of the two higher standards (22 and 18 carats); on the lower standards (14 and 9 carats) the decimal (14·585 and 9·375). It is used on all silver articles in lieu of the lion passant.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697–1720; since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz. 2 dwt. of fine metal to each 18 dwt. of alloy.

Fine Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof.

* For the greater part of the material for this article readers of the ALMANACK are indebted to the late Mr. Wilfrid Cripps (author of "Old English Plate") by whose courtesy also many of the illustrations were provided.

London (Goldsmiths' Hall) Date Marks

From 1438 *to* 1956.

a	Black letter, small ...	1916–7 ,, 1935–6
A	Roman letter, capital	1936–7 ,, 1955–6

An article marked with the letter **F** 1721–2 can be distinguished from letter F 1801–2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1821); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1881–2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801–2); the absence of crown on leopard's head, and the presence of the Queen's *vice* the King's head.

Jubilee Mark on Silver, 1935.

In 1935 permission was granted to celebrate a National Event by a special mark on silver plate. The special mark was applicable to the year 1935; but for the convenience of the trade it was arranged that articles marked during the previous two years could also bear the mark, the marks, as shown above, being (1) Maker's Initials, (2) Standard mark known as the "*Town Mark*," (3) Assay Office mark (Goldsmiths' Hall), (4) Date mark, and (5) Special Silver Jubilee mark.

Imported Plate.

Any gold or silver plate or article manufactured out of Great Britain and Northern Ireland and brought to be assayed, stamped or marked at a British Assay Office must be marked in the manner prescribed by the Order in Council of May 11, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Acorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St. Andrew's Cross; *Glasgow*, double block letter F inverted; *Dublin*, Boujet. For both gold and silver the decimal equivalent is used as the standard mark with the carat in numerals with a decimal equivalent—e.g. 22·916 or 18·750. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

THE PERIODS OF ENGLISH ARCHITECTURE

	Date	*Style*
I.	Before 55 B.C.	Ancient British.
II.	55 B.C. to A.D. 420	Roman Period.
III.	A.D. 449 to Norman Conquest (1066)	Anglo-Saxon.
IV.	1066–1189 (*i.e.* to end 12th cent.)	Norman.
V.	1189–1307 (*i.e.* 13th cent.)	Early English (Lancet, or Geometrical)
VI.	1307–1377 (*i.e.* 14th cent.)	Decorated (or Curvilinear).
VII.	1377–1485 (*i.e.* 15th cent.)	Perpendicular (or Rectilinear).
VIII.	1485–1558 (*i.e.* first half 16th cent.)	Tudor.
IX.	A.D. 1558–1625. Early Renaissance	Elizabeth (A.D. 1558–1603). Jacobean (A.D. 1603–1625).
X.	A.D. 1625–1830. Late Renaissance	Stuart (A.D. 1625–1702). Queen Anne and Georgian (A.D. 1702–1830).
XI.	Modern Architecture (The Age of Revivals) 19th cent.	William IV. (A.D. 1830–1837). Victoria (A.D. 1837–1901).
XII.	Recent Architecture. 20th cent.	Edward VII. (A.D. 1901–1910). George V. (A.D. 1910–1936). Edward VIII. (A.D. 1936). George VI. (A.D. 1936–1952).

This Comparative Table (from "A History of Architecture," by the late Sir Banister Fletcher) shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced.

EQUIVALENT INVESTMENTS

Examples:—To ascertain the yield of Consols at a price of £83 6*s.* 8*d.* look in the column headed 2½ per cent. for 83½, and it will be seen that the yield (column headed Return Per Cent.) is £3 0*s.* 0*d.* Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £189, will yield £3 3*s.* 6*d.* per cent.: while 5 per cent. shares at £152 10*s.* 0*d.* yield £3 5*s.* 7*d.* per cent.

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £36·012, and deduct £1 − £35·012.

LOST PROPERTY IN LONDON

Property Lost on London Transport

Enquiries about property left in London Transport Trains, Buses, Trolleybuses, or Green Line Coaches, should be made at the *Lost Property Office of London Transport*, 200–202 Baker Street, N.W.1. Office hours are 10 a.m. to 6 p.m. from Monday to Friday, and 10 a.m. to 1 p.m. on Saturday. The office is *not open* on Sundays, Good Friday, Christmas Day and Bank Holidays. Enquiries may be made by letter. Articles left in London Transport vehicles in the country area can be claimed at the nearest London Transport Country Garage within 48 hours.

Property Lost in Cabs

Enquiries as to property lost in a taxicab should be made at the *Lost Property Office of the Metropolitan Police District*, 109 Lambeth Road, S.E.1. Office hours are 10 a.m. to 4 p.m. (Saturdays, 10 to 1.) The office is *not open* on Sundays, Good Friday, Christmas Day and Bank Holidays.

THE SECRETARY, THAMES NAUTICAL TRAINING COLLEGE, INGRESS ABBEY, GREENHITHE, KENT.

Trade with the East

From Cyprus and the Lebanon to Japan,
THE CHARTERED BANK
and its wholly-owned subsidiary, The Eastern Bank Limited, link East and West through a system of one hundred branches extending to most centres of commercial importance in the Middle East, South and South-East Asia and the Far East. Those branches provide complete and up-to-date banking services, sustained by wide knowledge and long experience of Eastern trade, finance and industry. In particular an effective credit information service and skilled assistance and advice are available to merchants and manufacturers seeking new business connections in Asian markets.

PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

Appended is a list of the principal bequests for charitable purposes recorded during the year. The list records the principal bequests published during the year and not necessarily those becoming payable during the year. The term residue means the balance of the estate after charges, legacies and duty have been paid.

The estate of Lord Egerton of Tatton, subject to specific bequests, is left for charitable purposes at the discretion of Trustees. This sum estimated at over £1,000,000 is one of the largest gifts recorded for charitable purposes. Over £500,000, under the Will of Miss Gladys Yule, daughter of Sir David Yule, the East India merchant, will benefit Dr. Barnardo's Homes, the Animal Health Trust, selected charities benefiting the deaf and blind, and other charities to be selected by her trustees. The £4,070,550 estate of Miss Yule is one of the largest ever left by a woman in this country, and the yield to the Treasury in death duty was £3,233,454, representing four-fifths of the entire estate, while personal legacies accounted for one-twentieth, and her desire to aid charity dwindled to three-twentieths of her fortune. Other large estates are left for disposal at the discretion of Trustees, and this practice, prevalent in the post-war years, is no doubt explained by the desire of testators that their known wishes should be met as fully as possible after duty has been met.

These large bequests ensure that the total of charitable bequests is well up to the average of other years, and the list shows legacies to the better known charities, church and church missions, aid for the handicapped and orphans, and old people. A bequest for studentships in nuclear physics is a sign of the times. Bequests to hospitals of the residues of £43,294, £18,577 and £50,427 are the first sizeable gifts to such institutions for a number of years.

Lord Bennett of Edgbaston, well-known in industry and public life, left specific charitable bequests, and Sir Winston Churchill's adviser and friend Viscount Cherwell left the residue of his estate for colleges in Oxford. Dr. Venn, President of Queens' College, Cambridge, left over £30,000 for the benefit of that College.

Over £100,000 in various bequests is left to further cancer research and over £16,000 to found studentships " preferably in Nuclear Physics " at the University of Bristol. Societies for the care of animals are prominent in the list and £18,000 under the Will of Mrs. Dorothy Garnsey, of Bournemouth, is left for this purpose. Among other estates not listed the residue of the estate of a Welsh woman is left " especially for the care of cats " and a small bequest to the Royal Society for the Protection of Birds, under a London woman's Will, is left to be used " for the provision of illumination of lighthouses by the Tilley Lamp Co. Ltd."

Old people are remembered in the Wills of Mr. David Fenton, of Westminster, and Mr. Joseph Ewart, a Farnham solicitor, who bequeathed £40,000 and £30,000 respectively to provide homes. Miss Mary Ann Stratford, of Withernsea, left benefits for the Merchant Navy " who never let us down in War ", and bequests to the churches include £30,000 to the Society for the Propagation of the Gospel in Foreign Parts under the Will of Miss Ethel M. Purser, of Sidcup, Kent, £20,000 and a share of the residue for Clergy and their dependants under the Will of Mrs. Elizabeth R. Bramwell, of Wiggonholt near Pulborough, and the residue of the £414,843 estate of Mr. John J. C. Craig, of Belfast, for Presbyterian Church purposes in Ireland.

Mr. George E. Stier, of Sunderland, a lonely bachelor who cared for himself in a small house, where he was found dead, left some £60,000 for charities in Sunderland, the British Red Cross, the Cancer Research Fund and St. Dunstan's.

Name	Gross Value	
Mr. William Henry Bayley, of Kidderminster.	£43,294	Subject to a life interest, the residue to St. Bartholomew's Hospital, London, to provide five beds.
Mrs. Lily Belcher, of Cliftonville, Kent.	£28,081	Subject to a life interest, the residue to the British Empire Cancer Campaign.
Lord Bennett of Edgbaston, of Four Oaks, Warwickshire.	£312,353	Subject to a life interest: £5,000 each to the Birmingham Branch of the National Children's Home and Orphanage, Dr. Barnardo's Homes, the Methodist Foreign Missionary Society, the Salvation Army, Y.M.C.A., Y.W.C.A., and the British Empire Cancer Campaign. £7,500 to the " P.F.B. Hard-Luck Fund, Joseph Lucas (Industries) Ltd.", and the remainder to the Ardencote Charitable Trust.
Mrs. Elizabeth Reid Bramwell, of Wiggonholt near Pulborough, Sussex.	£257,494	£5,000 each to St. Dunstan's, the Distressed Gentlefolks Aid Association and the Friends of the Poor, £10,000 to the Imperial Cancer Research Fund, £20,000 to benefit widows and orphans of Clergy and old or dis-

CHARITABLE APPEALS

THEY STILL NEED YOUR HELP

There are still very many cases of hardship among ex-soldiers and bereaved families. Almost all need immediate financial help. They turn to the benevolent funds of Corps and Regimental Associations, which rely financially on the Army Benevolent Fund—the central fund of all military charities.

Here is one really good cause that deserves all possible support. When charitable bequests are under discussion, please recommend the Army Benevolent Fund to your clients.

Donations and Legacies should be made payable to :—

HOMES FOR
RETIRED CLERGY
AND CLERGY WIDOWS

PENSION GRANTS
FOR CLERGY WIDOWS AND
AGED DEPENDANTS

Manormead Nursing Home, Hindhead, Surrey

AGED CLERGY WIDOWS The Church of England Pensions Board in association with Diocesan Boards of Finance and Central Charities is increasing the eleemosynary side of its work by providing larger pension grants for more clergy widows.

To secure an immediate income of £250 a year for the 1,200 of the older generation of clergy widows who are too old to obtain the Church and State new retirement pensions is the main object of this appeal. Grants up to £75 per annum to elderly poor widows and daughters will cost the Pensions Board £70,000 each year in future.

HOMES FOR RETIRED CLERGYMEN Already ten residential homes including a nursing home for the infirm, 88 flats, cottages and bungalows have been provided by the Board for the retired clergy and for widows of the clergy – they pay all they can afford towards the cost of their board residence or for rent. The cost of building bungalows (plans for 30 more have already been passed) the subsidy for the homes and for nursing services all depend on your help. Please be generous for a few years more.
Send a cheque now or provide for a legacy – payable on your death – and so safeguard the future of this work.

Gifts will be gratefully acknowledged by :

(*continued on page xxii*)

They need more than sympathy!

The blind are full of enthusiasm and hope for the future. They are determined to find self-reliance and to make four senses do the work of five. But they must have the opportunity to *learn* and to become skilled in craft or trade. Teaching the blind is a highly specialised task. It needs instructors, premises, equipment, and it needs *money*. To do this vital job properly — as you would want it done for yourself or your family — *voluntary* help is still essential.

Turn your sympathy into practical help...

by a donation or a bequest in your will

HISTORIC CHURCHES

PRESERVATION TRUST

Patron: **HER MAJESTY THE QUEEN**
President: **H.R.H. THE PRINCE PHILIP, DUKE OF EDINBURGH**
Chairman: **THE ARCHBISHOP OF CANTERBURY**

Will you help to save England's heritage of ancient and beautiful churches? Over 900 churches and chapels have already been helped, but many hundreds still urgently need repair. £100,000 a year must be raised to augment the efforts of the parishes.

LEGACIES, DONATIONS AND SUBSCRIPTIONS
will be gratefully received by the Secretary
HISTORIC CHURCHES PRESERVATION TRUST
FULHAM PALACE, LONDON, S.W.6

Objects of the Trust: The objects of the Trust are declared in the trust deed by which the Trust was set up in 1952 to be: the preservation, repair, maintenance, improvement, upkeep, beautification and reconstruction of churches in the U.K. (which for this purpose includes the Isle of Man and the Channel Islands) and of monuments, fittings, fixtures, stained glass, furniture, ornaments and chattels in such churches and of the churchyard belonging to such churches. "Churches" is defined for this purpose by the trust deed as meaning any Church (including a Cathedral, Abbey, Minster or Priory Church) Chapel or other building used for public worship for the time being, whether belonging to or used by the Church of England or any other body.

APPEALS FOR CANCER RESEARCH

LORD HAILSHAM writes: "The Imperial Cancer Research Fund, which is under the highest medical and scientific direction, is continually engaged in the work of Cancer Research in its own modern laboratories. The work is now to be still further increased in new laboratories at Lincoln's Inn Fields. Very heavy expenditure is involved, and help is urgently needed from generous-hearted people to meet the cost. I hope, therefore, that the appeal may evoke a most generous response."

IMPERIAL CANCER RESEARCH FUND

Wireless sets loaned, installed and kept in repair. Six weekly Social Clubs. A flatlet house in Hackney for women up to the age of 60. Homes at Maldon and Worthing for elderly men and women. Twenty beds are kept at Worthing for the use of recuperative and holiday guests. Organising Secretary: Mrs. E. Perry

THE MISSION TO LEPERS

International Interdenominational

Since its foundation in 1874 the Mission to Lepers has been in the forefront of service to sufferers from leprosy. It co-operates with 56 Christian Societies in their crusade against leprosy, and itself administers a number of Leprosy Homes and Hospitals, in 30 different countries. Legacies, Annual Subscriptions and Donations will be gratefully received.

Full information may be obtained from Headquarters:

7, Bloomsbury Square, London, W.C.1

Fresh fields to conquer . . .

The London Association for the Blind has, for many decades, sought out and experimented with trades which can offer congenial employment to the blind. As a result, it has been responsible for introducing flat machine knitting, machine shop work and, more recently, injection moulding.

Injection Moulding Shop, Pelican House

Thirty years ago the idea of placing a blind person behind a power-driven machine was regarded by others as unwisely venturesome. Today, scepticism can effectively be removed by a visit to the modern workshop pictured above. All the machine operatives are blind, including a woman working on a buffing machine, her fingers close to the whirring wheel !

This is but one of our activities on behalf of the blind of England and Wales, which embrace homes and hostels, residential flats, welfare services and a comprehensive Benevolent and Pensions Fund.

Please send us a donation or remember us in your Will

An illustrated brochure will gladly be sent on request

DEAFNESS
means a lifetime of isolation

THE NATIONAL INSTITUTE FOR THE DEAF strives to alleviate this grievous handicap by every possible means. Its welfare activities are constantly expanding.

The N.I.D. administers residential Homes for deaf and deaf-blind people and a Hostel for deaf working youths near London. More Homes are urgently needed for the aged, lonely deaf; and for young children who suffer from additional physical handicaps.

Practical assistance is given in employment and other personal problems, including those of the deafened ex-serviceman and woman.

Gifts and legacies are earnestly needed to help maintain and extend our work.

CANCER RELIEF APPEAL

The National Society for Cancer Relief is helping thousands of poor persons who have been overtaken by the cancer scourge, and has brought a measure of cheer and comfort into countless homes. Grants, pensions, etc., now total approximately £70,000 a year.

The N.S.C.R. also endeavours to spread established knowledge as to the nature and incidence of cancer, its symptoms and diagnosis, and the measures that can be taken to prevent it, or curtail its activities.

YOU can share the privilege of giving at least a measure of cheer to our huge family of patients. They are of all ages, and are in all parts of the British Isles. A donation of £10 would qualify you for Life Membership in this work of mercy, but every shilling is welcome.

President: THE COUNTESS MOUNTBATTEN OF BURMA, C.I., G.B.E., D.C.V.O.

By Will or Codicil or Covenant...

May we suggest to Legal or Financial Advisers that when questions of their clients' benefactions arise the worthiness of the Royal Air Force Benevolent Fund may be wholeheartedly and deservedly commended.

Briefly, The Royal Air Force Benevolent Fund provides help to R.A.F. personnel disabled while flying or during other service. It assists the widows and dependants of those who lose their lives and helps with the children's education. It gives practical assistance to those suffering on account of sickness and general distress.

The need for help in nowise lessens in peace or war. Our immeasurable gratitude to that "Immortal Few" can hardly cease while memory itself endures.

THE ROYAL AIR FORCE BENEVOLENT FUND

RESIDENTIAL HOMES FOR ELDERLY GENTLEFOLK

Still entirely Dependent on Voluntary Contributions

THE SAILORS' HOME & RED ENSIGN CLUB

Dock Street and Ensign Street, London Docks, E.1

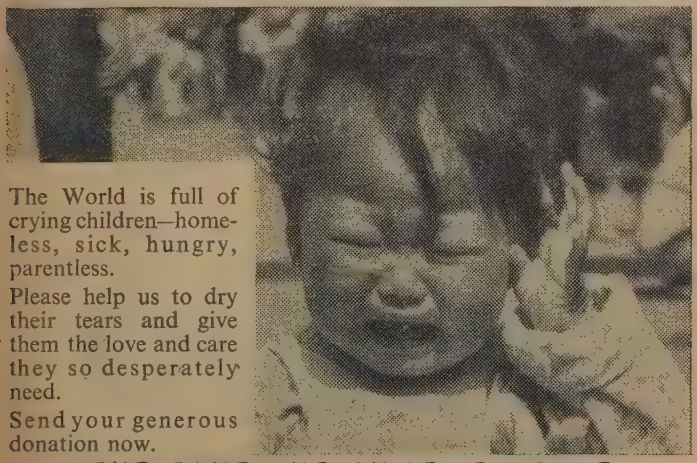
President: Admiral of the Fleet the Earl Mountbatten of Burma, K.G., P.C., G.C.B., G.C.S.I., G.C.I.E., G.C.V.O., D.S.O.

Chairman: Rear-Admiral Sir David Lambert, K.C.B., O.B.E.

This, the parent Sailors' Home, has carried on its unique work for the welfare of Merchant Seaman since 1830, by providing a Residential Club where their temporal, moral and spiritual needs can be met.

Legacies urgently needed to assist in the maintenance and extension of the work, and help is still required for the newly re-built Club, as a worthy and practical memorial to the wartime service of the personnel of the Merchant Service.

REMEMBER ST. DUNSTAN'S



THOUSANDS of war-blinded Servicemen and women have become skilled in a craft or profession thanks to the untiring efforts of St. Dunstan's. More important still, they have learnt the feeling of independence. But St. Dunstan's itself must always be dependent on the support of others, for the cost of their special training and welfare relies entirely on voluntary aid. Will you please remember St. Dunstan's in your will? And if you are in a position of trust, think of St. Dunstan's when discussing legacies?
